The Range That Wakes Up Trade

Many a dealer who thought his trade wouldn't buy a really high-class range has learned better this year; and it's the Imperial Oxford Range that showed him his error.

It's a pretty poor community that won't buy this range, once our selling-help gets to work there and the range itself is somewhere in sight.

There are so many things about an Imperial Oxford that make a woman realize how little price matters if one gets real value.

The Imperial Oxford oven, for instance,—the diffusive flue construction that it's so easy to see must make this range bake with absolute certainty of perfection.

The oven-flue has sold ranges where people had never bought anything but cheap cook stoves.

Doesn't your trade need a tonic as good as this? Wouldn't it make a differance you'd like if we were at work stirring up business for you right now?

We're ready with the selling-help at this end,—the Imperial Oxford is as ready as ever, too, is a better range than it ever was, too,—

Are you about ready to ask questions?

WE also manufacture Cast Iron Stoves and Ranges, Steel Plate Ranges, Gas Stoves and Heaters, Hotel Ranges and Complete Hotel Kitchen Outfits, Warm Air Furnaces and all kinds of cooking and heating apparatus, Plumbers' Supplies.

115

Series No. 518

"FAMOUS" AIR-TIGHT HEATERS

Made in three series, Nos. 185, 518 and 510

"Famous" Air-tight Heaters are made from only the best grades of planished iron, and are carefully put together.

Have anti-rust coated, polished sheet-iron body, heavy sheet steel linings, and cast-iron pipe collar.

The screw-damper for opening or checking the draft is perfectly air-tight when closed, and will shut the stove up so tight that fire can be retained for hours without going out.

These stoves are made in very small and very large sizes, so that a size can be had to suit any sized place.

As shown by the accompanying cut, series 518, have highly polished nickel rails and cast-iron tops, while all lines have ornamental urns.

"Famous" Air-tight Heaters are handsome enough for any house

Merit brings the Dealer Reward

These are prosperous days for "Dillon" dealers. Business is brisk. Custom is satisfactory.

The price of

DILLON HINGE-STAY FENCE

has something to do with it, but the real cause is the merit of the fencing.

THE DILLON is devoid of unessentials, or parts destined to rust, break or come loose.

THE DILLON is easily erected. This is a great talking point in making sales.

Hadn't you better enquire about "THE DILLON"

THE OWEN SOUND WIRE FENCE CO., Limited
OWEN SOUND, ONT.

Sold by { Messrs. Caverhill, Learmont & Co., Montreal. Messrs. Christie Bros. Co., Limited, Winnipeg.

An Exhibition Bargain

All the cases which we built for our exhibit at Toronto Exhibition have been sold with the exception of the one illustrated herewith.

This case is 11 feet long, 8 feet 6 inches high and 12 inches from front to back, fitted with 243 Bennet Steel Shelf Boxes. Size as follows: 20 boxes 3x3, 70 boxes, 6x3, 72 boxes 5x3, 12 boxes 10x3, 12 boxes 15x3, 4 boxes 15x6, 6 boxes 10x6, 35 boxes 6x6, 12 boxes 5x6.

This assortment of boxes has been found very practical and convenient for the Hardware trade.

All the wood in this case is oak, green oak finish. The pulls are nickel. All the boxes are interchangeable thus four boxes 3x3 could be put in place of one 6x6.

There is a very handsome cornice on this case about 8 inches high.

The net price for this case is $140.00, F.O.B., Toronto.

Manufacturers Endorse Mutual Insurance

Convention at Winnipeg Organizes Two Mutual Companies—President C. C. Ballantyne Urges Tariff Reform.

Several hundred members of the Canadian Manufacturers Association attended the convention held at Winnipeg this week, the second gathering to be held in the western metropolis. Following the convention, the majority of the delegates will visit the Pacific Coast and make a hurried trip through all the western provinces.

After addresses of welcome were delivered and replied to, President C. C. Ballantyne delivered his presidential address, making a distinct impression upon the delegates by his pleasing, though forceful manner and by the strength of the arguments presented by him.

President Ballantyne's Address.

Mr. Ballantyne opened with a reference to the large and satisfactory increase in Canada's foreign trade. The total trade was $73,046,000 in excess of 1904-05, the exports increasing $53,270.-000 or some $20,000,000 more than the imports. A gratifying feature was that the imports of British goods had increased more proportionately than imports from the United States. The speaker attributed the exodus of young Canadians to the States to the lack of towns and factories, and the inducements and opportunities they afforded.

"To-day the situation is completely changed," he continued. "We have begun to study our own resources. What do we find? Not only that nature had fitted us to be a great agricultural nation, but that our mines, our forests, our streams and our waterfalls destine us to stand in the front rank of the manufacturing countries of the world; that here, within our own borders, we have all the raw materials for the world's great industries, the necessary industrial opportunities for all our sons and daughters, and the greatest and best market for the products of our farms. Our neighbors to the south have recognized this even sooner than we ourselves. To-day they are returning to us our own.

"It is for us to say whether we will continue to purchase our manufactured goods in the United States, or put just a little more tariff on certain lines, and make the factories in the States build plants in Winnipeg, Saskatoon, Moose Jaw, Calgary, Medicine Hat, Regina, Edmonton or any other of the many centres in our great western prairies which have advantages to offer, and by this means keep the population we are getting. Last year our dutiable imports from the United States amounted to $94,200,167, the large percentage of which was manufactured goods, and might just as well have been made in Canada. As it is, the United States farmers, workmen, manufacturers and other citizens have just that much of our money that should have been kept at home.

The Fiscal Policy.

"It must be a matter of gratification to all patriotic Canadians that the fiscal policy has ceased to be a matter of partisan controversy. The leading politicians of both political parties now recognize the necessity of protecting Canadian industries of all kinds, and we may hope that when the members of our Dominion Parliament are called together in November to consider the revision of the tariff they will set aside all old prejudices and look at the question from the broad standpoint of Canadian interests, that they will consider what policy will best develop the varied resources of our country, give profitable employment to all classes of our people, and maintnin and advance the prosperity that now exists.

C. C. BALLANTYNE, of the Sherwin-Williams Co., Montreal, Retiring President of the Canadian Manufacturers' Association.

"We are sometimes asked what we mean when we say Canadian manufacturers do not demand a prohibitive tariff against the United Kingdom, but that we must at least have sufficient protection to put our Canadian manufacturers on an equivalent footing with those of Great Britain. Perhaps our meaning may be better understood when I cite the case of one of the members of our association who had large factories in Montreal and London, England. The difference in the wages paid in these two great factories of England and Canada is remarkable. Figures taken from the pay rolls, and strictly accurate, show that common labor is 82 per cent. higher in Canada than in England, gang leader or sub-foreman 70 per cent. higher, boys (16 to 18) 85 per cent. higher, machinists 64 per cent. higher, carpenters 40 per cent. higher, girls (by the hour) 33 1-3 per cent. higher, and girls (piece work) 66 2-3 per cent. higher.

"Are not these figures alone sufficient to show the necessity of maintaining an equalizing tariff against British goods? But if, while giving our manufacturers fair play in competition with British manufacturers, we make our tariff so high against all foreign countries that our surplus requirements, above what our own factories can supply, will be obtained from British manufacturers, a vast amount of money which now goes to enrich foreign nations will be turned into the pockets of British manufacturers and their workingmen."

Western Possibilities.

Mr. Ballantyne referred to a memorial presented by the Medicine Hat Board of Trade to the Dominion Tariff Commission to the effect that if the tariff were high enough to shut out the great influx of American goods, many United States manufacturers would start branch factories in Medicine Hat. The latter would not be the only town in the west to benefit by this policy. The possibilities of Winnipeg it would be difficult to exaggerate.

"To accomplish this," the president proceeded, "we want a strong Canadian policy that will benefit both east and west. What action the Government will take at the coming session of Parliament we cannot say, but we believe that the Government will give us the best and strongest Canadian tariff that we have ever had, and one that will give thorough protection to every Canadian industry."

Flaxseed was referred to as an article of great importance to the farmers of the west, but owing to its being on the free list was not produced to any great extent. The United States farmer produced 29,000,000 bushels of flaxseed during the last fiscal year, compared to a little over half a million bushels in Manitoba and the Northwest Territories which are better adapted for its growth than any country in the world. Canadian flaxseed was shut out of the American market on account of a duty of 25 cents per bushel. Under these circumstances he asked: "Why do not our Canadian farmers ask our Government to place a duty on flax entering Canada and thus give them the home market which they are justly entitled to? There

is from a million and a half to two million bushels of flaxseed consumed in Canada annually by our Canadian linseed oil crushers, and why should a million bushels or more of foreign seed be used instead of buying 'Grown in Canada' flaxseed, and grown right here in the west, the best that can be produced?

Provincial Taxes.

President Ballantyne entered a strong protest against the growing tendency among the provinces to impose commercial travelers' taxes and commercial corporation registration fees. He believed this to be a wrong and a short-sighted policy, and thought that steps should be taken to harmonize "the trade legislation in the different parts of the country and make an end of the senseless discrimination of one province against another."

In conclusion, President Ballantyne delivered a splendid peroration alluding to the proud destiny awaiting Canada. He said: "It seems but yesterday that we were a comparatively unknown people; to-day the name of Canada is on the lips of every country in the world, and thousands are hurrying to our shores to find new homes on our great prairies or in our busy towns and cities.

"We are gathered at the gate-way of the greatest wheat-producing area in the world. West of us 171,000,000 acres of arable farm lands are waiting for the plough. Of this immense territory only about 4 per cent. is as yet under cultivation. If we cultivate only one-quarter of it our granaries will contain more than four times the requirements of Great Britain, the world's greatest market.

Canada's Varied Resources.

"Resources of every kind are at our hand. The mines, the forests, the seas, the farms and factories of Canada are all beckoning labor and enterprise from every part of the globe, offering not only healthy conditions and comfortable homes, but a citizenship which, in the freedom of its thought and institutions, is as broad and free as our great dominions themselves.

"Great as these resources are, they are all enhanced by our splendid position in the empire and the world of commerce. Nature has destined us to be a great producing country. Let us not forget that we possess the shortest routes to Great Britain on the east and the Orient on the west. We lie between the east and the west. We hold the strategic position in time of war, and we will hold the commercial supremacy in the time of peace. In the great Imperial preferential movement to which we are moving on, and in the commerce of the world, Canada must play an important part, and the life of this great association must be woven into her development from year to year.

"What a great task; what greater opportunities! To develop all our industries hand in hand, to cultivate and maintain a national co-operation between our now scattered provinces, to weld and strengthen the bonds which bind us to the other portions of the Empire, and all the while to keep pure and healthful our moral and political life. If we are faithful to the trust imposed in us we need have no fear of the future."

Mutual Insurance Endorsed.

The mutual insurance committee's report was particularly interesting. The action taken in adopting it and choosing provisional directors for the two companies to be organized was probably the most important work of the whole convention.

Two losses during the year amounting to $24,552 were reported to have been adjusted. Policies were examined and risks inspected for 145 members, affecting an aggregate insurance of $10,771,994.

"It is almost impossible," the report said, "to present a statement that will convey an intelligible appreciation of the results of the work thus outlined, so much of it being intangible and difficult to place under any given heading, but in so far as a record is possible it may be thus summarized:

"(1) 146 insurances arranged and new schedules printed.

"(2) Direct annual saving in insurance premiums of $17,904.91, through improving risks or rearranging business.

"The committee think it well to record as a matter of interest that of the 271 members dealt with since February 1, 1905, having insurance in force to the extent of $20,457,788, losses have been sustained by three members involving a gross loss payment by the insurance companies of less than $1,500, and of these only one necessitated the services of the department in its adjustment. We have represented six other members in adjustments, but in none of these interests had the insurances of the members received prior attention. It is necessary to mention this division to explain a seeming inconsistency in the record of losses adjusted as previously given.

"The very trifling losses sustained by the 271 members whose business has passed under the supervision of the department is a remarkable showing, but it can only be accepted as an incident worthy of note rather than an experience from which definite conclusions may be safely reached.

"If the facts point to any conclusion at all it is in emphasizing the belief prevalent amongst manufacturers in Canada that the losses sustained by them in recent years do not warrant the high rates they are charged. Statistics are not available to make this belief an absolute certainty; the fire insurance companies themselves are the only source from which such figures can possibly be obtained, and, as they have never yet supported the contention so often repeated that 'Your class of risk does not pay' by the production of any confirmatory evidence of actual results, we can only accept the best evidence obtainable and form our opinion and judgment accordingly."

The failures of negotiations with the Fire Underwriters for permission to place risks with independent companies was recorded, and the necessity of ceasing to do a brokerage business with tariff companies pointed out.

Two Mutual Companies.

The report then referred to the executive council deciding to establish two mutual companies for the underwriting of risks in the senior and junior mutuals and of sub-standard risks on the lines of companies forming the National Association of Factory Mutuals.

In reply to communications to members 301 return agreements duly signed promising definite support to the proposed companies in sums varying from $1,000 to $100,000.

Thirty-four write approving the formation of the companies, and promising full support when organized if conditions are satisfactory.

Seven write discouraging the formation of the proposed companies.

"The 301 members sending definite agreements promise an aggregate insurance in each of the two companies of $2,371,000, of which about $1,250,000 will be available at the outset. Adding support from the members who have written, but who have not signed definite agreements, it is quite apparent that the two proposed companies will have at inception a minimum available insurance of at least $1,500,000 in each company, or three times the sum upon which it was thought the companies might safely commence operations.

"The insurance committee, after an experience of 18 months, unhesitatingly declares that the department is a valuable, if not necessary, addition to the services the association is in so many ways rendering to the members. The record of the work performed by the department, as shown herein, leaves no room for doubt but that each succeeding year will demonstrate its advantages to an increasing number of the members. It will be borne in mind that much expense has been incurred and time occupied in the investigations that have ultimately resulted in the development of mutual insurance plans, and with the time that will now be available to the manager it is reasonable to expect that increased activity will follow in directions to which only limited time has been given in the past.

"The committee, therefore, recommended that this meeting approve the continuance of the insurance department under plans to be approved by the executive council from time to time, and that the finance committee be authorized to provide whatever deficiency may arise in the expenses over the revenue of the department under such limits and restrictions as it may deem advisable.

"The revenue of the department for the year has fallen short of the expenses of the same period by $873.19."

Changes in Law Wanted.

It was recommended that the association ask for a change in the Insurance Act of Canada, to provide for:

(1) The incorporation and licensing of mutual fire insurance companies.

(2) The adoption of a paid, definite, and invariable standard insurance policy, protecting both the interests of the insurer and insured.

(3) The rejection of the aggregate liability assumed by fire insurance companies in cities and towns, so that in the event of large conflagrations the amount of such aggregate liability may be within the resources of the company to discharge.

The membership of the association was reported at 2,104, as compared with 1,839 last year. Of this total 1,257 were in Ontario.

P. H. Burton was named as chairman of the Toronto company and J. H. Burland chairman of the Montreal company.

RETAIL HARDWARE ASSOCIATION NEWS

Official news of the Ontario and Western Canada Associations will be published in this department. All correspondence regarding association matters should be sent to the secretaries. If for publication send to the Editor of Hardware and Metal, Toronto.

Auditors—J. W. Peacock and C. F. Moorhouse, Toronto.

ELIMINATING UNFAIR COMPETITION.

An address by Grant W. Porter before the Illinois Retail Hardware Association

I don't believe that there is a man in this whole assembly with a perfect character, or that there is any one here but who at some time or another has transgressed or selfishly usurped the rights of others to a greater or less degree. However, it is not necessary to attain perfection to conceive it. Therefore I am speaking as one aggressor to another upon this subject of unfair competition, which, if modified or eliminated, will be beneficial to us all.

No doubt there are a great variety of opinions as to just what unfair and disastrous competition is. Some of us would define as "unfair" that which others would call shrewd business tactics; and certain business methods would be alternately commended and condemned by the number of this association. But it seems to me that the meat of the whole question, stripped of its technical coloring, is motive. Motive seems to be capable of modifying or intensely changing the effect, good or bad, of any act born out of it.

Good done with a purpose is much more beneficial and effective than a favor accidentally rendered, and an act committed through an evil purpose or motive is proportionately worse in its effect than the same act unintentionally done.

My conception of fair competition is that when business is obtained in a legitimate profit through the environment, social standing or business ability of the dealer or his representative. Therefore, I would define as unfair and disastrous to all parties concerned, any aggressive competition which does not get business at a profit, and also, profit or no profit, where business is obtained by defaming the character of your neighboring dealer. We are all in business for the same purpose or motive. And that purpose is just and beneficial not only to ourselves but incidentally to the community in which we live. Because institutions are necessary to the existence and welfare of any community; and a business institution which does not show a profit is transitory and unsafe, and an unsafe institution is a menace and an infection to the community in which it exists.

Profit Necessary.

Our trade expects to pay and we are entitled to receive a legitimate profit, and unless we can show at the end of each year a satisfactory increase in our assets, we become discouraged and sad, apprehensive of conditions even worse than at present, and unfit to cope with the ordinary obstructions which baffle us at every turn and determine to a large degree our final failure or success.

Now, if we believe we are entitled to a profit, we have a right and are bound to grant and demand that our neighbor have and maintain the same privilege. If he is entitled to a profit on his merchandise, we are morally bound not to deprive him of it by selling his customers their goods at cost, and he is morally obliged to reciprocate, to the mutual benefit of both.

Business obtained by giving the profit to your customer, because of trade jealousy, puts the dealer in much the same light as the dog with a bone in his mouth looking into the stream. He drops the bone and grabs for its shadow, and when too late realizes what his jealousy has cost him.

Which is the more businesslike proposition—to work hard and give your profits away, because you want to down your competitor; or, sell your goods at a profit and let your competitor have a share of the business? To me it is an acknowledgement of defeat and inferior business ability for a dealer to give his goods away to get business. Don't sell goods with a club; use your brains. Cultivate that experience and ability which enable a man to satisfy his customer and sell his goods at a profit at the same time.

When unfair competition exists there is only one remedy for abolishing it. You must organize the business methods and moral tendencies of dealers' increase.

Each must realize that the yoke which he has helped to place around his own neck is fastened to a load not worth the hauling. Each must be made to see that all he can do is to back up and pull his head out from behind—he never can get his body through—then leave his load in the mire, and forget about it. Pick up your original motive as a business man, the one which you so entirely forgot in your desire to inflict an injury on your fellow dealers, and carry it to the end. The rank words of hate must be uprooted and the spot sterilized by common sense and fair-mindedness.

Local Associations.

The principal benefit to be derived from our local association is the sterilized effect it has upon this rank growth. But, gentlemen, if you keep fertilizing at the same time, you can never kill it off. Don't think that because you joined the association that you are converted. Don't think that because you can grasp in friendship the hand of a dealer miles from you—a dealer whom you never knew as a competitor—that you are out of the rut. No, sir! Not until you can walk into your competitor's store across the street with a "Good morning, John," and mean it.

Mere membership in our association means nothing unless we are men enough to bury our differences. Each must make up his mind to do something and to lay upon the sacrificial altar some of his selfishness. Usually it costs a man something, in dollars and cents, or nervous energy, to do the right thing; but here is a proposition that usually pays a man in coin to be fair, and it costs him money to be unfair.

Every year millions of dollars in profits are strewn broadcast by business men because they desire to be unfair to their competitors. Are we so desirous for the enmity of our fellow-dealers that we are willing to pay for it? Are we to continue to sell goods through malice or are we going to sell for a legitimate profit?

Free Trade With a Vengeance.

The other day a customer came to my store and said to me: "Mr. Porter, I have a furnace to be repaired, out of your district, so I am going to do the work myself; But I want you to give me an order downtown, so that I can buy the repairs that I need at your price." I said, "Do you think that would be fair? What do you suppose I I would think of a dealer on the north side who would grant what you ask, to fix a furnace in my locality? Do you suppose, if I knew it, I would have the same regard for his welfare as before? I am sorry that you ask it, and I must absolutely refuse."

That would be free trade with a vengeance. If a man steals a purse from the pocket of another and gives it to a friend, does that mitigate the theft? If we deprive our competitor of his profit simply to make a sale, we are moral robbers. I have just one new thought and can embody it in three lines — the great commercial trinity:

Justice to our customer.
Justice to our competitor.
Justice to our firm.

AN INTERESTING TALK.

"An evil that our association will have to combat soon," said a prominent Ontario retailer the other day, "is the sale of goods to private customers by jobbers. In many cases architects work in with the jobbers and appear to get a percentage on the business they turn over. Anyway, private parties building houses get their hardware direct from the jobbers, the architect arranging that

they can go to the warehouse and select the styles desired. Then the nails are thrown in along with the hardware. This is unfair competition of the worst kind."

"Another matter which should be complained about is the actions of jobbers travelers in coaxing corner groceries in the suburbs to stock up with a keg or two of nails, hoping that a larger order for other goods will follow. In many cases, too, a paint card will be put in a grocer's window, the grocer not carrying any stock at all, but being told by the traveler that any quantity can be secured by telephoning the wholesale whenever an order is landed. We cannot object to jobbers selling to anyone establishing a straight hardware store, but we have a right to expect that the jobbers will protect us from competition from men in other lines who merely use hardware, enamelware or paints as baits to draw trade to their store.

"The jobbers must stand by the retail trade if they expect to continue in business," he continued, "and we in return should stand by the wholesale trade instead of buying so much from manufacturers. The jobbers are losing trade to the manufacturers every day and if present conditions continue the number of jobbers must inevitably grow less. The Retail Hardware Association has been organized none too soon if the hardware trade is to be continued in old established channels. I know some traveling salesmen are knocking the retail association, but they will soon see that the Retail Hardware Association will be the salvation of the jobbing trade if it is properly supported and handled. The Wholesale Hardware Association

J. R. BAXTER

of Baxter, Paterson & Co.,
Manufacturers' Agents, Montreal.

has been a good thing for the jobbers and our association can be made of equal value to the retail trade if we keep on growing as we have done since we organized last Spring."

ASSOCIATION KINSHIP.

That the efforts of self-seeking politicians in building up walls of racial hatred can be nullified by trade organizations is well proven by the following interesting letter forwarded by Mr. Lariviere, of Montreal, who made so many friends amongst his English-speaking fellow hardware dealers at the recent convention in Toronto. Mr. Lariviere came prejudiced—he went away one of ourselves and all who met him look forward to meeting him again at future trade gatherings. He writes:

"Permit me to offer you my sincere thanks for the notes you have made in my favor in the report of the convention of the Ontario retail hardware dealers.

"I feel exceedingly pleased with my visit and my acquaintanceship with my cousins in Ontario. I was a little prejudiced, this opinion having been formed by what I had read in the Ontario papers, specially the News; for in reading your Toronto papers, we would presume that anything that is French (even French-Canadian) is not worthy of consideration.

"I am pleased to say, however, that in knowing one another better this opinion is quickly corrected and we feel at home amongst the hardware dealers of Ontario just as well as in our city of Montreal. I really do not think I have deserved all you have said of me in your valuable article. Surely I never expected such a long report and so accurate and well-made as you have succeeded in writing.

"I again offer my sincere thanks for the courtesy you and the other members of the association have shown me during my stay amongst you and hope to have the occasion of meeting them all soon. With my best regard, believe me, dear Sir,

FRED C. LARIVIERE.

Montreal, Sept. 14, 1906.

ENTERPRISING AGENCY FIRM.

St. Antoine street, Montreal, which is rapidly assuming a leading place in the wholesale section, has been selected as the location for their offices and warehouse by Baxter, Paterson & Co., the enterprising firm of manufacturers' agents, who have succeeded in securing numerous excellent agencies. As the result of a three months business trip in England, Scotland, and the continent, they have been appointed sole Canadian representatives for Geo. Angus & Co., manufacturers of leather and Balata belting; Walter Macfarlane & Co., Saracen Foundry, Glasgow, manufacturers of ornamental castings and soil pipe; William Bain & Co., fencing manufacturers; Cundall Gas Engine Co., England, and numerous others. They have also made special arrangements with the Nicholson File Co., Port Hope, to manufacture for them the highest grade file, branded "B.P." Thus Baxter, Paterson & Co. will be able to sell all kinds of machinery, engines, fire appliances, and engineering and mill supplies.

Baxter, Paterson & Co. have gone about the organization of their business in a logical manner, and they are fully entitled to success. J. R. Baxter was born in Scotland twenty-eight years ago and received an English education in theoretical and practical engineering. For the past four years he has been in Canada, making a special study of commercial conditions here. During this time he has been connected with a number of prominent Montreal firms in the business, and is well known both in business and social life. Mr. Baxter will have charge of the practical and selling end of the business.

Wm. Paterson, the other active member of the firm, is twenty-nine years of age. He was born at Bathgate, Scotland, and received his early education in the academy of that place. Mr. Paterson has also been connected with the practical side of engineering, his ex-

of Baxter, Paterson & Co.,
Manufacturers' Agents, Montreal.

perience, which extends over ten years, having been gained in Glasgow and Montreal, during which time he acquired a thorough knowledge of office management. In Montreal he was for a number of years engaged with B. & S. H. Thompson & Co. He will assume the office management, and will look after the financial end of the business.

Baxter, Paterson & Co. have secured fine premises at 102 St. Antoine street, Montreal. They will have a frontage of 65 feet on that street and 25 feet on Cathedral street. Three floors and a basement will be at their disposal, for storage and display purposes.

FOUNDRY FOR SYDNEY.

Some business men of Sydney, C.B., have organized a company to establish a foundry there. The company will be capitalized at $20,000 of which $8,000 is already subscribed.

PRACTICAL PHILOSOPHY.

When the outlook is not good, try the uplook.

Have the courage to appear poor and you disarm poverty of its sharpest sting.

If a man expects and believes great things of himself, it makes no odds where you put him.

The man who has lived longest is not the man who has counted most years, but he who has enjoyed life most.

If a man were to place himself in an attitude to bear manfully the greatest evil that could be inflicted on him, he would suddenly find that there was no evil to bear.

HARDWARE TRADE GOSSIP

Quebec.

Barrette & Godbout, electricians, have registered at Quebec.

E. Prouix, Montreal, has taken over the plumbing business of Prouix & Paquin.

R. B. Cherry, of Sargeant & Co., New York, was in Montreal on business a few days ago.

K. Monahan, general merchant, St. Lin, visited some of the Montreal jobbers this week.

Frank H. Scott, manufacturers' agent, Montreal, paid a brief business trip to Toronto recently.

Chas. Langley Evans, of the Massey-Harris Co., Brantford, is visiting in Montreal this week.

R. H. Crawford, contractor and builder, Huntingdon, was a visitor among the Montreal trade this week.

A. E. Kemp, of the Kemp Manufacturing Company, Toronto, visited Montreal on business this week.

Mr. Plumb, of the Eagle Lock Company, Terryville, Conn., called on the Montreal trade this week.

The annual meeting of the Allis-Chalmers-Bullock Company, Montreal, was held in that city on Wednesday.

D. A. McKay has accepted the position of traveler for Baxter, Paterson & Co., manufacturers' agents, Montreal.

W. T. Hampton, Montreal representative of Edgar Allen Steel, will sail for England on the "Empress of Ireland."

His numerous friends in the trade will be glad to learn that J. H. Bell, of Mattawa, is steadily improving in health.

H. W. Aird, secretary of the Canada Paint Co., Montreal, represented his company at the C.M.A. convention at Winnipeg.

Mr. Bissonette, of Bissonette & Freres, general merchants, St. Sebastien, was in Montreal on business during the past few days.

R. J. Younge, general sales manager of the Canadian Rubber Company, Montreal, is attending the C.M.A. convention in Winnipeg.

Sam Brewer, secretary of Thos. Robertson & Co., Montreal, has returned to his desk after a pleasant vacation spent at Point au Chene.

E. K. Watson, of the E. K. Watson Co., manufacturers' agents, Montreal, is in Winnipeg, and will be absent in the west for some weeks.

J. B. Campbell, of the Acme Can Works, Montreal, left last week to attend the convention of Canadian manufacturers at Winnipeg.

J. M. Curry, secretary-treasurer of Rhodes, Curry & Co., Amherst, N.S., was a caller at the Montreal office of Hardware and Metal on Monday.

The Sayer Electric Company, Montreal, has opened a branch on St. Lawrence street, for the convenience of their customers in the north-east section.

Hardwaremen were well represented at the Methodist conference in Montreal. Among others, M. S. Madole of Napanee and W. W. Chown of Belleville were noticed.

C. F. Comer, hardware merchant, Calgary, who is at present in Toronto attending the Sovereign Grand Lodge of Oddfellows is expected in Montreal on Monday.

Quinlan & Robertson, Montreal, are the lowest tenderers for the lock and dam to be constructed at St. Andrew's Rapids near Winnipeg, at a cost of about $500,000.

During the Ottawa exhibition, Caverhill, Learmont & Co. opened a sample room on Sparks street, where J. H. Meikle was assisted by J. R. Terrill, W. A. Woods and J. R. MacKay.

A. W. Humphries, Parkhill, president of the Ontario Hardware and Stove Dealers' Association, was another of the lay delegates to attend the Methodist conference at Montreal this week.

Among the hardwaremen noticed in Montreal by Hardware and Metal during the week, were: J. A. Paquin, St. Eustache, V. Leger, Valleyfield; C. Labelle, Three Rivers, and G. Gelinas, Sorel.

Mr. Hymmen, son of Peter Hymmen, hardware dealer, Berlin, Ont., spent a short time in Montreal this week. Mr. Hymmen was accompanied by his mother, and is taking the Quebec and Saguenay trip.

J. W. Smith, of the Smith & Ferguson Co., hardware merchants, Regina, Sask., spent the week in Montreal as a delegate to the Methodist general conference. Mr. Smith made the trip by water from Port Arthur and on the return journey will visit relatives in Toronto and Waterloo, Ont.

Ontario.

W. N. Lemon, painter, Kingston, has assigned.

James Lunny, iron founder, Hintonburg, has assigned.

W. G. Davis, plumber, Sarnia, has sold out to T. F. Clark.

B. D. Labar, blacksmith, Essex, has sold out to Arthur Wagner.

John Douglas, Wroxeter, was a visitor in Toronto during the week.

W. J. Clark, electrical supplies, Stratford, is going out of business.

C. J. Werner, Dunnville, has sold out his stove and tinware business.

H. E. Moore, Oakville, called on the Toronto jobbers a few days ago.

P. T. Barry & Sons, Wallaceburg, have sold out their hardware business.

G. Wells, of Wells & Wells, Dresden, called on Toronto jobbers recently.

Mr. Telford, Jr., Markdale, called on Toronto hardware jobbers this week.

N. L. Stewart, manager of the Guelph Stove Co., was in Toronto during the week.

John Penfold, Jr., Guelph, was a visiting hardwareman in Toronto this week.

W. A. Mitchell, hardware dealer, Kingston, was in Toronto during the week.

Mr. Peaker, of Peaker & Son, Brampton, spent a few days in Toronto during the week.

A. R. Garland, hardware dealer, Portage La Prairie, Man., spent a few days in Toronto this week.

Archie Black, who has been for fifteen years with A. Westman, hardware dealer, London, has severed his connection.

T. L. Moffat, of the Moffat Stove Company, Weston, is on a trip to the west with the Manufacturers' Association.

John Hillhouse, Clifford, called on hardware jobbers in Toronto this week, coming down with the Oddfellows throng.

I. N. Wait, hardware merchant, Picton, was a buyer in Toronto during the week, besides taking in the Oddfellows' convention.

Geo. F. Bradley, of the hardware firm of Bradley Bros., Hamilton, was married Tuesday evening to Miss Marguerite W. L. Hutton.

W. J. McMurtry, St. Thomas, was one of the thousands who thronged Toronto during the Oddfellows' convention during the past week.

J. E. Thomas, of the Taylor & Son Hardware Co., St. Thomas, has gone to New Liskeard, where he will be employed with the same firm.

Elliot Weston, ledger keeper for the McClary Manufacturing Company, London, has been absent from the office on sick leave during the past week.

C. M. Cutts, of C. M. Cutts & Co., hardware dealers, Toronto Junction, was married on Thursday last to Miss Elsie Norman, of Schomberg, Ont.

Moser & Son, Blyth, have sold their hardware business to McPherson Bros., of London. Will Moser expects to take a position as traveler in the west.

A report that another wholesale hardware house is to be established in Toronto by the former manager of an existing house cannot be confirmed and does not seem to have any foundation in fact.

W. H. Meredith, traveling representative of the Monarch Brass Manufacturing Company, Toronto and Port Colborne, returned on Monday from a two months trip through Western Canada and to the Pacific coast in the interest of his firm. Mr. Meredith reports trade excellent, especially for what was practically new ground.

L. L. Anthes, of the Toronto Foundry Company, C. C. Ballantyne, of the Sherwin-Williams Company, Montreal, C. Dolph, of the Metal Shingle & Siding Company, Preston, H. T. Hunter, of Hardware and Metal, Toronto, and W. K. George, of the Standard Silver Company, Toronto, were included in the list of delegates to the Canadian Manufacturers' Association convention at Winnipeg this week.

Maritime Provinces.

Willard K. Nelson has sold out his tinsmithing business at Truro to Stanley Roddick.

Business Management

By HOWARD R. WELLINGTON.

The Seventh in a Series of Articles on a Subject of Interest to Every Retailer.

PURCHASE INVOICES.

IF it is desired to keep account of goods purchased for different departments of a store, for instance a general store, a book (B) may be kept extending the amount of purchase for each department into a column for this purpose, the total of which is posted in one amount at the end of the month to the debit of merchandise account, and the party from whom the goods were purchased is credited (see Fig. A). When the account is paid a notation to this effect is made in the column for the purpose, the voucher is attached to the invoices and filed for future reference.

To insure the saving of all cash discounts, if the retailer is in a position to take advantage of discounts allowed for short terms, the creditors should be notified to make drafts when the account becomes due. In this way the dealer is free from any anxiety in this regard.

If it is convenient to pay by draft, or if the retailer prefers to pay by cheque or money order, the statements may be arranged according to "due dates" and settlements made accordingly.

Having now covered the ground fairly well so far as recording the daily transactions of the merchant, it is proposed to devote the next three articles to closing the books, introducing the results of the business for a period, together with the trading account, profit and loss account, and statement of the condition of the business at the present time.

FIG. C.

Results of the Business.

We will suppose that during the period merchandise has been bought to the amount of $15,000 and goods have been sold to the amount of $18,000, and that the value of the stock on hand at present, taken at cost price, is

$4,500. The merchandise account will then appear as in Fig. B.

Rule.—Add to the stock on hand when commencing business, the purchases for the period less any allowances ; deduct the total thus obtained from the total of the sales for the period, less any allowances, plus the stock on hand at the end of the time.

The difference thus obtained will be the gross profit on the business done outside of any expenses. (The trading account will be shown later.)

We will suppose that the cash on hand, when closing the books, amounts to $50.50, which would be the amount of the debit of "cash" accounts in the ledger.

During the period various articles, such as hammers, harness, etc., also a wagon, to the amount of $150, have been added to the general equipment, making the total amount at the debit of this account now $750.

No additions have been made to the real estate so that this account stands as formerly with a debit of $3,000.

The expense for the period has been $2,550, and there

Note—J. Simpson, due July 20, '06..... $50.00
" S. Jones, due Aug. 15, '06..... 30.00
" J. Jenkins, due Nov. 20, '06..... 150.00
" S. Brown, due Sept. 5, '06..... 28.00
" C. Clear, due Oct. 20, '06..... 30.00

The notes on hand not due at commencing business all being paid. The account would now appear as follows:—

As the various notes are paid amounts will be posted from the cash book to the credit of bills receiveable account until eventually all notes are paid, when the account will balance. At the end of the period we find that the following customers still owe the amounts set opposite their names respectively, viz :—

J. Jones ..... $ 30.00
T. Brown 50.00
S. Best 100.00
W. West 20.00

In addition new accounts have been opened with :—

S. Thomas ..... $ 30.00
T. Simpson 25.00

June	1	" J. Jenkins 20/11/06 -	150	00					
June	6	" S. Brown. 5/9/06 -	28	00					
June	1	" C. Clear. 20/10/06 -	30	00					

is at present on hand the following : Coal, $20 ; wood, $20 ; also insurance paid in advance, $100. There is also due, but not yet paid, taxes amounting to $30.

The expense account would now appear as in Fig. C.

The amount due by us on account of expenses not yet paid is brought down as a liability, and the amount which represents stock of coal, etc., or items prepaid, is brought down as an asset.

Referring to the expense account (Figure C) last chapter it will be noticed that the items prepaid, or stock on hand which has originally been charged, are credited to account and brought down as a debit in the next year's business ; similarly, the due and unpaid items are debited to the account and brought down as a credit. In the first instance the amount being credited reduced the expenditure for the year and when brought down is an asset, and in the second instance the amount being debited increases the expenditure and when brought down is a liability.

Bills Receivable account has been added to as follows :—

Also, we owe the following creditors :—

T. Thomas $100.00
S. Reter 30.00
R. Ramsay 15.00

In addition purchases have been made from

T. Little $100.00
J. Jackson 27.50

The amount owing the bank under discount has been reduced from $2,000.00 to $1,800.00.

Bills payable account shows that all notes outstanding have been provided for when due and only one acceptance has been given which is not yet due, viz :—T. B. Scott, $200.00, due Dec. 15, '06.

The bills payable account will appear in the same manner as bills receivable account in above cut with the exception that the payments will be recorded on the debit side and the note not yet due will appear as a liability on the credit side.

When this acceptance has been paid, bills payable account will be charged in the cash book and the amount posted to the debit of bills payable account in the ledger.

FISH AND GAME PROTECTION.

A valuable and public spirited work is being done for all sections of the community by the Ontario Fish and Game Protective Association, of which Mr. A. Kelly Evans, of Toronto, is founder and secretary. To the hardware and grocery trades, however, the work is of particular interest, and where local associations are formed merchants can well afford to help along the movement to the extent of active membership at least. The platform of the association deals with many important interests and is worthy of considerable study.

(a). That game, fish and game, through the attraction they form to tourists are a most valuable financial asset to the province and that therefore their protection should be encouraged.

(b). That the food fish in our waters should be conserved and regulated for the good of the masses of the people and not wasted or used for the benefit of one small class of the community.

(c). That certain game birds and song and insectivorous birds are an immensely valuable friend to the farmer in destroying harmful insects, weed seeds, rodents, etc., and the lack of knowledge by the public on such subjects should be combatted steadily.

(d). That the wild lands of the province suitable to game and the waters suitable to game fish should be ever kept the property of the public and that the association must always endeavor to prevent the acquisition by individuals or groups of individuals of large tracts of territory for the purposes of forming private game preserves.

(e). That the association should have no connection with politics or any political party.

Canada is favored in having splendid hunting grounds and fishing waters, and by wise regulation the supply of game and fish can be kept up and the tourist trade developed to a much greater extent that at present. In this tourist trade there is profit not only for the supply merchants in the larger cities, but also for the local merchants in the lake districts. One Toronto grocer issues an extensive catalogue and makes a large annual profit on its trade with campers, hunters and fishermen, while several Toronto handware and sporting goods dealers find their trade in fishing tackle and shooting materials one of the best paying branches of their business.

The development and perpetuation of fish and game means an increased population in the Summer resorts and remote districts where sport is most easily found. This means an increased consumption of canned goods, cereals and other foodstuffs, as well as additional hardware for the cabins and cottages erected. Extra labor will be required to erect these buildings and manufacture canoes, boats and launches for use in the rivers and lakes. Even the farmers will benefit by the increased demand for the products of the farms and factories.

The proper regulation of the taking of food fish in our lakes by fishermen and fishing companies also has its interesting possibilities, and the association does well by including under its protective wing commercial fish and useful birds. Much educational work is possible pointing out the dangers of destroying such valuable friends of mankind, and the information given on these subjects in our public schools might be extended considerably to the advantage of both students and parents.

In declaring for non-political action and in favor of conserving the public domain the association protects itself against being used by political wirepullers, in addition to maintaining a principle which will win the appreciation of all citizens desiring to see Canada continue, as it now is, one of the happiest spots in which to enjoy life to be found on the world's map.

A BUSINESS MAN FOR MAYOR.

In the attitude of the fire insurance companies towards the acceptance of risks in Winnipeg the citizens of the western metropolis have a practical example of the results that are sure to follow when the direction of the affairs of a great and growing city is entrusted to a number of professional politicians. The fire insurance companies are afraid of Winnipeg risks because of the inadequate water supply and the water supply is not what it should be for the simple reason that the men in charge of the civic administration were not big enough to plan for the future. For years the leading business men of Winnipeg have shirked their civic responsibilities. When pressed to stand for election to the city council they have answered that they could not spare the time, and, as a result, the control of affairs has fallen into incompetent hands. The civic administration for years has been marked by vacillation, hesitation and unnecessary delay, with the result that the extension to the various public services has not kept pace with the rapid growth of the city. The inadequate water works system is not the only example of the inability of the council to realize the necessity of providing for the future and, in a word, the civic administration has been one of blundering incapacity. Affairs have been badly muddled.

Now the management of the affairs of the most rapidly growing city in Canada is a task that requires trained ability of the highest kind. The position is no sinecure, it demands a business man of proved ability, tried integrity and indomitable energy and resource. Happily the citizens of Winnipeg seem to realize this truth at last.

In the present civic crisis the citizens in general are turning to J. H. Ashdown, and on all sides is heard the remark that if only Mr. Ashdown were mayor a thorough civic housecleaning might be expected and a broad progressive businesslike administration would undoubtedly be inaugurated. A man of broad outlook and proved business ability of the highest type, Mr. Ashdown is undoubtedly the man whom the people of Winnipeg desire to "honor," and whose assistance is required at the present juncture.

Will Mr. Ashdown consent to be a candidate? We do not know. He is not the class of man who seeks popularity or who desires public office, and to be mayor of Winnipeg would necessarily involve great personal and financial sacrifice on his part. But Mr. Ashdown has always shown himself a public spirited citizen—witness his effective work on the Transportation Commission and on the Water Commission—and it may be that if he is shown convincingly that his fellow citizens want him for mayor, and that it is essential that some one should inaugurate a businesslike administration of the affairs of Winnipeg—it may be that he will consent to make the big sacrifice that the acceptance of the position would involve. Winnipeg needs the services of Mr. Ashdown, and it is to be hoped that she will succeed in convincing him of the fact.

You will never get interest on past due accounts unless you ask for it. Some merchants can collect it and still hold customers. Others cannot. To which class do you belong?

REVIVAL IN ROLLER SKATING.

A great impetus has been given to the old-time sport of roller skating by the encouragement which it has received at the hands of amusement resorts in Montreal, Toronto, and other large centres of Canada during the present season. The smaller cities and towns are also catching hold, and a big opportunity is opening to progressive hardwaremen in supplying the demand for roller skates.

The skates which were known to our fathers, and to ourselves as well in our boyhood, will not do for the rising generation. The clumsy old wooden wheel arrangements with their multitudinous straps which required an immense expenditure of energy to drive at any considerable speed, have been superannuated. Skaters are now supplied with a neat and light steel skate whose claws catch the sole tightly, while a single strap around the ankle holds the heel firmly in place. To insure easy running, the steel rollers run on ball bearings, and more than that, they run true, thus obviating the wobbly sensations of the old-timers. These skates are practically noiseless, and to them is due in great part the revived interest in this exhilarating sport.

The roller skating trade must be handled gingerly at first by retailers, as it must be remembered that the promoters of roller skating rinks are as yet the chief customers and they buy at close margins. Their rule that patrons of the rinks who supply their own skates must pay as much as patrons who rent skates does not tend to encourage the retail trade. One Toronto dealer who stocked up with several hundred pairs and advertised them sold only a couple of dozen by retail, but secured several orders and inquiries from rink promoters.

Toronto's sixth rink has opened for business. Montreal already has two, and Guelph, St. Catharines, London and Sault Ste. Marie are other cities which have already taken up the sport.

There is scarcely a town in Canada where a suitable floor for roller skating cannot be obtained. Where the sport is not already booming, it is safe to say that the hardwareman could initiate it by displaying a sample pair of the modern roller skates. Several of the leading jobbers have now stocked them.

SHOULD CANADA BE IN THIS?

The next great exposition is to be held at Jamestown, Va., next year, to worthily celebrate the first permanent English settlement in America. British Vice-Consul Barton Myers, of Norfolk, Va., thinks Canada should have a prominent place in it and in a letter to Hardware and Metal says :

"Referring to your letter of June 25 in relation to the markets in the United States for Canadian goods, I beg to bring to your attention the Jamestown exposition, which is to be held here from April 26 to November 30, 1907. This is an international celebration of the 300th anniversary of the first permanent Anglo-Saxon settlement in America. In addition to an exposition on the shores of Hampton Roads, near Norfolk, the United States Government has invited all nations to send their ships and soldiers. The invitation has been generally accepted. Additionally, a large number of the states have made appropriations for State buildings and exhibits here. There will unquestionably be a vast concourse of visitors. The naval and marine features of this exposition are new and will be very attractive.

"Large exhibit buildings are being prepared by the exposition company, space in these buildings being sold at rates about on a par with those which were charged at Buffalo.

"I suggest that great good would be accomplished here for the commercial interests of Canada if a Canadian building could be erected by the Government or commercial bodies of Canada, in which could be assembled such matters of historical interest and exhibits of industrial and commercial character as might tend to make it a fair advertisement of what Canada is now seeking to offer to the trade of the United States."

THE METAL SITUATION.

Firmness is everywhere evident, this week. Not one decline has been noted in any metal, while considerable advances have occurred in numerous cases. Not only are prices steady at the higher level but at least several of the important commercial metals are very scarce and cannot be delivered at all with any degree of promptness.

Zinc spelter, antimony and pig lead are all quoted higher than last week. Indeed, as for lead, the present figures are the highest on record since 1888. As producers are so crowded with orders they cannot make deliveries with any degree of promptness, it would seem that the market is destined to go higher yet.

Copper will probably be advanced before very long, considering the present situation. Importers have had to meet several jumps during the past week and jobbers will no doubt soon be compelled to protect themselves by advancing their figures. The tone of the market is certainly stronger than it has been for many weeks and our quotations in this issue are considered very close.

Ingot tin, while still fluctuating to some extent, is nevertheless much steadier than for some time past. Indications are not wanting that this metal, too, will resume its upward career.

Sheet metals in nearly every case are creating considerable interest at present and as is the case with the majority of ingots, the tendency is decidedly upward.

Makers of galvanized sheets in both Great Britain and United States, have recently published new prices showing a general advance. This has not yet been followed by the Canadian jobbers, but higher prices are only a matter of time. Booking for forward delivery at the advanced prices is very brisk. Tin plates have also advanced in primary markets, though Canadian prices remain unchanged. Zinc sheets, in sympathy with spelter, are on the upward move, with the end of the boom not yet in sight.

A somewhat remarkable condition exists in Canada plates. These are very scarce and the shortage in galvanized Canada plates is felt with especial keenness. Importers have advanced their prices to wholesale dealers. The leading Montreal interest has informed Hardware and Metal that they have not put a box of these goods into stock for some time, as all their consignments were snapped up even before they reached this country.

To sum up, the present week has been the strongest generally for some months and the whole market shows a very healthy tone.

EDITORIAL NOTES.

The aggregate value of the stocks, bonds, and similar securities belonging to French capitalists is estimated by Mr. Neymarck, a French statistician, to have been at the end of the year 1905 93,000,000,000 francs ($18,600,000,000), 87,000,000,000 francs ($17,400,000,000) in 1900, and 74,000,000,000 francs ($14,800,000,000) in 1890.

* * *

American harvests this year will be the largest on record, according to the following estimates based on data of the Department of Agriculture : Winter wheat, 493,434,000 bushels ; Spring wheat, 278,830,000 bushels, against 428,462,834 and 264,516,655 bushels, respectively, in 1905. The total corn crop for 1906 is estimated at 2,713,194,000, against 2,707,993,540 bushels last year.

MARKETS AND MARKET NOTES

(For detailed prices see Current Market Quotations, page 66.)

THE WEEK'S MARKETS IN BRIEF.

MONTREAL.

Orange Mineral—Advanced ¾ cents per lb.
Shot—A new list has been issued.
Lead Pipe—Discount now 10 per cent.
Pig Lead—Advanced to $4.75 and $4.85.
Antimony—Up to 27½c. and 28c.
Zinc Spelter—An advance of 25 cents per 100 pounds.
Plumbers' Oakum—Another advance to $4.
Builders' Hardware—American manufacturers have raised prices 11 per cent.
White Lead—Advance of about 50c. per hundred pounds.

TORONTO.

Lead Pipe—Discount lowered from 15 to 10 per cent.
Soil Pipe and Fittings — Medium and extra heavy now 65 off, instead of 65 and 10.
Shot—An advance of 50 cents per 100 pounds made on all lines with a discount of 5 per cent. off.
Pig Lead—Now quoted at $4.90,
Antimony—Prices moved up half a cent.
White Lead—An advance of 25 cents per hundred lbs. has been made.
Turpentine—One cent of a drop reported.
Linseed Oil—Quotations one cent lower.
Old Material—Lead and copper lines advanced.
Builders' Hardware—Advanced 10 per cent.

Quebec Hardware Markets.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, September 21, 1906.

Something of a lull has been felt this week and trade, though fair, is not as good as was experienced during the previous six days. A cool spell would no doubt have an invigorating effect on the demand for seasonable goods.

Hardware markets are still advancing and judging from the way metals are soaring there is not much likelihood of easier conditions for a long time yet.

American makers have declared an advance in builders' hardware of about 11 per cent. It is said, by jobbers, that American makers of both builders' hardware and tools, are away behind in filling their orders.

Plumbers' oakum has again advanced and is now up to $4 per hundred lbs. A new list has been issued on shot showing higher prices, and throughout prices are exceptionally firm.

AXES—Fall business is opening up very rapidly. We still quote: $7.60 to $9.50 per dozen; double bitt axes, $9.50 to $12 a dozen; handled axes, $7.50 to $9.50; Canadian pattern axes. $7.50 a dozen.

HANDLES—Business conditions show no change. We still quote prices as follows: No. 3, $1.25; No. 2, $1.50; No. 1, $1.90 a doz.; adze handles, 34-inch, $2.20 a dozen; pick handles, No. 2, $1.70; No. 3, $1.50 a dozen.

LANTERNS—A brisk trade is being done in all the well known lines. We give prices as follows: "Prism," $7; "Prism" globes, $1.20; Cold Blast, $4; No. 0 Safety, $3.50 to $3.75.

COW TIES AND STALL FIXTURES—Local wholesalers report a very large demand for these goods, nearly every order received calling for a good assortment. We are quoting: Cow ties, discount 40 per cent. off list; stall fixtures, 35 per cent. off list.

SLEIGH BELLS— Shipments are fairly heavy. Prices remain stationary. Back straps, 30c. to $2.50; body straps, 70c. to $3.50; York Eye bells, common, 70c. to $1.50, pear shape, $1.15 to $2, shaft gongs, 20c. to $2.50; Grelots, 35c. to $2; team bells, $1.80 to $5.50; saddle gongs, $1.10 to $2.60.

RIVETS AND BURRS—The market maintains a good healthy tone. We continue to quote as follows: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., copper rivets and tin swede rivets, 60, 10 and 10 per cent.; swede iron burrs are quoted at 60 and 10 and 10 per cent. off new lists; copper rivets with the usual proportion of burrs, 35 per cent. off; and coppered iron rivets and burrs in 5-lb. carton boxes at 60 and 10 and 10 per cent.; copper burrs alone, 30 per cent., subject to usual charge for half-pound boxes.

HAY WIRE—A large demand is now being felt and good sized deliveries are being made daily. Our prices are as follows: No. 13, $2.45; No. 14. $2.55; No. 15, $2.70; net cash, f.o.b. Montreal.

MACHINE SCREWS—The customary business is being done. We still give the following discounts: Flat head, iron, 35 per cent.; flat head, brass, 35 per cent.; Felisterhead iron, 30 per cent.; Felisterhead brass, 25 per cent.

BOLTS AND NUTS—The scarcity of bolts is still very keenly felt. We quote: 3-8 and smaller, 60 per cent. and 10 per cent.; 7-16 and larger, 55 per cent.

HORSE NAILS—Orders for good quantities are constantly coming to hand. We still quote: C brand, 40, 10 and 7 per cent.; M.R.M. Co., 55 per cent.; P.B. brand, 55 per cent.

WIRE NAILS— Price cutting is no longer so rampant as it was earlier in the Summer. We quote the normal price of $2.05 base, f.o.b., Montreal.

CUT NAILS— We still quote: $2.20 f.o.b., Montreal.

HORSESHOES— The busiest season of the year is now at hand and jobbers and manufacturers are very busy. We are still quoting prices as follows: P. B. new pattern, base price $3.50 per 100 lbs.; M. R. M. Co., latest improved pattern iron shoes, light and medium pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; snow pattern, No. 2 and larger, $3.90; No. 1 and smaller, $4.15. Light steel shoes, No. 2 and larger, $4; No. 1 and smaller, $4.25; featherweight, all sizes, No. 0 to 4, $5.60. Toeweight, all sizes, No. 1 to 4, $6.85. Packing, up to three sizes in a keg, 10c. per 100 lbs. More than three sizes, 25c. per 100 lbs. extra.

BUILDING PAPER—Trade conditions are unchanged since our last report. A large business is expected to open up shortly.

CEMENT AND FIREBRICK—We are still quoting: "Lehigh" Portland in wood $2.54; in cotton sacks, $2.39; in paper sacks, $2.31. Lefarge (non-staining) in wood, $3.40; Belgium, $1.60 to $1.90 per barrel; ex-store, American, $2 to $2.10 ex-cars; Canadian Portland, $2 to $2.05. Firebrick, English and Scotch, $17 to $21, American $30 to $35; White Bros.' English cement, $1.80 in bags, $2.05 in barrels in round lots.

COIL CHAIN—A scarcity exists and it is very difficulty to obtain deliveries. We are still quoting the following prices: 5-16 in., $4.30; 3-8 inch, $3.80; lows: 5-16 in., $4.30; 3-8 inch, $3.80; 7-16 inch, $3.60; 1-2 inch, $3.40; 9-16 inch, $3.35; 5-8 inch, $3.25; 3-4 inch, $3.10; 7-8 inch, $3.05; 1 inch, $3.

SHOT—New lists have been issued by the local producers and we are now quoting as follows: Shot packed in 25-lb. bags, ordinary drop AAA to dust, $7 per 100 lbs.; chilled, No. 1—10, $7.50 per 100 lbs.; buck and seal, $8 per 100 lbs.; ball, $8.50 per 100 lbs. Discount, 5 per cent. Bags less than 25-lbs., 1-2c. per lb. extra, net; f.o.b. Montreal, Toronto, Hamilton, London, St. John, Halifax.

AMMUNITION—We give the following prices: Loaded with black powder, 12 and 16 gauge, per 1,000, $15; 10 gauge, per 1,000, $18; loaded with smokeless powder, 12 and 16 gauge, per 1,000, $20.50; 10 gauge, $23.50.

Ontario Hardware Markets.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto Sept. 21, 1906.

An advance has been made on shot during the week of 50 cents per hundred with a discount of 5 per cent. off. Sargeant's builders' hardware has also been advanced 10 per cent. and the feeling generally is that higher prices must shortly obtain in all regular lines of

these goods, locks particularly being very firm. There is a feeling that harvest tools for next season's trade will be advanced on account of the large consumption that has grown up during the last year, consequent upon the development of the Canadian west. At present the stocks of harvest tools are not heavy. In fact it might be said that nearly all lines of hardware are holding firm. Business is quiet in so far as booking orders for Winter lines is concerned, but steady sorting trade is being done.

AXES AND HANDLES—A seasonable trade is reported.

CUTLERY AND SILVERWARE—This line is particularly active at present.

SPORTING GOODS—An advance of 10 per cent. has been made in shot, and a good general trade is reported in all sporting goods.

WASHING MACHINES—An ordinary business continues to be done.

CHAIN—Coil chain is very firm and an advance is not improbable. We continue to quote as follows: 1 inch, $6.60; 5-6 inch, $4.55; 3-8 inch, $3.95; 7-16 inch, $3.80; 1-2 inch, $3.65; 9-16 inch, $3.55; 5-8 inch, $3.45; 3-4 inch, $3.35.

EXTENSION AND STEP LADDERS—Prices continue as follows: Step ladders at 10c. per foot for 3 to 6 feet, and 11c. per foot for 7 to 10 feet ladders. Waggoner extension ladders, 40 per cent.

POULTRY NETTING — Our quotations are as follows: 2-inch mesh, 19 w.g., discount 50, 10 and 5 per cent. All others 50 per cent.

GALVANIZED WIRE—We quote: $2.17 1-2 f.o.b. Cleveland.

BARB WIRE— We quote the following prices: On gauge 9, $2.40; gauge 12, $2.55; gauge 13, $2.65; f.o.b. Toronto.

OILED AND ANNEALED WIRE—(Canadian)—Gauge 10, $2.31; gauge 11, $2.37; gauge 12, $2.45 per 100 lbs.

WIRE NAILS—We quote nominally $2.25 base, but the market is open at $1.95. There are rumors of a return to former prices.

CUT NAILS—We quote: $2.20 base, f.o.b. Montreal. Toronto, 20c. higher.

HORSENAILS—"C" brand, 40, 10 and 7 1-2 off list. "M.R.M." brand, 55 per cent. off. "Monarch" brand, 50 and 7 1-2 off. "Peerless," 50 per cent. off.

HORSESHOES—Our quotations continue as follows: P.B. base, $3.65; "M.R.M. Co., latest improved pattern" iron shoes, light and medium pattern, No. 2 and larger, $3.80; No. 1 and smaller, $4.05; snow, No. 2 and larger, $4.05; No. 1 and smaller, $4.30; light steel shoes, No. 2 and larger, $4.15; No. 1 and smaller, $4.40; featherweight, all sizes, 0 to 4, $5.75; toeweight, all sizes 1 to 4, $7. Packing, up to three sizes in a keg, 10c. per 100 lbs. extra; more than three sizes in a keg, 25c. per 100 lbs. extra.

HORSE BLANKETS—Trade conditions are good.

SLEIGH BELLS—Booking orders are not heavy on account of stocks being carried over.

FARM TOOLS—Stocks are not heavy in farm tools and indications seem to point to an advance for next season's goods.

RIVETS AND BURRS—Tinned rivets are now quoted net extra 4c. per lb.

SCREWS—We quote: On gimlet point 70 and 5 per cent. off; on cone point, 70 and 10 per cent. off list.

BOLTS AND NUTS—Prices are very firm and stocks low. We still quote: 55 and 10 per cent. off list.

CEMENT—We quote: For carload orders, f.o.b. Toronto, Canadian Portland, $1.95. For smaller orders ex warehouse, Canadian Portland, $2.05 upwards.

FIREBRICK—English and Scotch fire brick, 27c. to 30c.; American low-grade, 23c. to 25c.; high-grade, 27 1-2c. to 35c.

WOOL AND HIDES—Rendered tallow is quoted ¼c. lower. Otherwise prices are unchanged. The market is quiet.

Hides, inspected, steers, No. 1	0	12½
" " " No. 2	0	11½
" " cows, No. 1	0	12½
" " " No. 2	0	11½

Canadian Metal Markets.

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, September 21, 1906.

During the past few days great strength and activity has been shown in nearly all metals, and in nearly every case increased prices have resulted. A fine inquiry has developed and business conditions aside from a scarcity in some lines are very highly satisfactory.

Copper has advanced in primary markets and conditions locally have been considerably affected thereby, the prices which have been quoted for some time past having firmed up to a marked degree. Inquiries are large and everything points to higher quotations.

Pig lead is still higher. A further advance of 5 cents per hundred pounds has brought the price above any quotations since 1888. Not only is this the case, but prompt deliveries have become a most difficult matter. As lead is one of the cheapest metals it is not subject to the same manipulations as others, and at all events, present appearances are that the advance is due to a legitimate demand. Canadian pig is particularly scarce.

Antimony has gone up slightly and our prices are considered very close in existing conditions. Tin went off a little earlier in the week, but has since stiffened and our last week's prices are still being quoted. In fact, they are much firmer than before.

Zinc spelter is very scarce and we are quoting an advance of 25 cents per hundred pounds. The demand for this metal is very brisk.

A scarcity has developed in pig iron, which is becoming very acute. Especially is this the case with stocks in local hands and the dealers who have iron to sell for immediate shipment, find no difficulty in securing a good price. Clarence and Cleveland irons are absolutely off the market and no quotations are given on these brands this week.

COPPER—With the primary market rapidly advancing we must expect early revisions in Canadian prices. We still quote: Ingot copper, 21c. to 21 1-2c.; sheet copper, base sizes, 25c.

INGOT TIN—Conditions this week are somewhat firmer. We still quote: 44c. to 44½c. per pound.

ZINC SPELTER—The Old Country market continues to go up and local jobbers have been obliged to raise their prices. We now quote: $7 to $7.25 per hundred pounds.

ANTIMONY— Stocks are light and prices have gone up. We quote: 27 1-2c. to 28c. per lb.

PIG LEAD—We are now quoting the highest price since 1888, $4.75 to $4.85 per 100 lbs.

PIG IRON—Stocks in Montreal are very light. So far as Clarence and Cleveland are concerned, they are absolutely bare and no quotations can be given. We quote:

Londonderry	20.50	delivered	Montreal
Carron No. 1	23.00	"	"
" (special)	22.00	"	"
Summerlee No. 1	22.75	"	"
" No. 3 (soft)	21.75	"	"
Ayresome No. 1	22.00	"	"
" No. 3	21.00	"	"

BOILER TUBES—We still quote: British and American tubes, 1½ inch, 8½c.; 2 inch, 8½c.; 2½ inch, 10c.; 3 inch, 12c.; 3½ inch, 15½c.; 4 inch, 20c.; 5 inch, 45c. Price per foot net.

TOOL STEEL—Business is brisk at the following quotations: Colonial Black Diamond, 8c. to 9c.; Sanderson's, 8c. to 45c., according to grade; Jessop's, 13c.; Jonas & Colver's, 10c. to 20c.; "Air Hardening," 65c. per pound; Conqueror, 7½c.; Conqueror High Speed Steel, 60c.; Jowitt's Diamond J., 6¼c. to 7c.; Jowitt's Best, 11c. to 11½c.

MERCHANT STEEL—The usual trade is being done. Our quotations are as follows: Sleigh shoe, $2.17½; tire, $2.27½; spring, $2.75; toecalk, $2.82½; machinery iron finish, $2.27½; ruled machinery steel, $2.75; mild, $2.15 base and upwards; square harrow teeth, $2.27 1-2. Net cash 30 days. Rivet steel quoted on application.

COLD ROLLED SHAFTING—We still quote: 3-16 inch to 1-4 inch, $6.80; 5-16 inch to 11-32 inch, $5.78; 3-8 inch to 17-32 inch, $4.76; 9-16 inch to 47-64 inch, $4.08; 3 1-8 inch to 3 7-16 inch, $3.60; 3-4 inch to 1 7-16 inch, $3.75; 1 1-2 inch to 3 inch, $3.50; 3 1-2 inch to 3 15-16 inch, $3.75; 4 inch to 4 7-16 inch, $4.08; 4 1-2 inch to 4 11-16 inch, $4.42.

GALVANIZED IRON—Both American and British manufacturers have advanced prices and jobbers will almost certainly follow them very shortly. We are still quoting: Queen's Head, 28 gauge, $4.35 to $4.60; 26 gauge, $4.20; 22 to 24 gauge, $3.65; 16 to 20 gauge, $3.50; Apollo, 28 gauge, $4.25 to $4.50; 26 gauge, $4.10; 22 and 24 gauge, $3.55; 16 to 20 gauge, $3.40; Comet, 28 gauge, $4.25 to $4.50; 26 gauge, $4.10; 22 and 24 gauge, $3.55; 16 to 20 gauge, $3.40; Bell brand, 28 gauge, $4.40 to $4.45; Fleur-de-Lis, 28 gauge, $4.20 to $4.45; 26 gauge, $4.05; 22 and 24 gauge, $3.50; 16 to 20 gauge, $3.35; Gorbal's "Best Best," 28 gauge, $4.25 to $4.50; "Windmill Best," 28 gauge, $4.15; Sword and Torch, 28 gauge, $4.15; Colborne Crown, 28 gauge, $4.20 to $4.45. In less than case lots 25c. extra.

BLACK SHEETS—We are quoting: 28 gauge, $2.40; 26 gauge, $2.35; 22-24 gauge, $2.30; 19-20 gauge, $2.30; 8-10 gauge, $2.45.

CANADA PLATES—The scarcity reported last week still continues and is especially felt in galvanized. We quote: 52's, $2.60; 60's $2.651; 75's, $2.75; full polished, $3.75 to $4; galvanized, 52's, $4.10; 60's, $4.35.

TIN PLATES—The market remains steady at the following prices: Cokes, base size, 1C 14 x 20, $4; charcoal, base size, 1C, 14 x 20, $4.25.

TERNE PLATES—We still quote $6.85

SHEET ZINC—Trade conditions remain the same. We still quote: $7.75 in casks; $8 in less than casks.

SHEET LEAD—We quote: 2 1-2 lbs., 6c. by the roll; 3 lbs., and heavier, 5 3-4c by the roll; small quantities, 25c. per hundred pounds extra.

BAR IRON—We are still quoting $2.05 base, f.o.b. Montreal.

OLD MATERIAL—Conditions are firmer, but the only actual change is in wrought scrap, on which an excellent demand is felt. We quote as follows: Light copper, 14½c.; heavy red brass, 14½c.; yellow brass, 11½c.; light brass, 8c.; lead, 3½c.; zinc, 4c.; machinery cast scrap, $15; wrought scrap, $14 to $15; stove plate scrap, $12; mixed rags, $1 to $1.20 per 100 lbs.; old rubbers, 7¾c. to 8c.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East.
Toronto, September 21, 1906

Marked strength is manifest in practically all metals and activity rules both in buying and shipping owing to the approach of the end of the open weather. Jobbers are preparing to book orders for next season's supply of tin plates, etc., and while prices are high there does not seem to be much likelihood of a decline. Some dealers will hold off taking a chance on lower prices ruling next year, but the majority seem to hold the belief that the market will hold firm at the advanced prices, owing to the steadily increasing demand and the limited supply of raw materials.

Canners are very short of the certain sizes and qualities of coke plates required for tin cans and some canneries have been forced to return shipments of corn to farmers and are facing the problem of closing down their plants. The market is practically clean of galvanized iron also, and relief does not appear to be in sight for some time.

Pig iron is still further strengthening owing to the inability of buyers to get early shipments. Bar iron and bolts are a trifle easier, however.

Lead and antimony have made slight advances, the former now being at record prices since 1888. Old material has also seen some small advances.

PIG IRON—Londonderry is practically five months ahead of orders and for other lines orders are held for delivery for several months ahead. We quote: Radnor at furnace, $33; Hamilton at furnaces, No. 1, $21.50; Londonderry, f.o.b. Toronto, No. 1, $23; Middleborough, $22.50 to $23.

BAR IRON—A brisk demand is evident with stocks in better shape. We quote: $2.15 base, f.o.b. Toronto, with discount of 2 per cent. net cash.

INGOT TIN—Foreign quotations continue to fluctuate but local prices are steady. Dealers are asking from 42c. to 43c. per lb.

TIN PLATES—Trade is active with prices unchanged. We quote: Cokes, base size, 14x20, $4; charcoal, base size, 14x20, $4.50.

GALVANIZED SHEETS—Stocks of galvanized iron are very low and last week's advances have been followed by the trade generally. Canada plates also hold firm.

BRASS—The market continues firm with no price changes. We quote: 23c. to 24c. per lb.

COPPER—Prices are firm and the tendency is upward. Our prices are: Ingot copper, $20 per 100 lbs., and sheet copper, $25 per 100 lbs.

LEAD—Even firmer conditions exist than were reported a week ago and we are advancing our quotations another 5 cents, the figures now being $4.90 for imported pig and $5.50 for bar lead.

ZINC SPELTER—Foreign markets are very stiff and prices are strengthening. We quote: 7¼c. per lb. for foreign and 6c. per lb. for domestic.

BOILER PLATES AND TUBES—We quote: Plates, per 100 lbs., ¼ in. and up, $2.45; heads, per 100 lbs., $2.60; tank plates, 3-16 inch, $2.50; tubes, per 100 feet, 1½ inch, $8.50; 2, $8.80; 2½, $10.75; 3, $12; 3½, $15.80; 4, $21. Terms, 2 per cent. off.

ANTIMONY—A half cent advance has been recorded. Stocks are none too heavy with a good demand.

OLD MATERIAL—Advances have been made in copper wire and tea and heavy lead. Dealers' buying prices are as follows: Heavy copper and wire, 15¼c. to 15¾c. per lb.; light copper, 13½c. to 14c. per lb.; heavy red brass, 13c. per lb.; heavy yellow brass, 11c. per lb.; light brass, 8¼c. per lb.; tea lead, $3.40 per 100 lbs.; heavy lead, $3.60 per 100 lbs.; scrap zinc, 4½c. per lb.; iron, No. 1 wrought, $11; No. 2 wrought, $3 to $5; machinery cast scrap, $15; stove plate, $10; malleable and steel, $5; old rubbers, 7¾c. per pound; country mixed rags, $1 to $1.25 per 100 lbs., according to quality.

COAL—We quote the following prices: Anthracite in cars at bridge, egg, stove and nut, $5.50; grate, $5.25; pea $3.50 per gross ton.

Standard Hocking, soft coal, in cars, f.o.b. at mines: Lump, $1.50; ¾ inch, $1.40; run of mine, $1.30; nut, $1.25; N. P. and S., $1; slack, 75c.; box cars, 10c. per ton additional.

Youghiogheny soft coal in cars, bonded at bridges: 1¼ inch, $2.55; ¾ inch, $2.45; mine run, $2.35; slack, $2.05.

For Manitoba, British Columbia and Maritime Provinces markets see pages following.

LONDON METAL MARKETS.

From Metal Market Report, Sept. 19, 1906.

PIG IRON—Cleveland warrants are quoted at 54s. 3d, and Glasgow standard warrants at 53s. 9d, making prices as compared with last week 6d lower for Cleveland warrants and 5d lower for standard warrants.

TIN—Spot tin opened irregular at £184, futures at £181 10s., and after sales of 150 tons of spot and 350 tons of futures closed steady at £184 for spot and £181 10s. for futures, making price as compared with last week £1 lower on spot, and £2 lower futures.

COPPER—Spot copper opened strong at £88 2s. 6d, futures £88 2s. 6d, and after sales of 350 tons of spot and 800 tons of futures, closed firm at £88 2s. 6d for spot and £88 2s. 6d for futures, making price as compared with last week £1 10s. higher on spot and £1 10s. 6d higher on futures.

LEAD—The market closed at £18 10s. making price as compared with last week 6s. 3d higher.

SPELTER—The market closed at £27 10s., making price as compared with last week unchanged.

U. S. METAL MARKET.

From the Iron Trade Review, Cleveland, Sept. 20, 1906.

Though no sales of iron ore for 1907 delivery have as yet come to light, it is pretty well determined that prices will be higher than for this season, the probable advance being 50 cents for Bessemer and 25 cents for non-Bessemer. The September movement of ore has so far been extremely heavy and it now seems that the 5,000,000-ton mark will be passed.

The excited tone which has prevailed in the pig iron market of the past few months has largely disappeared and new business is comparatively light, as the majority of furnace interests have taken all of the tonnage desired for first quar-

ter delivery. High prices are still occasionally paid for prompt delivery, but for 1907 delivery quotations are a little changed, though some interests are asking high prices for Bessemer and basic. Southern iron is selling largely on the basis of $15 Birmingham for No. 2 foundry.

In finished lines the market continues very strong. The reduction in the price of structurals announced last week in Chicago has not affected other sections to any extent. Many new inquiries have appeared in the rail market, and contracts for some 200,000 tons of standard sections are pending, as well as inquiries for about 50,000 cars and 40,000 of fabricated structural material.

The crude steel scarcity is more pronounced and deliveries of semi-finished material on contracts are slow. Steel bars are still active, and another large interest has advanced its price $2 per ton, though the steel corporation adheres to the old quotation.

U. S. IRON AND METAL TRADES.

From the Iron Age, Sept. 20, 1906.

The drift is unmistakably upward and it is apparent that some of the conservative interests who have been fighting against advances are less active in opposition. The consumption, present and prospective, is enormous, and the buying is on a very large scale. No better evidence of this can be furnished than the fact that during the first two weeks of the current month the United States Steel Corporation booked an average of 60,000 tons per day, which contrasts with a capacity of 33,000 per day.

Complaints of scarcity of labor come from all sections of the country and tell in the quantity of raw material raised from the ground and transported, and in the output of the manufacturing plants. Some of the leading independent lake ore mining companies have notified furnaces of their inability to supply the full quantities of ore contracted for.

The principal merchant furnaces in the Valleys are sold up tight into the second quarter of next year. On the other hand, the steel corporation now has 95 per cent. of its furnace capacity at work, and October is looked forward to as a record breaker in output.

One leading iron producer in the south has this week sold an aggregate of 40,000 tons of basic pig to western steel makers, the bulk of it at $15.50, Birmingham, but a round lot also at $16. In the east the markets for foundry, forge and basic iron are being tested by large inquiries for forward delivery, but the majority of buyers still refuse to the higher prices asked.

The rail mills have added to their orders 15,000 tons for the Soo line. A good deal of further tonnage is pending for southwestern roads, and a southern line, the South & Western Railway, is in the market for 27,000 tons.

Further large orders for steel cars are in sight. The Vanderbilt lines expect to close for over 20,000 steel cars during the next day or two, and some other large transactions are pending. On the lakes five new boats have been contracted for, two of them for delivery during 1908. Structural work is coming out steadily. The most interesting, though not most important transaction of this character, refers to a number of steel buildings for San Francisco, the tonnage aggregating 5,000 tons. The work was taken by the American Bridge Co.

The raising of prices on steel bars is becoming more general and the market has stiffened perceptibly.

Nova Scotia Trade News.

Halifax, N.S., Sept. 19.

The hardware trade is very quiet at present, and it is expected that it will remain so until after the exhibition is closed. There has been no material change in the price list since last report. Collections are very good and have been right along. There is a fair demand locally for guns and ammunition. A number of the Halifax hardware firms intend making big exhibits at the coming fair. Among them will be H. H. Fuller & Co. and A. M. Bell. The Starr Manufacturing Company are arranging a fine exhibit, and also the Dominion Iron & Steel Co. The products of the latter which will be placed on view will include rails, steel ingots, slabs, blooms, billets, rods, wire, pig iron, lime stone, as well as specimens of all the different ores used by the company.

* * *

The brick work on the malleable iron foundry at Amherst has been completed, and the foundations for the furnaces and the engines are now being constructed. It is expected that they will be finished this week, and the foundry will soon start operations with one hundred hands.

* * *

At Antigonish last week a deposit of iron was uncovered which it is hoped by the owners of the property will turn out to be a good thing. Samples of the ore have been assayed and adjudged to be of a superior quality.

* * *

Victoria County's newest industry, the Victoria Gypsum Co., has been progressing favorably this year notwithstanding the fact that it has had to confront the problem that most of the other industries in Cape Breton have had to face, viz., the difficulty in obtaining labor to carry on their operations with a greater degree of satisfaction. Up to date the company, which began to ship in June, has shipped about 25,000 tons of its product and expects to ship about 40,000 tons before the season closes, and these figures would be much larger if labor conditions were more satisfactory. The areas at St. Ann's are very extensive and no difficulties are experienced in getting it to tide water, where the facilities for shipping are ideal, and the harbor one of the most scenic on the Cape Breton coast line.

A man who has faith in what he is trying to sell is a hundred per cent better salesman than one who has not. Handle good machines and tools and your conscience will be perfectly free in all you say about them.

PERSONAL MENTION

Western Canada.

Whyte & Orr, Daysland, Alta., have been succeeded by Whyte, Orr & Wells.

S. Weaves, blacksmith, Kelwood, Sask., has sold his business to Barrows & Neil.

The estate of James Sinclair, hardware, etc., Winnipeg, has been purchased by Charles Mulvey.

E. C. Dent and Frank Tucker have opened a hardware business in Kroneau, Sask. Mr. Dent was in C. T. Laird's store at Indian Head.

W. M. Fulton, representing the Malleable Steel Range Manufacturing Co., of South Bend, Ind., called at the Winnipeg office of Hardware and Metal last week.

Thos. L. Waldon has been appointed a director and secretary of the Marshall-Wells Co. of Winnipeg. Hardware and Metal tenders its congratulations.

Joshua Peters, of the Record Foundry & Machine Co., of Moncton and Montreal, is in Winnipeg this week consulting with R. R. Kinread, the manager of the Winnipeg branch.

Messrs. R. F. Anderson, of Anderson & Lusby, New Westminster, and S. H. Warnock, lately connected with F. W. Lamplough & Co., Montreal, have acquired control of the Vancouver Hardware Co., Limited, and have applied to the Legislature for change of name to Anderson & Warnock, Limited. The business will be continued on the same premises and a close connection maintained with the business of Anderson & Lusby, New Westminster.

Great Britain.

Owing to the growth of the business of the Buffalo Forge Company and Buffalo Steam Pump Company in Great Britain, the London branch office has been removed from 39 Victoria street east to more capacious quarters at Caxton House, Westminster.

Mr. Gwynn Morgan, one of the proprietors of the Ironmonger, our British hardware contemporary, has been elected junior warden of the Ironmongers' Guild of London. In the natural course of events he will be master in 1908, and the youngest man to occupy the honorable position since the foundation of the guild in the fifteenth century.

There are few quicker sellers than the various kinds of boys' vehicles which are propelled on the handcar principle and propelled and steered with the feet. Once a boy sees it, it's as good as sold, if "papa" is at all indulgent.

* * *

If you want to sell a razor or two take the pains to get the names of all young men just approaching or who have just arrived at the "shaving age." Send them circulars about your razors and if you don't land one or more it will be because they haven't the price. Try it and see.

Hardware and Metal Conditions in Manitoba

(Market quotations corrected by telegraph up to 12 a.m. Friday, Sept. 21, 1906.)

Office of HARDWARE AND METAL,
Room 511, Union Bank Building,
Winnipeg, Man.

Pig lead has been sharply advanced to $5.60 per cwt. in small lots. This price is firmly maintained and further advances are considered not unlikely. There are few other quotable changes, values being held steadily in all lines. Business continues very active, but some interruption in the city trade in building supplies may be expected to result from the general strike which was inaugurated the first of the week.

GREEN WIRE CLOTH—Quoted at $1.55 per 100 square feet.

LANTERNS—Reports are still numerous of cutting of retail prices in certain districts. Wholesale prices are held steadily at quotations below: Cold blast, $5.25; coppered cold blast, $7.25; cold blast dash, $7.75; lift, $4.25 per dozen.

WIRE — We quote as follows: Barbed wire, 100 lbs., $2.90; plain galvanized, 6 to 8, $3.39; 10, $3.50; 12, $3.10; 13, $3.20; 14, $3.90; 15, $4.45; 16, $4.60; plain twist, $3; staples, $3.50; oiled annealed wire, 10, $2.96; 11, $3.02; 12, $3.10; 13, $3.20; 14, $3.30; 15, $3.45. Annealed wires (unoiled) 10c. less.

HORSESHOES — Quotations are as follows: Iron, No. 0 to No. 1, $4.65; No. 2 and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to No. 1, $5; No. 2 and larger, $4.75.

HORSENAILS — Lists and discounts are quoted as follows: No. 10, 20c.; No. 9, 22c.; No. 8, 24c.; No. 7, 26c.; No. 6, 28c.; No. 5, 32c.; No. 4, 40c., per pound. Discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent., "M" brand and other brands, 55 and 60 per cent. Add 15c. per box.

WIRE NAILS—Steady at $2.60 per keg.

CUT NAILS—Quoted now at $2.70 per keg.

PRESSED SPIKES—Prices are as follows: ¼ x 5 and 6, $4.60; 5-6 x 5, 6 and 7, $4.25; ⅜ x 6, 7 and 8, $4.10; 7-16 x 7 and 9, $4.00; ½ x 8, 9, 10 and 12, $3.90; ⅝ x 10 and 12, $3.75.

SCREWS—Discounts are as follows: Flat head, iron, bright, 85 and 10 p.c.; round head, iron, 80 p.c.; flat head, brass, 75 and 10 p.c.; round head, brass, 70 and 10 p.c.; coach, 70 p.c.

NUTS AND BOLTS — Discounts are unchanged and continue as follows: Bolts, carriage, ⅜ or smaller, 60 and 5; bolts, carriage, 7-16 and up, 55; bolts, machine, ⅜ and under, 55 and 5; bolts, machine, 7-16 and over, 55; bolts, tire, 65; bolt ends, 55; sleigh shoe bolts, 65 and 10; machine screws, 70; plough bolts, 55; square nuts, case lots, 3; square nuts, small lots, 2½, hex nuts, case lots, 3; hex nuts, smaller lots, 2½ p.c.

RIVETS—Quoted now as follows: Iron, 60 and 10; copper, No. 8, 34½; copper, No. 12, 40 p.c.

COIL CHAIN — Unchanged in price. We quote: 3-16 inch, $9.25; 5-16, $5.20; 7-16, $4.45; ⅜, $4.10; ¼, $7.20; ⅝, $4.60; ½, $4.30; ¾, $4.

SHOVELS—Discounts on spades and shovels continue 40 and 5 p.c.

HARVEST TOOLS — Discounts continue 60 and 5 p.c.

AXE HANDLES—Quoted as follows: Turned, s.g. hickory, doz., $3.15; No. 1, $1.90; No. 2, $1.60; octagon, extra, $2.30; No. 1, $1.60.

AXES—Prices quoted as follows: Bench axes, 40; broad axes, 25 p.c. discount off list; Royal Oak, per doz., $6.25; Maple Leaf, $8.25; Model, $8.50; Black Prince, $7.25; Black Diamond, $9.25; Standard flint edge, $8.75; Copper King, $9.00; Columbian, $10.75; handled axes, North Star, $7.75; Black Prince, $9.25; Standard flint edge, $10.50; Copper King, $11 per doz.

BUTTS — The discount on wrought iron butts if 70 p.c.

CHURNS— The discounts from list continue as before: 45 and 5 per cent.; but the list has been advanced and is now as follows: No. 0, $9; No. 1, $9; No. 2, $10; No. 3, $11; No. 4, $13; No. 5, $16.

CHISELS—Quoted at 70 p.c. off list prices.

AUGER BITS—Discount on "Irwin" bits is 47 1-2 per cent., and on other lines 70 per cent.

BLOCKS—Discount on steel blocks is 35 p.c. off list prices; on wood, 55 p.c.

FITTINGS — Discounts continue as follows: Wrought couplings, 60; nipples, 65 and 10; T's and elbows, 10; malleable bushings, 50; malleable unions, 55 p.c.

GRINDSTONES—As noted last week, the price is now 1 1-2c. per lb. A decline of 1-4c.

FORK HANDLES — The discount is 40 p.c. from list prices.

HINGES—The discount on light "T" and strap hinges is 65 p.c. off list prices.

HOOKS — Prices are quoted as follows: Brush hooks, heavy, per doz., $8.75; grass hooks, $1.70.

CLEVISES—Price is now 6 1-2c. per pound.

STOVE PIPES—Quotations are as follows: 6-inch, per 100 feet length, $8.50; 7-inch, $9.25.

DRAW KNIVES—The discount is 70 per cent. from list prices.

RULES—Discount is 50 per cent.

WASHERS—On small quantities the discount is 35 p.c.; on full boxes it is 40 p.c.

WRINGERS—Quotations are: Royal Canadian, $33; B.B., $37.75 per doz.

FILES—Discounts are quoted as follows: Arcade, 75; Black Diamond, 60; Nicholson's, 62½ p.c.

BUILDING PAPER — Prices are as follows: Plain, Joliette, 40c.; Cyclone, 55c.; Anchor, 55c.; pure fibre, 60c.; tarred, Joliette, 65c.; Cyclone, 80c.; Anchor, 65c.; pure fibre, 80c.

TINWARE, ETC. — Quoted as follows: Pressed, retinned, 70 and 10; pressed, plain, 75 and 2½; pieced, 30; japanned ware, 37½; enamelled ware, Famous, 50; Imperial, 50 and 10; Imperial, one coat, 60; Premier, 50; Colonial, 50 and 10; Royal, 60; Victoria, 45; white, 45; Diamond, 50; Granite, 60 p.c.

CORDAGE—Quotations are as follows: Rope, sisal, 7-16 and larger, basis, $11.25; Manila, 7-16 and larger, basis, $15.75; Lathyarn, $11.25; cotton rope, per lb., 21c.

SOLDER—Quoted at 27c. per pound. Block tin is quoted at 45c. per pound.

VISES — Prices are quoted as follows: "Peter Wright," 30 to 34 14½c.; 35 to 39, 14c.; 48 and larger, 13½c. per lb.

ANVILS—"Peter Wright" anvils are selling at 11c. per lb.

CROWBARS—Quoted now at 4c per lb.

POWER HORSE CLIPPERS — The "1902" power horse clipper is selling at $12, and the "Twentieth Century" at $6.00. The "1904" sheep shearing machines are sold at $13.60.

AMMUNITION, ETC. — Prices are still quoted as follows: Cartridges, Dominion R. F., 50 and 5; Dominion, C. F., pistol, 30; military, 20; American R. F., 33½; C.F., pistol, 5 p.c.; C.F., military, 10 p.c. advance. Loaded shells: Dominion Eley's and Kynoch's soft, 12 gauge, black, $16.50; chilled, 12 gauge, $17.50; soft, 10 gauge, $19.50; chilled, 10 gauge, $20.50. Shot, ordinary, per 100 lbs., $7.25; chilled, $7.75; powder, F.F., keg, Hamilton, $4.75; F.F.G., Dupont's, $5.00.

IRON AND STEEL—Prices are: Bar iron (basis), $2.50; Swedish iron (basis), $4.75; sleigh shoe steel, $2.75; spring steel, $3.25; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $9.50; Jesson, $13.00.

SHEET ZINC — The price is now $8.50 for cask lots, and $9.00 for broken lots.

PIG LEAD—The price has been advanced to $5.60 per cwt. in small lots with concessions for large quantities. Higher prices are expected.

AXLE GREASE—"Mica" axle grease is quoted at $2.75 per case, and "Diamond" at $1.60.

BLACK IRON PIPE—Quotations are: ¼ inch, $2.45; ⅜, $2.85; ½, $3.15; ¾, $4; 1, $5.75; 1¼, $7.85; 1½, $9.40; 2, $12.90.

GALVANIZED IRON — Quotations are: Apollo, 16 gauge, $3.90; 18 and 20, $4.10; 22 and 24, $4.45; 26, $4.40; 28, $4.65; 30 gauge or 10¾ oz., $4.95; Queen's Head, 24, $4.65; 26, $4.65; 28, $4.90.

TIN PLATES—We now quote as follows: IC charcoal, 20 x 28, box, $9.50; IX charcoal, 20 x 28, $11.50; XXI charcoal, 20 x 28, $13.50.

TERNE PLATES—Quoted at $9.00.

CANADA PLATES—Prices have been steady since the recent decline. We quote: Canada plate, 18 x 21, 18 x 24, $3.15; 20 x 28, $3.40; full polished, $3.90.

BLACK SHEETS—Prices are: 10 to 16 gauge, 100 lbs., $3.50; 18 to 22, $3.75; 24, $3.90; 26, $4.00; 28, $4.10.

PETROLEUM AND GASOLINE — Prices are quoted as follows: Silver Star, per gal., 21c.; Sunlight, 22c.;

Eocene, 24c.; Pennoline, 25c.; Crystal Spray, 24c.; Silver Light, 22c.; gasoline, 70-72 (engine), 25½c., in barrels f.o.b. Winnipeg.

PAINTS, OILS AND TURPENTINE—Mixed paints are being generally advanced owing to the high price of lead and oil. This week's quotations are as follows: White lead, pure, $7; bladder putty, in bbls., 2½c.; in kegs, 3¾c.; than barrel lots, 92c.; linseed oil, raw 64c.; boiled, 67c.

WINDOW GLASS—We quote: 16-oz. O.G., single, in 50-ft. boxes—16 to 25 united inches, $2.25; 26 to 40, $2.40. turpentine, pure, in barrels, 97c.; less 16-oz. O.G., single, in 100-ft. cases—16 to 25 united inches, $4.00; 26 to 40, $4.52; 41 to 50, $4.75; 50 to 60, $5.25; 61 to 70, $5.75. 21-oz. C.S., double, in 100-ft. cases—26 to 40 united inches, $7.35; 41 to 50, $8.40; 51 to 60, $9.45; 61 to 70, $10.50; 71 to 80, $11.55; 81 to 85, $12.60; 86 to 90, $14.75; 91 to 95, $17.30.

IMPROVEMENT IN TINNERS' SHEARS.

W. J. Hancock, Freeland, Colo., has secured a patent which has reference to tinners' shears or such as are employed for cutting sheet metal or the like of the type in which the edges of the cutting-blades meet or close on a plane extending to one side of the pivot for the blades, thus to derive an increased leverage for the blades when manipulated through the medium of their rigid handles and to cause the latter to be brought to the outer face of the work operated upon by the shears.

BINDER TWINE SEIZURE.

A seizure of binder twine has been reported from Manitoba which has a somewhat continuous history. Some weeks ago a large quantity of twine imported from England was seized in Montreal, having been found short of the guaranteed length. In view of the demand for twine so near the beginning of the harvest, three-fourths of this consignment was allowed to go forward for consumption on condition that it be retagged so as to show the exact length of twine in each ball. This stipulation was evidently ignored, as the twine just seized in Manitoba by Inspector Haycock is a portion of the Montreal consignment, but bears only the label which led to its seizure in the first place.

PAINT FOR SALE

100 GALLONS PAINT—Well assorted colors, manufactured by a first class Paint Co. Full information apply to Box 217, Port Hope.

DISSOLUTION OF PARTNERSHIP

We, Fred. B. Hope, of the town of Toronto Junction in the County of York, hardware merchant, and Frank A. Noden, of the said Town of Toronto Junction, hardware merchant, the sole members of the firm of "Hope & Noden," heretofore carrying on business as hardware merchants at Number 2 Dundas Street East, Toronto Junction, under the style of "Hope & Noden," do hereby certify that the said partnership was on the twenty-third day of June A.D. 1906, dissolved by mutual consent.

Witness our hands at Toronto Juction, this ninth day of July A. D. 1906.

IDEAS FOR THE INDUSTRIOUS

THE WAY TO BUY FREEDOM.

By Arthur Brisbane.

In the days of slavery an unusually intelligent negro would be permitted to buy his freedom. The master realized that the slave, working free, with some incentive, would produce much more than under compulsion, and he would arrange to sell the slave his own time for so much per day, or sell him the right to buy his freedom absolutely.

What would you think of a negro who in those days would have refused the chance of freedom?

You would say that the man was made to be a slave, and he ought to be a slave.

But do you realize that when you fail to save money you are refusing a chance to buy your freedom?

Are you a free man when you don't know where the money will come from to take care of your family or yourself the week after next?

Are you a free man when you don't own a foot of the surface of this earth, which men buy and sell to each other?

Are you a free man if you haven't accumulated and saved that which makes you independent of other men?

Do you imagine that having your body owned by a man is so very different from having your time and your future owned?

Make up your mind that you will start in to buy your freedom.

We would not suggest to any man that he should free himself from wage dependence in order to be idle. If we believed that a man would accumulate money enough to let him do nothing—and then do nothing—we should much prefer he never might save money. Every man should work, and want to work, as long as there is strength and energy in him.

But it is also true that every man should be in a position to do the best work that offers. He ought to be in a position to seize a good opportunity. He should be in such a position that if duty told him to he could devote himself to the welfare of others, to working for his fellow-men, instead of working for ever for his breakfast, luncheon, dinner and bed.

Money is crystalized labor. The money that you have saved up is all that you have to show materially for the efforts of your past life.

What has become of the money—little or much—that you have received in the past?

It has gone into your stomach, in pleasure, in clothes, unless you have it to show now. Of course, if you have really spent it as you got it for a family that needed every shilling, all honor to you.

But how many men and women can truthfully say that? How many can deny that if they had the will power they could save something and still do their duty?

Remember that this resolution to save means not only the accumulation of money, but the formation and strengthening of character.

Nine times out of ten the man who begins to save stops some kind of foolishness. Economy means giving up something, and the wise man usually manages to give up that which is bad for him. When you begin to save you begin, as a rule, to sleep longer, to drink and smoke less, to waste less time among unprofitable friends.

The saving of money not only means independence in the future, but it means better use of time in the present.

STOREKEEPING AS A CAREER.

Technically, the terms storekeeper and merchant are analogous, but commercially and practically speaking they are different. In trade the wholesaler and great retailer commonly are known as merchants, while the owner or keeper of a retail store of moderate size, located either in the large city, in the small city, or in the country town or village, commonly is known and classified as a storekeeper. Perhaps the best definition of storekeeper is "small retail merchant."

There are few callings more certain than that of the storekeeper, says the New England Grocer. If he understands the fundamental principles of business, he is certain of a livelihood and is reasonably exempt from failure, provided he is satisfied with a moderate income and does not overspread in business or in living. Most of the storekeeping failures are due to marked inability, extravagance, carelessness, inattention or an attempt to do a larger business than the field warrants. Almost any boy of average ability and good habits who is willing to work and is reasonably cautious can become a successful storekeeper.

The Best Fitted Boy.

The boy best fitted to be a good storekeeper shows, even at an early age, a natural trading propensity. The sharp boy is likely to fail. No matter how much dishonesty pays, or seems to pay, in general business, it is essential that the storekeeper be honest. The customer he makes to-day is a customer he has to-morrow. The bulk of his trade is permanent and not transient. Sharp practice of any kind, although it may pay under certain large city conditions, is sure to be fatal to the success of local storekeeping. The storekeeper comes in direct contact with most of his customers. He knows them socially as well as in a business way. His personality counts as much as does his store. He is part of the goods he sells, and he must keep himself, as well as his goods, in good condition.

Be a Good Citizen.

A common school education is essential, and the boy should graduate from a high school, if possible. A college education will do no harm. Such training is likely to do him lasting good, but it hardly can be considered necessary. The world never forgets the good citizen. The world immediately forgets the man of money only. Go through our "Who's Who in America," and other books of men of mark, and not one-tenth of one per cent. of those registered as worthy of having their names printed there are men who are known for their money.

Storekeeping should be encouraged We need more small stores and fewer big ones. We need more men in business for themselves and masters of themselves. We need fewer salaried men and wage-earners and more men who, although at the head of their business, do part of the direct work themselves. I would advise every boy, whether he be of the city or of the country, who does not have a pronounced love and a recognizable ability for some professional calling, seriously to consider becoming a storekeeper and adding himself to the ranks of common responsibility.

YOU MUST "GRIP" THE DAY'S WORK.

Two dangers threaten every executive. He can get so far away from the blood and bones of his business that he loses his grip on the day's work. Or he can hug petty routine, department matters, so tight that the big needs and opportunities romp by unobserved. The sheriff's flag marks the end of both courses. The way of success lies between.

Clamp down the line between oversight of your business and too close attention to details. Get the work done, but keep time to think and plan.

Every department of your factory or store needs you six days a week, says System. Not your bodily presence so much as your personality—the conviction that the slightest slump in sales, output, quality of product will bring the chief pounding down to find the sticking point and fix the blame.

The only way to hold this belief in you at its legitimate work of earning profits is to keep in touch—to know your business.

You cannot do this by looking over your balance sheet once a month at a weathered-oak desk in the front office. You want detailed, bed-rock facts and first-hand news of what is happening at your lathes, your counters, your shipping room—down on the firing line where profit and loss never quit quarreling.

TOO TRUTHFUL.

Yeast—He says he believes there are as big fish in the sea as ever were caught.

Crimsonbeak—It's evident he's no fisherman.

OUR LETTER BOX

Correspondence on matters of interest to the hardware trade is solicited. Manufacturers, jobbers, retailers and clerks are urged to express their opinions on matters under discussion.

Any questions asked will be promptly answered. Do you want to buy anything, want some shelving, a silent salesman, any special line of goods, anything in connection with the hardware trade? Ask us. We'll supply the necessary information.

Crown Raisin Seeder.

The St. Mary's Hardware inquires the name of the maker of the Crown raisin seeder? Can anyone furnish the information?

Gun Repairs.

Cleland Bros., Meaford, asks for the name of a practical gunsmith doing repair work at Toronto.

Alex. Johnston, 494 Eastern avenue, Toronto, makes a specialty of this class of work.—Editor.

Smoke Consumers.

La Compagnie Martineau, Quebec City, asks for the name of a reputable manufacturer of smoke consumers.

The Jones Underfeed Stoker Co., Montreal and Toronto, have a system which is meeting with considerable success.—Editor.

Ornamental Iron Fencing.

The Northern Engineering & Supply Co., Fort William, wish to get in touch with manufacturers of ornamental iron fencing.

The Canada Foundry Co., Toronto; Dennis Wire & Iron Co., London; Metallic Roofing Co., Toronto; Metal Shingle & Siding Co., Preston; Luxfer Prism Co., Toronto; Geo. B. Meadows, Toronto, and Toronto Fence & Iron Works, Toronto, all make this class of goods.—Editor.

TRADE INQUIRIES.

Correspondents desiring to get in touch with any of the firms referred to should quote the reference number when requesting addresses. For information write to Superintendent of Commercial Agencies, Department of Trade and Commerce, Ottawa.

1109. Agent.—A large Leeds engineering firm manufacturing all descriptions of cranes, lifting machines, dynamos, elevators, motors, steam boilers and electrical plants, invite correspondence with Canadian buyers, and are open to appoint Canadian firm as sole agent for Canada.

1111. Cranes.—A Yorkshire engineering firm manufacturing all kinds of locomotive, electric, steam, forge and hydraulic cranes, desire to extend their business in Canada, and invite correspondence with Canadian buyers; would also appoint reliable firm as agent.

1112. Machinery.—A Leeds firm manufacturing all descriptions of patent brick, tile, sanitary pipe, retort making machinery, invite correspondence with Canadian buyers.

1113. Iron and steel bars, etc. — A large Yorkshire firm would be pleased to correspond with Canadian firms importing iron and steel bars, rolled and finished shafting, steel rails and wagons.

Western Canada Factory, 797 Notre Dame Ave., Winnipeg, Man.

METALLIC WORKERS APPEAL.

The Metallic Workers' Union have decided in their action against the Metallic Roofing Co., of Toronto, to carry their case to the Court of Appeal. Some time ago the company got judgment against the union for $7,500 for alleged interference on the part of union men with company employes. An appeal against this judgment was entered in the divisional court, but was dismissed. Now the appeal is carried to the Court of Appeal, and will come up when that court opens.

DIED BY THE YARD.

"Hullo, Geordy, what's up, lad?" said an English pitman to his marra one day. "Is your wife deed or what?" "Na, na lad!" said Geordy, "it's worse than that." "Had away lad," said Jackie; "let's hev it. Vivvent ye look se bubbly; tell your morra what yor trouble is." "Oh," said Geordy, "the dog's dead. He swallened the tape measure!" "By! that's narking," said Jackie. "How did he die? By inches, I suppose, eh?" "You're wrang," said Geordy, "for he went roond the back and died by the yard!"

Don't complain that your trade is dull until after you have given a thorough trial to 5 and 10 cent goods—a changing few for leaders that look unmistakably big at 5 and 10 cents—a big variety, frequently renewed and changed about, in some one little or big part of your store expressly devoted to your 5 and 10 cent store on the side.

* * *

Many hardwaremen do not make near as much profit as they might in handling second-hand stoves. There is money in the second-hand business—if you can sell the goods. Take in the old stoves in exchange for new ones, fix them up nicely and sell them to people who will not buy the new goods. Odd time can be put in fixing up the old stoves and ordering repairs for them. An offer to take a customer's old stove in part payment for a new one is about the biggest inducement a dealer can make.

FOUNDRY AND METAL INDUSTRIES

The output of the Cape Breton coal mines this season surpassed all expectations. According to the official statement no less than 67,000 tons of coal have been carried from North Sydney to St. Lawrence ports since the opening of navigation up to Aug. 15, as against 37,500 tons for the corresponding period last year. The company has at work a fleet of twelve vessels and this will be

There are about twenty men at work developing the limestone areas at Irish Cove, N.S. These areas are owned by the Nova Scotia Coal & Steel Co. The limestone is being tested at the furnaces at Sydney Mines, and is said to give fairly good satisfaction. Should it be more entirely so the property will be developed extensively and a large force of men employed.

ZINC AND ITS MANUFACTURE.

In a recent address before the Metallurgical Society at the University of Birmingham, England, Professor Turner said there was no ancient metallurgy of zinc. It was the last discovered of the common metals. It possessed several peculiar properties, and one of the most remarkable at the present time was that it was not chiefly made in America. It was manufactured on a considerable scale in England, largely from British ore.

Zinc was first mentioned by Paracelsus in 1530, so that its history was comparatively recent, but as a matter of fact, it had been accidentally produced earlier on a number of occasions. It was not recognized, however, as a separate metal. In the ruins of Cameros, destroyed about 500 B.C., a girl's bracelet made of zinc was discovered. Up to the end of the sixteenth century zinc was only used on a small scale, and was brought from China and India. In 1625 Glauber knew that zinc could be produced from calamine, which was sometimes nearly white, but was generally colored. Calamine had been used for brass making in Birmingham, where the brass houses that used to stand in Brasshouse Passage were taken down less than a century ago.

Henckel in 1721 was stated to have been the first intentionally to make zinc, and of all western peoples the British first manufactured zinc on a large scale. A Scotchman named Lawson went to China and found out how zinc was made there, and on his return to England works were set up in Bristol in 1740 by Champion, and for some time England was the chief zinc-producing country in the world.

The process of extraction was very costly at first, and zinc sold for as much as ten times its present price. Zinc manufacture was introduced into Belgium by Douy a hundred years ago, and into Silesia by Ruhberg, who had learnt the process whilst on a visit to England. These processes continued side by side with but little improvement until about 1865, when gas-firing was introduced, from which time dated the really modern metallurgy of zinc. The various improvements introduced since then included the extended use of blende as a source of zinc, the more efficient preparation and concentration of ores by magnetic concentrators, oil processes (especially with the recent improvements with the use of the vacuum), and the flotation process by means of acidulation such as was used in the Broken Hill district. After referring to improvements in calcining-furnaces, especially those with multiple beds, and mechanically stirred, Professor Turner described in detail the Merton calciner, which has recently done excellent work with zinc ores. He also described other modern developments such as the introduction of gas-firing, including the use of natural gas, and of hot gas from producers attached to the reducing furnaces.

It was the introduction of natural gas in the Kansas industry that had brought the United States so much to the front in zinc manufacture in recent years. Professor Turner said that although he was very much impressed with the order, economy, and skill displayed in Belgium, he felt that the modern process of making zinc was not the best.

SUCCESSFUL S.W.P. AGENTS

Among the many successful agents of The Sherwin-Williams Paints in Canada is the firm of H. H. Otton & Son, Barrie, Ont. These well-known and progressive hardware men have always maintained a splendid reputation for giving the best value, and it was in line with this policy that they put in a stock of S. W. P. several years ago. Their paint business has made that time wonderful strides.

Mr. H. H. Otton.

The illustration below shows an interior view of this firm's store and their well arranged paint department. The display is neat and attractive and their large paint stock assembled conveniently to care for the demands of their trade.

The following letter from H. H. Otton & Son explains their success in handling paints:

"We started several years ago to sell S. W. P. and we believe our trade today has increased threefold. We have a great deal of confidence in the goods and it is a pleasure to sell them. In fact, we know of no better proposition in paint selling than S. W. P. Every can sold helps sell another.

"We take pleasure in recommending it to every dealer who does not already handle it and we speak with confidence, that as sure as a dealer puts in a stock of S. W. P. and uses the helps that are given by the Sherwin-Williams Co. to their agents, he will increase his business generally.

Mr. F. W. Otton.

The experience of these agents is the experience practically all S.W.P. agents. The Sherwin-Williams Co. manufacture the best paints but they not only give their agents the advantage of the best advertising helps in selling the goods. In co-operation with the dealer they go out after the trade and get it—and their products keep it. There is no "slack season" with the agent who takes advantage of their strong advertising campaigns.

The Sherwin-Williams Agency Proposition is the best ever offered the merchant. Write today to The Sherwin-Williams Co., 639 Centre St., Montreal, Que., for full particulars, if you want a better paint business.

PAINT, OIL AND BRUSH TRADES

IMPORTANT PAINT CHANGE.

It is announced this week that the Francis-Frost Co.'s entire business and plant has been amalgamated with that of Benjamin Moore & Co., New York, the latter firm being known to the Canadian trade as manufacturers of Muresco Wall Finish, for which the Francis-Frost Co. have acted as Canadian agents and have developed a very large sale. The announcement comes as a surprise to many who have noted the rapid development of the Francis-Frost business and have known of their enterprise in arranging to vacate their premises on Queen street east, Toronto, to locate in the new $30,000 factory building now in course of erection at Toronto Junction.

While the firm name of the old company will be dropped and the business carried on in future under the name of Benjamin Moore & Co., Limited, the management will remain in the hands of Mr. W. G. Francis, formerly president and general manager of the Francis-Frost Co. Mr. Francis will also be treasurer of the new company, Benjamin Moore of New York being president, and Andrew Caldow, who has represented Farquhar & Gill, a Scotch firm, in Canada, during the past three years, will be vice-president, and A. S. Lindsay, formerly secretary-treasurer of the Francis-Frost Co., will continue as secretary under the new regime.

W. G. FRANCIS, Toronto
General Manager and Treasurer of the new Benjamin Moore & Co. business.

In addition to their connection with the Toronto enterprise, Benjamin Moore & Co. have branch offices at Chicago and Cleveland, in addition to their New York headquarters. The factory at Toronto Junction will be equipped with special machinery of the latest design, Ark Brand Paint continuing to be the leader amongst the products of the factory. The manufacture of Muresco Wall Finish will also be undertaken, however, the demand for this line having grown to such an extent that it was necessary to undertake its manufacture in Canada.

The personel of the new company is particularly strong, Benjamin Moore, the president, having had a wide experience in the paint trade in the United States, and having worked himself up from the bottom rung into an important position in the paint manufacturing industry. Mr. Caldow, the vice-president, is a young Scotchman with a thorough knowledge of the paint, oil and varnish industry. He will devote his attention to the sales end of the business, and his three years' experience in introducing Farquhar & Gill's Enamelette on the Canadian market will aid him materially in the more important work he has now undertaken. Messrs. Francis and Lindsay need little introduction to the Canadian Paint trade, their successful work in building up the Francis-Frost Co. to the high position it has attained being a sufficient guarantee that the same enterprise will be instilled into the new expansion resulting from the amalgamation of the New York and Toronto companies.

In speaking to Hardware and Metal, Mr. Caldow aptly referred to the trinity of strength in the new combination, as follows: "Mr. Moore has the American experience, and Mr. Francis the Canadian enterprise, while I have the British training." With this combination there can be no question about the continued progress of the Francis-Frost business under the new arrangement.

SLAVERY IN TURPENTINE FIELDS

Some sensational stories have been current during the past month as to the conditions under which turpentine is gathered in Florida. It is said that immigrants have been persuaded to go there on promises of good pay, and are now living in a condition of absolute slavery. The men are made to live in huts guarded by negroes, and when they demand their wages they are told that they owe their employers for board far more than the sums they have earned.

PAINT AND OIL MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, Sept. 21, 1906.

There has been great activity in the local markets this week, and white lead products have advanced from 25c. to 50c. per hundred pounds. This is owing largely to the same causes as were mentioned in our last report, that is, the continued advances in pig lead at the places of production.

Red lead, orange mineral and letharge have all responded to the advance, and have gone up in about the same proportion.

Linseed oil is hardly so strong as last week, and prices may be shaded for good round lots. Turpentine keeps firm, without any particular feature.

A marked change has come over the paint and color trade and orders are pouring in rapidly. A good lively output is anticipated, from now until Christmas time. Hardwaremen would do well in looking forward and ordering their requirements before the inevitable "last boat" rush.

LINSEED OIL—The following prices are subject to shading, in the case of large orders: Raw, 1 to 4 barrels, 52c.; 5 to 9 barrels, 51c.; boiled, 1 to 4 barrels, 55c.; 5 to 9 barrels, 54c.

TURPENTINE — We still quote as follows: Single barrel, 86c. per gal.; two barrels or over, 85c. per gal.; for smaller quantities than barrels, 5c. extra per gal. is charged. Standard gallon is 8.40 lbs., f.o.b. point of shipment, net 30 days.

GROUND WHITE LEAD—We quote: Best brand Government standards, $6.50 to $6.75; No. 1, $6.15 to $6.40; No. 2, $5.80 to $6.15; No. 3, $5.55 to $5.80, all f.o.b. Montreal.

DRY WHITE ZINC— The market remains unchanged at following prices: Red seal, 7c. to 8c.; French V.M., 6c. to 7c.; Lehigh, 5c. to 6c.

WHITE ZINC (ground in oil) — We quote: Pure, 8c. to 9c.; No. 1, 6½c. to 7½c.; No. 2, 5¼c. to 6¼c.

PUTTY—Our quotations are: Pure linseed oil, $1.75 to $1.85; bulk in barrels, $1.50; in 2-lb. irons, $1.80; in tins, $1.90; bladdered putty in barrels, $1.75.

ORANGE MINERAL—We quote as follows: Casks, 8c.; 100-lb. kegs, 8½c.

RED LEAD—In common with all lead products this line continues very firm. We still quote: Genuine red lead in casks, $6; in 100-lb. kegs, $6.25; in less quantities at the rate of $7 per 100 lbs.; No. 1 red lead, casks, $5.75; kegs, $6, and smaller quantities, $6.75.

GUM SHELLAC—Prices remain unchanged as follows: Fine orange, 60c. per lb.; med. orange, 55c. per lb.; bleached shellac (white) 65c. per lb.

SHELLAC VARNISH — We quote: Pure white, $2.90 to $2.95; pure orange, $2.70 to $2.75; No. 1 orange, $2.50 to $2.55.

MIXED PAINTS—Prices range from $1.20 to $1.40 per gallon.

CASTOR OIL—We still quote as follows: Firsts in cases, 8 1-2c.; in barrels, 8c.; seconds in cases, 8c.; in barrels, 7½c.

REFINED PETROLEUM — We quote as follows: American water white, 17c.; Canadian prime white, 15½c.; astral, 20c., ex warehouse.

GASOLINE—The ruling quotation at present is 24c. in bbls.

BENZINE—There is nothing new this week and we are still quoting 20 1-4c in barrels.

WINDOW GLASS—A brisk turnover is the experience of the jobbers, and importers are booking large orders for delivery before the close of navigation. We quote: First break, 50 feet, $1.85; second break, 50 feet, $1.95; first break, 100 feet, $3.50; second break, 100 feet, $3.70; third break, 100 feet, $4.25; fourth break, 100 feet, $4.45; fifth break, 100 feet, $4.70; sixth break, 100 feet, $5.25. Diamond Star: First break, 50 feet, $2.30; second break, 50 feet, $2.50; first break, 100 feet, $4.40; second break, $4.80; third break, 100 feet, $5.75; fourth break, 100 feet, $6.50; fifth break, 100 feet, $7.50; sixth break, 100 feet, $7.50; seventh break, 100 feet, $8; eighth break 100 feet, $9. Double Diamond: First break, 50 feet, $3.45; second break, 50 feet, $3.75; first break, 100 feet, $6.75; second break, 100 feet, $7.25; third break, 100 feet, $8.75; fourth break, 100 feet, $10; fifth break, 100 feet, $11.50; sixth break, 100 feet, $12.50; seventh break, 100 feet, $14; eighth break, 100 feet, $16.50; ninth break, 100 feet, $18; tenth break, 100 feet, $20; eleventh break, 100 feet, $24; twelfth break, 100 feet, $28.50.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, Sept. 21 1906.

The expected increase in white lead, as noted in these columns, has come, the increase being generally about 25 cents per hundred pounds, but in some cases a little higher. A quarter of a cent advance has also been made on dry white lead, red lead, litharge and orange mineral. The advances made in pig lead have been largely responsible for these advances. Turpentine has dropped a cent this week. There have been different movements in turps during the last few days, but the general tendency shows

And CELEBRATED
English Varnishes
of CHAS. TURNER & SON, LONDON.

THE AUTUMN

is presumably the BEST TIME to paint. After the first appearance of cold weather the flies, like the proverbial ANGELS' VISITS, become "FEW and FAR BETWEEN." The clouds of dust cease, and the absence of muggy, steamy weather facilitates paint drying, and one is in a jolly mood to wield the brush !

Take an hour in the PAINT and VARNISH department and note in your "WANT BOOK" deficient lines of DRY COLORS, COLORS IN OIL, COACH COLORS, WHITE LEAD, WAGGON PAINT, WOOD STAINS, HOUSE AND CARRIAGE VARNISHES, BUGGY and SLEIGH paints, READY-MIXED PAINTS, especially the FLOOR PAINTS. Now turn to BARN PAINT, STOVE PIPE VARNISH, ALUMINUM AND GOLD PAINT, Look into ASBESTOS STOVE LINING, KALSOMINE, and don't forget the PUTTY.

One or **two** lines should be singled out and pushed **every day** by what is called in England "the **introduction method.**" This means: after a customer has made an ordinary purchase, you tactfully and "with winning grace" show him a small tin, say, of the **Canada Paint Company's aluminum paint,** and remark, "Have you seen our **silvery aluminum paint ?**" Show it off by painting a few strips of stove pipe iron. **Don't** be too obtrusive, but enlarge upon its merits. Now hand out a **C. P. Co.'s liquid paint folder** and sweetly invite the customer, him or her, to "**come again !**" Change your specialties **each day,** or at least **every other day.** Keep a **bright look out** for **casual telephone orders,** and make a list of your **largest regular buyers,** and call them up, at least **once a week,** for "**anything on the list, please ?**"

Having done all this, **mail a nicely assorted** order to where it will be **appreciated,** that is to say to

THE CANADA PAINT COMPANY LIMITED

some weakness at present. Linseed oil is also down a cent. The English market has shown a slight advance, but domestic consumption is light, hence the decline.

WHITE LEAD — Ex Toronto, pure white, $6.55; No. 1, $6.17½; No. 2, $5.80; No. 3, $5.55; No. 4, $5.30 in packages of 25 pounds and upwards; 1-2c. per pound extra will be charged for 12 1-2 pound packages; genuine dry white lead in casks, $5.40.

RED LEAD—Genuine in casks of 500 lbs., $5.75; ditto, in kegs of 100 lbs., $6.60; No. 1 in casks of 500 lbs., $5.75; ditto, in kegs of 100 lbs., $6.

DRY WHITE ZINC—In casks, 7c.; in 100 lbs., 7 1-2c.;No. 1, in casks, 6c.; in 100 lbs., 6 1-2c.

WHITE ZINC (ground in oil)—In 25-lb. irons, 8c.; in 12 1-2 lbs., 8 1-2c.

SHINGLE STAIN—In 5-gallon lots, 75c. to 90c. per gallon.

PARIS WHITE—90c. to $1 per 100 lbs.

CRUDE PETROLEUM— We quote: Canadian, $1.32; Pennsylvania, $1.58; Ohio, 96c.

PAINT WAREHOUSE ROBBED.

Alexander & Son's paint warehouse, Adelaide street, Toronto, was robbed Sunday night and a quantity of paint and white lead carried off.

PAINT FOR GUTTERS.

Put all old paint skins, cleanings of buckets, siftings and pieces of dry putty, into an old iron kettle with raw oil and boil until all is dissolved. Then add fine dry sand until the mixture is as thick as will spread under the brush. Apply quite warm—a heavy coat. When dry it will form an enamel like granite, and can be colored to match the cornice. If properly prepared this paint should be as smooth as glass.

PROPOSED PAINT PROJECT.

A. W. Poole, of the Hammer Paint Company, St. Louis, Mo., was a visitor to Montreal and Toronto during the past fortnight looking over the Canadian field with a view to introducing his company's tinted white lead on the Canadian market. Arrangements may be made to manufacture in Canada, the heavy duty making it difficult to import. Poole's Paint Pigments, a paste ready to mix with oil at a ratio of one gallon of pigments to two of oil, may also be made here. Mr. Poole is a young Canadian from Brockville, and for some time was with the Sherwin-Williams Company at Cleveland.

GASOLINE FIRE EXTINGUISHERS.

A gasoline fire may be extinguished with flour, sand, or earth, but water should not be used. Some users of gasoline find it well to hang a bottle containing about a gallon of ammonia from the top of the tank or room containing the gasoline, by a string so that if the gasoline takes fire the bottle will be broken with the fall, releasing the ammonia, and promptly putting out the burning gasoline.

TO CLEAN BRASS SIGNS.

Make a mixture of one part nitric, and one part of sulphuric acid in a stone jar or crock, having also ready a bucket of fresh water and a box of sawdust. Dip the article into the acid, or, if too large to go into the crock, wash the brass with a swab or brush, then dip into the water, after which dry with the sawdust. This will make the brass brilliant. If the brass is dirty, then clean it off with strong sal-soda water.

BLACK CRAYON FROM LAMP-BLACK.

Ordinary lampblack is placed in a strong linen bag, and pressed between the hand, then filled up and pressed again, until the bag is full, after which the bag is placed in a press and pressed slowly, so that the bag does not burst. When a hard cake has been formed, the bag is cut away, and the mass is still further compressed between the heated press plates until the screw will not turn any longer. The resulting cakes are hard and resonant. They are next cut into small crayons with a fine saw, and these are placed in an iron vessel, covered with coal dust, and calcined until no more fumes are given off. When cold, they are taken out, scraped clean with a knife and burnished; but the appearance will be finer if this has been done before calcining. This last-named operation is performed in order to expel the empyreumatic substances that would otherwise impair the marking properties of the crayons.

Little Sermons on Advertising

Delivered by John C. Kirkwood.

INSTRUCTIVE ADVERTISING.

When a man opens his mouth to talk business, he should say something. To merely mention his name; or to show a picture of his factory, and say "That's my factory;' or to recite a list of the things he has to sell, isn't likely to sell goods. Think of your salesman going into a man's store and shouting:

"William A. Carter, representing T. Robertson & Co., Tinware, Halifax."

Do you think he will get much of an order? Why, he has not even asked for business.

Yet one sees many advertisements that do not say a single thing except to state the name and address of the advertiser.

Or again, suppose William A. Carter should say, in addition: "Tin pails, coffee pots, pie-plates, and strainers," would it improve things much?

The salesman who wants to sell goods nowadays has to have more than a name and a price list. There are too many people calling on a man in these times to coax for orders, for the order to go to the man with no better reason or an order than his name, his house's name, and a price list. The merchant likes to buy from the friendly salesman, the man who can take time to cultivate his favor, who shows his interest in the merchant's welfare. Merchants are human. They like to have a hand-shaking acquaintance with the men who sell them goods. And merchants are business men, as well; they want to be assured of the quality, the value, the selling-power, and the selling points of the goods they are asked to buy.

The advertisement is a salesman and should talk like a salesman. It can contain a hand-shake; it can show an interest in the merchant's business; it can even tell a good story, if it seems worth telling. And it must get down to business, it must persuade, and quote, and explain. It may have to do some arguing. It may have to show the merchant how to sell the goods, teach him about the goods, and thus fit him and his staff to talk the line intelligently and forcefully to the consumer.

Such advertisements are read, because they are interesting and instructive; because they contain "meat." They are not wishy-washy, empty, dull; they are full of life, and a merchant responds to such advertisements. He cannot help but yield to their power. He may be slow to respond, but sooner or later he will be convinced that the house that has such an evident interest in him; that "talks business"; that quotes figures and helps him sell the goods, is the house he wishes to buy from.

Such advertising pays both the advertiser and the retailer. Once in a while one comes across a firm that tries to do advertising in this instructive style by pamphlets, circulars, booklets, sent under cover of a wrapper. This way may be effective, but if not backed up by advertising in the merchant's trusted newspaper, pamphlets, circulars, and booklets are likely to miss their mark. A merchant wants the houses he deals with to talk to him in his trade newspaper. He subscribes to this newspaper for news helpful to him in his business, advertising news included. And the firm who neglect to use this medium, or who misuse the space they may have engaged, are failing to use an influence powerful, persuasive, and profitable.

Printer's ink is a good salesman if well used.

BUILDING AND INDUSTRIAL NEWS

HARDWARE AND METAL would be pleased to receive from any authoritative source building and industrial news of any sort, the formation or incorporation of companies, establishment or enlargement of mills, factories, foundries or other works, railway or mining news. All correspondence will be treated as confidential when desired.

Barthelmes & Co. will erect a piano action factory in Toronto.

The St. John Lumber Co., St. John, N.B., will erect new saw mills.

The by-law to give a loan of $25,000 to the Canadian Bearing Co. was passed by Woodstock ratepayers.

The assets of the Good Roads Machinery Co. will be sold at Hamilton by public auction on the 24th.

Applications for 20,000 horse-power have been forwarded to the Hydro-Electric Commission by different municipalities.

The Dominion Carriage Co. have commenced work on their new plant at Toronto Junction. They expect to occupy it by the Spring.

The Bain Wagon Co., Woodstock, will make an addition to their factory of 120 feet in length by 60 in width. Fifty extra men will be employed.

J. O. Walker and others, of Goderich, ask that town for a loan of $20,000 with which to build a carriage factory. The by-law will be voted on at New Year.

Quinlan & Robertson, of Montreal, are the lowest tenderers for the lock and dam to be constructed at St. Andrew's Rapids, near Winnipeg, at a cost of about $500,000.

The London Fence Co. have let the contract for their fence factory at Portage La Prairie to Carr & Woodman for the brick work and A. McLarty for the carpenter work.

The Montreal Power Company will before the end of the year lose the street lighting contract of Westmount, a suburb of Montreal, which is building a municipal lighting plant.

Niagara Frontier Oil & Gas Co., organized under a charter from the State of New York, have been authorized by license from the Ontario Government to carry on the business of oil refiners, etc., in this province. Wm. G. Ryan, of Leamington, will be their attorney.

The Meisel Manufacturing Company, of Port Huron, will erect a large plant at Port Arthur for the manufacture of farm and milling machinery, provided an agreement they have made with the town is ratified by the ratepayers. They will employ not less than 150 men.

The Ontario Oil & Refining Company have been incorporated under Ontario charter with a share capital of $100,000 for the purpose of operating oil wells, gas wells, etc. The provisional directors are C. T. Hobart, G. W. Harrison, T. K. Holmes, J. M. Pike, and James Simon, with head office at Chatham.

Benjamin Moore & Co. have been incorporated under Ontario charter with a share capital of $50,000 for the purpose of carrying on the business of paint manufacturers. The provisional directors are H. B. Johnson, J. H. Whitehead, E. W. Wright, C. W. Thompson and Eva Marie Gardiner, with head office at Toronto.

James A. Moore, of Seattle, has purchased the Irondale plant on Port Townsend Bay, B.C. It is said large deposits of iron ore are contained in the district adjacent to this plant.

The Peterborough Steel Rolling Mills Co. have been incorporated under Ontario charter with a share capital of $200,000, for the purpose of manufacturing iron and steel and their different products. The provisional directors are Wm. Ferguson, Wm. Rudkins, R. J. Munro, A. Dunn, R. H. Fortye, Daniel O'Connell and A. Elliott, with head office at Peterborough.

Both the Nova Scotia and Dominion coal companies are evidently increasing their coal shipments to St. Lawrence ports this year. Last month 25,397 tons of coal from the Nova Scotia Steel & Coal Co. were received at Montreal, as against 19,699 tons in August last year, while from the Dominion Coal Co. 168,360 tons were received, as against 162,805 in August, 1905.

BUILDING NOTES.

Ald. G. H. Halse, Vancouver, will build a large hotel in that city.

Pither & Leiser, Victoria, B.C., will build a five storey block.

Toronto building permits so far this year amount to $9,120,683.

The Bank of Commerce will build a bank building at Nelson, B.C.

P. Burns & Co. will build an abattoir in Vancouver to cost $200,000.

The Verity Plow Co., Brantford, will build an extension to their factory.

The C.P.R. have commenced extensive additions to their docks at Port Arthur.

The Hamilton Distillery Co. will erect a seven storey building to cost $26,000.

The C.P.R. will build a much larger station than was at first proposed at Port Arthur.

The Toronto Public Library Board ask for tenders for the new public reference library.

St. Anne's Anglican church congregation, Toronto, will build a new church to cost $35,000.

In three days last week permits were issued for 39 dwellings at an aggregate cost of $129,250.

VISIT OF CEMENT MANUFACTURERS.

Some few weeks ago, notice was made in our columns of the visit to Canada of Messrs. H. D. Anderson and A. Brooks, directors of the Associated Portland Cement Manufacturers, England. After having visited the Maritime Provinces and New York, Washington, and other eastern cities in the United States, they returned to Montreal for a few days this week and were interviewed by a Hardware and Metal representative at the offices of B. & L. H. Thompson & Co., their Canadian agents.

This is the first visit these gentlemen have paid to Canada and they express themselves as being confirmed optimists as to the country's prospects. Naturally they have been especially interested in building and construction as it is done on this side of the ocean. They were much surprised at the really imposing appearance of some of the New York sky-scrapers, and declared that Londoners have an altogether erroneous impression of this type of building.

Speaking with reference to their own line of business, Mr. Anderson stated that they found the United States very far advanced in the use of cement and concrete. It is being used there in all kinds of building and construction work and the consumption of cement is increasing all the time. Canada is slightly behind the United States in the development of this business, but rapid progress is being made and an improvement is very noticeable over conditions in Great Britain. In the latter country concrete construction has not as yet taken so strong a hold as its deelopment is hampered by by-laws and other restrictions imposed by local authorities. Even so, considerable progress has been made and the use of cement and concrete is becoming more popular every month. English architects are finding it much more necessary to have a knowledge of engineering than at any time in the past.

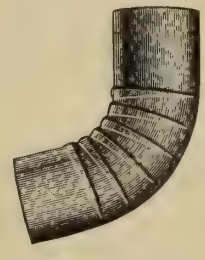
One of the objects Messrs. Anderson and Brooks have in view, in visiting this continent is to study the organization of large commercial concerns. The idea of huge combines is a new one in England, and, indeed, the Associated Portland Cement Manufacturers are the pioneers in this line. Consequently, although there are no combinations in the American cement industry, the directors feel that they can learn ideas of management and system from similar existing corporations in other branches of trade.

"We are only sorry," said Mr. Anderson, "that we have not visited Canada before. We believe that if British business men came oftener to the progressive younger countries they would soon become dissatisfied with their own more leisurely movements."

From Montreal, Messrs. Anderson and Brooks will go right across the continent, visiting the principal Canadian and United States cities, and finally reaching San Francisco where already 500 000 barrels of their cement has been supplied for the work of reconstruction. After a trip south to San Diego they will set out for home via the Southern transcontinental lines.

HARDWARE TRADE PARAGRAPHS.

Business on water coolers and filters is business that can easily be gotten by going after it. It is a profitable business, too, and a tour of the office buildings and some of the residences will be sure to bring some orders these hot days.



One of the advantages of taking a number of side lines into the hardware stock is that the merchant always has something to work on then. If he can't sell anything in the regular hardware department, maybe he can put out a few clocks or watches, or some fine silverware or glassware. There is no hard and fast limit to the hardware stock.

Bath room fixtures of all kinds are good sellers in these Fall days. There are many more of these than there were a few years ago and useful little novelties are constantly being added to the line. There are towel rods and racks, sponge holders, tooth brush holders, tumbler holders, soap holders, bath-tub seats, bath mats, sprays, showers and all kinds of small, useful novelties. They pay a good profit.

Set a good example to your trade by patronizing home industries. Let the local tailor make or the local dealer sell you your clothes, and don't let your wife send to the city for her dress goods. Give your printing to the home printer. If it is too big a job for him he can get it done for you at the same price which you would have to pay, and at the same time make a little commission. By practicing what you preach you are in a position to talk to the farmer on the catalogue question.

There are so many small items in the hardware stock and they are of such different shapes and sizes that system is absolutely necessary in keeping them in order. For this reason there is nothing like the shelving prepared for this purpose. It provides a place for everything and keeps the stock in such shape that it not only saves the time for the clerks but also enables the proprietor to keep a better check on his stock and to avoid running out of any line entirely.

A merchant of long experience recently said that the clerk in the country store got a better training than the clerk in the city. In the small town the young man learning the business has the opportunity to learn all sides and all features of it, while in the city institution he learns only a part of it. In the first case his experience is well rounded; in the other it is one-sided. The young man who learns the country store and its business thoroughly is better equipped to win success on his own hook later on.

Paroid Roofing Will Make Money for You

READ THIS:

Thousands of dealers all over Canada and the United States are making with Paroid one of their most profitable lines. If you are not selling Paroid it will pay you to get our proposition.

Why Paroid is the Best Ready Roofing Made

Paroid is the best quality of ready roofing made. Railroads, manufacturers and farmers all over Canada and the United States are using it in place of shingles, tin, iron and other kinds of roofings, because it lasts longer and costs less.

We make Paroid from start to finish—we make our felt—the most important part of the roofing, while other manufacturers buy their felt where they can get it cheapest. That's the principle reason why Paroid lasts longest. We could not stand back of Paroid if we did not make the felt.

Paroid is **soaked** and coated with a thicker, smoother, more pliable and durable coating than is on other ready roofings. Send for samples of Paroid and compare it with other kinds. You can see and feel the difference.

Paroid is applied with the **only** anti rust-proof cap made. It insures a tight roof. Other roofs often fail because the cap rusts out. Paroid will not crack and break in cold weather. It is adapted for all kinds of buildings and will outlast other ready roofings.

How We Help You

Our advertising plan has doubled the sales of our dealers this year. It helps to sell their other lines, too.

Send for our proposition and we will mail advertising matter and samples to every likely user of roofing in your town. It will not cost you a cent and can't help bringing you orders. We'll send you all the electrotypes and special things you can use. We'll write letters to prospective customers and send our salesman to help you land orders. Write, telegraph or telephone at our expense at any time.

The Fall is the best season of the year to sell roofing. Can you afford not to sell Paroid?

It won't cost you a cent to try out our proposition and we stand back of every roll of Paroid you sell.

Sign your name to a postal to-day and we'll send you full particulars and samples.

Accidental Discharge Impossible—

This is why

True only if it is an

IVER JOHNSON

The positive safety device is the exclusive patent of the Iver Johnson Revolver. See the lever between the hammer and the firing pin? This lever is raised only when the trigger is pulled, receives the blow of the hammer and transmits it to the firing pin. **That's why** you can throw a loaded Iver Johnson against a stone wall without fear—no discharge can possibly follow, as the hammer **never** touches the firing pin. An Iver Johnson never fails when you **pull the trigger** and never "goes off" when you don't.

Iver Johnson Safety Automatic

Prices—Hammer $6.50, Hammerless $7.50.

Iver Johnsons are sold by dealers the world over, or direct from us if your dealer won't supply

Please send for descriptive catalogue, free upon request. It tells all about it.

IVER JOHNSON'S ARMS AND CYCLE WORKS, FITCHBURG, MASS.

TRADE POSSIBILITIES IN BRAZIL.

There is undoubtedly a large market in Brazil for manufactured articles from North America, writes J. A. Johnston, of the American Exporter, who is making an investigation tour of South America. Machinery, hardware, novelties, agricultural implements, automobiles and other vehicles, typewriters, shoes, textiles, drugs and proprietary medicines, food preparations and beverages, perfumes paints, oils and varnishes, furniture, roofing, clocks and watches, steam and electrical specialties and the like.

Germans are doing much of the business that was formerly carried on by British manufacturers. This is due, primarily, to the fact that the German salesman is particularly well equipped in business training, languages and adaptability to secure the confidence of the Brazilians, and secondly, to the fact that German houses will modify their goods to meet the special Brazilian requirements. At the same time, German goods are not well thought of in Brazil and where the proper effort is made American goods will always sell in preference to German goods even at a considerably higher price. For example, nine-tenths of all the electrical machinery in Brazil is American.

A German salesman told me that certain of his goods he never attempts to sell in the larger cities and certain others he disposes of altogether in the cities. The sale of some goods he confines to certain cities and he makes up lines of samples for particular houses. While he usually remains for more than a year, there are certain times when he is away from Brazil for a considerable period. To keep in touch with his customers, however, he prepares lines of samples for each concern with whom he does business.

In case he cannot call upon a particular customer when that customer is making his purchases, he sends him the samples and writes him. This salesman pays a small commission to agents in each of the cities in which he does business. This is to secure their co-operation in closing orders—though he himself solicits the business personally—and their assistance afterward in connection with the delivery of goods, making collections, etc. He has made gradual but radical changes in the discounts to commission houses. The present discount is but one-fifth what was formerly paid. He says, however, that the reduction in discounts has had no appreciable effect on the sales made through commission houses. In other words, his own efforts combined with advertising, create a demand for the goods, part of which is filled through commission houses. He cannot trace any orders due to the initiative of commission houses and for that reason thinks that a nominal discount will bring him practically as much business from commission houses as would a large discount.

It is found in practice that in South America the best results are obtained from a salesman who is paid a liberal salary with a small commission on sales.

CONDENSED OR "WANT" ADVERTISEMENTS.

Advertisements under this heading 2c. a word first insertion; 1c. a word each subsequent insertion.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost **must** accompany all advertisements. **In no case** can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

Where replies come to our care to be forwarded, five cents must be added to cost to cover postage, etc.

ARTICLES FOR SALE.

CORNICE brake and a number of other tinsmith's tools in first-class condition for sale cheap Chesney & Smiley, Seaforth, Ont.

Model 16, Light-Weight 16-Gauge Shotgun. The lightest gun and the lightest load that will do the work, mark the greatest pleasure for the sportsman; the reduced weight of gun and shells to be carried is truly a blessing, readily appreciated by the experienced hunter.

The *Marlin* Model 16 is the only light-weight repeating shotgun made, and so well is it built of selected material, with the special *Marlin* method of boring and choking, that it is actually more effective than most of the 12-gauge guns of a few years ago.

All the features of the famous *Marlin* 12 gauge are present in the Model 16. The solid top and side ejector—the automatic hang-fire safety recoil block—the "Special Smokeless Steel" barrel—the solid matted rib on the frame—the beautiful hang and finish—but each part is made a little smaller, a little lighter and a little neater.

All the parts of the breech and the closed-in action are made of the time-tried *Marlin* steel drop forgings and are very strong.

The barrel is guaranteed to pattern 240 pellets No. 7½ shot in a 30 in. circle at 35 yards. No quail or woodcock can get through a pattern like this, and for grouse, prairie chickens, teal, wood ducks, squirrels, rabbits, etc., this gun is unsurpassed.

Write TODAY for our Catalog which describes in detail the Model 16 as well as the full ***Marlin*** *line of guns—mailed free for six cents in stamps.*

TO ALL DEALERS HANDLING FIREARMS:

The above is one of seven advertisements to be used by the Marlin Company in their 1906 advertising campaign. These advertisements will be inserted in a list of magazines selected for their QUALITY, known to be bought and read by a class of people financially able to buy Marlin repeaters and having a total guaranteed circulation per month of 5,000,000. Estimating five readers to a magazine, this will give a total, for seven months, of 25,000,000.

In addition, Marlin goods are advertised in farm papers, hardware papers, sporting goods papers and in many miscellaneous publications.

In our advertisements we ask for six cents in postage stamps. This means that a person must furnish paper and envelope, a two-cent stamp for mailing, include six cents and take the time and trouble necessary to write us a letter. Our object is to cut out catalog collectors, young boys and girls and people who are not interested enough to invest ten cents and the time and trouble necessary.

We reason that if a person is interested enough to do this, it is worth our while to go after him seriously and earnestly, and on all inquirers answering these advertisements and spending ten cents on us, we spend more than twenty cents.

We send each and every one a 136-page catalog illustrated with hundreds of engravings, having a beautiful cover in colors and containing a large amount of general information interesting and instructive to all shooters whether they use Marlin repeaters or not.

We send also a copy of our 96-page illustrated testimonial book and a personal letter in which we refer them to the nearest dealer that we know of who carries a good stock of Marlin goods and is enterprising enough to follow up an inquirer and try to sell the man a Marlin repeater.

We also send to the dealer the name and address of the party inquiring, thereby putting the dealer and the consumer in direct communication one with the other. We also follow up the customer and urge him to buy through the dealer.

Our advertising campaign each year brings us thousands of inquiries and makes us a great deal of expense and trouble, as you can readily see, but we believe that it pays us and it will pay you if you will take part in it.

If you are interested please write us and give us full particulars as to exactly where you stand on Marlin goods. If you are with us we want to know it and send you some of this business. Write us to-day and tell us whether you want to be on our dealers' list or not.

PLUMBING AND STEAMFITTING

DOMESTIC WATER SUPPLY SYSTEMS

From Plumbers' Trade Journal.

The use of compressed air as a means for delivering water and other liquids is not a new idea. The principle has been understood and used in a small way for ages, but it is only within the last third of a century that it has been successfully applied to water works systems for public and private use.

When these systems were first used, the facilities employed were, of course, very crude, and many difficulties resulted from having to work with apparatus poorly adapted to the purpose. This was particularly true of the storage tanks used in the early systems. The general opinion at that time was that most any kind of a tank that would hold steam or water under 125 pounds pressure would also hold compressed air. This opinion, too, was shared generally by the boiler makers of the country, to whom was entrusted the work of making the tanks, and although some systems might work satisfactorily for a while, others would develop a leak and allow all the air to escape. This, of course, would permit the tank to become waterlogged, and make the job at least a temporary failure.

At this time certain parties were working on the deduction that if one tank could be made air-tight, one thousand could also, although it might require a little better material, a little more brains and work than was put into the average tank, and it was found a very difficult task to convince the boilermakers generally that a tank had to be specially constructed to hold compressed air. This idea has grown and expanded until to-day we have the modern water supply outfits which not only furnish an abundant supply of pure, wholesome water, but they also supply it under sufficient pressure to thoroughly cleanse the sanitary appliances pertaining to the plumbing.

The operation of a pneumatic water works system is not at all complicated, and little or no technical knowledge is required to understand it. The principle is very simple. Take for illustration an air-tight tank in the basement of a house. Run a pipe with a suitable force-pump attached, from the well or cistern, and connect it to the bottom of the tank. Connect another pipe to the bottom af the tank, attach a faucet and pressure gauge to it, run it to the upper floor and attach another faucet. You thus have a pneumatic water works system in its simplest form ready for operation. On beginning to pump, the water is forced into the bottom of the tank, and begins to displace some of the air in it. The air, being confined, must naturally be compressed into less and less volume, and as you keep on filling the tank with water the air begins to exert a pressure which forces the water out of the tank and into the pipes leading from it. You will find that the pressure gauge registers in pounds the amount of pressure in the tank.

The foregoing illustrates very clearly the principles of this system. In recent years important improvements have been made in the apparatus used, but the principle has practically remained the same.

We publish herewith four cuts illustrating the improved system of domestic water works of to-day. For these cuts and for descriptive matter relating to same we are indebted to the Leader Iron Works, manufacturers of the Leader Water Supply Systems, Decatur, Ill. Fig. 1 illustrates a system of modern plumbing arranged for hot and cold water such as is usually installed in a country or suburban home. This system has been designed to deliver water either from a well or cistern that may be located convenient to, or at a considerable distance from, the house.

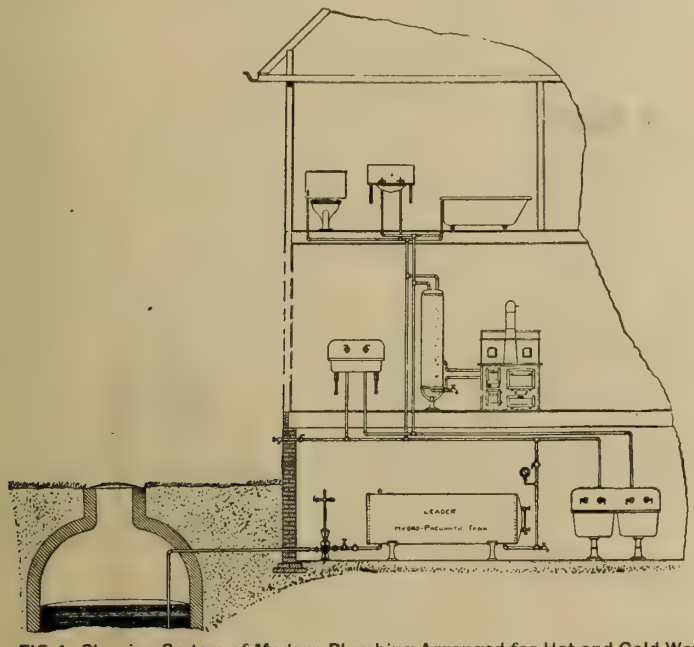

FIG. 1—Showing System of Modern Plumbing Arranged for Hot and Cold Water Designed Specially Where Electric Power is Obtainable.

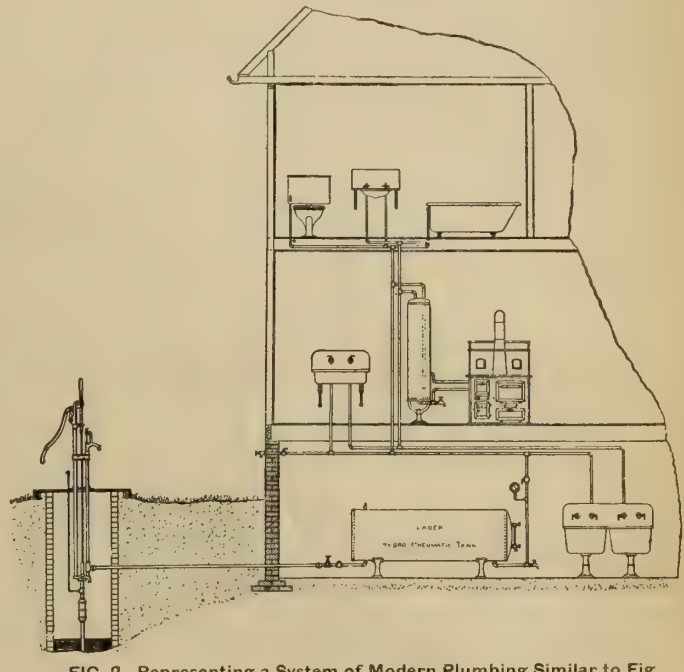

FIG. 2—Representing a System of Modern Plumbing Similar to Fig. Arranged for Common Well or Cistern.

Fig. 2 represents a system of modern plumbing arranged for hot and cold water similar to Fig. 1. The pump will deliver water from either a deep or shallow well, or from a cistern, and is provided with a three-way valve which can be adjusted to supply water either to the tank or at the pump as desired. The pump is usually placed immediately over the well as shown, but can be placed at a considerable distance from it providing the water in the well is not more than twenty-four feet below the level of the pump. The tank may be located in any part of the basement, or buried in the ground outside if desired.

Fig. 3 illustrates a hot air pumping engine connected with a system of modern plumbing arranged for hot and cold water. The engine is designed for pumping water from any source, such

as wells, cisterns, springs, lakes or rivers, and is fitted with burners for either gas, gasoline, wood, coal or kerosene. It is perfectly noiseless in action and can be located either outside or inside of the building. This outfit is very desirable for country homes and for the city buildings where the water pressure is insufficient, or where the quality of the water is unfit for domestic use.

Fig. 4 illustrates a system of modern plumbing arranged for hard and soft water. The hard water is supplied from either a deep or shallow well and is used for sanitary purposes in the house, for watering stock, etc. It is also used for operating a water lift which supplies soft water from a cistern for kitchen, laundry, etc., by means of a smaller pneumatic tank located in the basement. While this system may look somewhat complicated, it is in reality very simple. Being positively automatic, it requires no attention other than the oiling of the windmill. The pump is provided with a hydraulic cylinder which controls the operation of the mill by the rise and fall of the pressure in the hard water tank. The water lift is so constructed that when the pressure in the soft water tank equals the pressure in the hard water tank, the lift will stop working, and will not start again until water has been drawn off and the pressure reduced. In this system where a windmill is not desirable, the system can be operated by a hot-air pumping engine or gasoline engine, and where electricity is available, by an electric motor.

The superiority of the pneumatic water works systems is so well established that a comparison is almost unnecessary. The time honored attic tank with its stagnant water, leaky joints and frozen pipe connections has no recognized place in modern plumbing where health, durability safety and convenience are considered. Its chief recommendation lies in the fact that it is cheaper, and even this is not established, for a copper or lead-lined tank (which is the only kind you can use with any degree of safety) will cost as much as a pneumatic tank of equal capacity. The elevated and tower tank suffer even more by comparison, located as they are out of doors with nothing but the broad canopy of heaven as a shield, exposed to both sun and frost, full of water one day and empty the next. Is it any wonder that they rot out quickly or that they are easy prey for a storm? They are used extensively not because they are satisfactory, but because their users know of nothing better. They have not one redeeming feature when compared with the pneumatic water works system. They furnish no fire protection, the water becomes warm and stagnant in the Summer and freezes in the Winter, and affords no pleasure except it be to the one who is paid to keep it in repair.

These defects are not present in a pneumatic water works system, as the tank and the pipes leading to and from it are located in the basement of your home or building, or are buried in the ground outside. They are surrounded by an even temperature during all of the year and furnish an abundance of cool, sparkling water (for it must be remembered that this water is thoroughly aerated). A pressure of 40 to 60 pounds is higher than is usually furnished in the larger cities and equivalent to a pressure from an elevated tank from 80 to 120 feet high.

It affords ample fire protection and will deliver water through a pipe several miles long if necessary. You can water your stock, wash your vehicles, sprinkle your lawn, keep your garden fresh, supply your kitchen, bath room and laundry with water for domestic and sanitary purposes, and if supplied from a well operated by a windmill or other motive power, you can utilize the pressure to operate a water-lift for pumping soft water, or a water motor for operating a washing machine, sewing machine or fans for keeping your house cool in Summer.

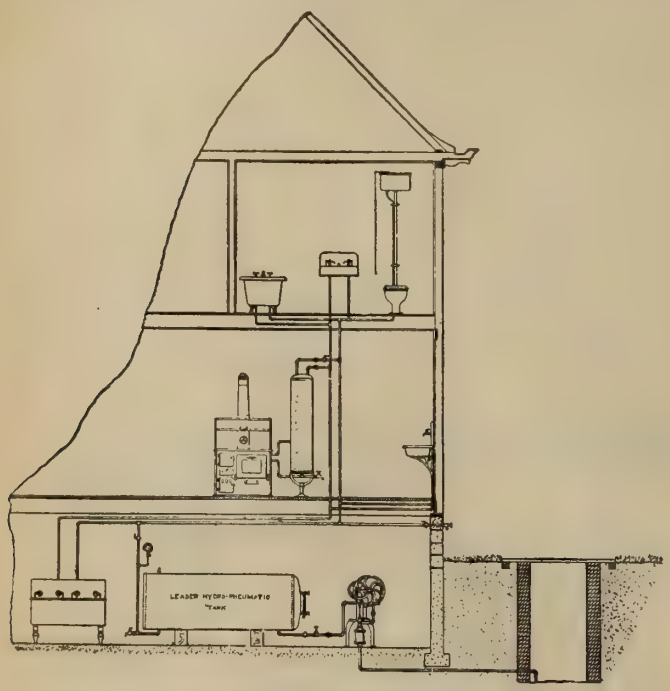

FIG. 3—Hot Air Pumping Engine Connected with a System of Modern Plumbing Arranged for Hot and Cold Water.

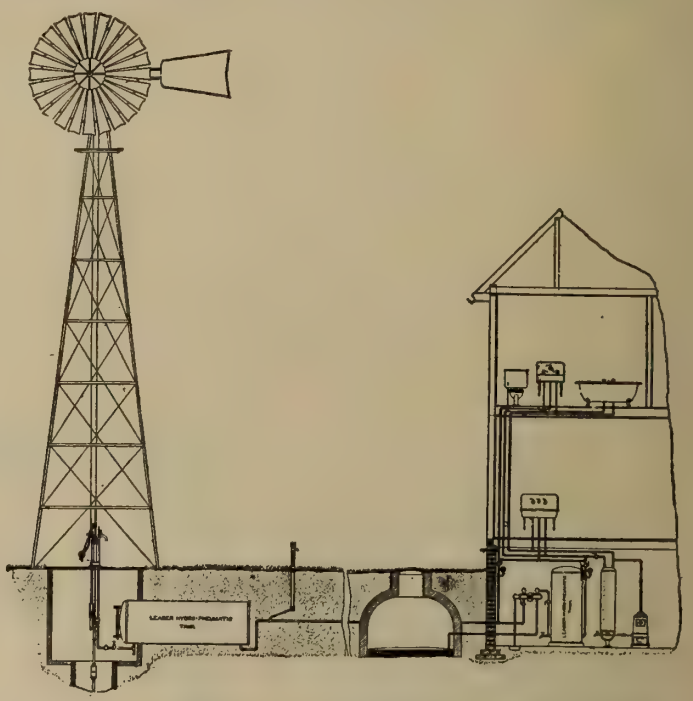

FIG. 4—A System of Modern Plumbing Arranged for Hard and Soft Water.

CLEANLINESS AND GODLINESS IN CHINA.

In the Town of Fatshan, when the birthday of the mysterious idol Saen Kai came round, the inhabitants prepared to celebrate the date with the usual expensive festival and processions. But an opposition party urged that if the money were to be spent at all, it had better be spent in cleaning up the drains in the neighborhood, since, if there should be anything in the western theory of cleanliness, the community would benefit more than by propitiating Saen Kai, who did little to stay the plague, in spite of the festivals in his honor. The opposition won the day, and the money intended for Saen Kai was devoted to the drains instead. A letter from South China reports the people of Canton as praying for a cessation of rain. "The Viceroy himself went to the Temple of the Guardian Angel to pray, as the prayers of the Pun U and Nam Hoi magistrates were not favored by this angel. When he arrived in the temple he found the shrine of this angel not in a sanitary condition, and he fined the temple-keeper £200 as expenses for repairs."

PECULIAR ACCIDENT TO PLUMBER.

A plumber employed by the Otley Gas Company, Otley, England, was recently engaged in laying a new service pipe into a house, and had out a hole through the wall with a chisel. Going into the cellar to knock the chisel back, he caused a spark by striking the tool, and the spark ignited a quantity of gunpowder which was near at hand. A loud explosion followed, and the man was severely burned about the neck and arms.

PLUMBING MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, September 21, 1906.

A big shortage of iron pipe is one of the market features this week. Several sizes are decidedly scarce, and it is more than likely that this will become more and more pronounced from now on. This is essentially the heating season, and thousands of feet of pipe are being called for from every part of the country.

As was expected, the abnormal conditions on the pig lead market have resulted in higher quotations for lead pipe. Discounts have been revised, and the generally accepted quotation is 10 per cent. off list.

Business continues wonderfully brisk, and it is confidently expected that there will be no let up in volume until the close of navigation.

RANGE BOILERS—Sales continue to be lively, and we still quote: Iron clad, 30 gallon, $5; 40 gallon, $6.50 net list. Copper, 30 gallon, $25; 35 gallon, $29.50; 40 gallon, $32 net.

LEAD PIPE — Still another advance has been scored in the primary markets so that producers have been forced to boost prices on lead pipe. We now quote as follows: 10 p.c. f.o.b. Montreal, Toronto, St. John, N.B., Halifax; f.o.b., London, 15c. per hundred lbs. extra; f.o.b. Hamilton, 10c. per hundred lbs. extra.

IRON PIPE FITTINGS—Business is extremely brisk. We give discounts as follows: Discounts on all sizes of nipples up to 6 inch, 67½ to 70 per cent.

IRON PIPE—The scarcity in certain sizes is now more pronounced than before, and with the heating season now in full blast this is likely to be somewhat seriously felt. Our quotations remain as follows: Standard pipe in lots of 100 feet, regular lengths, 1-4 inch, $5.50; 3-8 inch, $5.50; 1-2 inch, $8.50; 3-4 inch, $11.50; 1 inch, $16.50; 1 1-4 inches, $22.50; 1 1-2 inches, $27; 2 inches, $36.50; discounts on black pipe, 1-4 inch, 62 per cent.; 3-8 inch, 62 per cent.; 1-2 inch, 71 1-2 per cent.; 3-4 inch and upwards, 73 1-2 per cent. Discounts on galvanized pipe: 1-4 inch, 47 per cent.; 3-8 inch, 47 per cent.; 1-2 inch, 61 1-2 per cent.; 3-4 inch and upwards, 63 1-2 per cent. Extra heavy pipe of 100 feet lots are quoted as follows: 1-2 inch, $12; 3-4 inch, $15; 1 inch, $22; 1 1-4 inches, $30; 1 1-2 inches, $36; 2 inches, $50. The discount for black pipe is 71 per cent., and for galvanized, 61 per cent.

SOIL PIPE AND FITTINGS — Although the season for these goods is nominally over, shipments of considerable size are still being made. We continue to quote: Standard soil pipe, 50 p.c. off list. Standard fittings, 50 and 10 per cent. off list; medium and extra heavy soil pipe, 60 per cent. off. Fittings, 60 per cent. off.

SOLDER—With tin firmer and lead higher than for many years past, prospects are for early advances. In the meantime we are quoting: Bar solder, half-and-half, guaranteed, 24c.; No. 2 wiping solder, 21c.

ENAMELWARE — Trade continues good, with prices still being quoted as follows: Canadian bath tubs, plate E1, 5 ft., 1st quality, $20.65, special $18.65; plate E11 and E21, 5 ft., 1st quality, $19.50, special $17.15; plate E35, 5 feet, 1st quantity, $24.65, special $22.40. American baths, rolled rim, 5 feet 2 1-2 inch rim, $22.25; 3 inch rim, $29.25. Lavatories, discounts, 1st quality, 30 to 30 and 5 per cent.: special, 30 and 10 to 40 per cent. Sinks, 18 x 30 inch, flat rim, 1st quality, $2.60, special $2.45.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, September 21, 1906.

An advance has been made on soil pipe, the extra ten off which has been given during the past few weeks being taken from the list. This applies only to medium and extra heavy pipe and fittings and makes the discount 65 per cent. on those lines. Lead pipe has also advanced, the discounts being now ten per cent. instead of fifteen. This has been expected for some little time owing to the increasing price of pig lead, as noted in these columns. Solder remains the same, as does also iron pipe. Business has been easing off a little, but a large volume of trade is expected next month, closing out the work which must be done before the cold weather sets in.

LEAD PIPE—The discount on lead pipe has been lessened to 10 per cent. as a result of the increasing price of pig lead. Lead pipe, 8c.

SOIL PIPE AND FITTINGS—Medium and extra heavy lead pipe and fittings are back to their former price, the extra ten having been taken off again. We quote: Medium and extra heavy pipe and fittings, 65 per cent. off; light pipe and fittings, 60 per cent. off; 7 and 8 inch pipe, 10 and 5 per cent.

IRON PIPE—Prices are uniform throughout the trade. We quote: Black, 1-in. pipe, $4.37; galvanized, 1 in. pipe, $6.02. See current market quotations for other sizes.

IRON PIPE FITTINGS — We quote as follows: Cast iron elbows, tees, crosses, etc., 67 1-2 per cent.; cast iron plugs and bushings, 67 1-2 per cent.; flange unions, 65 per cent.; nipples, 75 and 5 per cent.; iron cocks, 60 per cent.; Canadian malleable, 35 per cent.; American malleable, 25 per cent.; malleable unions, 65 per cent.; malleable bushings and plugs, 60 and 10 per cent.; C. I. ceiling plates, plain or N. P., 70 per cent.; C. I. floor, 80 per cent.; hook-plates, 65 per cent.; expansion plates, 65 per cent.; headers or branch tees, 65 1-2 per cent.; ring hangers, black or galvanized, 70 per cent., American list.

GALVANIZED IRON RANGE BOILERS—We quote: 12 gallon capacity, standard, $4.50; extra heavy, $6.50; 18 gallon, standard, $4.75; extra heavy, $6.75; 24 gallon, standard, $4.75; extra heavy, $6.75; 30 gallon, standard, $4.75; extra heavy, $7.50; 35 gallon, standard, $5.75; extra heavy, $8.50; 40 gallon, standard, $6.75; 40 gallon, extra heavy, $9.50; 52 gallon, $11; extra heavy, $14; 66 gallon, standard, $18; extra heavy, $20; 82 gallon, standard, $21; extra heavy, $24; 100 gallon, standard, $29; extra heavy, $34; 120 gallon, standard, $34; extra heavy, $40; 144 gallon, standard, $47; extra heavy, $55. The discount on copper and range boilers continues at 15 per cent.

RADIATORS—A large volume of business is being done, jobbers and manufacturers being taxed to their utmost to fill orders. We quote: Hot water, 50 and 2½ per cent.; steam, 50 and 5 per cent.; wall radiators, 50 per cent.

SOLDER—Solder is keeping pretty even at present, there being no change for some weeks. We quote as follows: Bar solder, half-and-half, guaranteed, 26c.; wiping, 24c.

ENAMELWARE — Quotations are as follows: Plate E1, 5 feet, first quality, $20.65, special $18.65; plate E11, 5 feet, first quality, $19.15, special $17.15; plate E21, 5 feet, first quality, $14.15, special $17.15; plate E35, 5 feet, first quality, $24.65, special $22.90. Fittings extra.

LONDON'S NEW BRASS WORKS.

The Mann Brass Works, under the management of A. W. Mann, formerly traveling salesman for the James Robertson Company, Toronto, and manager of the Canada Brass Works, London, has commenced operations and a very nice looking line of plumbers' brass goods is being placed on the market, the trade mark being the small figure of a man. Mr. Mann's long connection with the plumbing trade should win him a goodly share of the business to be done.

LARGE HEATING JOB.

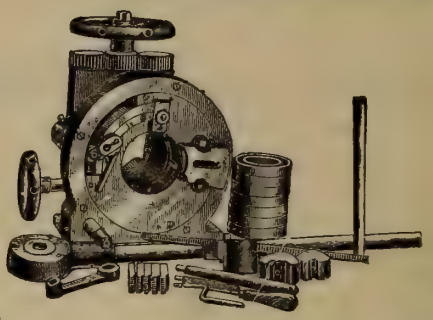
Smith Bros., plumbing and heating engineers, London, are just completing the installation of a heating system in the Tecumseh House, London. It is probably the largest job yet undertaken in Western Ontario, comprising 7,500 feet of radiation and 185 Sovereign radiators being used on the contract. Another feature of the job is the installation of the automatic vacuum system of return heating, an improvement on similar systems, for which the Toronto Furnace & Crematory Company are Canadian agents. An interesting article is promised our readers shortly regarding the work done in the Tecumseh House.

OZONE FOR WATER PURIFICATION.

Various experiments are being made in Europe for pure water supply for cities, one of the most prominent being de Frise's system of employing ozone for the sterilization of water at Saint-Maur, near Paris.

The main facts of this process are contained in a report addressed by Dr. Miquel, chief of the micrographical service of the Mont Souris Observatory, to the sixth commission of the Paris municipal council. Experiments were undertaken with water filtered through sand at various speeds in order to test the extent to which the bacteria present were destroyed by exposure to air containing very slight admixtures of ozone. From 50 up to 100 cubic meters of filtered water were dealt with per hour, and each set of tests lasted for five hours. The filtered water in very many cases contained germs of the bacillus coli, but after the water had been subjected to the de Frise process these bacteria were invariably destroyed. These experiments confirm the results obtained in a previous set of trials carried on during the first three months of 1905. Dr. Miquel reports that the process has been found capable of eliminating a large proportion of the bacteria present in water of various descriptions and of permanently destroying with certainty the germs of bacillus coli, which possess greater resisting power than the Eberth bacillus and the cholera spirillum. The cost of this treatment is stated, in dealing with large volumes, to be about 1½ centimes per cubic meter, say 1½c. per 1,000 gallons.

PLUMBING PARARGRAPHS.



The town of Dalhousie, N.B., advertises for tenders for laying waterworks mains, and other work incident thereto.

The city of Winnipeg asks tenders for the supply of 7,500 feet of 3½-inch cotton rubber-lined hose for the high pressure fire service system.

The Halliday gas well at Chatham, at first reported to be flowing 1,500,000 feet a day, is now said to give from five to eight million feet. The owners are jubilant.

The United Association of Journeymen Plumbers, Steamfitters, Gasfitters, etc., met in the Labor Temple, Toronto, this week. Nearly 300 delegates were present. Mayor Coatsworth and Ald. J. J. Graham extended the city's welcome.

A Certain Sense of Satisfaction

goes with every MERRELL PORTABLE HAND MACHINE, PIPE THREADING and CUTTING MACHINE. We build them that way.

For doing ALL kinds of threading—under ALL conditions—labor trouble and faulty material included—where speed, durability and ease of control count for something, our word to you is to investigate the MERRELL.

Whether it be stationary or portable—hand or power driven—30 DAYS FREE TRIAL must prove conclusively that your choice should be the MERRELL.

This Portable Hand Machine has encased gears, MERRELL standard quick opening and closing die-head, and the latest improved Cutting-off Knife.

Let us tell you more about this machine—The Chasers, Vise and the large range of work covered.

Little Effort Sells It
Because
Little Fuel Feeds It

The Oxford Hot Water Boiler sells easier because of twelve things. Here are three of them! The in-sloped Oxford firepot walls that catch heat other boilers waste. The hollow grate-bars that make the fire burn more air than any boiler ever did before. And the double-deep, bell-flued first section, close above the fire, that actually saves a hundred pounds of coal for every ton the boiler uses.

That isn't just talk,—it is just fact,—fact we can prove to you and you can prove to your customer. If you'd ask we'd prove, too, that the kind of selling-help you get from us is the only kind that makes you sure you'll get all the trade in your town worth while.

Asking costs a two-cent stamp, or even a post card. What might not asking probably cost you.

F. J. C. COX, Winnipeg, Sole Agent for Northwest Provinces.

CURRENT MARKET QUOTATIONS.

Sept. 21, 1906.

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figures being for larger quantities and prompt pay. Large cash buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate.

EVAPORATION REDUCED TO A MINIMUM

is one of the reasons why PATERSON'S WIRE EDGED READY ROOFING will last longer than any other kind made.

Mr. C. R. Decker, Chesterfield, Ont., used our 3 Ply Wire Edged Ready Roofing fourteen years ago, and he says it is apparently just as good as when first put on.

We have hundreds of other customers whose experience has been similar to Mr. Decker's.

Hardware and Plumber—

We have pumps suitable to any demand made upon you by most exacting customers.

Our pumps will do anything that a pump can do, and we will be pleased to give the benefit of many years' experience to any one having pump troubles.

McDougall Pumps are Standard Pumps, and with us it is quality first, last and always, while we ask just as little money as we can get along with.

We have a few catalogues for distribution

Marlin

The .38-55 MARLIN Cartridge is conceded to be the most accurate, as well as the greatest game killer, ever used in a repeater. This size is now loaded with High Power Smokeless powder giving increased velocity, flatter trajectory and greater penetration. MARLIN repeaters have "Special Smokeless Steel" barrels much stronger and harder than the ordinary soft steel barrels.

"Preference without Sacrifice"

Do you know that Dominion Ammunition is enjoying an increasing business at every foreign point where it has been introduced?

The high quality, and satisfaction that **Dominion Ammunition** gives are responsible for this popularity. "Made in Canada" by the Dominion Cartridge Company, has become one of this country's best advertisements abroad.

To-day there is no better ammunition made than Dominion, and it will be to your financial advantage to sell and push our shot gun shells and cartridges.

Do Your Books Show You?

Supposing Smith or Jones comes in when your book-keeper is away to lunch.

Can you open your books off-hand and put your finger on the item you want to know about?

If you can't there is something wrong with the system you use.

* * * * * *

You should be able to find an account in your books as rapidly as your book-keeper.

Your book-keeper merely keeps your books for you.

Then what good are your books to you if they won't show you at a glance where you stand?

Business Systems show you where you stand.

Business Systems always mean an early monthly report.

Business Systems mean simplicity, dispatch, accuracy and satisfaction.

* * * * * *

Your request will bring detailed information by return mail.

The Range They Ask About—

Until you learn what the Imperial Oxford Range really does in the way of selling help for the dealer, you'll never know how easy it is to sell.

Not so much because we advertise the Imperial Oxford so widely, though that helps, of course; but because the women of Canada have found out that the Imperial Oxford actually does what other ranges almost do.

The Imperial Oxford bakes perfectly, because its diffusive oven flue makes faulty baking about impossible. It cooks perfectly, with least fuel and least bother, because it is designed and built to do that very thing.

And the woman who sees its beauty of design, and who once really understands what makes the Imperial Oxford so different from other ranges, will keep on asking for it till she gets it.

If we can show you (and we can) where your profit is better and easier with this range, what reason have you for not knowing the fact, at least.

SELLING STOVES ON EASY PAYMENTS

By H. A. Cole, Chicago, in the National Hardware Bulletin.

Is it practical or not for the average stove dealer to incorporate the easy payment feature in his business ?

The writer says it is not only practical but that if the average dealer does not incorporate this feature he will not have any stove and range business left to speak of in the next few years.

On my desk this morning is my report from one of the best towns in Iowa where the old line dealer is closing out his business and where the easy payment store has practically captured the entire stove business in the community.

It is a patent trade secret among well versed stove men, both manufacturers and dealers, that the stove trade of the country in both cities and towns is rapidly drifting into the hands of dealers who do an aggressive easy payment business.

This proposition together with the competition of the cut price catalogue house which appeals to the close buyer who has the cash, presents a fierce proposition for the average retail stove merchant to meet.

The way to meet it is to take advantage of the experience of those who are making a big success of the stove business and do business along these lines.

A positive advantage lies in the hands of the complete house furnisher from the mere fact that his extension of credit enables the purchaser to supply his entire household necessities.

This advantage is balanced to quite an extent in case of old line dealers by the general prestige and reputation for square dealing which they have with the buying public.

The way hundreds of dealers in the country have either already solved or expect to solve this proposition is to immediately add house furnishing departments to their business, often replacing present departments like the implement business that requires large capital and fails to pay adequate returns.

If the regular stove and hardware dealer adopts the same easy payment plan of selling goods in connection with the stove, refrigerator and gasoline stove business, and goes after the business aggressively, his general prestige above referred to will enable him to retain the trade of the high grade public who buy for cash and at the same time will enable him to hold the trade of that class of the buying public to whom terms of payment are the vital question.

The absolute necessity of the average dealer drawing his trade from the ranks of the entire buying public is in itself an imperative reason for the immediate adoption of this form of business by every stove merchant in the country.

Paying Ability of the Buying Public.

Apply this question to your own individual trade, both cash and credit.

Isn't it a fact that the large bulk of the most desirable patronage comes from the salaried classes who earn from $1.50 a day to $1,500 per year ?

People with such incomes cannot conveniently pay the cost of a stove or range or refrigerator at one time. Their ability to pay one-third or one-fourth of the purchase price and the balance at five to ten dollars per month will not only be a great convenience to them, but the dealer who sells them on these terms will be able to supply an actual want in the household of this customer months or years before the purchaser could supply it on any other basis.

How many merchants even, who read this article, have taken advantage of the easy payment terms themselves in books, sewing machines, musical instruments and furniture ?

The writer well remembers one or two experiences in his own early married career where the terms of payment enabled him to supply the household with a good piano and a quality of furniture that would not have been afforded had they been paid for entirely at the time of purchase.

The fact is, that the average stove merchant of the country has been entirely deceived by reading the ads of the aggressive easy payment house. The glaring headlines "Your Credit is Good, $5 Down and $1 Per Month," etc., have given the trade an idea that the easy payment house furnisher credits every one, good, bad and indifferent, takes any payment down regardless of the amount of the purchase and any payment which the customer chooses to pay.

With such an idea and his own average loose-jointed method of extending credit, it is no wonder that the average dealer has not for a moment considered the easy payment proposition.

Is it not a humiliating fact for the hardware and stove merchants to face in hundreds of communities, old line dealers who have failed to take up these new business plans with the prestige of years and honorable and conscientious dealings behind them, have to acknowledge that some former second-hand dealer who had neither capital nor prestige has captured their stove business and moved out of his second-hand joint into the best location the town affords.

The above conception of the business methods of the easy payment house furnisher is entirely wrong.

How to Extend Credit.

No class of merchants in the United States are, on the average, so careful in the extension of credit. Before credit is granted at all a systematic investigation is made. Certain questions and answers give the desired information and a permanent record of all the points which justifies the credit is kept.

The customer may come in on the strength of a "$5 down and $1 a month" advertisement, and wish to purchase an outfit of one of two hundred dollars.

In nine cases out of ten instead of a first payment of five dollars he will be handled by the dealer in such a way as to secure the first payment of from $25 to $50 up to the very limit of his cash ability, and instead of $1 per month the payment contract will be signed up for $5 or $10, according to the wages and the expenses the customer has to meet.

Every credit extended is thus handled on the basis of the individual customer involved, without reference to the advertisement that brought the customer to the store.

The business policy of the easy payment house has for one of its foundation facts a recognition that it costs money to sell on credit ; that it costs money to collect ; that it costs money to have one stock of goods in the house and one or two on your books ; that no firm can afford to tie up his capital in book accounts often to the extent of losing his own cash discount and sell the goods on the same margin of profit that he makes on the cash customer. Thousands of hardware dealers all over the land persist in giving the same prices on time as for cash, and I will venture the assertion that the average time stove sale of the hardware dealer averages a longer credit than is extended on the easy payment plan.

The easy payment houses of the country get considerably larger profits on the goods sold on time than are asked for the same goods by dealers not selling on payments. They give a substantial rebate to cash purchasers.

The answer of the public to the above business policy of one price for credit and cash sale is seen in every community in the cut price cash stores and the stupendous business built up on cut prices for cash by the catalogue houses, and on the other hand, of the equally startling growth of the houses who make the easy payment terms the main feature of their business.

How to Go Ahead.

For the average stove merchant to incorporate easy payments in his business he will first of all have to take a step that will take his breath to contemplate, namely, mark a straight advance of ten to twenty per cent. on every article that enters into the proposition of easy payments, and this time price must invariably be the price asked every purchaser regardless of whether he turns out to be a time or cash customer.

This is necessary because even though the terms of payment are the vital consideration to most purchasers, they don't want to have the fact rubbed in by having the dealer hold before his gaze the amount he is having to pay for his accommodation.

Another reason for this step is the fact that you will have to retain your hold on your close buying trade, many of whom are now patronizing the catalogue houses, and the strongest card you can play for winning and holding them is the knowledge of their getting a sub-

stantial reduction over the customer who buys on time.

The writer well remembers the trepidation with which he took this step about ten or twelve years ago when in the retail business he made the payment feature an aggressive part of our programme. I anticipated that every customer who was sent in to purchase a stove recommended by a former customer would put up a strong objection to the advanced prices asked for the same article. We only had one or two complaints and had no trouble in handling them.

Any dealer taking this step can be assured further by the fact that his price will still be considerably under the prices asked by the easy payment house.

This will enable the trade to give the cash customer when discovered a substantial reduction from the time price and still maintain the general average of profit which is necessary and reasonable.

This substantial reduction for cash will also do much in our opinion to handle the stove competition of the catalogue house.

The success or failure of the dealer who adopts this plan, however, lies in the credit methods employed.

Look After Payments.

The vital thing after the careful extension of credit and the arrangement of payments is the care with which payments are looked after.

There must be but one credit man in the house, and by the proper use of a dated file it should not take over fifteen or twenty minutes per day to check up every payment that is due on that day, and send a notice to the customer that his payment is in default.

A loose handling of your collection department will strand any one going in the payment business, as the minute your close-run customer finds out that but little attention is paid by the house to the way he makes his payments he will let this concern whistle for their money which he can use in so many other ways.

This same customer can be kept to a prompt paying basis in ninety-nine cases out of a hundred when he sees that he cannot neglect the payment twenty-four hours without your reminding him of the fact.

Some manufacturers stand ready to furnish a set of complete forms which will incorporate the latest and best plans found in their survey of the easy payment business of the country.

Easy Payments in the Country.

The answer that most dealers in the ordinary town will give to the above proposition is that you can do that kind of business in cities but you can't in the country. His trade is too different from the trade at any other point. Human nature, under specified financial conditions, is just the same wherever it may be.

Talk with these same dealers five minutes and you will find the greatest complaint he has is that the stove pedler has gone through his country and sold the best farmers for twenty dollars more than he would have sold one equally as good, the pedler giving four years time and getting the farmer's note for the amount.

What was it but the terms that was the vital consideration in this, just as it was in the thousands of sewing machines, musical instruments, in fact all pedler sales.

There is not a class in the community as open to the seduction of easy payments as the farmer, and the same farmer who will send cash to the catalogue house when he has it is the man who will pay the extra twenty dollars in order to get easy terms when he hasn't the cash.

A Few Concrete Instances.

In Omaha and Council Bluffs the stove dealers aggressively adopted the above plan ten or twelve years ago. Easy payment stores invaded both communities and are doing a big business, but the stove business is right where it belongs with the old line stove houses, who have adopted the modern business plans just about as outlined above of pushing goods on payments and rebating for cash.

The writer talked the other day with a Chicago traveling man who has gone into the easy payment house furnishing business in one of the nearby county seat towns. He stated that in eighteen months he had opened up many hundreds of accounts, he personally attended to every credit extended, he went over every payment due each day, and sent a notice to every one who failed to pay as per agreement, and had only lost three dollars to his knowledge since he started in business.

I investigated this same subject in another small neighboring town recently with the following results: There were three beautifully equipped stove and hardware stores and a couple of easy payment house furnishing stores, one of them run by a woman with the stock divided into widely separated stores, furniture in one place and stoves in the other. The former second-hand woman competitor was referred to very slightingly by the hardware dealers but careful investigation revealed the fact that she was rapidly capturing the stove business of the community. Was it because she was a woman or was it because she supplied a want the other stores failed to supply?

We have in mind another dealer in Southern Illinois who has unquestionably solved the catalogue house and easy payment proposition at the same time. He handles the catalogue house proposition by aggressively going after business with attractive prices and specialties that he can control, sending priced circulars with attractive prices several times a year, and the easy payment proposition by substituting house furnishings in place of the implement line, retaining only buggies in his trade.

A new catalogue house proposition faces the trade, viz: Easy payment houses that sell goods by mail on easy payments to anybody that can give good references.

We pass a new five-storey block every day that has lately been constructed to do business on this plan and are informed that another concern which has been doing this business for a year or two that can do any amount of business on this plan only limited by the capital they have to use. The patrons of these stores are unquestionably from the farm and smaller towns where most dealers would say they cannot do a time payment business.

From our point of view every dealer in the country should sell stoves and ranges on the lease and easy payment plan and must do so or lose his stove trade.

STEEL FURNACE.

Dealers in heating apparatus for household use are manifesting considerable interest in a new type of upright steel furnace made by the Stanton Heater Co., Martin's Ferry, Ohio. The main drum or radiating sheet of the furnace is constructed of locomotive firebox steel, 3-16 inch thick, the joints being tightly riveted to make a smoke and gas tight construction. The grate is of the shaking and dumping type and is supported by lugs on the grate rest. The latter is made in two pieces and is held in position by lugs bolted to the side of the ash pit. The radiator, of Bessemer steel, is connected to the radiating sheet, or main drum, at the smoke outlet, thus rendering the furnace effective to the fullest extent, and, it is claimed, reducing the amount of fuel used. The radiator is provided with a damper, so that the products of combustion pass directly to the chimney when the feed door is open, or down to the bottom of the radiator and thence to the smoke pipe. The radiator is fastened to the radiator sheet, or main drum, by a flange bolted to it, and connected by a slip joint 1-2 in. deep held in place by two bolts. The feed door is large, which is a great convenience in putting in the grate, the grate rest or the linings, or replacing any part that may be required. A simple and effective hot blast is made by connecting hot blast tubes with openings in the grate rest and thence to the top of the fire, where it mixes with the products of combustion. The furnace is made in two sizes, with estimated heating capacity ranging in the smaller from 10,000 to 15,000 cubic feet, and in the larger size from 15,000 to 20,000 cubic feet.

OVEN RANGE.

A simple type of kitchen range has been perfected by the Cole Manufacturing Co., of Chicago. A substantial skirt base supports the combustion chamber which is provided with the usual air-tight draft regulators. The combustion chamber supports a four-hole top on which cooking may be done. The products of combustion as they pass from the fire chamber are carried up behind the supports for an elevated oven and pass around the oven, heating it. An important feature of the construction is that it is adapted for burning various grades of coal. The fire chamber is composed entirely of cast iron, made very heavy to insure durability. The stove occupies but little space in the kitchen, and the oven is far enough removed from the direct heat to insure durability. A fire is not only quickly started, but owing to the use of malleable iron quick heating covers, the top is quickly heated for effective work. The air-tight construction insures complete control over the fire and the temperature of the oven.

2nd Vice-President—J. R. Hambly, Barrie.
Treasurer—John Caslor, Toronto.
Secretary—Weston Wrigley, 10 Front St. East, Toronto.
Executive Committee—The officers and J. W. Peart, St. Mary's; M. R. Marshall, Dunnville; D. Brocklebank, Arthur; F. W. Jeffery, Midland; E. P. Paulin, Goderich, and Frank Taylor, Carleton Place.
Auditors—J. W. Peacock and C. F. Moorhouse, Toronto.

AN ORGANIZER AT WORK.

Hardware merchants in some Western Ontario towns and cities are being called on this week by Mr. J. D. Fletcher, formerly in the retail hardware trade as a member of the firm of R. Fletcher & Son, Toronto. Since the sale of their business Mr. Fletcher has traveled considerably in Ontario, Manitoba and Saskatchewan, and his wide experience should make certain his success as organizer of the Ontario association.

Mr. Fletcher is a strong advocate of trade organization and well posted regarding the obstacles which retail hardwaremen have to meet in the course of their business. His experience in the west and knowledge of the extent of the credit evil makes him favor strongly the establishment of a credit coupon and account collecting department of the association, as well as a Mutual Insurance Company to help in lessening the increasing burden of fire insurance expense.

No salary will be paid the new organizer, he having offered to take up the work for a few months on a purely voluntary basis, traveling expenses only being guaranteed him. If the same spirit pervades the trade generally the results of Mr. Fletcher's work should be eminently satisfactory.

PEDDLER'S COMPETITION.

A member of the association writes: "We are from time to time troubled with parties traveling the town and country peddling tinware. The Retail Merchants' Association boasts of the law respecting peddlers which they were instrumental in having passed, and we would like to have the details of the law as enacted published, providing it is not too lengthy. There is a gent of this sort now doing the town, and we think this thing should be stopped."

The law as it stands is incomplete, and the Retail Merchants' Association are now preparing a by-law which should be adopted uniformly by town and city councils to enlarge upon the provincial law. The information asked for will be given in these columns shortly.

THE WRONG ASSOCIATION.

Henry Gillies, general hardware merchant, St. Jacobs, writes: "How is it that we retailers here in St. Jacobs do not hear anything about the Retail Merchants' Association whenever there is a convention held? Mr. Brubacher organized a local association here last Winter and each member paid his $2 fee. I was appointed secretary and was given two books, and that was the last of it." Mr. Gillies wants to know why he did not hear of the recent convention until after it was held. He has been informed that he should be a member of the Retail Hardware Association if he wants to keep alive to what Ontario hardwaremen are doing. Every retail hardware dealer in Ontario whose address can be procured is sent an invitation to attend conventions of the Retail Hardware Association, and members are kept fully informed as to what the officers of the association are doing.

MONEY IN INSURANCE.

In an address before the Michigan Retail Hardware Association at the convention in August, C. A. Peck, secretary of the Hardware Dealers Mutual Life Insurance Co., of Wisconsin, said that a recent report showed a total of $520,000,000 fire insurance written in Wisconsin on which premiums were $8,000,000 and losses $3.000,000. "Where is the other $5,000,000?" asked Mr. Peck, "not in your pocket or mine unless some of you happen to own some stock in the fire insurance companies."

This is on their business in Wisconsin, and of all the companies doing business in the State the percentage of expense runs from 29 to 95 per cent., the latter of a company winding up its Wisconsin business. The Hardware Mutual has an expense of 11.3 per cent. and in May it was down to 9.3 per cent., but will probably average 11 per cent. We have written something over $30,000 for Michigan dealers on which their dividends are $182, with as much more interest in the surplus.

In the 28 months we have been running we have written $2,014,000 of insurance at an expense of about $5,500, and with a loss of $10,742.15. These losses we are now paying the same day they are adjusted without asking the usual discount of 1 per cent. for payment inside of 60 days.

We are now carrving insurance in 14 States and Territories and this year are paying back to policy holders 33 1-3 per cent. of their premiums, a saving that to me is certainly worth looking after. So far our losses have been four times as much on outside business as on Wisconsin business, but that only happens to be a coincidence, for hardware will burn in Wisconsin just as quickly as in any other State.

We have written an average of $4,000 every day so far in 1906, which amounts to some $71,000 more than all we wrote in 1905, which shows pretty clearly how the trade at large look upon this matter of carrying our own insurance. We claim hardware stores and stocks are better risks than livery stables, bakeries, saloons and general stores and writing only for the members of some state association we have a preferred c,ass of preferred risks to care for.

DOMINION CARTRIDGE EXPANDING.

Not content with the splendid trade they have worked up in Canada and foreign countries for their popular brands of shells and cartridges, the Dominion Cartridge Co., Montreal, have organized an American sales department under the direction of C. Asa Wood, for several years identified with the Simmons Hardware Co., St. Louis. Stocks are now being carried at three branches in the States, located at New York, Syracuse and St. Louis. The further extension of this trade means considerable to Canadian industry and the hardware trade throughout the country will learn with satisfaction of the progress being made by the company.

OBSERVATIONS OF AN EMPLOYER

"Not yet, but soon," spells failure.

Good judgment is often mistaken for old fogyism.

It's the men behind the methods that make a business what it is.

A cost clerk hired in time cheats the bankruptcy courts of many a case.

Many a failure in business is making money writing advice to young men.

Why overwork your memory when tickler cards are so cheap and so sure?

Less hard work and more thought would help many men to rise above the dead level.

The man who seems the busiest is not always the one who is really doing the most.

A pretty safe road to success is the one that leads to the nearest savings bank every pay day.

More than $9,000,000 worth of American goods were shipped from St. John, New Brunswick, during the fiscal year 1906 to the United Kingdom and South Africa. The principal shipment was 7,000,000 bushels of grain.

PATENTED VENTILATOR.

G. D. Pearson, 17 Pontiac street, Montreal, is the patentee of a ventilator which has been on the market quietly for years and has won considerable popularity, and now proposes to manufacture on a larger scale. During the past Summer twenty-four of his ventilators were used at Dominion Park, Montreal, and proved so valuable in providing fresh air to the stuffy amusement halls that electric fans and other artificial ventilation were superseded. Anyone wishing particulars about these ventilators will profit by writing Mr. Pearson and mentioning this paper.

HINTS ON CARE OF TOOLS.

The following hints on the best means of keeping tools in good condition can not fail to be useful :

The wooden parts of tools, such as the stocks of planes and handles of chisels, are often made to have a fine appearance by French polishing ; but this adds nothing to their durability. A much better plan is to let them soak in linseed oil for a week, and rub them with a cloth for a few minutes every day for a week or two. This produces a beautiful surface, and at the same time exerts a solidifying and preservative action on the wood.

The following recipes are recommended for preventing rust on iron and steel surfaces : All steel articles can be perfectly preserved from rust by putting a lump of freshly burnt lime in the drawer or case in which they are kept. If the things are to be moved (as a gun in its case, for instance), put the lime in a muslin bag. This is especially valuable for specimens of iron when fractured, for in a moderately dry place the lime will not want renewing for many years, as it is capable of absorbing a large quantity of moisture. Articles in use should be placed in a box nearly filled with thoroughly pulverized slaked-lime. Before using them rub well with a woolen cloth.

FEED BAGS FOR ANIMALS.

The driver of every team should be supplied with a bag of some kind for holding feed for his horses, as he seldom is sure where he will be when feeding time comes. Some drivers are very careful in this respect, while others make use of anything that is available. Quite a large number of feed bags are in use, the majority being constructed so that they can be attached to the side of the horse's head. This does not give the horse any freedom to move his head without moving the bag also. A Philadelphia man has patented an exceedingly simple feed bag which overcomes this fault. The bottom and sides are made of canvas or other flexible material, while the top consists of a circular frame divided into two sections, which are connected by small loops. Supporting the bag are two metal rods, one on each side, having hooks at the end which fit into the loops in the frame. In the centre and at the other end of the rods are circular loops which are shaped to fit over the shaft of the vehicle. It can easily be seen how easily this can be done, the bag always remaining in position where the horse could conveniently reach the feed, at the same time being able to move his head freely.

SUCCESSFUL JOBBERS AND SALESMEN.

No. 30.

An interesting development in the history of Schuchardt & Schutte, manufacturers of hardware specialties, who now have offices and factories in all the principal countries of the world, was reached last week, when they opened a Canadian branch with offices at 13 St. John street, Montreal, in charge of J. Sophus, whose likeness is here presented.

Mr. Sophus is now a thorough-going and enthusiastic Canadian, but he was born in Denmark, twenty-five years ago. His early education was received in that country, but, while still a mere youth he went to England, where he gained valuable business experience for six years. During this time he traveled in

J. SOPHUS, Montreal.
Manager Canadian Branch Schuchardt & Schutte.

Holland, Germany, France and Sweden.

About a year and a half ago, Mr. Sophus decided to try his fortune in Canada and entering into partnership with W. B. McLean, under the firm name of McLean & Sophus, carried on the business of mechanical engineers and machinery experts. This firm held the Canadian agency for Schuchardt & Schutte. When the partnership was dissolved, recently, Mr. Sophus retained his connection with them. It was only last week, however, that final arrangements were made, by which Schuchardt & Schutte opened their branch here, and Mr. Sophus was made their Canadian manager.

A full line of Swedish cutlery will be introduced into Canada by this firm next year, but in the meantime they are prepared to push the sales of their "Vesta" cream separator, Gronkvist drill chuck, split steel pulleys and a complete line of shelf hardware.

Mr. Sophus is an enthusiastic and enterprising young man of the type who succeed, and Schuchardt & Shutte have made no mistake in entrusting to him their Canadian business.

WHAT "HORSE POWER" IS.

What is the relative amount of work that a man can do in comparison with a horse or machinery ? At his very best the strongest man stands in pretty poor comparison, even with a horse, for hard, continuous labor. He might perform for a few minutes one-half horse power of work, but to keep this up for any great length of time would be impossible.

Thus the gain in forcing horses to do a part of the world's work was enormous. One horse could exhaust a dozen men in a single day, and still be ready for the next day's work.

The measurement of a horse's power for work was first ascertained by Watt, the father of the modern steam engine, and he expressed this in terms that hold to-day. He experimented with a great number of heavy brewery horses to satisfy himself that his unit of measurement for work was correct. After many trials he ascertained that the average brewery horse was doing work equal to that required to raise 330 pounds of weight 100 feet high in one minute, or 33,000 pounds one foot in a minute. So he called this one horse power.

This work, however, was not continuous, for the horse would have had to back up after each pull to lower the line of the pulley, and thus he would work four hours a day in pulling 330 pounds in the air at the rate of 100 feet a minute, and four hours in slacking up the rope. Consequently no horse can actually perform continuously what is generally called one horse power. The horse was never born that could tug a rope for eight hours a day, pulling 330 pounds 100 feet each minute without rest or change. Consequently, when we speak of horse power we refer only to the average work a horse can do in one minute, that is to say, the rate at which he can work.

A strong man might pull half that weight 100 feet in the air in two minutes, but he could not repeat the operation many times without being exhausted.

For all needful purposes the expression of one horse power is accurate enough, and practically shows the measurement of an average horse's abilities for working. As a rule a strong man can, in eight hours, work at the rate of about one-tenth of one horse power ; that is, it would require ten men to pull 30 pounds 100 feet in the air in a minute, and then slack up and repeat the operation throughout the eight hours of a working day. The world's gain in labor when horses were first employed to help man in his work was thus tenfold.

W. J. McGuire & Sons have been incorporated with a capital stock of $250,000, to carry on the business of plumbers, steamfitters, etc. The provisional directors are W. J. McGuire, G. F. McGuire and Owen Neily, with head office in Toronto. A very large portion of the McGuire business is in the installation of water sprayer systems for fire protection.

FARMERS OPPOSE DUTY ON TIN.

Another section of the community has risen to enter its protest against the imposition of a duty on tin plate as urged by the professional company promoters who during the past year have been unloading on Canadian investors stocks in the proposed works at Morrisburg.

The near approach of the opening of the session of the Dominion Parliament, at which it is expected important tariff legislation will be introduced by the Government, has encouraged a large body of farmers in Prince Edward County to protest against the proposed duty as an additional tax upon their industry. They point out that not only are they users of the products of the tinware factories, whose goods would have to be advanced in price if a duty was imposed, but as part owners and sellers of goods to canneries, who use millions of cans every year, they would feel the pinch severely if a duty was imposed.

The tin plate company promoters in their request for a duty of 33 1-3 per cent. claimed that this duty would only advance the cost of a tin can one-fifth of a cent, but even at this minimum view of the situation the increased price would mean about $6,000 per year extra to only one cannery in Prince Edward County. If each of the fruit canning factories in Ontario and salmon canneries in British Columbia are forced to contribute to the Morrisburg promoters on a similar basis the extent of the imposition can hardly be gauged.

Farmers in other parts of the country should take up the agitation against the proposed duty and hardware merchants and grocers could to advantage to the trade co-operate with the farmers in urging the local members of Parliament to stand firm against the blandishments of the lobbyists who may press for the duty at the next session of Parliament.

THE METAL SITUATION.

If the metal situation was strong last week, it is stronger now, in almost every particular. The buying movement in all lines is very heavy, and the pronounced scarcity which is manifest in so many branches of the trade has caused further upward tendency.

Consumers of pig iron are, perhaps, the hardest hit by the present market. In most cases they have to be content with very inadequate deliveries, and are working in a hand-to-mouth manner. Many foundries which have been using certain grades of pig iron are now paying $2 and often more in advance of normal prices, rather than change their iron. Importers are being daily importuned to ship orders booked some time ago, but they find themselves unable to do so. The Montreal market is bare of Clarence, Cleveland, Ayresome and also of Summerlee No. 1. A considerable tonnage of the first two mentioned is now en route to that port, but as practically the entire shipment is under contract, the situation will not be relieved thereby. Similar conditions exist in all the great iron-consuming countries, so that the present situation is likely to continue for some time.

Pig lead, by scoring another advance of 15 cents, has jumped to really phenomenal figures. Quotations are now dangerously close to $5, and as the market continues very strong, that figure may yet be reached.

Copper is now so high in primary markets that brass manufacturers have withdrawn prices. Brass and copper wire manufacturers have also issued new discounts. Canadian jobbers are continuing the same prices as they have been quoting for several weeks, but it seems very probable that these will very soon have to be increased.

Sheet metals continue to be very active. Sheet zinc has gone up 25 cents per cwt., responding to the strong and healthy tone of spelter which was recently advanced. A general revision of prices in galvanized sheets is looked for next week, as importers have expressed their intention of making another advance at the beginning of October. Galvanized Canada plates have gone up about 15 cents. The leading importers of these plates report that their principals are sold up until next May.

BARRED FROM THE MAILS.

Many a doubtful enterprise has masked its obliquity behind a fair name. At length deeds speak louder than words — but there are the profits. A fraud order has been issued by the U. S. Post Office against the McLean Publishing Co. of 88 Walker street, New York, barring them from the use of the mails. The story is told by the New York Times as follows:

The concern advertized in the cheaper magazines, offering large prizes for the solution of a puzzle. These puzzles were always easy to solve, and many persons sent in the answer and demanded the prize. Instead, they received a circular announcing that "the present which will be given you is a very beautiful set of table silverware, consisting of an A1 silver plate flatware coffee set, including sugar shell gold bowl, carefully packed in an elegant double-sealed box, all fully warranted."

The prize winner was also informed that he was to receive four volumes of the Arlington Edition, a series of cheap reprints. The winner was requested to send "shipping directions, with a remittance of $1.35 to cover boxing and packing charges."

Many persons took the bait, and it is said that the McLean Publishing Company was overwhelmed with mail. However, the outgoing expresses were not taxed to anything like the same extent in carrying books and coffee sets to the persons who had sent in their $1.35. As a result, many letters of inquiry were sent to the post office Moreover, in Canada there is a MacLean Publishing Company, which is a thoroughly reliable concern. It publishes seven trade newspapers in Montreal and Toronto. Its president, J. B. MacLean, was for some years commanding officer of the Duke of York's Own Canadian Hussars, the crack cavalry regiment of Montreal. His company found itself accused of its namesake's derelictions. When a Canadian sent his $1.35 to New York and failed to receive the articles he had expected he called the Montreal firm to account. So it, too, began to make complaints.

The post office authorities made an investigation. The manager of the company admitted some of the goods had not reached their destination, but put it down to insufficient addresses. That didn't satisfy the inspector and the company was barred from the use of the mails. To the reporter of the Times all the manager would say was that it was "a dirty mean piece of business."

WIRE NAILS ADVANCED.

For the past couple of weeks the wire nail situation has been marked by a freedom from price cutting which suggested a firmer tendency. This has been justified by the present week's occurrences. There is evidently a tendency on the part of manufacturers to put prices on a higher plane, and a leading Montreal mill has advanced prices 5 cents. It is altogether likely that the other mills will follow suit sooner or later.

Canadian Wholesale Hardware Association

EIGHTH ANNUAL CONVENTION AT HAMILTON, SEPTEMBER 27th

After eight years absence from its birthplace the Canadian Wholesale Hardware Association held a happy reunion on Thursday, Sept. 27, at Hamilton, the attendance at the eighth annual convention being very representative of the jobbing interests of Ontario and Quebec and necessarily much larger than gathered at Hamilton eight years ago, when the first annual convention was held.

The first president of the association was Wm. Vallance, senior member of Wood, Vallance & Co., Hamilton, and it was fitting that the present gathering in the Ambitious City should again be under his presidency. Repeatedly the wish was expressed that his health would allow of his being again able to wield the gavel at another reunion in his home city eight years hence.

The proposal discussed at the two previous conventions that the association become more national in scope, taking in the jobbers in all the provinces, was not given much consideration this year, the limited time at the disposal of the jobbers being used to discuss matters of moment to the trade interests in Ontario and Quebec chiefly. Steps were taken to eliminate evils affecting the trade in these two provinces and the work accomplished will have far reaching influence.

The absence of Secretary Hardy and ex-President Wm. Starke, was regretted by all, the former sending an able representative in Sam Frame, while the latter's place as an all round promoter of good fellowship was hard to fill.

The crowded condition of the Hamilton hotels owing to the holding of a race meeting was the one regrettable feature of the gathering, a large number of the delegates finding it impossible to secure sleeping accommodation, and it being necessary to secure a special train after midnight to carry a portion of the delegates to Toronto, where sleeping accommodation could be had.

Mr. T. H. NEWMAN, of Caverhill, Learmont & Co., Montreal,
The New President of the Canadian Wholesale Hardware Association.

Officers Elected.

President—T. H. Newman, Caverhill, Learmont & Co., Montreal.

Vice-President—Thomas Dexter, H. S. Howland & Sons, Toronto.

Secretary-Treasurer—Jenkins & Hardy, Toronto.

Executive Committee—Thos. Birkett, sr., of Thos. Birkett & Sons Co., Ottawa; J. G. Lewis, of Lewis Bros. & Co., Montreal; D. H. Howden, of D. H. Howden & Co., London, and A. C. Fisher, of Rice, Lewis & Son, Toronto.

The list of delegates present is comprised in the record of those present at the banquet, with the exception of one or two who did not remain for that function, these including Messrs. S. R. Kennedy, of the Kennedy Hardware Co., and A. C. Fisher, of Rice, Lewis & Son, Toronto.

THE BANQUET.

Following the business of the convention the delegates spent a few hours fraternizing with each other in the hotel parlors and corridors. Trade matters were talked over in an informal way, old friendships were renewed and new ones fostered between those who had more recently engaged in manufacturing or jobbing hardware. The value of the association gatherings was emphasized again and again when keen competitors for trade were seen in friendly conversation, each learning that the other fellow was as good a fellow as he imagined himself to be.

The banquet itself was a fitting finale to what was undoubtedly the most successful convention yet held by the association. Retiring President Wm. Vallance, who tendered the banquet, was in the chair and grouped around him as guests were many prominent manufacturers. The Royal Hotel banquet hall was tastefully arranged, the menu was first-class and the orchestral music and singing by the Male Quartette was particularly entertaining.

From the time the guests sat down until the National Anthem was sung there was fun in plenty, all being in the best of humor and ready to appreciate both the serious and witty addresses delivered in reply to the various toasts.

Who Were Present.

Wm. Vallance, Wood, Vallance & Co., Hamilton; W. A. Wood, Wood, Vallance & Co., Hamilton; R. Hobson, Hamilton Steel & Iron Co., Hamilton; Col. Gartshore, McClary Mfg. Co., London; S. O. Greening, B. Greening Wire Co., Hamilton; R. H. Merrima, B. Greening Wire Co., Hamilton; H. G. Wright, E. T. Wright Co., Hamilton; J. R. Murphy, Canadian Shovel & Tool Co., Hamilton; W. L. Cummer,

Droswell Mfg. Co., Hamilton; F. H. Whitton, Ontario Tack Co., Hamilton; S. H. Alexander, Wood, Vallance & Co., Hamilton; Thos. Cook, Wood, Vallance & Co., Hamilton; J. W. Sey, Wood, Vallance & Co., Hamilton; John Milne, Burrow, Stewart & Milne, Hamilton; W. H. Ginder, Ontario Lamp & Lantern Co., Hamilton; A. F. Hatch, Canadian Steel Goods Co., Hamilton; T. H. Watson, Toronto Bolt & Forging Co., Toronto; W. B. Converse, Colonial Cordage Co., Toronto; W. J. Lind, Independent Cordage Co., Toronto; Thos. B. Lee, Toronto; T. G. Dexter, H. S. Howland Sons & Co., Toronto; A. Burdette Lee, Rice, Lewis & Son, Toronto; Geo. W. Howland, Graham Nail Works, Toronto; S. J. Frame, Jenkins & Hardy, Toronto; Weston Wrigley, Ontario Retail Hardware Association, Toronto; Geo. H. Smith, Kennedy Hardware Co., Toronto; Major J. A. Currie, Imperial Steel & Wire Co., Toronto; Col. J. B. MacLean, MacLean Publishing Co., Toronto; A. W. Taylor, Parmenter & Bullock, Gananoque; C. E. Britton, Cowan & Britton, Gananoque; Lloyd Harris, Brantford Screw Co., Brantford; J. W. Cameron, Cameron, Dunn Mfg. Co., Strathroy; Harry F. Moulden, Taylor-Forbes Mfg. Co., Guelph; W. W. Near, Page-Hersey Iron & Tube Co., Guelph; H. B. Brainerd, Dominion Cartridge Co., Montreal; Geo. C. Haldimand, W. C. Haldimand & Co., Montreal; T. H. Newman, Caverhill, Learmont & Co., Montreal; A. Jeanotte, L. H. Hebert & Co., Montreal; A. Letang, Letang Hardware Co., Montreal; C. M. Strange, Lewis Bros., Montreal; A. Prudhomme, A. Prudhomme & Fils, Montreal; Geo. Birch, Whitman & Barnes, St. Catharines; C. McGhie, Welland Vale Mfg. Co., St. Catharines; J. D. Chaplin, Welland Vale Mfg. Co., St. Catharines; C. A. Whitman, Hobbs Hardware Co., London; E. S. Field, Hobbs Hardware Co., London; D. H. Howden, D. H. Howden & Co., London; Jas. Maxwell, D. Maxwell & Son, St. Marys; C. Shurly, Shurly & Deitrich, Galt; A. H. Hough, Montreal Rolling Mills, Montreal; M. H. Day, Consumers' Cordage Co., Montreal; W. A. C. Hamilton, Consumers' Cordage Co., Montreal; J. D. Peck, Peck Rolling Mills, Montreal; W. Smale, Canada Horsenail Co., Montreal; W. H. Evans, Canada Paint Co., Montreal; H. Cluecas, Canada Paint Co., Toronto; Julius Waterous, Waterous Wire Nail Works, Brantford; J. W. Millard, Meridan Brittania Co., Hamilton.

The Toasts.

On rising to propose the first toast, Host Vallance was greeted with a burst of song and it was some minutes before he could secure quiet. He protested that it was rather early to be a jolly good fellow, and asked the guests to drink the health of a better man than he was—the King. "Yes, but he doesn't know anything about the hardware business," aptly put in one of the delegates.

After the King had been honored in the usual style "Canada, Our Home" was proposed, coupled with the name of A. Prudhomme, Montreal, whose patriotic sentiments were roundly applauded.

"We must be proud to belong to Canada," he said. "If we look back upon all that our forefathers have done to make this home worthy to live in. In 1837 both English and French united and in 1867 Liberals and Conservatives worked together, and the result of their work is now seen in a country that is honored in every part of the world. Questions of nationality must be kept in the background and French, English, Irish and German must co-operate in carrying out the work so ably begun by our grandfathers."

"Our Guests the Manufacturers" was toasted heartily by all present, the first to be asked to reply being Col. Gartshore, of the McClary Manufacturing Co., London. Col. Gartshore said other manufacturers had been manufacturing speeches while he had been eating and he begged to be excused from speaking at length. "It has been a great pleasure to meet some of the captains of jobbery," said the colonel in conclusion.

Mr. Lloyd Harris, of the Canada Screw Company, Brantford, told an interesting story of how he had entertained a reporter with a story for 2 1-2 hours and although it was suggested that he tell the story again he would not do so. He had found the jobbers kings of good fellows and he trusted that the good relations existing between the captains of industry and the captains of jobbery would continue.

Mr. C. E. Britton, of Cowan & Britton, Gananoque, was asked to reply to the toast as being one of the oldest hardware manufacturers in the country. Mr. Britton said the present looked like a case of the spider and the fly. He had come into the parlor and he hoped he would get out without being skinned. "We are apt in the joviality of the dinner to forget the real object of organization. We are in business for a profit but we must all endeavor to do whatever will be in the best interests of the trade as a whole. It is not in the interest of any hardware association to get goods for less than cost of production, as sooner or later the conditions engendered by a close buyer will react upon each branch of the trade," said Mr. Britton in urging a fair profit for each branch of the trade.

Mr. T. H. Watson, of the Toronto Bolt & Forging Company, Swansea, made a witty speech which kept his hearers in the best of good humor. In concluding, Mr. Watson again proposed the health of the king of the jobbers, retiring President Wm. Vallance.

Mr. Vallance in his reply looked back upon the seven years since the association had last met in Hamilton. They had been seven fat years for business for both manufacturers and jobbers. The two interests had one object in view and both jobber and manufacturer could well afford to overlook small annoyances and work together in the interests of the trade as a whole.

Jobbers' Sun Not Setting.

Mr. T. E. Newman, of Caverhill, Learmont & Co., Montreal, was asked to reply to the toast, "The Wholesale Hardware Association." In opening he told Mr. Britton that brighter days were coming and his mock pessimism would not be taken seriously by the jobbers present. On behalf of the Wholesale Association he could say that in many respects it had been a great success. The jobbers are entitled to respect even if they had not the great wealth of the manufacturers. The jobber's day is not yet over and he will continue to be the distributor of the goods produced by the manufacturer. Never before was the jobber's position so strong in the United States and there was no indication of their passing and the trade being done direct from manufacturer to retailer. The jobbers' interests were the same as the manufacturers' and the manufacturers' the jobbers'. The manufacturers should not allow themselves to believe that the jobber was a back number, as it was a mistaken idea.

Mr. Newman referred to the absence in England of Mr. William Starke regretfully, he being one of the best fellows in the wholesale association. Mr. Starke's health was proposed and heartily drunk.

Hardware and Metal Toasted.

"Hardware and Metal" was next proposed by Mr. Newman, and Col. J. B. MacLean was referred to as one of the best friends the wholesale association had ever had and his paper as indispensable to the trade in Canada. The toast was honored in hearty fashion, jobbers and manufacturers uniting in saying that there was nothing the matter with Hardware and Metal—it was all right.

Col. MacLean thanked the guests for the kind reception tendered him and the flattering words spoken in reference to Hardware and Metal. He referred to the first time he had been invited to attend a gathering of the wholesalers several years ago. Hardware and Metal was not then the recognized authority in the trade that it is to-day, and he was not honored then as he had been to-night. Just as the gathering was adjourning he had been called upon to speak and he had referred to the relations which should exist between the manufacturers, jobbers and retailers. He had repeatedly urged closer relations between these sections and was pleased to know that for the first time in the history of the association they had honored a retailer, the president of the Ontario Retail Hardware Association, with an invitation to attend the banquet and it was unfortunate that President Humphrey was not able to be present.

Col. MacLean suggested that future gatherings should be arranged to be attended jointly by manufacturers, wholesalers and retailers, not with the purpose of discussing prices, but to talk over subjects of interest to every branch of the trade. The retailer was the final distributor, and anything which could be done to assist him was worthy of consideration. And anything which could help the retailer to sell more of the jobbers' goods was in the real interest of the wholesale association.

Major Currie, of the Imperial Steel & Wire Co., Collingwood, said this was the first occasion on which he had been invited to be a guest of the association, and he was thankful of the opportunity to meet the jobbing trade of Ontario and Quebec. He proposed the health of President-elect Newman, who, being greeted with a song, said he had nothing to say other than that he would, during his term of office, do all in his power to advance the interests of the trade, and particularly of the wholesale association.

(Continued on page 38.)

MARKETS AND MARKET NOTES

(For detailed prices see Current Market Quotations, page 66.)

THE WEEK'S MARKETS IN BRIEF.

MONTREAL.

Scythes—Advanced 25 cents per dozen.
Pig Lead—Now quoted from $4.90 to $4.95.
Canada Plates—An advance in galvanized.
Turpentine—Now up to 88 cents.
Old Material—Light copper, 14¾c; heavy red brass, 14¾c; light brass, 8¼c; machinery assorted scrap, $15.50.
Sheet Zinc—An advance of 25 cents per cwt.
Wire Nails—One leading mill has advanced 5c.
Copper Wire—New discount 47½ per cent.
Brass Wire—New discount 47½ per cent.

TORONTO.

Pig Lead—Now quoted $4.90 to $5.00.
Conductor Pipe—Advanced 10 per cent
Eavestroughing—Prices 10 per cent. higher.
Sandpaper—5 per cent. higher.
Iron Pipe—Great scarcity developing.
Scythes—Likely to advance.
Copper and Brass Rod and Tubing—Advanced two cents per pound.

Quebec Hardware Markets.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, September 28, 1906.

Business this week has picked up considerably over last week's record. Seasonable articles are being ordered in the liveliest style, and trade is especially brisk in weatherstrips, carriage heaters, food choppers and bread makers. Some sleigh bells are also going out during the past few days. Lanterns and cow ties, now that the cold weather is approaching, are selling very well.

From the appearance of orders which are now being shipped by the local wholesale houses, it would seem that the predicted general advance in all lines of builders' hardware is having a considerable effect upon retailers' orders. Good assortments of such lines as hinges may be seen in almost every order.

Scythes are being advanced for next season's delivery. The new price is 25c. per dozen higher than former quotations. We published last week the new list on shot. This week a discount of 5 per cent. on that list has come into effect.

An effort is being made to raise the price of lanterns by a very appreciable advance. Though this movement, if successful, will almost certainly mean an advance next year of from 35 to 50 per cent., but will scarcely affect the situation this season, as jobbers are well stocked up.

AXES—Trade is quite brisk. Our quotations remain: $7.60 to $9.50 per dozen; double bitt axes, $9.50 to $12 a dozen; handled axes, $7.50 to $9.50; Canadian pattern axes, $7.50 a dozen.

HANDLES — No change in business conditions is noticed this week. We still quote: No. 3, $1.25; No. 2, $1.50; No. 1, $1.90 a dozen; adze handles, 34-inch, $2.20 a dozen; pick handles, No. 2, $1.70; No. 3, $1.50 a dozen.

LANTERNS—An effort is being made to materially advance existing prices, which have been admittedly too low for some time past. We are still quoting: "Prism," $7; "Prism" globes, $1.20; Cold Blast, $4; No. 0 Safety, $3.50 to $3.75.

COW TIES AND STALL FIXTURES—These are among the best selling lines at present. We give discounts as follows: Cow ties, discount 40 per cent. off list; stall fixtures, discount 35 per cent. off list.

SLEIGHBELLS—Good orders have been going out this week. Our prices remain: Back straps, 30c. to $2.50; body straps, 70c. to $3.50; York Eye bells, common, 70c. to $1.50; pear shape, $1.15 to $2; shaft gongs, 20c. to $2.50; Grelots, 35c. to $2; team bells, $1.80 to $5.50; saddle gongs, $1.10 to $2.60.

RIVETS AND BURRS — Conditions are very steady. We quote discounts: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., copper rivets and tin swede rivets, 60, 10 and 10 per cent.; swede iron burrs are quoted at 60 and 10 and 10 per cent. off new lists; copper rivets with the usual proportion of burrs, 35 per cent. off, and coppered iron rivets and burrs in 5-lb. carton boxes at 60 and 10 and 10 per cent.; copper burrs alone, 30 per cent., subject to usual charge for half-pound boxes.

HAY WIRE—The height of the season is at hand, and as it is always short manufacturers and jobbers are finding it difficult to secure sufficient quantities to fill orders. We quote: No. 13, $2.45; No. 14, $2.55; No. 15, $2.70; net cash, f.o.b. Montreal.

MACHINE SCREWS—Business is on the normal basis. We continue to quote: Flat head, iron, 35 per cent.; flat head, brass, 35 per cent.; Felisterhead, iron, 30 per cent.; Felisterhead, brass, 25 per cent.

BOLTS AND NUTS — Nothing has transpired to relieve the scarcity of bolts. We quote as follows: 3-8 and smaller, 60 per cent. and 10 per cent.; 7-16 and larger, 55 per cent.

HORSE NAILS—Trade is lively, with discounts currently quoted as follows: C brand, 40, 10 and 7 per cent.; M.R.M. Co., 55 per cent.; P.B. brand, 55 per cent.

WIRE NAILS—The market here is somewhat steadier in tone, and we are quoting $2.05 base, f.o.b. Montreal.

CUT NAILS—There is no new feature to report. The price is $2.20 base, f.o.b. Montreal.

HORSESHOES—Orders and inquiries are very numerous. Our quotations remain: P.B. new pattern, base price $3.50 per 100 lbs.; M.R.M. Co., latest improved pattern iron shoes, light and medium pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; snow pattern, No. 2 and larger, $3.90; No. 1 and smaller, $4.15. Light steel shoes, No. 2 and larger, $4; No. 1 and smaller, $4.25; featherweight, all sizes, No. 0 to 4, $5.60. Toeweight, all sizes, No. 1 to 4, $6.85. Packing, up to three sizes in a keg, 10c. per 100 lbs. More than three sizes, 25c. per 100 lbs. extra.

BUILDING PAPER—Trade is improving day by day and manufacturers expect to be very busy from now until the close of navigation. Prices are unchanged.

CEMENT AND FIREBRICK — Considerable business is being done, but nearly all orders received by local jobbers are for small lots. We quote: "Lehigh" Portland in wood $2.54; in cotton sacks, $2.39; in paper sacks, $2.31. Lefarge (non-staining) in wood, $3.40; Belgium, $1.60 to $1.90 per barrel; ex-store, American, $2 to $2.10 ex-cars; Canadian Portland, $2 to $2.05. Firebrick, English and Scotch, $17 to $21, American $30 to $35; White Bros.' English cement, $1.80 in bags, $2.05 in barrels in round lots.

COIL CHAIN—Conditions are the same as at our last report, and we continue to quote prices as follows: 5-16 in., $4.30; 3-8 inch., $3.80; 7-16 inch, $3.60; 1-2 inch, $3.40; 9-16 inch, $3.35; 5-8 inch, $3.25; 3-4 inch, $3.10; 7-8 inch, $3.05; 1 inch, $3.

SHOT—A discount of 5 per cent. is now being given off the new list published last week. We quote: Shot packed in 25-lb. bags, ordinary drop AAA to dust, $7 per 100 lbs.; chilled, No. 1—10, $7.50 per 100 lbs.; brick and seal, $8 per 100 lbs.; ball, $8.50 per 100 lbs. Discount, 5 per cent. Bags less than 25-lbs., 1-2c. per lb. extra, net; f.o.b. Montreal, Toronto, Hamilton, London, St. John, Halifax.

AMMUNITION—Large orders are going forward rapidly. We give prices: Loaded with black powder, 12 and 16 gauge, per 1,000, $15; 10 gauge, per 1,000, $18; loaded with smokeless powder, 12 and 16 gauge, per 1,000, $20.50; 10 gauge, $23.50.

Ontario Hardware Markets.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto Sept. 28, 1906.

General business among the wholesalers is a little quieter at present, but a good seasonable trade is being done. It is probable that an advance will be made on scythes and some other lines of farming tools for next season. An effort is also being made to bring lanterns back to something like their former prices, and new lists showing an increase of from 35 to 50 per cent. have been sent out by some houses. An increase has been made on sandpaper, the

discount being now 35 per cent. off instead of 40 per cent. Bolts and nuts are very firm in price, and manufacturers find the utmost difficulty in supplying the demand.

AXES AND HANDLES—Sales have been good for some time for delivery to new parts of the country. Prices remain the same.

CUTLERY AND SILVERWARE — These lines are the feature of the present business.

SPORTING GOODS—Since our last week's advance of 10 per cent. no further changes have been made.

CHAIN—Coil chain is very firm and an advance is not improbable. We continue to quote as follows: 1 inch, $6.60; 5-6 inch, $4.55; 3-8 inch, $3.95; 7-16 inch, $3.80; 1-2 inch, $3.65; 9-16 inch, $3.55; 5-8 inch, $3.45; 3-4 inch, $3.35.

EXTENSION AND STEP LADDERS —Prices continue as follows: Step ladders at 10c. per foot for 3 to 6 feet, and 11c. per foot for 7 to 10 feet ladders. Waggoner extension ladders, 40 per cent.

POULTRY NETTING—Our quotations are as follows: 2-inch mesh, 19 w.g., discount 50, 10 and 5 per cent. All others 50 per cent.

GALVANIZED WIRE — We quote: $2.17½ f.o.b. Cleveland.

BARB WIRE—We quote the following prices: On gauge 9, $2.40; gauge 12, $2.55; gauge 13, $2.65; f.o.b. Toronto.

OILED AND ANNEALED WIRE — (Canadian)—Gauge 10, $2.31; gauge 11, $2.37; gauge 12, $2.45 per 100 lbs.

WIRE NAILS — We quote nominally $2.35 base, but the market is open at $1.95. There are rumors of a return to former prices.

CUT NAILS—We quote: $2.20 base, f.o.b. Montreal. Toronto, 20c. higher.

HORSENAILS—"C" brand, 40, 10 and 7½ off list. "M.R.M." brand, 55 per cent. off. "Monarch" brand, 50 and 7½ off. "Peerless," 50 per cent. off.

HORSESHOES—Our quotations continue as follows: P.B. base, $3.65; "M.R.M. Co., latest improved pattern" iron shoes, light and medium pattern, No. 2 and larger, $3.80; No. 1 and smaller, $4.05; snow, No. 2 and larger, $4.05; No. 1 and smaller, $4.30; light steel shoes, No. 2 and larger, $4.15; No. 1 and smaller, $4.40; featherweight, all sizes, 0 to 4, $5.75; toeweight, all sizes 1 to 4, $7. Packing, up to three sizes in a keg, 10c. per 100 lbs. extra; more than three sizes in a keg, 25c. per 100 lbs. extra.

HORSE BLANKETS — Trade conditions are good.

SLEIGH BELLS — Trade is light throughout the country.

FARM TOOLS—An advance for next season's delivery is not improbable, owing to increased demand and the lightness of present stocks.

RIVETS AND BURRS—Tinned rivets are now quoted net extra 4c. per lb.

SCREWS—We quote: On gimlet point 70 and 5 per cent. off; on cone point, 70 and 10 per cent. off list.

BOLTS AND NUTS—The output is still insufficient to meet the demand and prices are very firm. We still quote: 55 and 10 per cent. off list.

CEMENT—We quote: For carload orders, f.o.b. Toronto, Canadian Portland, $1.95. For smaller orders ex warehouse, Canadian Portland, $2.05 upwards.

FIREBRICK—English and Scotch fire brick, 27c. to 30c.; American low-grade, 23c. to 25c.; high-grade, 27½c. to 35c.

HIDES AND WOOL—The market is very quiet.

Hides, inspected, steers, No. 1	0	12½
" " " No. 2	0	11½
" " cows, No. 1	0	12½
" " " No. 2	0	11½

Canadian Metal Markets.

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, September 28, 1906.

Once more we have to report a market of uninterrupted firmness, and several advances.

Copper is stronger than last week, and it is hard to see how the present level of prices can be much longer maintained. The market has been subjected to a number of advances at the hands of producers, and jobbers' prices are almost sure to go up very shortly. The fact that brass manufacturers have withdrawn their lists on account of the high price of raw material, will lend weight to this prediction.

Pig lead is now 15c. higher than last week, and has now reached a price well beyond any quotations of the past two decades. Stocks are very light, so that it is a difficult matter to obtain deliveries, even at the advanced rate.

Zinc spelter and ingot tin are both firmer, though quotations on these metals remain unchanged. It is believed by close followers of the market that tin will go higher during the next few weeks, as the great tonnage of tin plate booked for delivery before the end of the year will consume large quantities of tin and force the market up.

The situation in pig iron is daily becoming more interesting. There is almost no soft iron to be had, and even the high grades are very scarce. Ayresome iron has now been entirely sold off the Montreal market, and quotations are withdrawn. A considerable tonnage of Clarence and Cleveland irons is expected to arrive shortly, but it is practically all under contract. We understand that the Londonderry furnace is sold away ahead, and cannot deliver the softer grades of the metal until 4 or 5 months hence. Prices have been advanced $2 a ton for No. 1. No. 1 Summerlee is almost unobtainable at present, and consumers requiring this special brand must of necessity pay higher prices.

Sheets of all kinds are active and firm in price. Advanced prices have been made in galvanized Canada plates, which are very scarce. One of the large importing houses here report that their principals are heavily booked with orders that will keep them going until May.

COPPER—Primary markets are still on the upward trend, and jobbers' margins are very close at the following quotations: Ingot copper, 21c. to 21½c.; sheet copper, base sizes, 25c.

INGOT TIN—Higher prices are looked for very soon. Meanwhile we are quoting: 44c. to 44½c. per pound.

ZINC SPELTER — Stocks are very bare, with practically none of the virgin metal obtainable. We are still quoting, however: $7 to $7.25 per hundred pounds.

ANTIMONY — The recently advanced prices are firm. We quote: 27½c. to 28c. per lb.

PIG LEAD—The record is broken by this week's price. We quote $4.90 to $5.

PIG IRON—Prices are very firm, with the tendency still upward. Almost no iron can now be had except the higher grades, and even they are very scarce. We quote, delivered Montreal: Londonderry, $22.50; Carron No. 1, $23; Carron, special, $22; Summerlee No. 2, selected, $22.75; Summerlee No. 3, soft, $21.75.

BOILER TUBES — We still quote: British and American tubes, 1½ inch, 8½c.; 2 inch, 8½c.; 2½ inch, 10c.; 3 inch, 12c.; 3½ inch, 15¾c.; 4 inch, 20c.; 5 inch, 45c. Price per foot net.

TOOL STEEL—Business is brisk at the following quotations: Colonial Black Diamond, 8c. to 9c.; Sanderson's, 8c. to 45c., according to grade; Jessop's, 13c.; Jonas & Colver's, 10c. to 20c.; "Air Hardening," 65c. per pound; Conqueror, 7½c.; Conqueror high speed steel, 60c.; Jowitt's Diamond J., 6¼c. to 7c.; Jowitt's best, 11c. to 11½c.

MERCHANT STEEL — The usual trade is being done. Our quotations are as follows: Sleigh shoe, $2.17½; tire, $2.27½; spring, $2.75; toecalk, $2.82½; machinery iron finish, $2.27½; ruled machinery steel, $2.75; mild, $2.15 base and upwards; square harrow teeth, $2.27½. Net cash 30 days. Rivet steel quoted on application.

COLD ROLLED SHAFTING — We still quote: 3-16 inch to 1-4 inch, $6.80; 5-16 inch to 11-32 inch, $5.78; 3-8 inch to 17-32 inch, $4.76; 9-16 inch to 47-64 inch, $4.08; 3 1-8 inch to 3 7-16 inch, $3.60; 3-4 inch to 1 7-16 inch, $3.75; 1 1-2 inch to 3 inch, $3.50; 3 1-2 inch to 3 15-16 inch, $3.75; 4 inch to 4 7-16 inch, $4.08; 4 1-2 inch to 4 11-16 inch, $4.42.

GALVANIZED IRON—New and advanced quotations will probably be issued next week. Meanwhile we quote: Queen's Head, 28 gauge, $4.35 to $4.60; 26 gauge, $4.20; 22 to 24 gauge, $3.65; 16 to 20 gauge, $3.50; Apollo, 28 gauge, $4.25 to $4.50; 26 gauge, $4.10; 22 and 24 gauge, $3.55; 16 to 20 gauge, $3.40; Comet, 28 gauge, $4.25 to $4.50; 26 gauge, $4.10; 22 and 24 gauge, $3.55;

16 to 20 gauge, $3.40; Bell brand, 28 gauge, $4.40 to $4.45; Fleur-de-Lis, 28 gauge, $4.20 to $4.45; 26 gauge, $4.05; 22 and 24 gauge, $3.50; 16 to 20 gauge, $3.35; Gorbal's "Best Best," 28 gauge, $4.25 to $4.50; "Windmill Best," 28 gauge, $4.15; Sword and Torch, 28 gauge, $4.15; Colborne Crown, 28 gauge, $4.20 to $4.45. In less than case lots 25c. extra.

BLACK SHEETS—We are quoting: 28 gauge, $2.40; 26 gauge, $2.35; 22-24 gauge, $2.30; 19-20 gauge, $2.30; 8-10 gauge, $2.45.

CANADA PLATES—The scarcity in galvanized Canada plates is very keenly felt, and some of the largest producing mills are sold up till May. We quote: 52's, $2.60; 60's, $2.65; 75's, $2.75; full polished, $3.75 to $4; galvanized, 52's, $4.10; 60's, $4.35.

TIN PLATES—A very large tonnage has been booked for delivery before the end of the year, and prices have firmed up considerably. We quote: Cokes, base size, IC 14 x 20, $4; charcoal, base size, IC, 14 x 20, $4.25.

TERNE PLATES—We still quote $6.85.

SHEET ZINC—The market is extremely strong, and the following prices under the circumstances are considered low: $7.75 in casks; $8 in less than casks.

SHEET LEAD—We quote: 2½ lbs., 6c. by the roll; 3 lbs., and heavier, 5¾c. by the roll; small quantities, 25c. per hundred pounds extra.

BAR IRON—We are still quoting $2.05 base, f.o.b. Montreal.

OLD MATERIAL—Trade in all lines is very active. Copper goods are especially firm. We quote: Light copper, 14¾c.; heavy red brass, 14¾c.; yellow brass, 11½c.; light brass, 8¼c.; lead, 3¼c.; zinc, 4c.; machinery cast scrap, $15.50; wrought scrap, $14 to $15; stove plate scrap, $12; mixed rags, $1 to $1.20 per 100 lbs.; old rubbers, 7¾c. to 8c.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, September 28, 1906.

Strong conditions still rule but prices have not changed much during the week. Lead is getting close to the five-cent mark and in fact some dealers are asking that much already. Copper is strengthening and both copper and brass rod and tubing has been advanced two cents per pound. A general advance in copper goods seems likely and some brass manufacturers are talking of withdrawing their lists.

The scarcity in stocks of tin has caused many canners to close down their plants temporarily and the general impression is that higher prices will be asked by jobbers very soon. On next season's stocks there is bound to be a considerable advance owing to the increased price on ingots now ruling over those of a year ago. Eavetroughing and conductor pipe have both been advanced ten per cent. during the week.

Bar iron is easier than a month ago, but pig iron is getting more difficult to secure owing to the mills being bocked up for months ahead. Only the poorer grades are available on early shipments. Iron pipe is very scarce and prompt shipments cannot be had.

PIG IRON—Only the softer grades of pig iron can be procured for early shipment. We quote: Radnor at furnace, $33; Hamilton at furnaces, No. 1, $21.50; Londonderry, f.o.b. Toronto, No. 1, $23; Middleborough, $22.50 to $23.

BAR IRON—A brisk demand exists at steady prices. Stocks are more assorted. We quote: $2.15 base, f.o.b. Toronto, with discount of 2 per cent. net cash.

INGOT TIN—Local prices are steady. Dealers are asking from 42c. to 43c. per lb.

TIN PLATES—Canners are short of tin for cans and eavetroughing and conductor pipe have both been advanced. We quote: Cokes, base size, 14x20, $4; charcoal, base size, 14x20, $4.50.

GALVANIZED SHEETS—Stocks of galvanized iron are very low and prices are stiff. Canada plates and black sheets are also firm.

BRASS—Brass rod and tubing have been advanced two cents per pound. We quote: 23c. to 24c. per lb.

COPPER—Rod and tubing are subject to an advance of two cents per pound. Copper is stiffening and further advances probable. Our prices are: Ingot copper, $20 per 100 lbs., and sheet copper, $25 per 100 lbs.

LEAD—We are advancing our quotations another 5 cents, the figures now being $4.95 to $5 for imported pig and $5 to $5.50 for bar lead.

ZINC SPELTER—Foreign markets are very stiff and prices are strengthening. We quote: 7¼c. per lb. for foreign and 6c. per lb. for domestic.

BOILER PLATES AND TUBES—We quote: Plates, per 100 lbs., ¼ in. and up, $2.45; heads, per 100 lbs., $2.60; tank plates, 3-16 inch, $2.50; tubes, per 100 feet, 1½ inch, $8.50; 2, $8.80; 2½, $10.75; 3, $12; 3½, $15.80; 4, $21. Terms, 2 per cent. off.

ANTIMONY—A half cent advance has been recorded. Stocks are none too heavy with a good demand.

OLD MATERIAL—Advances have been made in copper wire and tea and heavy lead. Dealers' buying prices are as follows: Heavy copper and wire, 15¼c. to 15¾c. per lb.; light copper, 13½c. to 14c. per lb.; heavy red brass, 13c. per lb.; heavy yellow brass, 11c. per lb.; light brass, 8¼c. per lb.; tea lead, $3.40 per 100 lbs.; heavy lead, $3.60 per 100 lbs.; scrap zinc, 4½c. per lb.; iron, No. 1 wrought, $11; No. 2 wrought, $3 to $5; machinery cast scrap, $15; stove plate, $10; malleable and steel, $5; old rubbers, 7¾c. per pound; country mixed rags, $1 to $1.25 per 100 lbs., according to quality.

COAL—We quote the following prices: Anthracite in cars at bridge, egg, stove and nut, $5.50; grate, $5.25; pea $3.50 per gross ton.

Standard Hocking, soft coal, in cars, f.o.b. at mines: Lump, $1.50; ¾ inch, $1.40; run of mine, $1.30; nut, $1.25; N. P. and S., $1; slack, 75c.; box cars, 10c. per ton additional.

Youghiogheny soft coal in cars, bonded at bridges: 1¼ inch, $2.55; ¾ inch, $2.45; mine run, $2.35; slack, $2.05.

For Manitoba, British Columbia and Maritime Provinces markets see pages following.

LONDON METAL MARKETS.

From Metal Market Report, Sept. 25, 1906.

PIG IRON — Cleveland warrants are quoted at 54s. 6d, and Glasgow standard warrants at 54s., 9d, making prices as compared with last week 3d higher for Cleveland warrants and 1s. higher for standard warrants.

TIN—Spot tin opened firm at £185 12s. 6d, futures at £184 10s., and after sales of 350 tons of spot and 550 tons of futures closed firm at £186 for spot, £184 17s. 6d for futures, making price compared with last week £2 higher on spot, and £2, 17s. 6d higher on futures.

COPPER—Spot copper opened strong at £90 2s. 6d, futures £90, and after sales of 400 tons of spot and 500 tons of futures, closed firm at £90 5s. for spot, and £90 5s. for futures, making price as compared with last week £2 4s. 6d higher on spot and on futures.

LEAD—The market closed at £18 10s. making price as compared with last week unchanged.

SPELTER—The market closed at £27 12s. 6d, making price as compared with last week 2s. 6d higher.

U. S. METAL MARKET.

From the Iron Trade Review, Cleveland, Sept. 26, 1906.

The buying by railroads continues to be a prominent feature of the market and several hundred thousand tons of plates will be required for the construction of rolling stock just ordered, including 12,400 cars for the Pennsylvania Railroad, which is expected to place larger orders at an early date. The buying of steel rails has not been so brisk, but the New York Central system has allotted 80,000 tons sold some weeks ago. Many rumors are current of orders for lake vessels to be placed.

There is considerable activity in the pig iron market in some centres but very heavy buying can hardly be expected for the present. Some very high prices are being paid for prompt delivery, but quotations for the first quarter and the first half of the year are about the same as they have been for several weeks.

An advance of $1 per ton on all wire products has naturally followed the tremendous demand of the past three months.

The shipping of iron ore has progressed rapidly during the past ten days, and indications now are that the total shipments for the year will be about 36,500,000 tons. The ports at the head of the lakes have made heavy gains recently, compared with last year.

The wonderful prosperity of the iron and steel industries is shown in a most impressive manner by the increasing difficulty of obtaining adequate supplies of semi-finished material to meet the unprecedented demands of the mills. Keen observers of tendencies in the trade foresaw this demand to some extent, as evidenced by the building of the new Bessemer plant at Youngstown, but the addition of new capacity has furnished small relief, and there are now numerous new

projects on foot to increase the supply of crude steel. During the past week the Union Pacific Railroad has been unable to place an order in the Chicago market for 11,500 tons of billets for its mill at Laramie, Wyo., while many other inquiries have met with similar fate and forging billets have been shipped very long distances. Consumers have not been unwilling to pay heavy freight in order to keep their mills in operation. This tremendous demand for crude steel is due to pressure for delivery on contracts and also to the large number of orders in prospect.

U. S. IRON AND METAL TRADES.

From the Iron Age, Sept. 27, 1906.

On the whole, the pig iron markets throughout the country have been quiet, with occasional spells of activity cropping out locally. The latter feature grows out of the appearance of inquiries both for prompt and forward delivery. Generally speaking, quotations are about $1 higher for the former. A good deal is being made of the new furnace capacity which will become available during the next six months, but experience has only too often taught that expectations as to the date of blowing in of new furnaces are rarely realized.

From the west comes reports of increasing scarcity of steel.

The railroads continue to appear as important buyers for next year.

A good run of moderate sized contracts for structural material has come to the mills. Included in them is 5,000 tons for the two new plants in the Chicago and Pittsburg districts of the Universal Portland Cement Co., a new subsidiary company of the United States Steel Corporation, which is handling the rapidly developing cement production of the corporation.

In the lighter lines, it is the old story of enormous pressure to meet the demands. In the wire industry there has been an advance of $1 per net ton all along the line. In the sheet trade a premium of $1 per ton on the heavier gauges is growing more general, while in the tin plate trade a somewhat significant incident is that there have been small sales of foreign tin plates for domestic consumption for very prompt delivery, it being impossible to secure domestic tin plate.

British Columbia Trade News

Vancouver, Sept. 21, 1906.

While steady development work has been going on at the oil fields in the Flathead country, in Southeastern British Columbia and Southwestern Alberta, not much has been known by the public as to progress made. The Western Oil & Coal Co., which has been operating there for the past three years, will soon be in position to ship. One well is producing about 200 barrels per day and another is to be sunk. Already the company has five "holes" down. Kelly Bros., a West Virginia company of long experience, are sinking a well ten miles from the Western Oil & Coal Co.'s property.

President Hays, of the Grand Trunk Pacific, is expected to reach Vancouver on Sunday. A trip by team across the prairie from Portage La Prairie to Edmonton, just completed by the president and party, is a last reminder of the old cross country route by Red River carts, the first means of transport from Winnipeg to the far Northwest. From Edmonton President Hays is on his way south to Calgary and thence west to the coast. Interviewed at Edmonton he expressed his surprise at the speed which had marked work on the prairie section. By next year that section will be ready for the iron. As to the mountain section and the location of the coast terminus, Mr. Hays said nothing would be finally decided till survey parties still in the field would report this Fall.

* * *

In adding to its power-producing capacity this year, the Vancouver Power Co. has purchased from the Canadian Westinghouse Co., of Hamilton, the largest generator ever made in this country. It is of 2,000 h.p. capacity, 3 phase, 7,200 alternations, 200 revolutions per minute, of direct connected engine type. Included with the order was a rotary convertor of 1,350 h.p. and eight air-blast transformers, each of 733 h.p. This new plant is required for immediate demands upon the power the company is supplying to the cities of Vancouver and Victoria and to the B. C. Electric Railway system. The total power to be developed by the company when this addition is installed will be 12,000 h.p. The waterworks installation of the company at Lake Beautiful is of 30,000 h.p. capacity, so that future extensions are provided for.

The Stave Lake Power Co.'s plant, some 30 miles from Vancouver, is also actively under construction, Mr. Wm. Kennedy, C.E., of Montreal, being the engineer in charge of construction, so that Vancouver is not to be handicapped in building up a manufacturing centre.

* * *

Building material for the construction of the Fraser Valley section of the V., V. & E., J. J. Hill's British Columbia road, is being collected at Cloverdale, a a point on the Great Northern south of the river, whence the projected line starts east to meet the section now being driven through the Similkameen and the Hope Mountains, to the coast. Active construction work is to go ahead uninterrupted, so the orders run. The company has just completed purchase of right of way on the south side of the Fraser River to Ladner, a point close to the mouth of the river, and whence steamer connection to the island and to northern coast points may be had.

* * *

The visit of the Manufacturers' Association is being looked forward to with considerable excitement here, now that the convention at Winnipeg is over and the party is en route west in its special train. It is to arrive here Monday and almost a week is to be spent on the coast. Closely following this visit is the convention of the Canadian Forestry Association, at which His Excellency the Governor-General is to preside. As His Excellency is also to open the B. C. Exhibition at New Westminster, the next two weeks will be very important to this province, bringing it into deserved notice in Eastern Canada.

Nova Scotia Trade News.

Halifax, N.S., Sept. 25.

With the Dominion Exhibition now on, the hardware business is very quiet and it is not expected to brighten up until the show is closed. Some changes have been made in the price list since last report. White lead has been increased about 25 per cent. on the hundred pounds, and shot has been increased 50 cents on the list. Zinc has also been advanced, but the Halifax jobbers have not yet increased their prices, though it is expected that they will soon raise it half a cent per pound, placing the quotation here at 8½ cents per pound.

Among the hardware dealers and manufacturing firms exhibiting at the exhibition are the following:

The Consumers' Cordage Company displayed five large pyramids of rope and ten smaller pillars of clothes lines, binder twine, etc.

Henderson & Potts had an interesting exhibit. The frame work of a reception room was covered completely by different colored cans containing the firm's various paints, varnishes and stains.

The Starr Manufacturing Co.'s exhibit was somewhat similar to that of other years, with pillars made from hockey sticks and a fine display of the Acme Club skates.

Cragg Bros., retail hardware merchants, Halifax, exhibited several handsomely finished show cases and other shop fixtures.

The McClary Manufacturing Co. made a fine showing of about twenty sample stoves, ranges, etc.

In Machinery Hall, James Flemming, St. John, showed the Essex gasoline engines, with a couple of motor boats, one of which was fitted with revolving chairs.

W. C. Thompson had a fine display of hot water boilers, stoves and ranges.

Longard Bros. showed hot water boilers and gasoline engines, and the Maritime Light & Power Company, which lighted the building, also had an exhibit.

The Lloyd Manufacturing Company showed gasoline engines and saw mill machinery.

The Maritime Heating Company, Amherst, exhibited hot water apparatus and radiators.

The Amherst Foundry Co. had a fine display of beautiful enamelled ware ranges and stoves, and Jas. Dover, Truro, had a display of patent curling stones.

The Toronto Gas & Gasoline Engine Co. had a most attractive display of launches and gasoline engines.

Austen Bros. had a big exhibit, including a mining car fitted with Chapman ball bearings, gasoline engines, steam drills and mining supplies.

H. H. Fuller & Co. had a large and attractive display of forges, blowers, drills, tools of all kinds, mill and mining supplies.

W. Crowe, Truro, showed lawn swings and windmills.

The Waterous Engine Co., Brantford, Ont., showed a steam fire engine and a gasoline fire engine, and the Canadian Fire Engine Co., London, Ont., showed the first new steam fire engine.

James Hills & Sons had a nice exhibit of the stoves, ranges, etc., manufactured at their foundry.

Hardware and Metal Conditions in Manitoba

(Market quotations corrected by telegraph up to 12 a.m. Friday, Sept. 28, 1906.)

Office of HARDWARE AND METAL,
Room 511, Union Bank Building,
Winnipeg, Man.

Owing to the advances in pig lead local prices have been advanced in shot and lead pipe. New prices will be found in the detailed quotations below. General business is active in all lines and collections are reported much better than at the corresponding season last year. The settlement early in the week of the building trades strike in the City of Winnipeg has prevented any serious setback in the city trade in builders' supplies and builders' hardware.

LANTERNS — Wholesale prices are steady in spite of severe cutting by retailers in a few sections. We quote: Cold blast, $5.25; coppered cold blast, $7.25; cold blast dash, $7.75; lift, $4.25 per dozen.

WIRE—We quote as follows: Barbed wire, 100 lbs., $2.90; plain galvanized, 6 to 8, $3.39; 10, $3.50; 12, $3.10; 13 $3.20; 14, $3.90; 15, $4.45; 16, $4.60; plain twist, $3; staples, $3.50; oiled annealed wire, 10, $2.96; 11, $3.02; 12, $3.10; 13, $3.20; 14, $3.30; 15, $3.45. Annealed wires (unoiled) 10c. less.

HORSESHOES — Quotations are as follows: Iron, No. 0 to No. 1, $4.65; No. 2 and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to No. 1, $5; No. 2 and larger, $4.75.

HORSENAILS — Lists and discounts are quoted as follows: No. 10, 20c.; No. 9, 22c.; No. 8, 24c.; No. 7, 26c.; No. 6, 28c.; No. 5, 32c.; No. 4, 40c., per pound. Discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent., "M" brand and other brands, 55 and 60 per cent. Add 15c. per box.

WIRE NAILS—Steady at $2.60 per keg.

CUT NAILS—Quoted now at $2.70 per keg.

PRESSED SPIKES—Prices are as follows: ¼ x 5 and 6, $4.60; 5-6 x 5, 6 and 7, $4.25; ⅜ by 6, 7 and 8, $4.10; 7-16 x 7 and 9, $4; ½ x 8, 9, 10 and 12, $3.90; ⅝ x 10 and 12, $3.75.

SCREWS—Discounts are as follows: Flat head, iron, bright, 85 and 10 p.c.; round head, iron, 80 p.c.; flat head, brass, 75 and 10 p.c.; round head, brass 70 and 10 p.c.; coach, 70 p.c.

NUTS AND BOLTS — Discounts are unchanged and continue as follows: Bolts, carriage, ⅜ or smaller, 60 and 5; bolts, carriage, 7-16 and up, 55; bolts, machine, ⅜ and under, 55 and 5; bolts, machine, 7-16 and over, 55; bolts, tire, 65; bolt ends, 55; sleigh shoe bolts, 65 and 10; machine screws, 70; plough bolts, 55; square nuts, case lots, 3; square nuts, small lots, 2½; hex nuts, case lots, 3; hex nuts, smaller lots, 2½ p.c.

RIVETS—Quoted now as follows: Iron, 60 and 10; copper, No. 8, 34½; copper, No. 12, 40 p.c.

COIL CHAIN—Unchanged in price. We quote: 3-16 inch, $9.25; 5-16, $5.20; 7-16, $4.45; ½, $4.10; ¼, $7.20; ⅜, $4.60; ½, $4.30; ⅝, $4.

SHOVELS—Discounts on spades and shovels continue 40 and 5 p.c.

HARVEST TOOLS — Discounts continue 60 and 5 p.c.

AXE HANDLES—Quoted as follows: Turned, s.g. hickory, doz., $3.15; No. 1, $1.90; No. 2, $1.60; octagon, extra, $2.30; No. 1, $1.60.

AXES — Prices quoted as follows: Bench axes, 40; broad axes, 25 p.c. discount off list; Royal Oak, per dozen, $6.25; Maple Leaf, $8.25; Model, $8.50; Black Prince, $7.25; Black Diamond, $9.25; Standard flint edge, $8.75; Copper King, $9; Columbian, $10.75; handled axes, North Star, $7.75; Black Prince, $9.25; Standard flint edge, $10.50; Copper King, $11 per dozen.

BUTTS—The discount on wrought iron butts is 70 p.c.

CHURNS — The discounts from list continue as before: 45 and 5 per cent.; but the list has been advanced and is now as follows: No. 0, $9; No. 1, $9; No. 2, $10; No. 3, $11; No. 4, $13; No. 5, $16.

CHISELS—Quoted at 70 p.c. off list prices.

AUGER BITS—Discount on "Irwin" bits is 47½ per cent., and on other lines 70 per cent.

BLOCKS—Discount on steel blocks is 35 p.c. off list prices; on wood, 55 p.c.

FITTINGS—Discounts continue as follows: Wrought couplings, 60; nipples, 65 and 10; T's and elbows, 10; malleable bushings, 50; malleable unions, 55 p.c.

GRINDSTONES—As noted last week, the price is now 1½c. per lb., a decline of ¼c.

FORK HANDLES—The discount is 40 p.c. from list prices.

HINGES—The discount on light "T" and strap hinges is 65 p.c. off list prices.

HOOKS—Prices are quoted as follows: Brush hooks, heavy, per doz., $8.75; grass hooks, $1.70.

CLEVISES—Price is now 6½c. per lb.

STOVE PIPES—Quotations are as follows: 6-inch, per 100 feet length, $8.50; 7-inch, $9.25.

DRAW KNIVES—The discount is 70 per cent. from list prices.

RULES—Discount is 50 per cent.

WASHERS—On small quantities the discount is 35 p.c.; on full boxes it is 40 p.c.

WRINGERS—Quotations are: Royal Canadian, $33; B.B., $37.75 per doz.

FILES—Discounts are quoted as follows: Arcade, 75; Black Diamond, 60; Nicholson's, 62½ p.c.

BUILDING PAPER — Prices are as follows: Plain, Joliette, 40c.; Cyclone, 55c.; Anchor, 55c.; pure fibre, 60c.; tarred, Joliette, 65c.; Cyclone, 80c.; Anchor, 65c.; pure fibre, 80c.

TINWARE, ETC.—Quoted as follows: Pressed, retinned, 70 and 10; pressed, plain, 75 and 2½; pieced, 30; japanned ware, 37½; enamelled ware, Famous, 50; Imperial, 50 and 10; Imperial, one coat, 60; Premier, 50; Colonial, 50 and 10; Royal, 60; Victoria, 45; white 45; Diamond, 50; Granite, 60 p.c.

CORDAGE—Quotations are as follows: Rope, sisal, 7-16 and larger, basis, $11.25; Manila, 7-16 and larger, basis, $15.75; Lathyarn, $11.25; cotton rope, per lb., 21c.

SOLDER—Quoted at 27c. per pound. Block tin is quoted at 45c. per pound.

VISES — Prices are quoted as follows: "Peter Wright," 30 to 34, 14½c.; 35 to 39, 14c.; 48 and larger, 13½c. per lb.

ANVILS—"Peter Wright" anvils are selling at 11c. per lb.

CROWBARS—Quoted now at 4c. per lb.

POWER HORSE CLIPPERS — The "1902" power horse clipper is selling at $12, and the "Twentieth Century" at $6. The "1904" sheep shearing machines are sold at $13.60.

AMMUNITION, ETC.—Owing to the advances in lead, shot has been marked up 25c. per cwt. New prices will be noted below. There is a good demand for ammunition and general sporting supplies. We quote: Cartridges, Dominion R. F., 50 and 5; Dominion, C. F., pistol, 30; military, 20; American R. F., 33⅓; C. F., pistol, 5 p.c.; C. F., military, 10 p.c. advance. Loaded shells: Dominion Eley's and Kynoch's soft, 12 gauge, black, $16.50; chilled, 12 gauge, $17.50; soft, 10 gauge, $19.50; chilled, 10 gauge, $20.50. Shot, ordinary, per 100 lbs., $7.25; chilled, $7.75; powder, F.F., keg, Hamilton, $4.75; F.F.G., Dupont's, $5.

IRON AND STEEL—Prices are Bar iron (basis, $2.50; Swedish iron (basis), $4.75; sleigh shoe steel, $2.75; spring steel, $3.25; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $9.50; Jessop, $13.

SHEET ZINC — The price is now $8.50 for cask lots, and $9 for broken lots.

PIG LEAD—The local price of $5.60 per cwt. in small quantities is maintained firmly and still higher prices are expected.

AXLE GREASE—"Mica" axle grease is quoted at $2.75 per case, and "Diamond" at $1.60.

BLACK IRON PIPE—Quotations are: ¼ inch, $2.45; ⅜, $2.85; ½, $3.15; ¾, $4; 1, $5.75; 1¼, $7.85; 1½, $9.40; 2, $12.90.

LEAD PIPE—The price has been advanced to $7.80.

GALVANIZED IRON — Quotations are: Apollo, 16 gauge, $3.90; 18 and 20, $4.10; 22 and 24, $4.45; 26, $4.40; 28, $4.65; 30 gauge or 10¾ oz., $4.95; Queen's Head, 24, $4.65; 26, $4.65; 28, $4.90.

TIN PLATES—We now quote as follows: IC charcoal, 20 x 28, box, $9.50; IX charcoal, 20 x 28, $11.50; XXI charcoal, 20 x 28, $13.50.

TERNE PLATES—Quoted at $9.

CANADA PLATES—Prices have been steady since the recent decline. We quote: Canada plate, 18 x 21, 18 x 24, $3.15; 20 x 28, $3.40; full polished, $3.90.

BLACK SHEETS—Prices are: 10 to 16 gauge, 100 lbs., $3.50; 18 to 22, $3.75; 24, $3.90; 26, $4; 28, $4.10.

PETROLEUM AND GASOLINE — Prices are quoted as follows: Silver Star, per gal., 21c.; Sunlight, 22c.; Eocene, 24c.; Pennoline, 25c.; Crystal Spray, 24c.; Silver Light, 22c.; gaso-

line, 70-72 (engine), 25½c., in barrels, f.o.b. Winnipeg.

PAINTS, OILS AND TURPENTINE—Mixed paints are being generally advanced owing to the high price of lead and oil. This week's quotations are as follows: White lead, pure, $7; bladder putty, in bbls., 2½c.; in kegs, 3¾c.; turpentine, pure, in barrels, 97c.; less than barrel lots, 92c.; linseed oil, raw, 64c.; boiled, 67c.

WINDOW GLASS—We quote: 16-oz. O.G., single, in 50-ft. boxes—16 to 25 united inches, $2.25; 26 to 40, $2.40; 16-oz. O.G., single, in 100-ft. cases—16 to 25 united inches, $4; 26 to 40, $4.52; 41 to 50, $4.75; 50 to 60, $5.25; 61 to 70, $5.75. 21-oz. C.S., double, in 100-ft. cases—26 to 40 united inches, $7.35; 41 to 50, $8.40; 51 to 60, $9.45; 61 to 70, $10.50; 71 to 80, $11.55; 81 to 85, $12.60; 86 to 90, $14.75; 91 to 95, $17.30.

CANADIAN WHOLESALE HARDWARE ASSOCIATION.

(Continued from page 31.)

"The Retail Hardware Association" was proposed by President-elect Newman, he referring to the need of organizing each branch of the trade and to the great good which the retail association could do in eliminating price-cutting and fostering a more fraternal spirit amongst the members of the trade.

Secretary Weston Wrigley, Toronto, whose name was coupled with the toast, regretted the inability to attend of President Humphries, who was much better fitted than he to speak on behalf of the retail trade. "The present gathering," the speaker said, "was an evidence of the benefits of organization to jobbers and manufacturers. Doubtless when the jobbers first organized there were many pessimists, and it was found difficult to get the conflicting interests together, but after eight years of organization each had probably learned that his competitor was not a bad fellow after all, and while there were occasional breaks the general advantages of organization far outweighed the disadvantages.

"The retailers are learning the bene fits of getting together," the secretary continued, and as anything which tendgressive action being taken by the retailer would reflect back upon the jobber, both wholesaler and manufacturer should view with satisfaction the progressive action being taken qy the retail trade. The jobber is in reality the retailer's banker, and the wholesaler as an assembler of goods was a necessity to the retailer as the manufacturers could not to advantage carry a large enough staff of salesmen to call upon each retailer and sell in the small quantities that the limited capital of the retailer made it necessary for him to buy.

"The Retail Hardware Association has been organized at an opportune time," the speaker concluded, "as the present is a critical period in the history of the trade. The wholesale trade is threatened with extinction if present tendencies are not checked. The retailers complain that the jobbers are selling direct to consumers, and this is encouraging many retailers to buy more and more goods direct from the manufacturers. The organization of the retail trade and the harmonious working together of the two interests was absolutely essential to the proper combatting of the destructive tendencies now gaining headway. In the United States the jobbing and retail associations worked together harmoniously, and the same condition could exist in Canada if the jobbers, as the older organization, extended the hand of fellowship to their sister organization.

Secretary Hardy Ill.

Mr. Newman proposed the health of Secretary Hardy, who was too ill to attend the convention. A fitting tribute was paid to the work of Mr. Hardy for trade organizations, and his assistant, Mr. Sam Frame, responded briefly.

"The Ladies" was the concluding toast, it being responded to in a few happily chosen words by Mr. H. B. Brainerd, of the Dominion Cartridge Co., Montreal.

HARDWARE TRADE GOSSIP

Ontario.

Heximer Bros., Welland, are building a stove and plumbing shop.

A. Andrews, hardware dealer, Carp, suffered a fire loss of $6,000.

C. M. Strange, of Lewis Bros., Montreal, was a visitor in Toronto during the week.

J. E. Farrell & Co., Soo, will put the heating plant in the new High School there.

A. Tidey & Co., gas fitters, etc., Hamilton, have assigned to W. G. E. Boyd.

Sturgeon & Beal, of Peterborough, will open a plumbing establishment in Woodstock.

Frank Moses & Son have opened a stove and tinware business at 487 Yonge street, Toronto.

J. T. Norton, Ingersoll, has purchased the plumbing and tinsmithing business of H. Tune.

F. J. Wilson has sold his hardware business at Buckingham, Que., and removed to Ottawa.

McDonald & Kennedy, tinware, etc., Cornwall, have dissolved partnership, D. E. Kennedy continuing.

J. M. Gunn, of the McClary Mfg. Co., London, is in the west with the Canadian Manufacturers' Association.

The stock and business of Norris & Lockhart, plumbers and electricians, Guelph, have been sold to Lockhart & Co.

H. J. Morden & Co., hardware dealers, Colborne, Ont., suffered a considerable loss from the recent big fire at that place.

George A. Childs, Montreal representative of the United States Steel Corporation, was in Toronto during the week.

Joseph Firth, head plumber with Peter & Sylvester, Stratford, has taken a position with E. P. Paulin, of Goderich.

Norman A. Wylie, of the Kemp Mfg. Co., Toronto, is visiting Western Canada with the Canadian Manufacturers' Association excursion.

W. C. Springer, of the Belleville Hardware Co., Belleville, is one of the Canadian Manufacturers' Association party touring Western Canada.

Thos. S. Baker, general manager of Ontario Steel Ware, Limited, Toronto, leaves next week on a months' tour of the enamelware plants of the United States.

The recent fire at the works of the Maple Leaf Harvest Tool Co., at Tillsonburg, has not interrupted the business of that concern and shipments are being made as usual.

A. W. Humphries, president of the Ontario Retail Hardware and Stove Dealers Association, was a visitor in Toronto and Guelph during the week on his return from the Methodist conference at Montreal.

Henry and Edmond Zettel, who formed a partnership this year to conduct their hardware, stove, tinware, implement and windmill business at New Germany, Ont., report a steadily increasing trade with some difficulty experienced in getting sufficient help.

George T. Pepall, of Samuel, Benjamin & Co., Toronto, returned a few days ago from a trip to the iron and steel plants in the Pittsburg district. While visiting one mill he had a narrow escape with his life, part of the superstructure collapsing a few seconds after he had crossed.

Jones Bros., Bracondale, estimate their loss by fire last week at $8,000, on which there is only $2,000 insurance. The business was started about ten years ago, but by hard work had been built up into a prosperous concern. Last year they were talking of building a new factory opposite the old one, but pressure of business delayed operations. All this Summer has been spent getting ready the Fall and Winter stock, which is entirely destroyed, besides many valuable patterns that will be hard to replace. The firm is rebuilding and rapidly getting in shape again and will soon be able to look after their former trade in stove repairs and cement.

Quebec.

Charles Belisle, plumber, Montreal, has been burned out.

Latourneau, Fils & Co., wholesale hardware, have been registered in Montreal.

T. L. Clark & Co., Montreal, plumber's supplies, had their stock damaged by fire.

Messrs. Austin & Nicholson, contractors, Chapleau, Ont., spent part of the week in Montreal.

T. M. Hutchinson, of Drummond, McCall & Co., Montreal, spent a few days of this week in New York.

Mr. Cameron, representing the Winchester Repeating Arms Co., called on the Montreal trade this week.

H. B. Carbary, of Lewis Bros.' city traveling staff, was married this week to Miss Odair, of Green Valley.

W. J. Leslie, of A. C. Leslie & Co., metal importers, Montreal, spent the week in Hamilton and Toronto.

J. Watterson & Co., wholesale metal merchants, Montreal, suffered a slight loss through fire in their warehouse this week.

F. S. Laythe, representing Butterfield & Co., manufacturers of taps and dies, Roch Island, Que., visited Mont-

real during the week, in the interests of his firm.

I. England, of J. England & Son, general merchants, Knowlton, paid a business visit to Montreal during the week.

H. L. Holstein, general merchant, of Whitney and Barry's Bay, Ont., was a caller at Montreal hardware warehouses recently.

Chas. Dietrich, representing Shurly & Dietrich, Galt, was a caller at the Montreal office of Hardware and Metal this week.

J. R. Golden, manager of the Canadian McVicker Engine Co., Galt, called at the Montreal office of Hardware and Metal, on Tuesday.

S. E. Waffle, representing Alex. McArthur & Co., paper manufacturers, visited the firm's Montreal office on Tuesday of this week.

F. Wilson Fairman, president of the Dominion Wire Mfg. Co., Montreal, has gone west on a six weeks' business trip. Mr. Fairman will stop at Winnipeg for a few days and then continue as far west as the coast.

Geo. J. Scott, western representative of the Pedlar People, spent his holidays in Montreal, accompanied by Mrs. Scott. Mr. Scott, being himself an old Montreal boy, has met a number of boyhood friends during his stay.

The Dundas Axe Works, Dundas, Ont., have got out a neat little souvenir representing a miniature of their "Crown Jewel" well known axe. Their Quebec representative, A. Bourbonniere, 204 St. James street, Montreal, is distributing them among his friends in the trade.

Western Canada.

Sova & Barbour, plumbers, Winnipeg, have dissolved partnership.

A. E. Hiscox, hardware dealer, Vermillion, Sask., has assigned.

Geo. D. Wood, of Geo. D. Wood & Co., has been slightly ill for several days.

Nicholles & Renouf, hardware dealers, Victoria, B.C., advertised their business for sale by tender.

C. D. Waldon, of Pease-Waldon Co., Winnipeg, returned last week from a business trip to Toronto.

Jesse Anderson, of Barr & Anderson, plumbers, Vancouver, has returned to his business from his wedding trip. He was married to Miss May Irving, Boston, Mass.

The additions to the warehouse of the J. H. Ashdown Hardware Co., Winnipeg, are being pushed rapidly to completion now that the building trades strike is settled.

The capacity of the Winnipeg warehouse of the Kemp Mfg. & Metal Co., Winnipeg, will be almost doubled when the addition now in course of construction is completed.

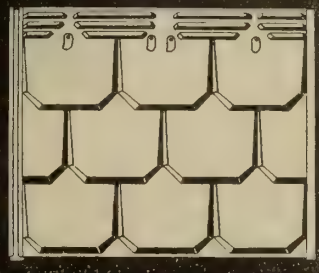
The Marshall-Wells Co. hope to be in their new Winnipeg warehouse the first of the year. The new building will be eight storeys high and the management state that it will be the largest in Canada.

A. N. Marshall, of Duluth, president of the Marshall-Wells Co., was in Winnipeg last week consulting with the management of the Winnipeg branch of the firm. This week he is in the country shooting chickens.

M. Shaffner, traveler for W. G. McMahon, Winnipeg, is on the road again after a seige of typhoid, which confined him to the St. Boniface hospital for several weeks. Sales of "Happy Thought" ranges should boom now.

Johnston & Co., Brandon, had a very attractive window last week, displaying their line of mantels and grates. When lit up at night it was the subject of admiring comment on the part of the crowds who throng the streets of the "Wheat City."

Jesse Anderson, of Barr & Anderson, Vancouver, passed through Winnipeg this week on his way to the Pacific Coast, carrying with him the spoils of a successful matrimonial campaign, which he has waged in Boston. Hardware and Metal tenders congratulations.



J. B. Curran, of the Brandon Hardware Co., has in his possession a "Commercial Agency register" of 1874, a book corresponding to the Bradstreets' or Dun's of the present day. A Hardware and Metal representative, who called on Mr. Curran last week was interested to notice the ratings in 1874 of two or three of the most prominent business men of Manitoba in 1906. There was no Brandon in 1874.

United States.

The E. A. Pfleuger Co., Akron, Ohio, has been organized with $100,000 capitalization to manufacture fishing tackle. E. A. Pfleuger, formerly with the Enterprise Mfg. Co., Akron, Ohio, is to be president and general manager of the new concern, and his years of practical experience will stand him in good stead in the new venture.

THE METALLIC ROOFING COMPANY LIMITED

"EASTLAKE"

STEEL SHINGLES

FOR THE ROOF

There's truest economy in choosing

"EASTLAKE"

STEEL . . . SHINGLES

They last indefinitely.

Are fire, lightning, rust and leak-proof.

Fit together perfectly by means of their special patented side lock, can't possibly work apart.

GALVANIZED "EASTLAKES" are heavily coated on both sides with all the galvanizing material that will adhere to them.

PAINTED "EASTLAKES" are thoroughly covered on both sides with Sherwin-Williams best paint.

"Eastlakes" have been tested by years of service in all climates, everywhere giving thorough, lasting satisfaction.

Write and let us give you further information.

TORONTO, CANADA.

Western Canada Factory, 797 Notre Dame Ave., Winnipeg, Man.

FOUNDRY AND METAL INDUSTRIES

The Defiance Iron Works, Chatham, will be greatly enlarged.

The Cape Breton Foundry Co. will establish a foundry at Sydney, C.B.

H. R. McLellan and others, of Sydney, C.B., have taken over the Mowry Safety Nut Co.

It is reported that Graham Fraser, formerly director of the Dominion Iron & Steel Co., is at the head of a syndicate to establish an iron plant at Amherst, N.S.

The Dominion Iron & Steel Co. during August produced 4,947 tons of wire rods, 17,840 tons of steel rails, 25,079 tons of steel ingots, and 20,844 tons of pig iron. The bounty earned would be $70.000.

At Portage la Prairie on Sept. 20, 54,674 tons of eighty-pound steel rails, valued at $1,500,000, were officially entered into Canada from Buffalo. The steel is for use on the Grand Trunk Pacific line, and will be brought to the yards they have established here for distribution. This is said to be the largest single entry ever passed in the west.

W. I. Kemp, Newark Valley, N.Y., proposes to reopen the Kemp Manure spreading factory in Stratford, as an agricultural machinery factory. The city council is asked to submit a by-law to the ratepayers to guarantee the bonds of the company for the sum of $25,000, repayable in 20 years, and to fix the business assessment at the sum of $25,000 for ten years. The factory was built five years ago at a cost of $36,000.

It is said that the Dominion Iron & Steel Co. have secured a large order from the United States for overhead rails of 125 pounds. They received the sample rail a few days ago. The mill is working now on the G. T. P. contract for 30,000 tons, and it is understood the manufacture of this rail will be begun as soon as this order is finished. The mill is rushed day and night. Very little work is being done in the rod mill of the company, owing to the serious depression in the market. It is stated that strong pressure will be brought to bear upon the Government to increase the duty on wire goods.

SHIP BUILDING INDUSTRY.

The big 500-foot freighter now under construction at the shipyard, is certainly a wonder for size and strength. Stood on end she would reach as high as a ten-storey building, and to climb to her deck is like going up the winding stairs of the tower at Ottawa. All the framework of this vessel is in position, and the greater portion of the heavy plates also riveted in place. The foundry and machine shops have a large gang busy on the engines for No. 9.

The shipyard is bound to be a money maker. The old conditions have passed away. The company have already a large number of applications for reservation for the Winter months, and it looks as if the dock and yards will be run wide open all Winter with repair work.

Our reporter visited the Northern Iron & Steel Co's works on Monday last, and found this magnificent plant last, and found this magnificent plant The rolling mills will be ready by the end of the month.

About four thousand tons of raw material have already been assembled on the premises, and orders have been booked for the whole of the product manufactured during the first three months.—Collingwood Express.

TO APPEAL AGAINST JUDGMENT.

The Smith's Falls Malleable Castings Co. are appealing to the Court of Appeal against a $60,000 judgment given against them in favor of the National Malleable Castings Co. It was held that they had failed to carry out a contract to supply a large and continuous supply of iron couplers at a certain price. The court has reserved judgment.

HOW ONE FIRM MADE A SUCCESS OF THEIR PAINT BUSINESS.

Every dealer who puts in a stock of paints and varnishes does not make a success in building up a profitable paint business. Much depends on the line, the way it is pushed, and the dealer himself. Goods do not sell themselves, neither do they make "repeat" sales if they have failed to give satisfaction the first time.

But Magladery Bros., Parkhill, Ont., are a splendid example of successful paint dealers. A little over a year ago they decided to add a stock of paints and varnishes to their hardware lines, and, after careful consideration, decided on The Sherwin-Williams Products. Thus they took the first step toward success by securing the best line, and goods of a uniform quality and excellence. Then, by co-operating with the Company in pushing their products, they rapidly built up a most profitable paint trade. The advertising and promoting helps secured the business and the satisfaction given by S-W. Products held customers when they had been secured.

Paint Department of Magladery Bros.' Store, Parkhill, Ont.

The illustration below shows a corner of the paint department in Magladery Bros.' store. It is a good example of a compact and well arranged paint and varnish display. By giving the right kind of attention to their line they have helped it along. Goods cannot be expected to do all the work—they must be shown up to advantage and brought to the attention of the prospective customer.

The following expressions from a recent letter to The Sherwin-Williams Co. from Magladery Bros. are interesting:

"We do our best to give S. W. P. all the space we can possibly give in our store, as we recognize in it a money maker and a trade getter.

"We have nandled S. W. P. only one year and it is needless to say that we find it a very easy seller, especially with the help of your personal letters, etc."

There is food for reflection in this firm's paint success and dealers who anticipate putting in a line of paints and varnishes, or who have not found their paint business profitable, should write The Sherwin-Williams Co., 639 Centre St., Montreal, Que., for their Agency Proposition. With the S-W. line and the S-W. advertising the dealer has every advantage.

Mr. Thomas Maglade. y.

Mr. Wm Magladery

PAINT, OIL AND BRUSH TRADES

CANADIAN OIL CO. FIRE.

The manufacturing establishment and oil warehouse of the Canadian Oil Company, Limited, Strachan avenue, Toronto, were destroyed by fire last Saturday morning. The office and a frame building used for storing varnishes and paints were saved from destruction, but as the company has large stocks in warehouses at various points in Ontario they are again shipping orders as usual. The loss, it is estimated, will probably be around $100,000. Thousands of gallons of oils, a large quantity of greases and four cars loaded with oil for shipment to Port Arthur were destroyed.

The fire spread with amazing rapidity, and is supposed to have originated in the oil warehouse at the extreme west end of the structure, which was about 250 feet deep, with a frontage of 55 feet. The intersection of the building, which contained six ten thousand and six twenty thousand gallon steel tanks filled with different grades of oil paints between the office and the warehouse, was two storeys high, the other parts of the structure being one storey high.

The total insurance is $138,250, divided among twenty-four companies. T. H. Hamilton, general manager of the company, stated "that the eastern portion of the building in which the offices are was saved, together with the paint factory and all other buildings and plant, including outside and underground tanks, which were filled with oil and remain undamaged. The business will continue without interruption, as we are in a position to fill all orders on hand and take care of all future business with our well equipped line of branches. The part of the plant destroyed will be rebuilt at once."

THE TURPENTINE INDUSTRY.

A southern trade paper states that if present conditions are permitted to continue, the extinction of the long leaf pine will be complete within the next 40 or 50 years. The United States Government is fully alive to the situation, but it is difficult to see in what way they can remedy it further than by giving advice to the owners. It is customary to lease tracks of timber for short terms of years to turpentine operators. The lessee naturally endeavors to obtain the largest quantity of products he can during his term of lease. As there is practically no supervision, he bleeds the trees to such an extent as to damage them. The timber speculator and the turpentine operators appear to be in control, and are indifferent as to whether the country is depleted or not of the long leaf pine.

The following description of the method employed in the distillation of turpentine is taken from one of the publications of the United States Department of Agriculture: "The process of distillation requires experience and care in order to prevent loss in spirits of turpentine, to obtain the largest quantities of resin of higher grades, and to guard against overheating. After heating the still somewhat beyond the melting point of crude turpentine, a minute stream of tepid water from the top of the condensing tub is conducted into the still and allowed to run until the end of the process; this end is indicated by a peculiar noise of the boiling contents of the still and the diminished quantity of volatile oil in the distillate. On reaching this point the heating of the still and the influx of water have to be carefully regulated. After all the spirits of turpentine has distilled over, the fire is removed, and the contents of the still are drawn off by a tap at the bottom. This residuum, the molten resin, is first allowed to run through a wire cloth, and is immediately strained again through coarse cotton cloth, or cotton batting made for the purpose, into a large trough, from which it is ladled into barrels, The legal standard weight of the commercial package is 280 lbs. gross, no tare being allowed. The finest grades of resin are largely used in the manufacture of paper, for sizing, of soaps, and of fine varnishes; the medium qualities are mostly consumed in the manufacture of yellow soap, sealing wax, in pharmacy, and for other minor purposes; and the lower and lowest qualities are used for pitch in ship and boat building, brewers' pitch, and for the distillation of resin oil, which largely enters into the manufacture of lubricating agents.

INDUSTRIAL POISONING IN LONDON.

According to the statistics for 1905-6, the following cases of industrial poisoning occurred in London, England, during the year: Lead poisoning, 203 cases, made up thus: White lead manufacturing, 66; paints and colors manufacturing, 25; printing, 5; metal melting, refining and rolling, 27; ship and boat building, 3; carriage and wagon building, 19; electrical accumulator manufacturing, 15; cask, drum and keg making, 10; other places under the act to which section 73 applies, 19; other places to which section 73 does not apply, 3; places outside act, 11; mercurial poisoning, 2 cases, made up thus: Barometer and thermometer manufacturing, 1; other processes, 1; phosphorus poisoning (lucifer match manufacturing) 1 case; arsenical poisoning (paints and colors manufacturing and arsenic extracting), 2 cases.

PAINT AND OIL MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, September 28, 1906.

Turpentine has shown a change during the past week, and with an increase of 3 cents a gallon at shipping points, prices in Canada have been marked up 2 cents.

Notwithstanding the firmer tone and advanced quotations on white lead, reported in our last issue, the demand even at the higher prices is exceedingly brisk. There are also lively shipments of red lead and other lead products.

A brisk inquiry is being maintained for varnishes, and prices are extremely firm. Especially is this the case with reference to shellac, and in view of the higher price of gum it is anticipated that some manufacturers will soon advance prices.

LINSEED OIL—The market is still somewhat unsteady, and our prices are subject to shading for round lots. We quote: Raw, 1 to 4 barrels, 52c.; 5 to 9 barrels, 51c.; boiled, 1 to 4 barrels, 55c.; 5 to 9 barrels, 54c.

TURPENTINE—At shipping points an advance of 3 cents has been made, and Canadian jobbers have responded by an increase of 2 cents per gallon. We are now quoting: Single barrel, 86c. per gal.; two barrels or over, 85c. per gal.; for smaller quantities than barrels, 5c. extra per gal. is charged. Standard gallon is 8.40 lbs., f.o.b. point of shipment, net 30 days.

GROUND WHITE LEAD—We quote: Best brand Government standards, $6.50 to $6.75; No. 1, $6.15 to $6.40; No. 2, $5.80 to $6.15; No. 3, $5.55 to $5.80, all f.o.b. Montreal.

DRY WHITE ZINC—The market remains unchanged at following prices: Red seal, 7c. to 8c.; French V.M., 6c. to 7c.; Lehigh, 5c. to 6c.

WHITE ZINC (ground in oil) — We quote: Pure, 8c. to 9c.; No. 1, 6½c. to 7½c.; No. 2, 5¼c. to 6¼c.

PUTTY—Our quotations are: Pure linseed oil, $1.75 to $1.85; bulk in barrels, $1.50; in 2-lb. irons, $1.80; in tins, $1.90; bladdered putty in barrels, $1.75.

ORANGE MINERAL—We quote as follows: Casks, 8c.; 100-lb. kegs, 8½c.

RED LEAD—In common with all lead products this line continues very firm. We still quote: Genuine red lead in casks, $6; in 100-lb. kegs, $6.25; in less quantities at the rate of $7 per 100 lbs.; No. 1 red lead, casks, $5.75; kegs $6, and smaller quantities, $6.75.

GUM SHELLAC — Primary markets are constantly advancing, but Canadian jobbers quote the following prices: Fine orange, 60c. per lb.; med. orange, 55c. per lb.; bleached shellac (white) 65c. per lb.

SHELLAC VARNISH—From present indications there will be an upward movement in this line very soon, owing to advances in gum shellac. We are still quoting: Pure white, $2.90 to $2.95; pure orange, $2.70 to $2.75; No. 1 orange, $2.50 to $2.55.

MIXED PAINTS—Prices range from $1.20 to $1.40 per gallon.

CASTOR OIL—We still quote as follows: Firsts in cases, 8½c.; in barrels, 8c.; seconds in cases, 8c.; in barrels, 7½c.

REFINED PETROLEUM — We quote as follows: American water white, 17c.; Canadian prime white, 15½c.; astral, 20c., ex warehouse.

GASOLINE—The ruling quotation at present is 24c. in bbls.

BENZINE—There is nothing new this week and we are still quoting 20¼c. in barrels.

WINDOW GLASS—Business continues large. We quote: First break, 50 feet, $1.85; second break, 50 feet, $1.95; first break, 100 feet, $3.50; second break, 100 feet, $3.70; third break, 100 feet, $4.25; fourth break, 100 feet, $4.45; fifth break, 100 feet, $4.70; sixth break, 100 feet, $5.25. Diamond Star: First break, 50 feet, $2.30; second break, 50 feet, $2.50; first break, 100 feet, $4.40; second break, $4.80; third break, 100 feet, $5.75; fourth break, 100 feet, $6.50; fifth break, 100 feet, $7.50; sixth break, 100 feet, $7.50; seventh break, 100 feet, $8; eighth break, 100 feet, $9. Double Diamond: First break, 50 feet, $3.45; second break, 50 feet, $3.75; first break, 100 feet, $6.75; second break, 100 feet, $7.25; third break, 100 feet, $8.75; fourth break, 100 feet, $10; fifth break, 100 feet, $11.50; sixth break, 100 feet, $12.50; seventh break, 100 feet, $14; eighth break, 100 feet, $16.50; ninth break, 100 feet, $18; tenth break, 100 feet, $20; eleventh break, 100 feet, $24; twelfth break, 100 feet, $28.50.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East.
Toronto, September 28, 1906.

There is no further change in turpentine since our last week's quotations, although the market shows a somewhat firmer condition since then. Linseed oil is stronger in tone and is costing more, but prices to retailers are unchanged. Lead, and all pigments continue firm, but as the season is now well advanced there will scarcely be any further advances. Varnish is costing more to manufacture owing to increased prices of the raw material used and there are some indications

SHINGLE STAIN—In 5-gallon lots, 75c. to 90c. per gallon.

PARIS WHITE—90c. to $1 per 100 pounds.

TURPENTINE TO ADVANCE.

Owing to the serious storm which occurred in the Southern States on Thursday in which floods are reported to prevail in the districts known as the pine belt, higher prices are almost certain to prevail for turpentine. Those in control of the markets at Savannah will take full advantage of the disaster to jump up the prices. At the time of writing the extent of the influence of the storm on the turpentine is not known, but as the negroes will not work in the water a scarcity is possible.

WHITING—60c. to $1 per 100 lbs. Gilders' whiting, 75c.

SHELLAC VARNISH—Pure orange in barrels, $2.80; white, $2.90 per barrel; No. 1 (orange) $2.25.

CRUDE PETROLEUM—We quote: Canadian, $1.32; Pennsylvania, $1.58; Ohio, 96c.

WILL MAKE GLASS.

The Manitoba Glass Co., of Beausejour, Man., is ready to commence work. They have five melting basins and five kilns for the purpose of tempering glass.

PRESENTATION AT MONTREAL.

On Friday last for about five minutes just before closing up time at the Canada Paint Company's offices in Montreal the telephone service in the counting house was badly disorganized.

It appears that one of the stenographers, Miss Tabb, has resigned, and the office staff being desirous of showing their appreciation of her uniform kindness and genial good nature, left their desks and telephones and rallied around, presenting Miss Tabb with a case containing a handsome sunburst composed of immaculate pearls set in solid gold. The short speeches which were made during the presentation by Mr. Robt. Munro, the managing director of the company, and Mr. William H. Evans, were literally bubbling over with well deserved compliments, and the recipient of these marks of appreciation was so overcome by this unexpected ovation that it was with great difficulty she could make any response to the genuine and much regretted farewell. The informal meeting quickly dispersed after three rousing cheers and a spontaneous "tiger" had been given for the fair young lady who has graced the office with her sweet smile and charming manner for some time.

CHINESE LABOR A FAILURE.

The Florida turpentine operator who tried the experiment of substituting Chinese for negroes in naval stores work has decided that it is not a success, and has arranged to ship the forty-eight Chinamen back to Portland, Oregon, whence he secured them three months ago. It is said the experiment cost him $10,000.

ITEMS OF INTEREST.

It is estimated that the aggregate yield of flaxseed in Manitoba, Saskatchewan and Alberta this year will be 700,000 bushels, an average of 12 bushels per acre.

It is reported that the United Alkali Company, of Northwich, Eng., has discovered a new process for extracting arsenic from a bye-product of their factory.

CATALOGUES AND BOOKLETS

When sending catalogues for review, manufacturers would confer a favor by pointing out the new articles that they contain. It would assist the editor in writing the review.

By mentioning HARDWARE and METAL to show that the writer is in the trade, a copy of these catalogues or other printed matter will be sent by the firms whose addresses are given.

Prize Winning Windows.

The Dover Mfg. Co., of Canal Dover, Ohio, have recently sent out a number of reproductions of some of the prize winning windows in last year's window display contest. There is something to be learned in looking over these cuts, in the art of window dressing and hardwaremen would do well to have a copy of their circular showing the different ideas which are suggested. The company will mail a copy to those sending their names.

Bowser Oil Pumps and Tanks.

S. F. Bowser & Co., Toronto, are mailing a set of cards showing their different styles of oil pumps and tanks. These cards are a departure from the usual catalogue and convey clearly the many good features of the Bowser self-measuring oil pumps. Their exhibit at the Fair was one that deeply interested all who were fortunate enough to pass that way, and those who had already purchased one of them were more than pleased with the saving effected in time and in oil. Besides these features they eliminate all danger incident to the storage of oil in the ordinary manner. A request from dealers will bring all information.

Sidney Wheel Scrapers.

The Sidney Steel Scraper Co., Sidney, Ohio, in their catalogue No. 10, show something new in steel scrapers, wheelbarrows and other contractors equipment. Their improved wheel scraper has a number of features that will commend it to all using this class of tool. particulars of which will be sent upon request.

Ingersoll-Seargeant Rock Drills.

The Ingersoll-Rand Co., 11 Broadway, New York, have ready their latest catalogue, No. 45B., showing their rock drills. Besides showing the different manufactures of this company the book gives some valuable information and comments upon the work for which each tool is adapted. A list of forty-four questions covering the problems of rock drilling under all conditions is given, as well as several pages and tables of useful information on compressed air, which ought to be in the hands of users and handlers of these tools.

Starr Skates.

Forty years at the business is a long time, and ought to mean a lot of experience. The Starr Mfg. Co., Dartmouth, N.S., have recently issued their fortieth annual catalogue. It is all about skates and shows a lot of good ones, which just at this time of year should be very interesting. Over 25 different styles are shown, accompanying which are a delineation of their particular features, and the class of skating they are constructed for. The reputation of the Starr skates is well established throughout Canada, and this year their prospects are better than ever for a large output.

Moore's Treasure Stoves.

A new catalogue of 146 pages has been recently gotten up by the D. Moore Co., Hamilton. It deals exhaustively with the many different classes of stoves and ranges made by this company. With each cut there is a description, giving a general outline of that style, stating the length of wood it will take, the number and size of the holes, the price with extras, etc. In short it is a silent salesman, showing such a number of sizes and styles that even the most peculiar conditions could not fail to be met. The back pages contain a lot of information on chimney, the operation of stoves, campers, fuel, etc., which will be found useful for everyone who sells or owns a stove. Dealers who have not received one of these catalogues should write for one.

STOCK CONTINUOUS LEDGERS

$21.00 Size 8x12 — **$23.75** Size 12x12

The above prices are for a complete outfit, comprising--

BUILDING AND INDUSTRIAL NEWS

HARDWARE AND METAL would be pleased to receive from any authoritative source building and industrial news of any sort, the formation or incorporation of companies, establishment or enlargement of mills, factories, foundries or other works, railway or mining news. All correspondence will be treated as confidential when desired.

The Sydney Cement Co., Sydney, C.B., will build a large plant.

The Seamen Kent Co., of Meaford, will build a factory in Winnipeg.

The Polson Iron Works, Toronto, will extend their plant at a cost of $100,000.

The Borland Carriage Co., Stratford, purpose making a large addition to their factory.

The Sawyer-Massey Co., Hamilton, will increase their plant at a cost of $30,000.

The Modern Bedstead Co., Cornwall, Ont., have applied for a charter, and will build a factory.

The Peterborough Shovel Co. will erect an addition 40 x 115 feet to meet their growing business.

Fred A. Harley, Georgetown, Ont., and others, contemplate establishing a knitting factory in that town.

The Strathcona Radial Tramway Co. are seeking franchise to build an electric railway between Strathcona and Edmonton.

W. E. Buckingham, of Guelph, representing Michigan capitalists, contemplates starting a paper mill in Toronto.

The Sanderson Mfg. Co., Sydney, N. S., have been incorporated with a capital stock of $45,000. They will manufacture roofing material, tar paper, etc.

J. M. Fleming, of Ottawa, and others, purpose starting a factory in Iroquois, Ont., for the manufacture of certain patents in connection with machine shops.

The Detroit Trolley Wheel & Electric Equipment Co., have purchased the Ward factory building in Leamington, Ont., and will manufacture automobiles, brass goods, tools, etc.

The Phillip Carey Mfg. Co., Lockland, Ohio, is preparing to erect an asbestos plant at Montreal. It cost $15,000 in duty last year to bring this company's goods into Canada.

Oil of very good quality has been struck at Fort McMurray, up the river from Edmonton. The C.N.R. is pushing its branch line from Edmonton to the Landing, five miles of steel already being laid.

The John Morrow Screw Co. have been incorporated with a capital stock of $100 000. They will carry on their usual business. The directors are J. A. Coulter, W. H. Shapley, F. H. Deacon, O. E. Robinson, and W. H. Wortman, with head office at Ingersoll.

The first electric or trolley locomotives to be used on the Canadian Pacific, or in Canada, will be installed in the Fort William switching yards of the C.P.R. Mr. Cross, assistant to the vice-president, stated that as soon as Kakabeka Falls power plant is completed electricity will be used for motive power in the Fort William yards.

The first gasoline traction engine for threshing, plowing and general heavy work, ever built in Canada was turned out of the Dyment Foundry Co's shops at Barrie for its trial trip. The engine weighs four tons and is the invention of J. C. McLachlan, of Toronto, now superintendent of the motor shops. It is equipped with a 40 h.p. double opposed engine and with a gang of ten plows will plow 40 acres a day. The machine is much lighter than a steam engine, and the elimination of the chances of fire is one of the engine's chief recommendations. It will drag a threshing outfit two miles an hour on ordinary roads.

In many respects the recent convention of the Canadian Manufacturers' Association held in Winnipeg was the most successful in its history. The attendance was much larger than a year ago at Quebec and a vast amount of business of an important nature was disposed of in the businesslike style of the best business men of Canada. It was decided to open a permanent office in London, Eng., to act as a commercial intelligence agency for the association members, to assist in securing skilled labor for the members, and in other ways to promote the interests of the organization. Important steps were also taken in promoting the scheme for the mutual fire insurance of association members, and, taken as a whole, the meeting was remarkable for the new departures which were decided upon.

For the first time in the history of the association the annual convention was held west of the Great Lakes and the event was looked forward to with keen anticipations by the citizens of Western Canada, who, rightly or wrongly, united in considering it a most important epoch in the history of the newer Canada. The west wants manufacturers and is determined to have them, her citizens being thoroughly convinced of the unwisdom of shipping raw materials east and bringing in the manufactured product. The west wants manufacturers and preferably Canadian manufacturers, and hence the keen interest excited by the visit to the west of the Canadian Manufacturers' Association. Winnipeg received them with open arms and everything possible was done to show the visitors the advantages offered them by the metropolis of the west. In the excursion westward which followed the convention the principal western towns have been visited and in all an effort has been made to show the visitors what the west has to offer them. It may be confidently expected that one result of the western

Paroid Roofing Will Make Money for You

READ THIS:

Thousands of dealers all over Canada and the United States are making with Paroid one of their most profitable lines. If you are not selling Paroid it will pay you to get our proposition.

Why Paroid is the Best Ready Roofing Made

Paroid is the best quality of ready roofing made. Railroads, manufacturers and farmers all over Canada and the United States are using it in place of shingles, tin, iron and other kinds of roofings, because it lasts longer and costs less.

We make Paroid from start to finish—we make our felt—the most important part of the roofing, while other manufacturers buy their felt where they can get it cheapest. That's the principle reason why Paroid lasts longest. We could not stand back of Paroid if we did not make the felt.

Paroid is **soaked** and coated with a thicker, smoother, more pliable and durable coating than is on other ready roofings. Send for samples of Paroid and compare it with other kinds. You can see and feel the difference.

Paroid is applied with the **only** anti rust-proof cap made. It insures a tight roof. Other roofs often fail because the cap rusts out. Paroid will not crack and break in cold weather. It is adapted for all kinds of buildings and will outlast other ready roofings.

How We Help You

Our advertising plan has doubled the sales of our dealers this year. It helps to sell their other lines, too.

Send for our proposition and we will mail advertising matter and samples to every likely user of roofing in your town. It will not cost you a cent and can't help bringing you orders. We'll send you all the electrotypes and special things you can use. We'll write letters to prospective customers and send our salesman to help you land orders. Write, telegraph or telephone at our expense at any time.

The Fall is the best season of the year to sell roofing. Can you afford not to sell Paroid?

It won't cost you a cent to try out our proposition and we stand back of every roll of Paroid you sell.

Sign your name to a postal to-day and we'll send you full particulars and samples.

BUILDING NOTES.

A new land titles office will be built at Regina.

Souris, Man., Methodists will build a $20,000 church.

St. Jules congregation, Winnipeg, will build a church.

Thos. Kennedy will build a Summer hotel at Barrie.

Victoria will have hospital extensions to cost $30,000.

Donaldson Bros. will build a hotel at Cobalt, to cost $10,000.

The C.P.R. will build a paint shop at Montreal, to cost $70,000.

P. O. Dwyer will build a pork packing factory at Edmonton.

Milne Bros., Mundare, Alta., are building a hardware store.

The Cockshutt Plow Co. will enlarge their Winnipeg warehouses.

It is stated that the Grand Trunk will build a large hotel in Quebec.

Winnipeg will build another new Collegiate Institute to cost $50,000.

A new Baptist church will be built in Montreal at a cost of $60,000.

The Lutheran congregation, Fort William, will build a new church.

A penitentiary, to cost a half million dollars, will be built at Prince Albert.

The Canadian Express Co. will build a ten storey building at Montreal to cost $250,000.

Winnipeg building permits for the past nine months have amounted to $10,500,000.

The Toronto, Hamilton & Buffalo Railway will build shops at Hamilton, to cost $10,000.

Rhodes, Curry & Co., of Amherst, N.S., have the contract for the new school at Glace Bay, for $17,300.

MANUFACTURERS' ASSOCIATION OFFICERS.

The officers elected for the ensuing year were as follows:

President—Harry Cockshutt, of the Cockshutt Plow Co., Brantford.

First Vice-President—Hon. J. D. Rolland, Rolland paper mills, Montreal.

Provincial Vice-Presidents—Ontario: L. Harris, Brantford; Quebec, G. A. Vandry; British Columbia, John Hendry, Vancouver; Manitoba, L. C. McIntyre, Winnipeg; New Brunswick, Chas. Macdonald, St. John; Nova Scotia, T. M. Cutler, Halifax; Alberta, A. E. Cross, Calgary; Saskatchewan, E. J. Brooks, Regina. Treasurer, Geo. Booth.

The convention was brought to a fitting close by a brilliant banquet at the Royal Alexandra, on Wednesday night, Sept. 19. At its close the special excursion train left for the west carrying the manufacturers on their western tour.

OUR LETTER BOX

Correspondence on matters of interest to the hardware trade is solicited. Manufacturers, jobbers, retailers and clerks are urged to express their opinions on matters under discussion.

Any questions asked will be promptly answered. Do you want to buy anything, want some shelving, a silent salesman, any special line of goods, anything in connection with the hardware trade? Ask us. We'll supply the necessary information.

The Northern Engineering & Supply Co., Fort William, write: "We would be obliged if you could put us in touch with manufacturers of school fixtures, such as desks and furniture used in schools."

The James Smart Mfg. Co., Brockville; Canadian Office & School Furniture Co., Preston; Moffat & Co., Carleton Place; John B. Snider, Waterloo; Granby Iron Works, Granby, Que.; and Rhodes, Curry & Co., Amherst, N.S., make various kinds of school furniture.—Editor.

Carriage Springs.

C. A. McDonald Co., Mortloch, Sask., write: "We have a special order to fill for buggy springs, but do not know who to get them from. We have tried the Winnipeg wholesale houses to no effect. Can you favor us with the names and addresses of at least two firms making this class of goods."

Three manufacturers of carriage springs, etc., are: Campbell Bros., St. John, N.B.; James Warnock & Co., Galt, Ont., and the Gananoque Spring & Axle Co., Gananoque.—Editor.

NEW ENAMELWARE PLANT.

Toronto is to be the headquarters of the fourth enamelware factory to be established in Canada, and the new ware, when it is definitely placed on the market, will embody many new features, according to Thomas S. Baker, the general manager of Ontario Steel Ware, Limited, who have succeeded Fairgrieves, Limited, as manufacturers of tin and galvanized ware and are broadening out into the enamelware field.

Mr. Baker, who is secretary-treasurer as well as manager of the company, was for some years with Messrs. B. & S. H. Thompson, metal merchants, Montreal, and for a brief period with Messrs. Samuel, Benjamin & Co., Toronto, leaving the latter firm to take hold of the Fairgrieves business, Mr. Fairgrieves' interest having been purchased and the entire control now being in the hands of Mr. Baker and his associates, two of whom are John De Gruchy, of the M. Langmuir Manufacturing Company, Toronto, and H. W. MacMahon, of the Sanderson Harold Company, the John Leckie Company and other enterprises.

The new firm name is well chosen as the firm's product will largely be enamelware, although their factory now has an output of 1,500 galvanized pails daily and 45 cement laundry tubs weekly, besides a large amount of tinware specialties. For their enamelware factory they have procured the services of several experts from the largest factories in Europe and the United States and by November they promise to be in a position to fill orders for high-class enamelware. Their factory is well located, having a frontage on Brock and Florence avenues.

CONDENSED OR "WANT" ADVERTISEMENTS.

A. RAMSAY & SON COMPANY

Est. 1842 MONTREAL PAINT MAKERS

BOOKS FOR
Plumbers and Sheet Metal Workers

HOUSE CHIMNEYS.

A series of articles and letters by different authors on chimney troubles and their remedies.

This book contains chapters dealing with the following subjects: Points on Chimneys, Defective Flues, How to Improve a Weak Chimney, Various Forms of Ventilators or Chimney Tops, Condensation in Stove Pipes, Smoke Pipe for Wood Furnaces, Remedying Down Draft in Chimney, Connected Flues Destroy Draft, and Fails to Bake on Bottom. Surely there is contained in this book information that will solve many of the problems that trouble furnace and stovemen.

62 pages, 5 1-2 x 8 inches.

40 illustrations.

Paper cover; post paid, 25c.

THE NEW METAL WORKER PATTERN BOOK.

A treatise on pattern cutting as applied to all branches of sheet metal work; by Geo. W. Kittredge.

This is the most thorough and complete work that has been published for sheet metal pattern cutters. The first five chapters are theoretical or educational in their nature, while the last chapter is devoted to practical work. The book does not presume upon any previous technical knowledge upon the part of the reader. Besides being a systematic treatise on the principles of pattern cutting, is also a valuable reference on pattern problems and as a fund of information on the subject treated.

430 pages, 10 x 13 inches.

744 illustrations.

Cloth bound; price, post paid, $5.

KITCHEN BOILER CONNECTIONS.

A selection of practical letters and articles relating to water backs and range boilers.

The work is divided into two parts, the first on water backs and boilers and their connections, and the second on heating rooms from range boilers, a topic that has much practical interest to the plumber. There are few lines of work where so many little difficulties arise, and therefore the discussion of different questions which have arisen should be of great interest as well as practical value to workers in this line.

Fifth enlarged edition; 194 pages; 6 x 9 1-4 inches; 113 illustrations.

Cloth, post paid, $1.

STEAM AND HOT WATER FITTERS' TEXT BOOK.

A book prepared for the steam and hot water heating course at the New York Trade School, with supplementary chapters on house heating, specifications and surface estimating; by Thos. E. McNeill.

This book will be appreciated by those who wish to master the prinicples of steam and hot water heating. The definitions in the beginning deal with the appliances, and little by little the reader is led on until at the close he is informed how to figure surfaces, lay out plans and install heating apparatus with the necessary piping.

140 pages; numerous illustrations and diagrams; 5 x 7 inches.

Cloth, post paid, $1.

TINSMITH'S HELPER AND PATTERN BOOK.

A book of tinsmiths' patterns with rules, diagrams and tables, by H. K. Vosburg.

The author, knowing from experience the needs of the practical tinner, has prepared a book in which a number of simple patterns are described in the plainest way. There are rules for the surface measurement of circles, cylinders, spheres, triangles and polygons; and also for the contents of solid bodies.

120 pages, 4 1-2 x 6 3-4 inches.

53 illustrations.

Cloth binding; price, post paid, $1.

FURNACE HEATING.

A practical and comprehensive treatise on warming buildings with hot air; by W. G. Snow; 170 pages, 6 x 9 inches; 90 illustrations; bound in cloth.

Besides dealing with hot air heating the work has an appendix on furnace fittings. The author has prepared a book of reference for the furnace man or the architect. Details have been discussed at some length. There are tables which have been tested by years of practical use, and these will be of great value to the practical furnace man.

Price, post paid, $1.50.

EASY LESSONS IN ROOF MEASUREMENTS.

Twelve short lessons on figuring from architects' or scale drawings the amount of material required to cover a given surface in flat, hipped or irregular shaped roofs; by W. Neubecker.

This book would prove of value to mechanics in the building trades, but would also prove of worth to the tinsmith.

31 pages, 5 1-2 x 8 inches.

12 illustrations.

Paper cover; post paid, 25c.

In addition to the above-mentioned we have many other works in stock and can secure any book published.

PLUMBING AND STEAMFITTING

ANSWERS TO HOT WATER HEATING QUESTION.

"If you were installing a hot water heating plant having 500 sq. ft. of radiation, and a boiler rated to handle the same amount, and you were asked by your customer if there would be any advantage in installing a larger sized boiler, either in the interest of better service or economy in the consumption of fuel, and if so, why?— What would you say?"

About six weeks ago we asked the above question relating to the installation of a hot water heating system and offered to send Hardware and Metal free for one year to every one whose answer we published and a special prize to the one giving the best answer to the question.

We have received a large number of replies and it has been a difficult task to pick out those which we reproduce in this issue, because nearly every one possessed more or less merit, and it has been more especially difficult to arrive at a conclusion as to which one should be awarded the prize.

A striking feature of the contest has been the practically unanimous opinion expressed by practical men that a boiler a size larger than that rated to handle a given amount of surface is the best to use, and this undoubtedly is true; but, while the statement is made in almost every reply, the "reasons why" are in most cases not made clear.

If the assumption contained in Knox Bros.' letter were true in fact, then, of course, there would be no necessity for providing greater capacity than that given by boiler manufacturers for their various sizes, but, unfortunately, these ideal conditions do not obtain in one case in a thousand.

We know that this is a strong statement, but practical men everywhere realize that it is quite within the mark, because they know that in boiler manufacturing, as in every other line, competition compells the inflating of apparent value to the highest point and it is easy to understand that boiler tests are made under the very best conditions, viz., with perfectly clean sections, and careful firing, properly insulated pipe connections, etc., so that practically no heat escapes except through the radiators.

As compared with these conditions the heating man has to figure on the possibility, and indeed, probability, of a dirty boiler, having, perhaps, from 1-4 inch to 1-2 inch of soot and ash on the top of each setion, poor firing and perhaps poor fuel.

Some times, too he is compelled to depend on poor mechanics, and in consequence defective work retards the circulation which will otherwise be assisted to some extent by a stronger boiler.

In addition, it is an undeniable fact proven by everybody's experience, that a moderate fire, permitting the absorption of the maximum number of heat units as they pass slowly over the water surface, is much more economical than a bright fire, which will always be required, especially during cold weather, when the boiler is connected to heating surface equal to its total rating.

Thos. Stinson, London, makes a good point when he says that the capacity of a boiler is considerably reduced when a domestic heater is introduced, and this fact is too often overlooked.

To sum up, while, as has been said, several of the answers possess a good deal of merit, we are of the opinion that that written by "J.E.W." Ailsa Craig, Ont., is given in a way which would be most convincing to a customer who had no practical knowledge concerning the point, and we therefore award him the prize.

* * *

The Prize-Winning Reply.

To your question relative to hot water heating I would say:

My experience in installing and also tending to hot water systems, I have come to a practical conclusion that it is better and more economical to have a hot water boiler larger by from 15 to 25 per cent. than the radiation calls for, for the following reasons:

1. In extreme cold weather, with the larger boiler you have enough boiler capacity to keep an even temperature in the building **without excessive firing** and liability of injury to a smaller one.

2. That it requires **much less attention** with the larger boiler under checked draft than a boiler just large enough, owing to the **more rapid consumption of fuel** under full draft, and thereby necessitates frequent replenishing of fuel to the fires.

3. That with a small boiler under full draft the water is **heated to a greater degree of heat upon a smaller surface**, which therefore, carries a larger amount of air with the water to the radiators, which have to have constant attention to let the air pass off through the air cocks so as to give the full circulation of the radiator.

4. The most important item of all is the saving of fuel. By using a small furnace to get desired results you have to have the **fires under full draft**, and in this way a **large quantity of heat and unburnt gases passes off through smoke pipe and chimney and is entirely lost** when by having a larger boiler running under checked draft **and a small amount of fresh air passing in over the fire, the combustion of the gases is almost perfect** and the loss of heat passing up the chimney is reduced to a minimum.

J. E. W.

Ailsa Craig, Ont., Aug. 13, 1906.

Larger Size Unnecessary?

In reply to your questions of August 11, concerning a given quantity of hot water radiation, specifically 500 square feet: First, would the use of a heater, larger in size than one that is listed by the maker, ensure a more efficient service; and secondly, would it serve as an economizer of fuel. The subject is so important, surrounded as it is by so many variable conditions that one feels reluctant to display any assurance or to lay down a strict line for general guidance.

Offhand, the casual listener, in the light of comparison, would promptly dismiss the idea of getting a 20 h.p. motor, when all he needed would be the energy of a 10 h.p. one, he would consider that the surplus energy instead of being conserved, would be uselessly expended. To the practical man who has been schooled to appreciate the differences between the appearance of capacity and the possession of it, to him, oftentimes practice and theory appear contradictory and perhaps he would be prepared to show cause why the larger motor should be placed in preference to the smaller, the differences are as a rule settled by considerations that are special in character. So it is with a hot water heater—it is a fair and reasonable assumption that makers of them have demonstrated their capacity under the most severe test to perform their rating.

We will not differentiate between makers, but simply say our reasoning applies to the sectional boilers now so popular. Most boilers are good, conditional on their treatment. Incompetent pipe fitting will destroy the merit of any of them. Many a boiler of ample capacity for this reason has been condemned and thrown on the scrap heap. In these cases uniformity and simultaneity in radiation were impossible owing to the condition named, but which might be more appropriately described as disregard for the law of heat circulation. Where the fitting is perfect, a case is known where the boiler in the coldest weather for a considerable period, heated some thousands of feet more than it was listed at. Therefore, allowing for a well constructed house and piping, in size and arrangement, conforming to the law that heat lays down for its control, we would not consider it necessary, in regard to efficiency,

to advise our customer to place a boiler larger in size than his list called for, namely, 500 square feet.

It is supposed on this basis, that the cubicial size of the building has been determined, and a percentage struck, to give the required temperature, percentage is a condition whereon many differences arise, number and size of windows, position of rooms, whether they have an aspect to the north or south, presumably you have allowed for these in your specification. With a larger boiler you would have a larger firepot, hence a larger fire. Is it necessary with the limit you have placed before you? It has been determined by the rule of proportion that the size of the firepot tallies with the boiler or vise versa. If, then, 500 square feet, will give our customer the temperature he wants, our duty would be to tell him, that it would be useless expenditure in fuel and money to get a greater surface than that estimated to heat the quantity specified.

KNOX BROS.

Ottawa, Sept. 21, 1906.

* * *

Allow for Domestic Heater.

In answer to your question for steamfitters, in your issue of August 11, regards size of boiler for 500 feet of surface, I would say that it would be to the customers benefit to have boiler a size larger for service, economy, and saving of fuel and working of heating plant in general.

1. A larger boiler would have a free and quicker circulation of water, more grate and heating surface, fire pot and fire could be kept under control better in very cold weather as there would be no occasion to force the fire and it could be run with less waste of coal.

2. Grates in larger boiler would last longer, as there would be no occasion to force boiler in cold weather and they would be less liable to be burnt out.

3. The customer by purchasing a larger boiler may have the benefit of adding more surface to his plant, by the way of addition of residence or conservative as the case may be.

4. Or the customer may have a coil or heater placed in fire pot of boiler for heating water, for domestic uses, which is done on a good many boilers, and I find by experience it requires at least 5 per cent. more boiler power to heat a 60-gallon range boiler, and in a good many cases fitters do not take this into consideration.

Now Mr. Editor, take the life of the boiler in from three to five years time. All boilers get more or less corroded with soot and rust and we are all using a sectional boiler. A size larger boiler would certainly get the benefit by having more direct fire surface. I myself would try and place the size larger if possible.

GEO. STINSON.

London, August 26, 1906.

* * *

Fire Forced in Smaller Boiler.

In reply to your question of heating I would say that I always advise the installation of a furnace one size larger than one that is rated to carry the necessary amount of radiator specified. If 500 square feet of radiator were put on a boiler rated at that capacity it would be overloaded, as no allowance is made for mains. It will do the work in moderately cold weather if large mains are installed.

In my experience in heating I have always found it more economical for my customer to install a boiler one size larger than boiler rated to carry a specified amount of radiation, for the reason that a larger boiler means a larger fire pot and greater heating surface, and also a slower fire.

With a small boiler a much hotter fire is necessary as the fire pot is smaller. Consequently, in very cold weather the fire must be to a certain extent forced, as the capacity for coal is not so great, and with a very hot fire, clinkers will form, whereas in a larger boiler, the fire being slower, the coal has an opportunity to burn to a fine ash. This means a saving in the coal bill and less attendance, which does away with a certain amount of care and worry incidental to getting up in the small hours of the morning to replenish the fire that has burned itself out in the night.

W. J. GRAHAM,
Per Brennan.

Montreal, August 17, 1906.

* * *

Some Strong Arguments.

I would most certainly recommend a boiler of a larger size for many reasons.

1st. Because boilers are in many cases over-rated by manufacturers.

2nd. Because the mains have to be looked after and require to be allowed for.

3rd. Because of imperfect construction of many boilers, for instance (a) firepot may be too small to keep fire in all night (even with drafts closed) and especially on a very cold night if boiler is only large enough it would require some one to be firing several times during the night; (b) waterways may be tortuous and small and should the velocity of the water passing through boiler be high the friction would be so that the system would fail to give satisfaction; (c) forced firing (which is never economy in fuel) would cause trouble with grate and would necessitate more care in watching ashes and clinkers which would more than likely lead to burning out of grate bars and considerable annoyance at the very time that you most need the boiler; (d) insufficient heating surface is also another defect in construction, especially around and over fire.

4th. Because it is a wise precaution to allow a margin in the capacity of a boiler for very severe weather, for after all it is those few days of very cold weather that you have to live through.

5th. Because by having a larger boiler you are able to fire easier (which means economy in fuel) and with a damped fire, thus avoiding a large amount of heat going up the chimney unnecessarily.

Summing up, say you have a boiler that is rated with a margin of 50 per cent. or that your boiler rated at 500 square feet is really good for 750 square feet; that your boiler has a good deep firepot that will hold a good supply of coal to put you through on the coldest night you may have for at least eight hours; that your boiler has a good grate with a level surface where you can get a slice bar to work in case of clinkers; that your boiler has good clear waterways so that water as soon as it gets hot can deliver the heat to the radiators through pipes properly installed and of ample capacity (for your boiler would be useless otherwise); that your boiler is easily got at to clean surfaces; that your boiler is equipped with good doors, dampers, draft and check drafts; that your chimney is of ample size and of good draft; then it would be about as useless to get a larger size boiler to do the work as it would be to buy a pair of No. 9 boots if a pair of No. 8 suited you to perfection.

A. R. WILSON.

Sherbrooke, Que., Aug. 14.

* * *

Make Allowance for Extension.

If I was installing a furnace such as you mention, I would certainly recommend a size larger, first, for economy in fuel, the larger furnace holding more coal, requires less shaking, thereby saving coal; second, with a larger furnace you have capacity for adding more radiators in case of extension at first cost less radiators and labor.

ALEX. FORREST.

Quebec, August 22.

* * *

Adding Extra Radiators.

If I were installing a hot water heating plant with a given radiation and a boiler estimated to handle same, and were asked by my customer if there would be any advantage in installing a larger boiler, either for better service or the saving of fuel, I should say:

Put in a larger size boiler; it will burn no more fuel than will a smaller one, and will give a quicker circulation and does not require the same amount of attention. The advantage, however, would be greatest in case the given radiation was not sufficient to heat all the rooms and where an extra radiator would have to be added, or where unforeseen circumstances made it necessary to extend the building.

D. G. ROSS.

Winnipeg, August 20.

* * *

Large Size More Economical.

I always recommend the use of a boiler of more than the necessary capacity for the following reasons:

1st. The larger boiler has more heating surface.

2nd. It has also a larger firebox, taking a proportionately larger charge of fuel.

3rd. The additional heating surface permits the fire to be carried at a lower temperature than would otherwise be necessary.

4th. The fire being carried at a lower temperature allows the charge of fuel to last longer, assuring a greater uniformity of temperature at the radiators.

5th. There is consequently less wear and tear and burning out of grates and

firebox, less dirt, dust, labor and attention.

6th. With firebox properly charged, a little attention to dampers, and (as stated above) as the larger boiler may be run at a lower temperature in the firebox with a consequent slower combustion of fuel, the result is a big saving of fuel. After all, once the plant is installed, the main object is to keep the water at the required temperature with as little fuel and as little wear and tear on plant as possible, and to my mind the larger boiler is certainly more likely to have this result. I always like to see a boiler or boilers with 1¼ to 1½ times the required capacity go into a job—it depends on the size of the plant a good deal.

Hope you will get a good lot of answers to this question as I am eager to see what the other fellows say about it I want to say right here that I find your Hardware and Metal most interesting and up-to-date. I look for it every week.

GEO. BOND.

Hudson's Bay Company, MacLeod, Alta., August 16.

* * *

Heat Losses of Small Size.

If I was installing a hot water plant having 500 square feet of radiation and a boiler rated to heat the same amount and a customer would ask me if it would be of any advantage to him to install a larger size boiler, I would advise him to have at least a size larger boiler than the one mentioned.

In doing so you have a larger body of water, also a larger firepot, and when the water is once heating it has less tendency of cooling off when putting on fresh coal and the water returning back to the boiler than the one specified.

It is more economical to work with a larger size boiler at a moderate heat than a smaller size and rushing the fire, for in doing so you lose a certain amount of heat through the chimney.

A small apparatus should have more surface of boiler in proportion to the amount of radiation than a larger one, as the fire burns to less advantage in a small furnace than in a larger one.

There is no advantage in using too large a boiler for a small plant — the water is more liable to boil and discharge through the overflow of the expansion tank and form air in the radiators.

ARTHUR DESMARCHAIS.

Picton, Ont., Sept. 17.

* * *

Saves Fuel and Labor.

Assuming the combined area of the radiators and mains to be 500 square feet and the boiler to have a maximum rating of 500, I would advise my customer to use a size larger boiler as I believe it would be economy for him to do so, for I think he would save the extra cost of the larger boiler in at least five years in fuel alone, besides the time saved in attendance.

With the larger boiler a given quantity of coal would impart more heat units to the water contained in the system over a slow fire than would be the case with the same quantity of coal in a smaller pot under a full draft, as the waste through chimney would not be so great. At least that is the opinion of

D. S. A.

Campbellford, Ont., Aug. 14.

HOT WATER HEATING

(Reproduced from the splendid catalogue recently issued by the Taylor-Forbes Company, Guelph, copies of the book can be secured on request by any heating contractor in Canada.)

The theory of circulation is that all falling bodies gravitate with the same velocity, and, therefore, descend through a certain definite space in a given time, an effect of which gravity is the cause; by it the circulation of hot water is attained. The circulation causes all the hot water in an apparatus to be warmed. This continues while there is a fire in the boiler.

By means of this unequal pressure the water is forced to circulate through the apparatus, and it will continue to do so as long as the water in the returns has a lower temperature than that in the boiler and flow pipes, and as one is continually receiving heat while the other is as constantly parting with it, an equality of temperature can never occur. So we find the circulation of water in an apparatus is caused by the unequal pressure of the "up and down" pipes, and is not the result of any alteration in the level of the water contained.

A more even temperature may be obtained by hot water than by any other method, and it is also superior in its economy of fuel.

The relative weight of water and steam at 212 deg. is about as 1 is to 1,640. So that a pipe filled with water at 212 deg. contains 1,640 times the matter that it does when filled with steam. When the temperature of the steam falls below 212 deg. condensation begins, and continues until all its latent heat is abstracted; it then contains a heating power of an equal bulk of water, or as quantity occupying 1-1640 part of space the steam did.

The colder the water in the return pipes, as compared with that in the heater, the more rapid will be the circulation through the pipes.

Provision must be made for the escape of air in the pipes, or no circulation can be had. Water while boiling evolves air, and when cooling it embibes it again; and as the air is lighter than water, it lodges in the high part of the circulating pipes, and allowance must be made for its escape or for carrying it off.

With closed boilers, pipes may be carried to any height, depending only on the strength of the material employed. The higher the ascending and descending pipes are run, the more rapid will be the motion of the water, because of the greater difference in their weights.

Neither the principle nor practical working of an apparatus is in the least affected by having any additional pipes leading into or out of the boiler. The effect is the same with more flows than returns, and conversely.

Increasing the number of vertical branches does not increase the pressure in an apparatus if the vertical height is not increased.

Velocity of Flow.

The motive power of the circulation in a hot water apparatus is the difference between the specific gravities of the ascending and descending pipes. This effective pressure is very small, and is equal to about one grain to each foot in height for each degree difference between the pipes; thus, with a height of 12 in. in "up" pipe, and a difference between the temperatures of the up and down pipes of 8 deg., the difference in their specific gravities is equal to 8.16 grains on each square inch of the section of return pipe and the velocity of the circulation is proportioned to these differences in temperature and height.

Friction of water in pipes varies accordingly to their arrangement and size, being much greater in small than in large pipes, because of greater surface the water contained is in contact with, and its increased circulation, on account of its more rapid cooling. By increasing velocity the friction is increased nearly as the square of the velocity.

Water loses less of its heat in small than in large pipes, since it travels more rapidly, and the loss of heat by water is directly as the time and the surface conjointly.

One square foot of boiler surface exposed to the direct action of the fire, or three square feet of fuel, will be sufficient in a hot water system to supply the necessary heat to about 50 superficial feet of four inch cast iron pipe of about 200 deg. Fahr.

Every square foot of glass cools about 1¼ cubic feet of air as many degrees per minute as there is difference between inside and outside temperature.

If the difference between the inside and outside temperature should be 50 deg., then 1¼ cubic feet of air will be cooled 50 deg. by each square foot of glass, or as much heat as is equal to this will be given off by each square foot of glass.

The expansion of water between the temperatures of 40 deg. and 212 deg. is equal to one gallon in every 24.

To compute the pounds pressure per square inch of a column of water, multiply the height of column in feet by .434.

Water contracts and becomes denser in cooling until it reaches 39 deg. Fahr., then it has reached its greatest density. Below this point it expands, and at 32 deg. Fahr. it becomes solid, or freezes and expands, and will burst any metal used for either boilers, radiators or connections of the system.

Radiator boards should always be used as they cost very little extra, and carpets may be taken up or relaid without moving the radiator—besides it is easier to keep the floor or board under the heater free from dust than it is to brush the carpet.

Heating of Dwellings.

Hot water heating for dwellings is the best, the nearest to perfection, and most economical system known to-day. If it is intended to warm the rooms to 65 or 70 deg. Fahr., bedrooms to 60 or 65 deg., and bathrooms slightly higher, with the water temperature at 165 deg. when the thermometer is 10 to 15 deg. below zero, hot water is best, because the water can be conveyed through the system any temperature below 205 deg., thereby preventing overheating in mild weather. This is not so with steam heating, where 212 deg. of heat is necessary to secure any circulation.

Cast iron boilers have, from actual experience, proved to be the most satisfactory. There is a large variety of types, but the round boiler is most pre-

ferable. They have the best proportioned combustion chamber and perfectly arranged grate surfaces. The first section of boiler over the fire should be the largest, as this section easily does the best work. There should be a clinker door right on top of the grate below charging door, to admit of readily cutting out clinkers.

The fire-pot should be deep and, if possible, corrugated inside, and larger at the bottom than top, or perfectly straight. Cleaning out doors should all be separate instead of one large door, as this saves cooling off the boiler too suddenly when brushing out the soot.

Radiators of the vertical section cast iron type have proven to be the most perfect method of distributing heat through any building. They are made in a great variety of styles, shapes and heights—any and every demand can be easily satisfied. Those with screw threaded nipples will stand the highest pressure and look most like a finished article when set up. Those tied together with bolts have in many cases been found unsatisfactory because of the uneven expansion of the metals, as cast iron and wrought iron do not expand or contract evenly, whereas screw nipple radiators are all cast metal of even thickness and, therefore, not affected by the uneven expansion caused by very sudden changes in temperature and water.

Radiators should be placed as near the windows as possible; underneath gives the best results, or on exposed walls. This will prevent cold drafts on the floor.

PLUMBERS' ADVERTISING

The plumber of to-day has more than ordinary advertising to do; he has the people of his community to educate to a higher knowledge of better sanitation. The education of a people that are liable to look at price only, to see the necessity of a better grade of material and workmanship and the ill effect that poor sanitation can have on health. You yourself fully realize how the corners can be cut and good workmanship sacrificed in the plumbing business. But the average house owner does not realize this; in fact, he knows very little about the plumbing business. He couldn't tell you whether the traps ought to be put in the cellar or underneath the fixture, and as to the careful wiping of joints he can't see as there is any difference in the way of doing it. But where would your competitor with his cheap help be if you had been running an educational advertising campaign explaining the necessity of higher sanitation. Why, your prospective customer will realize that you know what you are talking about and he will never be easy if he does give the job to your competitor. You've unnerved him, and in nine cases out of ten you will get his work.

Now, there is a right and wrong time to give this information to a prospect, and it is not when he is ready for the work. Your price is higher than your competitor and you have a hard time convincing him then, for there is too much price as a gauze before his eyes. But if he has had this house in view for some time, and it's most likely he has, he'll be reading everything that has a bearing on it. He'll be making a study of paint, looking at the different houses he likes, getting the price on lumber, cabinet ware, etc. If you are running a good, strong newspaper talk on the better grade of plumbing, you'll have his attention even if he hasn't the matter definitely settled. Every man has a longing to have a little home of his own some day, and the minute the first money is laid away for this purpose anything pertaining to this house will be of interest to him. If your advertising has been well written you'll find that you will be the first one he will interview in regard to his plumbing. More than that, he will want the better grade, for you've shown him the difference, and he has reasoned it out for himself.

The average plumber thinks he can't run such an advertising campaign, yet he can talk plumbing if he has a prospective customer in hand. Then, why is it that he can't write this down in a series of ads and hand them to the printer? It is not any harder than to talk it. But the trouble is that the plumber is like many other business men. When it comes to writing anything down they try to make the matter look too well. Leave this alone. Write your ads just like you talk and don't attempt to add any of the frills. If you are in the habit of using the best of English, then write your ads the same way, but be sure and get them simple enough for any one to read. Leave out all the technical plumbing phrases you can, talk in the language any man would use when talking to another if both knew very little about plumbing. Don't mention syphon jet unless you go on and show what a syphon jet is. Try and look at the writing of plumbing ads from the reader's standpoint and you'll be sure and get them plain enough.

My experience in handling plumbers' advertising taught me that in the average size town or city a five or seven-inch single column space is just about the right size space. Try and give each ad as strong a headline as possible; make it of few words and with a bearing on the ad itself. Don't forget that when a person reads your ad once they'll not read it again, any more than they will the news items. The oftener you change them the better. Takes some time, but you will find it'll pay. — Selected.

PLUMBING ADS.

J. E. Farrell & Co., North Bay, a portion of whose ad is shown herewith, are progressive plumbers, judging from their interpretation of retail publicity's mission. "The Art of Fine Plumbing" explains the situation, comments on it and states a conviction. This stamp of ad certainly indicates that some plumbers are coming to the fore in sales matters. Unfortunately, Farrell's ad was poorly printed and therefore a reproduction, showing the cut, was impossible.

Purdy, Mansell & Co., Toronto, run a 25-line single column ad in the Globe. The ad does not do the company justice, for the space is so small that continuous statements are out of the question.

John Lewis & Co., Belleville, have a well-worded ad, but it is very badly set. The advertiser should insist on getting something like a decent presentation of his story in type. He pays for it and should see that the printer gives it to him.

H. Lalumiere, of Cookshire, Que., doesn't specialize enough on plumbing. He advertises his new tin shop and his metallic roofing, but merely places the word "plumber" below his name. He should advertise one thing at a time.

CLUFF BUSINESS GROWING.

The steady growth of the business of Cluff Brothers, Lombard street, Toronto, selling agents for Warden, King & Son, Montreal, manufacturers of the Daisy boiler, is evidenced by the recent additions to their sales staff of Angus Groft, representing the firm in Western Ontario, John Wilson, calfing on the Toronto trade, and Charles Childs at the warehouse.

P. A. Smith, formerly of Detroit, but recently with W. J. McGuire & Co., Toronto, has also been secured to look after the company's advertising, as well as to undertake the important work of supervising the getting out of a catalogue, which will comprise "Everything in Heating Goods," as well as roughing-in materials for plumbers and the Warden King Co.'s stable fittings.

M. J. Quinn, who recently resigned his position as mechanical superintendent of the Ontario Government, and in that capacity had won a wide reputation as a heating and sanitary engineer, is now devoting his attention particularly to the installation of Thomas air washing, cooling and ventilating systems, for which Cluff Brothers are Canadian agents.

The magnificent new offices and showrooms in the new Lombard street building are nearly completed, and Hardware and Metal hopes to be able to give our readers illustrations and descriptions of the new building in an early issue.

The pictoral post card gotten out by Cluff Brothers to celebrate their remov-

A QUESTION FOR PLUMBERS

In HARDWARE AND METAL of August 11th, we propounded the question on Hot Water Heating to which about a dozen answers are published on the preceding pages. The large number of replies received have encouraged the announcement of another query, this time to plumbers. As before, we offer an honorary prize of $5.00 for the best answer to the question repeated below, as well as a year's subscription to HARDWARE AND METAL, to any reader of the paper who sends in an answer considered worthy of publication. The question is as follows :

> In your judgment is it essential that every closet connection to soil pipe stack should be provided with a Break syphon ?
>
> If not, illustrate by a rough sketch the conditions which would render unnecessary the use of a Break syphon, and give the reasons why it would not be required.

An interesting subject for discussion is opened up in the above proposition and many Master Plumbers in every province in Canada should take part in the discussion by sending in a reply. By a comparison of views, and the presentation of the arguments of various correspondents, every plumber should be able to learn something.

In the replies to the question on Hot Water Heating several of the correspondents did not explain their "Reasons" as fully as might have been done and their arguments were not carried out to their proper finality. The answers to the plumbers query should not be too brief and confined. Plenty of space should be taken to make the argument clear and understandable.

Master Plumbers' Associations in the cities are often used for the discussion of subjects such as the one suggested. Let the columns of HARDWARE AND METAL be used in a similar manner as a sort of meeting place where the members of the trade throughout Canada can get together and talk mutual advantage.

How many can send us an answer before December 1st ? Address all letters to

HARDWARE AND METAL

10 Front St. East, Toronto

al into their new building made a great hit with the trade, and the demand for extra copies has been large. Any dealer in heating goods who did not secure one should send for a copy before the supply is exhausted.

BRASS GOODS AND APPLIANCES.

The Turner Brass Works, of Chicago, who have been established for thirty-five years, and have grown from a small beginning to probably the largest brass manufacturing concern in Chicago, report a constantly increasing Canadian trade and have been compelled to add extra equipment to their factory during the last year, an evidence of their increasing patronage. Two years ago they purchased from the White Manufacturing Co. their blow torch, furnace, brazer, and oven business and all patents controlling this line and continue to market it as in the past. They issue special catalogues of the following specialties: Automobile specialties, foot and pressure pumps, brass letters and figures, gasoline vapor lamps, gas arc lamps, sidewalk and name plate stamps, machinery name plates, blow torches and furnaces, and furnish estimates on all special work in brass, copper and aluminum. They operate a large foundry and give special attention to contract work.

PLUMBING MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, Sept. 28, 1906.

A rushing business is being done this week in all heating goods, and other lines required for finishing plumbing jobs. The big demand is caused by the near approach of the cold season and also the desire to have shipments made before the close of navigation.

Iron pipe is a big seller at present and no relief from the reported scarcity has been experienced by the jobbers. Heating contracts in the many new buildings which have been erected this Summer are calling for exceptionally large quantities of pipe.

A still further advance in pig lead has occurred this week, but without affecting the price of either lead pipe or solder, other than to strengthen last week's quotations.

RANGE BOILERS—Trade conditions are unchanged and prices remain as follows: Iron clad, 30 gallon, $5; 40 gallon, $6.50 net list. Copper, 30 gallon, $25; 35 gallon, $29.50; 40 gallon, $32 net.

LEAD PIPE—Quotations on pig lead have advanced about 15c. per hundred lbs., this week Pipe, however, remains as follows: 10 per cent. f.o.b. Montreal, Toronto, St. John, N.B., Halifax; f.o.b., London, 15c. per hundred lbs. extra; f.o.b. Hamilton, 10c. per hundred lbs. extra.

IRON PIPE FITTINGS—There is an exceedingly good demand for this line. We give discounts as follows: Discounts on all sizes of nipples up to 6 inch, 67 1-2 to 70 per cent.

IRON PIPE—The scarcity which we have mentioned as existing for some months past, shows no abatement. Our prices and discounts remain as before: Standard pipe in lots of 100 feet, regular lengths, 1-4 inch, $5.50; 3-8 inch, $5.50; 1-2 inch, $8.50; 3-4 inch, $11.50; 1 inch, $16.50; 1 1-4 inches, $22.50; 1 1-2 inches, $27; 2 inches, $36.50; discounts on black pipe, 1-4 inch, 62 per cent.; 3-8 inch, 62 per cent.; 1-2 inch, 71 1-2 per cent.; 3-4 inch and upwards, 73 1-2 per cent. Discounts on galvanized pipe: 1-4 inch, 47 per cent.; 3-8 inch, 47 per cent.; 1-2 inch, 61 1-2 per cent.; 3-4 inch, and upwards, 63 1-2 per cent. Extra heavy pipe of 100 feet lots are quoted as follows: 1-2 inch, $12; 3-4 inch, $15; 1 inch, $22; 1 1-4 inches, $30; 1 1-2 inches, $36; 2 inches, $50. The discount for black pipe is 71 per cent., and for galvanized, 61 per cent.

SOIL PIPE AND FITTINGS—These goods are not experiencing so lively a demand as before, but it is still excellent for the season. We quote as follows: Standard soil pipe, 50 per cent. off list. Standard fittings, 50 and 10 per cent. off list; medium and extra heavy soil pipe, 60 per cent. off. Fittings, 60 per cent. off.

SOLDER—Although lead has gone up still higher, solder remains the same, and we are still quoting: Bar solder, half-and-half, guaranteed, 24c.; No. 2 wiping solder, 21c.

ENAMELWARE—Our quotations remain as follows: Canadian bath tubs, plate E1, 5 ft., 1st quality, $20.65, special $18.65; plate E11 and E21, 5 ft., 1st quality, $19.50, special $17.15; plate E35, 5 ft., 1st quality, $24.65, special $22.40. American baths, rolled rim, 5 feet 2 1-2 inch rim, $22.25; 3 inch rim, $29.25. Lavatories, discounts, 1st quality, 30 to 30 and 5 per cent.; special, 30 and 10 to 40 per cent. Sinks, 18 x 30 inch, flat rim, 1st quality, $2.60, special, $2.45.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, Sept. 28, 1906.

There is a great scarcity of iron pipe just now and supply men are taxed to the limit in trying to fill orders. There is practically no 1¼ in. on the market, and galvanized pipe is also very short. The reason for this scarcity is said to be an insufficient supply of raw material and not because the mills cannot manufacture fast enough. This shortage of pipe consequently makes prices very firm. There is no further change in lead pipe, nor yet in solder, but on account of the high prices reached by pig lead, all lead products are firm. Heating goods are without change, but a lively demand exists for all lines. The end of the season usually stimulates this trade, but this Fall the business is much larger than in previous years. Soil pipe remains the same as our last quotations.

LEAD PIPE — The discount on lead pipe has been lessened to 10 per cent. as a result of the increasing price on pig lead. Lead pipe, 8c.

SOIL PIPE AND FITTINGS—Medium and extra heavy lead pipe and fittings are back to their former price, the extra ten having been taken off again. We quote: Medium and extra heavy pipe and fittings, 65 per cent. off; light pipe and fittings [illegible] cent. off; 7 and 8 inch pipe, 40 and 5 per cent.

IRON PIPE — A great scarcity prevails in iron pipe, and unless raw material commences to come to the mills in larger quantities there will be an actual shortage. At present there is scarcely any 1¼ inch. The supply of galvanized pipe is also very light. We quote: Black, 1-in. pipe, $4.37; galvanized, 1-in. pipe, $6.02. See current market quotations for other sizes.

IRON PIPE FITTINGS—There is no further change since last week, but prices are firm. We quote: Cast iron elbows, tees, crosses, etc., 67½ per cent.; cast iron plugs and bushings, 67½ per cent.; flange unions, 65 per cent.; nipples, 75 and 5 per cent.; iron cocks, 60 per cent.; Canadian malleable, 35 per cent.; American malleable, 25 per cent.; malleable unions, 65 per cent.; malleable bushings and plugs, 60 and 10 per cent.; C. I. ceiling plates, plain or N. P., 70 per cent.; C. I. floor, 80 per cent.; hook-plates, 65 per cent.; expansion plates, 65 per cent.; headers or branch tees, 65½ per cent.; ring hangers, black or galvanized, 70 per cent., American list.

GALVANIZED IRON RANGE BOILERS—We quote: 12 gallon capacity, standard, $4.50; extra heavy, $6.50; 18 gallon standard, $4.75; extra heavy, $6.75; 24 gallon, standard, $4.75; extra heavy, $6.75; 30 gallon, standard, $4.75; extra heavy, $7.50; 35 gallon, standard, $5.75; extra heavy, $8.50; 40 gallon, standard, $6.75; 40 gallon, extra heavy, $9.50; 52 gallon, $11; extra heavy, $14; 66 gallon, standard, $18; extra heavy, $20; 82 gallon, standard, $21; extra heavy, $24; 100 gallon, standard, $29; extra heavy, $34; 120 gallon, standard, $34; extra heavy, $40; 144 gallon, standard, $47; extra heavy, $55. The discount on copper and range boilers continues at 15 per cent.

RADIATORS — Business never was better than at present. Prices are the same. We quote: Hot water, 50 and 2½ per cent.; steam, 50 and 5 per cent.; wall radiators, 50 per cent.

SOLDER — Quotations remain the same, but not likely to drop any. We quote as follows: Bar solder, half-and-half, guaranteed, 26c.; wiping, 24c.

ENAMELWARE — Quotations are as follows: Plate E1, 5 feet, first quality, $20.65, special $18.65; plate E11, 5 feet, first quality, $19.15, special $17.15; plate E21, 5 feet first quality, $14.15, special $17.15; plate E35, 5 feet, first quality, $24.65, special $22.90. Fittings extra.

The Houseowner's Preference—"Standard" Fixtures

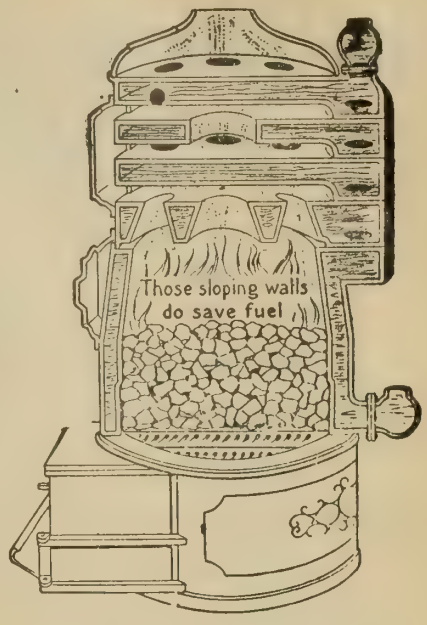
"Standard" Porcelain Roll Rim Sink and Wash Tray Combination with 15-inch Porcelain Enamelled Back. (For detailed specifications see catalogue).

OUR advertising and the houseowner's own observation have impressed him with the fact that "Standard" Porcelain Enamelled Fixtures are superior to all others. Architects and Plumbers find "Standard" equipment preferred in the home because the houseowner knows that the name "Standard" on any fixture is a **guarantee** of superior sanitation, inviting appearance and great durability, and that "Standard" equipment increases the cash value of the house.

Standard Sanitary Mfg. Co. PITTSBURGH, PA., U. S. A.

The Oxford Boiler is the Boiler for you to push, because-

The dealer can meet competition easier with the Oxford Boiler because the way the boiler comes to him (four-fifths put together) saves him much in expensive time—a few hours work instals an Oxford, where a day or more is needed with the average boiler.



He can meet competition easier with the Oxford Boiler because, although it has so many heat increasing and fuel saving improvements, these are not made the excuse for an exorbitant price.

He can meet competition because, though the Oxford Boiler is lavishly and liberally advertised for the dealer's benefit, neither dealer nor customer is taxed with the outlay for publicity.

He can **EXCEL** competition, because the Oxford Boiler selling-help puts him in touch with every opportunity in his field, and aids him in every necessary way to close every contract worth going after.

It would pay you to ask questions to-day about our new offer to live dealers on the

Boiler With Twelve Betterments.

EVAPORATION REDUCED TO A MINIMUM

is one of the reasons why PATERSON'S WIRE EDGED READY ROOFING will last longer than any other kind made.

Mr. C. R. Decker, Chesterfield, Ont., used our 3 Ply Wire Edged Ready Roofing fourteen years ago, and he says it is apparently just as good as when first put on.

We have hundreds of other customers whose experience has been similar to Mr. Decker's.

Hardware and Plumber—

We have pumps suitable to any demand made upon you by most exacting customers.

Our pumps will do anything that a pump can do, and we will be pleased to give the benefit of many years' experience to any one having pump troubles.

McDougall Pumps are Standard Pumps, and with us it is quality first, last and always, while we ask just as little money as we can get along with.

We have a few catalogues for distribution

NORTH BROS. MFG. CO.

PHILADELPHIA, Pa.

QUALITY COMES FIRST

in a Revolver. If you do not wish to sell a customer a second time, then it might pay you to offer him a cheap and worthless weapon on which you make a big profit. If you want his future trade, sell him the famous

H. & R. REVOLVER

Recognized as the greatest revolver value for the money. H. & R. Revolvers are noted for their accuracy, safety and durability. Made of the best obtainable materials, in a factory fitted with the most improved modern machinery, operated by highly skilled mechanics, each one is rigidly inspected to insure absolute freedom from flaws of any kind. Every part is accurate to the thousandth of an inch. H. & R. Revolvers are free from shake or rattle, and if treated with ordinary care will last a lifetime and can always be depended on. When you sell one you make a friend of your customer, and he'll come again to buy cartridges or other goods he may need in your line. If you have never handled these goods, it is to your interest to put in a stock at once. They are the kind that don't stay on the shelf, and that make satisfied customers.

TORONTO

EVER FOOLED ON PLUMBERS' OAKUM?

Your Automobile

will take a more substantial form than it does in your dreams, if you pay strict attention to the "when and where" to buy your goods to advantage.

Let us save you the price of a new pair of tires on this order.

Sometimes it comes with so little tar in it that it's taken for Carpenter's Oakum (not tarred); sometimes the weight of the wrapper is enormous, when compared with the weight of the bale; again, perhaps you'll find lumps in the centre that can't be used, and consequently you lose on the weight.

We have a large boat shipment of

Good Plumbers' Oakum

coming in this week. **How much can you use?** Let us know the largest quantity and we'll name you interesting prices (likely lower than factory carloads).

Prices are advancing rapidly, if you want our **best,** write now.

You Can Sell

some of these high-grade Cutlery Cases if you try.

There will arise plenty of opportunities in your town.

They make excellent wedding presents, They are more than ordinarily acceptable as silver wedding gifts. They are often bought as Christmas presents.

Is anyone leaving your town to whom the citizens wish to give a present? Suggest to the committee in charge of the matter, a cabinet of silverware.

RETURNED
OCT 6 - 190

Our cabinets are made in Canada of quarter cut oak, seasoned to our climate, and will not crack.

The cutlery is English make of the highest quality, and a choice can be given of several designs and grades.

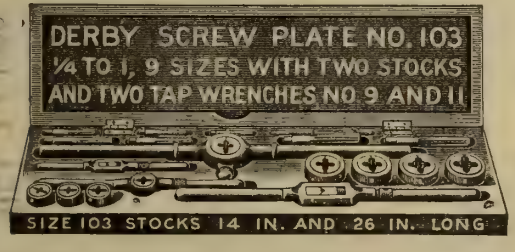
If interested, we will send you a folder with full descriptions.

If you have an enquiry, write us.

F. & W. Hardware Montreal

F. & W.

REECE'S SCREW PLATES

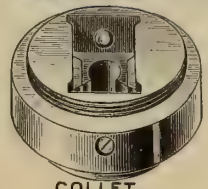


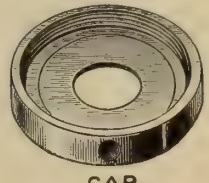
No. "CC" { 4 Small Collets cutting 1/4, 5/16, 3/8, 7/16. Stock 14-in.
3 Large Collets cutting 1/2, 5/8, 3/4. Stock 26-in.
With Tap Wrench

No. "EE" { 4 Small Collets cutting 1/4, 5/16, 3/8, 7/16. Stock 14-in.
5 Large Collets cutting 1/2, 5/8, 3/4, 7/8. Stock 26-in.
With Tap Wrench

The Taps and Dies in these sets have "V" shaped threads for cutting rough iron.

Derby Screw Plates





WITH ROUND ADJUSTABLE DIES

No. 102 cuts ¼ to ¾ in. with Tap Wrench
" 103 " ¼ to 1 " " " "
" 113 " ½ to 1 " " " "
" 121 " ⅜ to 1 " without Tap Wrench

Superior workmanship and high grade materials go to make up the great reputation enjoyed by the makers of Reece's Screw Plates.

The Collet holding the Reece Dies is made in two pieces—the guide and the cap which holds dies rigidly in place rendering stripping of threads impossible.

COLLET

CAP

By means of screws on side of Collets, dies can be adjusted as required.

Both Reece's Taps and Dies are made by skilled workmen, (in Canada) as though the firm's reputation depended on each individual article turned out.

That Stuffy Room

is more deadly than desease itself. Bad air is the curse of crowded living. In all public places such as asylums, clubs, big offices, schools and theatres, **PURE AIR CAN BE OBTAINED ONLY BY OUR SYSTEM OF VENTILATION.**

It has stood the tests of scientific experts.

It is in use in the finest buildings in Canada.

Its price is reasonable and its benefits lasting.

Testimony

Montreal, June 7th, 1901
Messrs. J. W. HARRIS CO., LIMITED, Montreal.

Dear Sirs,

I have been using your "AEOLIAN" Ventilators on several houses in this city with the best results. The tenants of these houses declared that your Ventilators are of great advantage to them. I also installed two (2) 18" on my stable and I can say that your Ventilator cannot be surpassed by any to take out the sweating or bad smell in any room.

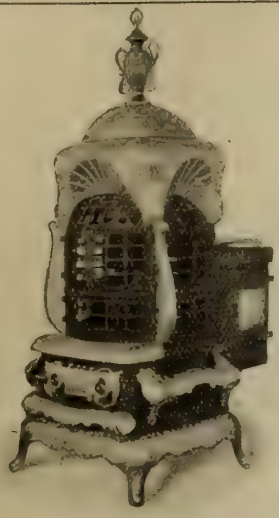
The "PERFECT IDEA"



Has the Necessary Attractiveness for Buyers

What attracts buyers?—self-evident, self-asserting merits that tell the range does its work well.
That it has all the up-to-dateness that an up-to-date range should have.
That it looks as good as it really is.
That it is priced in proportion.
That ***it has made good.***
The ***"Perfect Idea"*** is this kind of Range.
☞Price and other ***particulars*** you certainly should get.

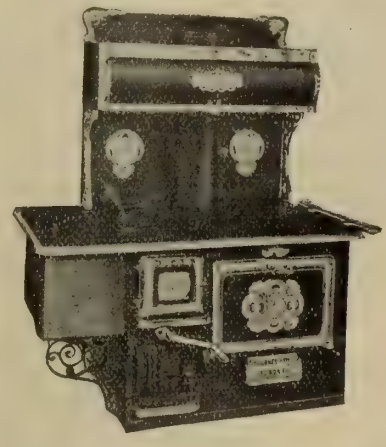
"Watch this space for Oaks next week"



More Range for the Money--

The dealer who shows any customer The Oxford Chancellor Steel Plate Range has little enough talking to do after he names the price. Because——

If that customer knows even a little about range prices, it is an easy thing to see how big a money's worth this range offers. Because——

It isn't a cheap range, but it is a range for much less money than a judge of ranges expects to pay. Because——

The Oxford Chancellor's extra-roomy oven, its body of extra-heavy, extra-riveted cold rolled sheet steel, its extra-sensitive draft control, its extra-fine nickel ornamentation, — all make this range one that does its own talking and its own selling once the customer hears the price.

We will bring the customer in to hear the price, if you'll point out the Oxford Chancellor when the customer comes in.

That's the part of it you'll have to ask us about,—our offer to live dealers tells you it all.

Wouldn't now be a good time to ask?

One Woman said "it is the best cooker I have ever seen."

Patented

OUR "FAMOUS" QUICK-SELLING TRI-USE COOKER

Can be used in various ways, viz., as a double boiler for cooking cereals of all kinds, as a steamer for vegetables, puddings, stale buns, bread or cake, or as two separate saucepans, etc.

Sufficient room has been allowed for the steam to circulate between the two saucepans and under the outer cover into the inner saucepan, thus cooking the food by steam, making it appetizing and more easily digested.

Patented

The Tri-use Cooker is a great seller and every one of your customer's should have one. Introduce it and follow results.

Model '93 Large Caliber Rifle. When the crash of the fleeing buck and doe makes your heart jump and brings your gun with a jerk to your shoulder,

and your eye follows those good *Marlin* sights as you lead the white flag for a shot, it's a comfort to know the gun is going to do its part.

Marlin Model '93s are sure-fire and accurate. All *Marlin* rifles are simple, strong, easy to carry and have that balance which makes you shoot well. *Marlin* '93 rifles are made in calibers .25-36 to .38-55. They are getting the best results everywhere at big game, from Virginia deer to Kadiak bear.

The barrels are of "Special Smokeless Steel," the best obtainable, and are rifled deep and severely tested.

The working parts are all of drop-forged steel blocks cut to simple patterns. All *Marlin* parts are interchangeable.

The *Marlin* solid top is accident insurance of the best kind. The *Marlin* side ejection throws the shell aside, not into the line of sight or into the eyes.

These and many other valuable ***Marlin*** *features are fully explained in our handsome Catalog. Sent FREE upon receipt of six cents in stamps.*

Remember all *Marlin* Rifles are proved and tested for safety. Safe, sure and strong! What more can we say to the hunter of big and dangerous game?

TO ALL DEALERS HANDLING FIREARMS:

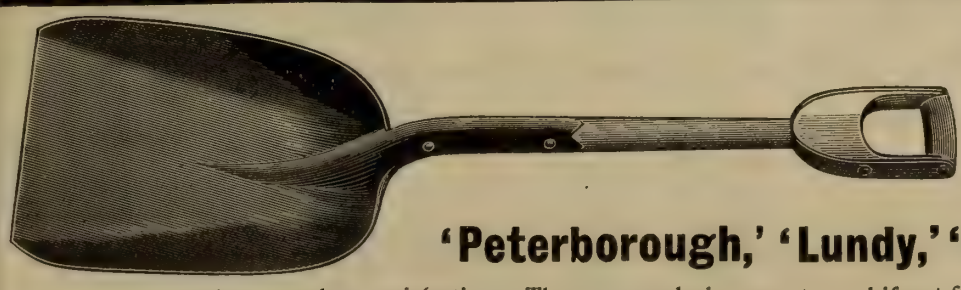
The above is one of seven advertisements to be used by the Marlin Company in their 1906 advertising campaign. These advertisements will be inserted in a list of magazines selected for their QUALITY, known to be bought and read by a class of people financially able to buy Marlin repeaters and having a total guaranteed circulation per month of 5,000,000. Estimating five readers to a magazine, this will give a total, for seven months, of 25,000,000.

In addition, Marlin goods are advertised in farm papers, hardware papers, sporting goods papers and in many miscellaneous publications.

In our advertisements we ask for six cents in postage stamps. This means that a person must furnish paper and envelope, a two-cent stamp for mailing, include six cents and take the time and trouble necessary to write us a letter. Our object is to cut out catalog collectors, young boys and girls and people who are not interested enough to invest ten cents and the time and trouble necessary.

We reason that if a person is interested enough to do this, it is worth our while to go after him seriously and earnestly, and on all inquirers answering these advertisements and spending ten cents on us, we spend more than twenty cents.

We send each and every one a 136-page catalog illustrated with hundreds of engravings, having a beautiful cover in colors and containing a large amount of general information interesting and instructive to all shooters whether they use Marlin repeaters or not.



We send also a copy of our 96-page illustrated testimonial book and a personal letter in which we refer them to the nearest dealer that we know of who carries a good stock of Marlin goods and is enterprising enough to follow up an inquirer and try to sell the man a Marlin repeater.

We also send to the dealer the name and address of the party inquiring, thereby putting the dealer and the consumer in direct communication one with the other. We also follow up the customer and urge him to buy through the dealer.

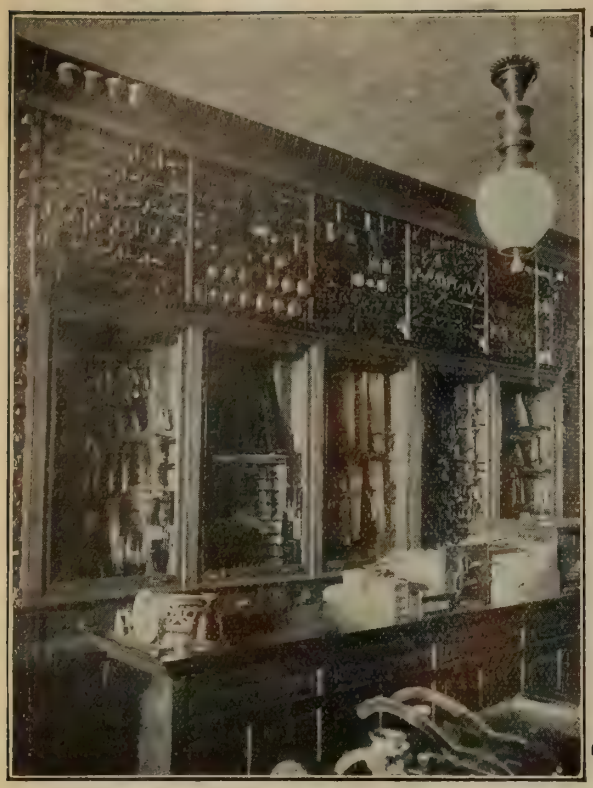
Our advertising campaign each year brings us thousands of inquiries and makes us a great deal of expense and trouble, as you can readily see, but we believe that it pays us and it will pay you if you will take part in it.

If you are interested please write us and give us full particulars as to exactly where you stand on Marlin goods. If you are with us we want to know it and send you some of this business. Write us to-day and tell us whether you want to be on our dealers' list or not.

The Marlin Firearms Co., 91 Willow St., New Haven, Ct.

SOCKET STRAPS

are to be found on the **SHOVELS** we make, but on ours only. That is why the



'Peterborough,' 'Lundy,' 'Irwin,' 'Hill'

give complete satisfaction. They are made by experts, and if not found as represented will be replaced at our expense.

You can sell these Shovels and also our Spades, Scoops, Draining Tools, etc.

THE PETERBOROUGH SHOVEL AND TOOL CO., Limited, PETERBOROUGH ONT.

INCREASE YOUR SALES

by displaying your goods on the fronts of shelf boxes, and in this way suggesting articles which your customers had not thought of buying.

A neat store is the best and cheapest advt. you can have. It gives an air of prosperity to your business, and "Nothing succeeds like success." Make your store look as if you were doing the best business in town. If your store looks like a second-hand junk shop, people will feel like paying second-hand prices for what they buy. The

Bennett Steel Shelf Box

is the only steel shelf box on the market. It has steel sides and oak or ash fronts. The sides and bottom are pressed from one piece of the best galvanized steel. The steel is embedded in the wooden ends by our own patented process. 20 per cent. shelf room is saved by using these steel boxes.

WHAT TO DO THIS MONTH

Some Timely Suggestions for the Canadian Hardware, Heating and Paint Trades.

Many of the lines, the sale of which has opened in September, are much livelier articles in the hardwareman's store during October. In fact, nearly all the goods mentioned a month ago, as seasonable for September selling might also be included in the list which we purpose giving on this page. But there are a good many other hardware lines which are to be counted as distinctively October's.

Cold Weather Coming.

The weather is already becoming cool and will before long be cold. October is the month in which consumers begin to realize the approach of Winter, and to take stock of the various articles they will need during that period.

The houses, barns, stables, hen coops, etc., must be put in shape to exclude the blasts of Winter. Consequently, the hardwareman will find a great sale for weather-strips, window glass, putty and other goods which may be used for repairing these buildings. There are very few, if any, who do not find a few broken panes of glass in their various outbuildings, as a result of the small boys' operations during the Summer. And as the season for attaching the storm windows has arrived when cracked and broken lights are numerous, it will not take a great deal of persuasion on the part of the dealer to turn over a good quantity of glass. Even those who are likely to let things slide should decide to repair their windows on being reminded that a small outlay will guarantee greater comfort during the Winter.

Comfort for Stock.

The farmer proceeds to make things comfortable for his stock just now. Horseblankets will be brisk sellers throughout the month, while halters and cow ties will also experience an active demand. It is a little early yet for the retailer to dispose of any sleigh bells, but he should get his line in shape and let his customers know what he has.

It might also be mentioned in this connection that the owners of barns and other outbuildings are just as anxious to safeguard their stock as they are to make them comfortable, and a good many padlocks should be disposed of during the present month.

Heating Goods Seasonable.

The stove and heating goods department will be strongly emphasized this month. Both heating and cooking stoves are now at the height of their season, while the inevitable stove pipes, elbows and wire will be required by almost everyone. Other staple heating supplies which are expected to move in October, are furnace scoops, coal shovels, coal hods, and ash sifters. And every housewife demands stove polish in order to put the heaters into presentable shape when they have been resurrected from the back shed and set up in the sitting room and hallway.

Among heating goods there are some good lines which are handled by only a few dealers. Footwarmers and carriage heaters are important examples. The hardwareman who specializes on these goods is very likely to attract permanent trade in staples.

While the present bright weather continues, householders will hold off their coal fires as long as possible, and the long cool evenings open another opportunity to the trade. Coal oil heaters and portable gas heaters should be sold quite readily. Particularly in the last mentioned line, the present season should see a good movement, as there have been during the Summer very considerable extensions of mains in the natural gas districts.

Probable Advance in Stove Prices.

Something which should be kept in mind and used as an argument to encourage early sales is the probability of higher prices on stoves. Malleable and pig iron have been steadily increasing in price during the past year and it is almost impossible to get deliveries of orders for months ahead. Dealers who carried over a stock of stoves and ranges as a result of the very mild Winter should not be pessimistic. They should, instead, study weather conditions closely. We do not pose as weather prophets but we do believe that an exceptionally long and warm Summer is almost certain to be followed by an extremely cold Winter, and in this case the demand for stoves will be correspondingly large. If the stove manufacturers have reckoned upon the large increase in population and have not decreased their outputs in view of last years overstock, there will be no shortage, but a scarcity is probable if any of these conditions have not been figured upon.

Push Lighting Goods.

The long Autumn evenings have arrived and a window display of lamps and fixtures would be timely. There are some improvements in burners for lighting fixtures and some of the new electroliers and brackets are both artistic and reasonable in price. Oil lighting is still a big feature in the country districts and along with the lamps, oil cans and funnels can be pushed, while in some districts five gallon cans of oil can be sold to many customers.

A personal canvass or the mailing of a circular to a selected list at this time might land some very good orders to instal gas or electric fixtures in the houses of customers living in the towns and cities where John D. Rockefeller has competitors in supplying artificial light.

Miscellaneous Articles.

Judging from the number of wooden pails, wash tubs, etc., which are daily leaving the large Canadian wholesale warehouses, the retailers are expecting a big trade in woodenware. And this is very natural, considering that the Summer is a particularly hard season on tubs and pails, which come to pieces very easily, as a result of the hot weather.

Bread and cake mixers will now be sold in good volume. Housewives who have patronized the baker, during the Summer, will begin to turn out the home made article, and the hardwareman should find many converts to the use of these modern but successful mixers. As the weather is now cool enough for making meat pies, there will be a revival in the demand for meat choppers.

Apple parers are now seasonable. The Fall apples are ripening and being marketed, so that makers of apple sauce and apple pies, who believe in economic production, should be easily cajoled into the purchase of these machines.

Watch for Novelties.

New ideas are constantly being adopted by manufacturers, and it is difficult for dealers to keep fully in touch with these novelties through the travelers, some of whom do not visit the general offices more than once a year. But an unfailing source of information on these points may be found in the advertising pages of the trade paper, where jobbers and manufacturers display the latest, best and most seasonable goods. Watch the advertisments and keep up-to-date.

A Word to the Wise.

It might not be out of place to remind the dealer that he will avoid disappointments if he places his specifications early so as to avoid the "close of navigation" rush. Orders are then so numerous that there are many chances for making mistakes in them. Besides, the whole market is on the advance, and there is nothing to be gained by waiting.

The Hunting Season.

From now on, hunters' supplies and equipment will be needed. Bring forward guns and rifles, ammunition and loaded shells, but in selling the goods emphasize the advantage of buying the best goods. There is danger in cheap firearms and there are enough fool-killers loose already without having their number increased by hardwaremen selling cheap goods to young boys. Rather encourage the formation of gun clubs and look for legitimate trade in this line.

Prepare for the Holidays.

It's not too early to plan an advertising campaign for holiday goods. The local newspapers, the show windows, circular letters, etc., should all be used and if the plans are well laid now valuable time will be saved when the Christmas rush is on. And if the stocks of sporting goods, cutlery, silverware, toys and novelties have not yet been thoroughly arranged for the final purchases should be made at once as the early bird is the one which catches the biggest worms. Window cards should not be forgotten and one of the clerks should be commissioned to prepare some attractive card signs for use during the Christmas trade. It might even be advisable to offer the clerks a small prize for the best suggestions for window displays, show cards and advertisements.

Look for Cash Trade.

With good crops everywhere collections should be pushed and every effort made to keep the business on a cash basis in future. Too many dealers lose their margins of profit on bad debts, while others make no charge on overdue accounts. Time lost in making collections should be considered and where there is more than one dealer in a town they should get together and agree to discontinue the giving of credit.

TRADE SITUATION IN SOUTH AFRICA

(By Hugh S. Kingdon, Krugersdorp, Transvaal.)

"I have never seen business so bad during the twenty years I have been in South Africa," remarked a Johannesburg merchant the day before I left the Rand. The gold output greater than ever (over $10,000,000 last month) and yet business has never been so bad. What a remarkable state of affairs! And yet the explanation is simple. The prosperity of the whole of South Africa is virtually dependent upon the Rand mines. If Canada could not get the labor to harvest her wheat crop then every individual in the country would feel the effect. How much more must South Africa feel the pinch when she is unable to get a sufficient supply of labor to develop her only great industry. South Africa's exports for the six months ended December 31, 1905, were as follows:

Exports: South African produce—	Value.	Per Cent. proportion of Total.
Gold	54,600,958	61.4
Diamonds	16,944,035	19.1
Other raw materials, mainly unmanufactured	14,659,787	16.4
Animals, (living)	943,723	1.1
Articles of food and drink	113,374	.1
Manufactured articles (not food and drink)	167,389	.2
Total exports (South African produce)	84,429,266	98.3
Goods not South African produce	1,515,674	1.7
Total exports (British South Africa)	88,944,940	100.0

From this you will observe that 61.4 per cent. of the export trade of the whole of British South Africa consisted of gold, practically all of which is extracted from the 45 miles of reef lying along the Witwatersrand. In order to work these mines an ample supply of cheap, unskilled labor is essential. Eight Kaffirs (or Chinese) mean the employment of a white miner, and the employment of eight Kaffirs and a white miner gives indirect employment to three other white men. The Kaffir does not like work—the mines cannot get laborers enough, the Boer farmers have the same difficulty, and roads, railways and other public works are held up because the Kaffir has not yet learned the dignity of labor. Lord Milner experimented with English navvies on railroad construction. His experiment cost the country £60,000, the navvies were dissatisfied (as well they might be), but Lord Milner at least demonstrated what South Africans have always maintained, that South Africa is not a country for white unskilled labor. President Kruger said that £1 per day was the lowest wage a white man ought to earn in South Africa and the figure holds good today. What is a good wage to a Kaffir whose food is produced in the country and whose requirements are very limited, means proverty to a white man for whom even the necessities of life have to be imported. The financial houses controlling the mining industry sought to have legislation introduced by which all adult able bodied Kaffirs under a fair age limit would have to pay a tax sufficiently heavy to induce them to work six months in every two years and thereby obtain an exemption certificate. To compel any person, even indirectly, to work for three months in the year is slavery—thus spake our friends at home.

Being forced to abandon this idea our eyes were turned to China for assistance. Chinese coolies were recruited to work for three years, at the end of which time they were to be repatriated at the expense of the companies importing them, or they could renew their contracts for a further three years at the expiration of which they must definitely be sent back to China. We did not then, nor do we now want Chinese, but we must have them unless we can get the Kaffir to work. The merchant prefers the Kaffir for whilst he spends all his money in South Africa the Chinaman does not. The mining houses don't want Chinese if they can get Kaffirs because the cost of bringing them over and repatriating them makes them more expensive than Kaffirs, and as the bulk of the food for the Chinese has to be imported it constitutes a drain on the country and the expense of feeding them is greater than the cost of maintaining Kaffirs. And here let me remark that high wages are not any inducement to a Kaffir to work. Double the wages of the Kaffir and instead of working six months he would only work for three, return to the country, lie around and drink Kaffir beer, and generally live the life of a pig. Prior to the war the Kaffir could obtain spirituous liquors on the Rand, but the sale of alcoholic beverages to Kaffirs is now punishable with imprisonment, and the only opportunity the Kaffir has to indulge this propensity for liquor is to stay at his kraal and brew Kaffir beer.

Two Reasons Against Chinese.

To return to the Chinese question—in due time the Chinese commenced to arrive, the gold output increased, and eventually we found four thousand more white miners at work than previous to their arrival, and every day found us picking up lost ground. But alas, our hopes were to be deferred yet again. The effect of employing these Chinese was to raise two distinct parties in Merrie England, both demanding the repatriation of the Chinese, but each advancing a different reason, the one as far apart from the other as the north is from the south pole. The anti-Chinese party said, "You are doing the white man out of a job," and the pro-Chinese party said, "You have disgraced the Union Jack by introducing slavery into a British country." Can you for one minute believe that English merchants and traders have no direct interest in the mines would be in favor of Chinese if white men could be employed. Would it not be to their profit if white men were employed, men who would be

customers for their stores. And yet you find these men practically unanimous as to the impossibility of white men being employed as unskilled laborers.

South Africa Loyal—But.

By what right do the people of England accuse Englishmen of doing the white man out of a job in order to put in a Chinaman. Have not Anglo-Africans demonstrated their right to be regarded as loyal to their country, their traditions and consequently to their countrymen. The whole country cried out against Chinese labor when the proposal was first mooted, but English legislators took up such an uncompromising position on the Kaffir question that after the Native Labor Commission had concluded its labors and reported that without legislation, the nature of which I have already mentioned, could be introduced that the requirements of the mines, farmers and public bodies could not be supplied, then, and then only, did the people of the Transvaal grant a reluctant consent to their importation. The conditions under which they were to be brought in were discussed in public meetings in every village in the country, under heavy penalties for contravention on the part of the employer the Chinese were restricted to the work of bona-fide unskilled laborers, thus safeguarding the interests of the skilled white laborer.

Chinese Work in Hope.

Then we have the pro-Chinese, who raised the slavery cry and pictured themselves as Twentieth Century Harriet Beecher Stowes. Some of these good people employ a large number of factory hands. How I wish I could in one instant take them from viewing their factory hands and plant them amidst a group of Chinese laborers on the Rand. The former, weary and heavy eyed, having no hope for the future, the latter joyous, thinking that at the end of their six years labor they will be able to return to their native country without the necessity of working another day in their lives. The Chinese slavery cry is arrant humbug. The Chinese are well-housed, well fed and according to their standard they are well paid. That these statements are correct has been amply verified by the manner in which Mr. Churchill's poster was received—a poster offering the Chinese a free trip back to China, for which compliment they were no doubt much obliged to the honorable gentleman, but with few exceptions they could not see their way to accept his kind invitation. Although the Chinese have not been sent back, the uncertainty of the labor situation has caused a cessation of all enterprise, mining and commercial; investors are nervous, banking institutions are marking time, and firms who contemplated extending their premises or their business have called a halt.

Illustrative Incident.

Perhaps the following little incident will best describe the situation. The day of the delivery of the address from the crown I was visited by an American who stated, "I have £800 lying in the National Bank here and I want to buy for cash a residential site running into not more than £300. I want you to raise £500 for me on first mortgage, to be expended on a house, as I must keep £500 in hand myself. I am a diamond drill contractor and need that for working capital." To cut a long story short, after inspecting a block of ground over which I had an option, he left me to consult his better half. Later in the day he returned and informed me that he had practically settled to buy, and would come round in the morning as soon as the bank opened and fix the deal up. He also signified his intention of taking up £500 which I had been able to secure as a loan on first mortgage. The following morning my client walks in and remarks, "Well, I guess we'll have to call that deal off." "Why, what is the matter now?" I queried. "Well, you see, it's just like this—I've been reading the King's speech in this morning's paper and it looks as if this new Government is going to send the Chinese back. Well, if they do I guess there won't be any more diamond drilling work for me 'cos they won't have the labor to open up the properties after they have been proved. I'll want to be off back to America, and I can't take that bit of land with me." And unless that man has shifted it since August 10 that money is still lying idle. Having, I hope, made clear the cause of the present depression in South Africa, I will deal briefly with her future as I see it.

Market for Manufactures and Foodstuffs

The solution of South African difficulties lies in the imposition of a native tax as already defined. Surely, if conscription is justifiable, then the suggested measures are more than reasonable if we reflect that it is to the ultimate benefit of the Kaffirs themselves and will in addition find employment for thousands of men, and build up numberless happy homes in South Africa, and indirectly provide work for thousands of others in the countries which establish themselves on the South African market. Now, do you know what a drill Kaffir has to do in the mines? He has to drill a certain number of inches, his ticket is then punched and he has earned a day's pay. Many of them go down the mine at 6 o'clock and at 10.30 have finished for the day.

Responsible Government.

In January the elections for the newly constituted Transvaal Government are to take place. But for the fact that the Liberal Government has specifically reserved to itself the right to veto any legislation on the native or Chinese questions, I should congratulate the Government which has given us responsible Government, but it is more than a practical joke to give us responsible (?) government in response to our request and at the same time to inform us that under responsible government we may not deal with the very matters which induced us to press for self-government. I am of opinion that the voting in the Transvaal will be on purely racial lines, that neither party will have a working majority (there will probably be a difference of two to four members) and that a joint Government will have to be appointed, which to my mind will be the finest solution of the racial problem. On one point all parties are united in South Africa, and that is the native question. Legislation will be introduced in the Transvaal to compel the Kaffir to do what the man has to do, i.e., work for his living and share the country's burdens. The Kaffir enjoys freedom from the fear that a neighboring chief will pounce on him, seize his possessions and terminate his existence. The cost of policing the country and maintaining the Native Affairs Department is enormous and those benefitted must bear the burden. Despite the veto held out as a threat in the constitution, I cannot believe that the Imperial Government will take such steps as will entirely alienate the sympathies of British South Africans. South African affairs have been made subservient to party politics—the ruse has succeeded, but South Africa will no longer tolerate interference with domestic affairs affecting her solvency as a state and as individuals.

A Forecast.

Presuming this legislation to have been duly sanctioned, our native labor force will be equal to any demands made upon it, our white population will be doubled, the capital now lying dormant will flow forth to open up miles of proved, but unworked "banket" reef—the mines in the outside districts will receive the attention they merit and the South African market will become an important factor in the world's trade. The objectionable Chinese will be returned to the land from whence they hail—prosperity will bring about harmonious relations between Boer and Briton, the late war being remembered only as a nightmare that has passed, and unhandicapped by any religious differences, a great nation will spring up, a nation speaking two languages and cherishing the traditions associated with the two mother tongues as being equally their heritage. For many years to come, the whole of South Africa's attention will be directed to the exploitation of her mineral wealth, and will therefore provide an unrivalled market for the disposal of manufactured goods and foodstuffs. South Africa is not an agricultural country in the accepted sense of the word. By the expenditure of many millions on irrigation works she will be able to meet her own requirements in time, and possibly at a later date may be able to export but on this point there is some diversity of opinion. Looking to-day at her list of imports we find that practically everything required to clothe and feed the human race is imported, the following being a summary of her imports for the six months ended December 31, 1905:

Present Trade.

An examination of the countries of origin shows Canada eighth on the list with a trifle over 1 1-2 per cent. of South Africa's total imports, clear evidence that Canada is neglecting this important market.

Statement showing, by countries the value of imports of all merchandise into British South Africa during the six months ended December 31, 1905:

Great Britain	$49,228,431
British Australasia—	
Australia	4,924,594
New Zealand	399,938
British India	1,577,204
Canada	1,225,358
Ceylon	140,467
Mauritius	1,129,106
Other British possessions	158,469
Argentine Republic	2,543,549
Belgium	1,159,761
Brazil	655,447
France	950,507
Germany	5,105,041
Holland	827,201
Italy	254,214
Norway	174,752
Portugal	69,447
Portugese colonies	148,959
Russia	94,184
Sweden	1,311,810
United States	6,804,836
Other European countries, N.O.E.	668,797
Other parts of Africa, N.O.E.	94,364
Other foreign countries	832,245
Total imports	80,478,681

As to representation in South Africa let me conclude by quoting from the correspondent of the London Commercial Intelligence in the Far East, and which also appeared in the May issue of Industrial Canada These remarks are equally applicable to South Africa.

"The first difficulty a manufacturer meets with," he says, "is that of finding a good agent. I am inclined to believe that this difficulty is greater in the east than in any other part of the world. In every district old-established and wealthy firms can be found, most of whom may safely be placed in the category of have beens. Such firms have a greater idea of their own importance than their business ability warrants, * * * * * * * * * * *

"In nine cases out of ten it is unwise to appoint as agents in the east old-established, wealthy firms, with a multitude of interests. They have neither the time nor the energy to give to any one department. They think their dignity suffers if they attempt to hustle for business. Should it be necessary to appoint such a firm as agents, the only way in which to make the agency a success is to make such terms as will entail the employment by the agents of a man from the manufacturers works, should the volume of business warrant it. Failing such an arrangement, it is better to give the agency to some local man whose interests are small, but who has energy and good business ability. In such a case it may be necessary for the manufacturer to assist such a man with an allowance for expenses or stock."

Imports—	Value.	Proportion of Total. Per Cent.
Animals	$ 570,359	.7
Articles of food and drink	20,435,103	25.4
Raw materials	5,883,829	7.4
Manufactured articles	51,524,372	63.9
Parcels post	2,065,018	2.6
Total imports (British South Africa)	80,478,681	100.0

AUSTRALIAN TRADE.

The trade in arms and ammunition in Australia is increasing. Last year the total importations were £751,302. Of this amount, £1,294 is credited to Canada, being the importation of rifle cartridges of one calibre only and one rifle. The imports are mainly from Great Britain. The United States' share in 1905 was almost double as compared with 1904, but is still slightly below the importations from that country in 1902.

The importations of agricultural implements for 1905 amounted to £361,439. For the previous year they were £578,361. The trade varies with the season. There having been some stock carried over from 1904, it lessened the imports of 1905. The importations last year came from: United Kingdom, £58,530; Canada, £43,329; New Zealand, £2,505; Germany, £3,020; United States, £253,519.

Exclusive of nails, pipes, tubes, wire and wire-netting, the importations of metal manufactures last year amounted to £1,024,540. Of this amount the United Kingdom furnished £725,236; Belgium, £18,862; Germany, £86,791; United States, £159,485.

Canada is credited with £915, a very considerable decrease compared with that of previous years. The principal articles exported from Canada were steel ceilings and shingles. In these lines there are now a number of local manufacturers, who have secured the great bulk of an increasing trade.

The importations of paints and colors are increasing, amounting to £293,376 in 1905. The bulk of these imports, amounting to £236,055, came from the United Kingdom, and £42,081 from the United States. The United States last year increased its share of the trade, though in previous years it had made little progress and it yet remains to be seen whether it can hold its own against British manufactures. Canadian factories have made efforts to get into this market, but they had to compete against large concerns who have branches under expert management, frequently carrying stocks or supplying large houses upon the consignment basis. Under such conditions Canadian manufacturers did not feel it would be advisable to push trade.

A NEW ABRASIVE.

The Norton Emery Wheel Co., Worcester, Mass., are placing before the hardware and supply trade a new material called alundum, which is claimed to surpass all other materials of a similar nature as an abrasive. Alundum is the hardest, sharpest and most durable abrasive material known. It is manufactured by a special electrical process in their own plant at Niagara Falls, N.Y. These works, which are devoted exclusively to the manufacture of Alundum, are located at this great source of power because of the large amount of electrical energy required in its production.

The principal raw material used in the production of Alundum is Bauxite, an amorphous hydrate of aluminum. Bauxite was originally found at Baux, France, from which it derives its name, but purer forms are now found at Georgia and Arkansas. The highest quality only is used in the manufacture of alundum. This material is transformed into a pure crystalline abrasive in electric furnaces of special design. The temperature at which alundum is formed is above the limit by which temperatures are measured by any means known to science. The process of manufacturing alundum is patented, being thoroughly protected by United States and foreign patents on the process and apparatus, which are controlled exclusively by the company. Certain special improvements of the process result in great purity, uniformity, and hardness of crystal.

Alundum comes from the furnaces in the form of large ingots, which are broken up and shipped to their main works at Worchester, Mass. It is then crushed and graded, and manufactured into grinding wheels, stones, and other articles, and put up for the general grinding and polishing trade. Extreme hardness and sharpness, and remarkable uniformity are the general characteristics of alundum. Its purity and uniformity are under absolute control. In addition to its use in grinding wheels, alundum is being used on cloth and paper for abrasive purposes, and in the grain for grinding and polishing with remarkable success.

Bulawayo, South Africa, several hundred miles north of Cape Town on the Cape to Cairo Railroad, held an agricultural exhibition on July 5. There were over 1,000 visitors on the first day and at the dinner in the evening when the administrator of the district and the principal farmers of the vicinity were present it was decided to make the show an annual affair.

RETAIL HARDWARE ASSOCIATION NEWS

Official news of the Ontario and Western Canada Associations will be published in this department. All correspondence regarding association matters should be sent to the secretaries. If for publication send to the Editor of Hardware and Metal, Toronto.

Officers Retail Hardware and Stove Dealers' Association of Western Canada:

President—A. J. Falconer, Deloraine.
First Vice-President—J. B Curran, Brandon.
Second Vice-President—W. M. Gordon, Winnipeg.
Secretary-Treasurer—J. E. McRobie, Winnipeg.
Executive—Alberta, A. E Clements, Olds; C. F. Comer, Calgary; A. R. Auger, Okotoks.
Manitoba—H. S. Price, Boissevain; A. P. Macdonald, Winnipeg; O. Gilmer, Winnipeg.
Saskatchewan—G. K. Smith, Moose Jaw; S. A. Clark, Saskatoon; J. R. Fox, Weyburn.
Officers Western Board (elected by general merchants and hardwaremen in joint session): President, W. G. McLaren, Souris, Man; vice-president, G. K. Smith, Moose Jaw, Sask.; H. C. Hamelin, Winnipeg, Man.; secretary, W. A. Coulson, Winnipeg, Man.; treasurer, J. E. McRobie, Winnipeg, Man.; auditor J. A. Lindsay, Winnipeg. Man.
Association offices, 53 Scott building, Main street, Winnipeg.

Officers Ontario Retail Hardware and Stove Dealers' Association:

President—A. W. Humphries, Parkhill.
1st Vice-President—W. G. Scott, Mount Forest.
2nd Vice-President—J. R. Hambly, Barrie.
Treasurer—John Caslor, Toronto.
Secretary—Weston Wrigley, 10 Front St. East, Toronto.
Executive Committee—The officers and J. W. Peart, St. Mary's; M. R. Marshall, Dunnville; D. Brocklebank, Arthur; F. W. Jeffery, Midland; E. P. Paulin, Goderich, and Frank Taylor, Carleton Place.
Auditors—J. W. Peacock and C. F. Moorhouse, Toronto.

CO-OPERATION BETWEEN JOBBERS AND RETAILERS.

One of the features of the recent convention of the Michigan Retail Hardware Association was an address on "The National Hardware Association of the United States—How Can it Best Co-operate With the Retail Trade," by T. James Fernley, secretary of the National Hardware Association. Some of the points made by Mr. Fernley were so pertinent to present conditions with the trade in general that we herewith produce a synopsis of his address. Mr. Fernley said:

At the present time the evil which is most pronounced is that of the competition of the catalogue houses, and side by side with this evil we find that of the parcels post, which proposition involves carrying to every hamlet in the confines of our country merchandise sold by the catalogue houses to these various hamlets at a very nominal cost, but at a tremendous loss to our Government.

Catalogue House Competition.

In combating the first evil the work must be with the manufacturers of the country, while if we would prevent the growth of the second evil we must use our influence with members of Congress. It would seem that we must co-operate as ratailers and wholesalers by using our influence with manufacturers, as they hold the key of the situation. If they give their extreme prices to the catalogue houses then it is not possible for the retailer to sell at as low a price and at the same time retain a living margin of profit. The retailer must endeavor to carry a variety of goods which will satisfy the wants of the consuming trade upon whose business he depends.

In many instances manufacturers state that the catalogue houses sell some of their most profitable goods, goods indeed which the retail merchant does not carry in stock, We fear that possibly there may be some truth in this statement. If so, is it not wise for the retail merchants of the country to take the position that no goods can be made too fine for them to carry in stock?

Surely if the catalogue houses through a very poorly executed illustration can induce a consumer to purchase a high-priced article the retail merchant should have no difficulty in selling the same article when showing it personally to his customer.

THOMAS DEXTER, of H. S. Howland Sons & Co., Toronto.

Elected Vice-President of the Canadian Wholesale Hardware Association at the Convention at Hamilton Last Week.

Some have made the statement that the retail merchants charge too high a price for their goods. I have no sympathy with this statement, as from the inquiries which I have made in various parts of the country I feel certain that as a rule the retail merchants of the country are asking an inadequate margin of profit.

It is generally conceded that the co-operation of the jobbers of the country is essential; this being the case is it not fair to suggest that the retail merchant of the country should to a greater extent support the jobbers from whom he purchases? We know of so many instances where the retailer has been induced to buy from the manufacturer direct, generally purchasing an abnormally large quantity of a given line of goods and frequently paying the manufacturer as high if not a higher price than would have been charged by the jobber.

During the time we have occupied our official position with the National Hardware Association of the United States it has been our pleasure to interview almost every prominent manufacturer of hardware and kindred lines in this country, and these gentlemen state (almost without an exception) that it costs them more to sell the retail merchant direct than it does the jobber. This being the case we feel that we have a perfect right to ask the retail merchant to at least give the jobber the preference when purchasing goods. We do not ask manufacturers to refrain from selling retail merchants, although we would probably be justified in doing so.

Jobbers' Retail Departments.

We realize that most of the large jobbers of the country as well as some of the smaller ones have retail departments and we think that these gentlemen owe it to their customers that their retail prices should be as high as those of any of the retail merchants with whom they attempt to do business. This is a policy which our association has advocated and which we propose to hold constantly before our members.

The hardwareman is compelled to have his store open to meet the mechanic and supply his demands for tools before the hour of labor in the morning. He must be prepared to meet the housewife who finds during the day that she needs some household or cooking utensils. And in the evening he must be prepared to again meet the mechanic, who has ascertained that some of the tools with which he started to work in the morning need renewal. Indeed, the hardwareman above all others must be diligent in his business. We think that he who said, "Seest thou a man diligent in business, he shall stand before kings," must have had in mind the hardware merchant. He it is indeed who should stand up before kings and he has little time for anything else, while those who are engaged in other lines may have time to sit behind kings, queens and jacks.

It will always be the pleasure of the National Hardware Association of the United States to co-operate with the resail merchants of the country, who are their friends and customers and upon whom they must rely for support. I sincerely hope that the time will never come when there shall be any divergence of our paths, but as each organization grows in strength, may we find our paths coming closer and closer together.

SUGGESTIONS FOR SALESMEN

HOW TO WAIT ON A CUSTOMER.

A salesman or clerk never becomes profitable, and is invariably a loss and expense to his employer, until he has learned how to properly wait on a customer. For this reason an article on this subject from the Boot and Shoe Recorder can be read with a great deal of interest. What is said herein is the result of years of experience and observation on the part of the writer.

To properly wait on a customer one must first of all be interested in his merchandise and its owner, be ever ready to greet the approach of a patron and in doing so avoid any form of familiarity even though the person in question be an acquaintance or friend. A mild form of dignity is the keynote to quick confidence in business. This much done, ascertain in as quiet a way as possible the wants of your visitor, without comment or further conversation. Proceed as quietly as possible to get exactly (or as near as you have) what was requested, and at this point is offered the first opportunity for a display of salesmanship.

It is here the clerk can suggest the economy of better priced goods of similar style, or the more perfect suitability of other shapes, size or kind. In offering suggestions of this or other kinds, it is well to add as much strength to same as possible by comparison. If you haven't got the goods desired, do not try to palm off or substitute. Be frank. Admit the fact, and seem to be surprised and disappointed that you should not have just what is requested. Offer some suitable goods instead thereof.

Under no circumstances should the clerk condemn or criticize the merchandise he did not happen to have, or the maker of the same. In offering goods of any kind it is well to point out this, that or the other advantage, and under no condition must one contradict or argue with a customer or prospective buyer. Always bear in mind the adage, "Convince a man against his will, he's of the same opinion still." A sale pleasantly and properly made is the first step toward the clerk's success. This done, the clerk should suggest the possible need of this, that or the other in other departments. Offer any facilities you may have at your disposal, by way of delivery, transfer, etc.

Never promise anything that your house will not afford; very often a clerk's ambition to do this has ended in dispute and dissatisfaction, which costs the employer cash and customers. The clerk also finds the customer who is in this way disappointed harder to deal with and satisfy forever after.

Avoid as much as possible special orders. The clerk who sells $50 worth of stock is more valuable to the merchant than the one who takes $200 worth of special orders, as this is always attended with more or less disappointment, no matter how carefully attended to, and the annual accumulation of left-over specials becomes a burden at stock-taking time.

Avoid guarantees as much as possible, and when necessary frame them in a careful way. Remember, merchandise out of one's store is subject to any abuse its owner may see fit to give it, and a grumbler never makes allowances for this. In hearing a complaint be patient and quiet, and avoid any argument of any kind, even though you know the complainer asks something morally unfair.

Remember, he has come to get something from you. Be as lenient as you can afford, and whatever you do in cases of this kind do it as pleasantly as possible. None are so dissatisfied as a dissatisfied kicker, and remember even mean men have friends and can influence them to pass your door, and because of their meanness are very apt to exert themselves along these lines.

To act any other than pleasant to these customers robs your transaction of its advertising feature. In exchanging goods try always to replace the returns with goods of exactly the same kind, as no matter what value you may give back, if it is not exactly the same the customer stamps the deal as a confidence game, and advises his friends of the unreliable methods of your house.

These are but some of the many things to learn in order to be a successful salesman. Bear these in mind, and act accordingly, and you will benefit yourself, your employer and his business, and mark you, your efforts will not go unnoticed. Your advancement is as sure as some other's failure. It is in this way clerks become merchants. You can in this way earn respect and gold instead of disappointment and failure, which is the positive lot of your running mate who never found out how to wait on a customer.

SHELVING VS. SELLING GOODS.

The Hardware Bulletin says an Ohio hardwareman is highly gratified because he has devised a form of hardware shelving whereby half his space has been economized, having erected double shelving around the whole store, the outer shelving being protected by glass doors. Behind this is another cavity, the door of which consists of the entire outer shelf. When the outer shelving is swung open the recesses of the inner shelving are revealed. They are visible through no other means.

The dealer has economized space. His store is neat, pleasing to the eye, well arranged, attractive to ladies, but the fundamental requisite of the hardware store is not neatness, attractiveness or space economy, but selling goods at a profit, and the former attributes are merely a means to an end.

Things like food choppers, wrenches, floor spring hinges, grass catchers, expansion bolts, squares, potato mashers, carpet whips, steam cookers, automatic awls and screw drivers, etc., should invariably be accessible to customers. These things sell themselves. They are silent salesmen and are robbed of their chief virtue when hidden away on shelving. They are out of reach and out of mind.

The salesman of to-day is not the man who fills the demand. He is the man who creates it. It is not giving a customer what he wants, but selling him that plus a lot of other things he has never heard of before or the usefulness of which he has never appreciated. The cherry-stoner, for instance, is a most desirable contrivance. It is appreciated, in a way, by a majority of housewives, but is rarely seen in most sections of the country. This specialty should never be hidden in hardware shelving. It should be out on the counter and the more customers that monkey with it the better. It might be well to have a bushel of cherries on hand for experimental purposes. They won't cost much and the customers can stone and eat. A small country girl may be induced to give practical exemplification on carnival or other meeting days. Anything that will bring these self-selling specialties to the attention of your customers will prove profitable. They sell themselves, if given a good opportunity.

An army veteran in Indiana bought a stove from a Chicago mail order house last October, paying cash in advance and asking immediate delivery. The stove did not arrive until Christmas, and, according to Fike, was not as represented, many parts being missing and the stove being different in size than ordered. Fike at once re-crated the stove and demanded his money back. Six months' of continued correspondence, during which the postal authorities were called into action, finally resulted in the return of the original amount sent in advance as payment for the stove.

HARDWARE TRADE GOSSIP

Quebec.

L. A. Nobert, hardware dealer, of Louiseville, visited Montreal this week.

O'Shea, Bisson & Co., of Montreal, have registered as importers of glass, etc.

Wayland, Williams & Dadson, of Montreal, Que., machinery dealers, have assigned.

L. Withy, of Gaspe, was one of the hardware buyers noticed in Montreal this week.

F. A. Johnston, of J. C. McLaren Belting Co., Montreal, has returned from a business trip in the Maritime Provinces.

L. R. Souliere & Co., St. Henry, Montreal, have registered as hardware merchants.

W. B. McLean & Company, of Montreal, Que., have registered as machinery merchants.

T. R. Moulden, of Taylor-Forbes Company, Guelph, was in Montreal for part of this week.

H. B. Brainerd, of the Dominion Cartridge Co., Montreal, is taking a three weeks trip to the coast.

J. A. Coulombe, Berthierville, Que., hardware merchant, is offering to compromise with his creditors.

Lieut.-Col. Gartshore, of the McClary Manufacturing Co., London, Ont., paid a business visit to Montreal on Thursday.

J. A. Paquin, general merchant, of St. Eustache, was one of the outside buyers to visit Montreal during the past few days.

Mr. Sheppard, representing Iver Johnson's Arms & Cycle Works, visited the Montreal hardware wholesalers this week.

D. G. Hamilton, manager of the Montreal branch, Simonds Canada Saw Co., was in Ottawa for a few days this week.

Arthur J. Owen, Canadian manager of Franklin Saunders & Co., tin plate manufacturers, was in Hamilton and Toronto last week.

B. Saunders, of the traveling staff of Lewis Bros., with headquarters at Brockville, visited the firm's Montreal office this week.

Jos. E. Lemieux, of N. Lemieux & Fils, wholesale hardware merchants, of Quebec, has left for an extended trip to the United States.

C. O. Gervais, of C. O. Gervais & Frere, general merchants, St. Johns, was a visitor at the Montreal hardware jobbers' this week.

H. G. Vogel, of H. G. Vogel & Co., manufacturers of automatic sprinklers, etc., New York, visited the firm's Montreal branch on Thursday.

The gold medal for excellence of exhibit at the Halifax Dominion Exhibition was awarded to the Montreal Rolling Mills, over all comers.

Mr. Bissonette, of Bissonette & Freres, general merchants, St. Sebastien, was in Montreal this week placing orders for hardware lines.

J. Ernest Millen, of John Millen & Son, hardware specialties, Montreal, was among those registered at the Canadian office in Paris last week.

A. S. Daly, formerly with Rice Lewis & Son, Toronto, has accepted a position with Amiot, Lecours & Lariviere, Montreal, and will call on the building trade.

Chas. F. Comer, hardware merchant, Calgary, visited the Montreal office of Hardware and Metal last week. Mr. Comer is a westerner of the most enthusiastic type, and he is making converts to the "western fever" wherever he goes. He was accompanied to Montreal by his father, G. W. Comer, of the Customs Department, Kingston.

Ontario.

B. Bell, of St. George, was in Toronto during the week.

M. McClure, of Fort Sydney, was a visitor in Toronto during the week.

Adam Clark, plumber, of Hamilton, was a visitor in Toronto on Wednesday.

Mr. Peaker, of Peaker & Sons, Brampton, was a visitor in Toronto on Wednesday.

W. A. Wood, of Wood, Vallance & Co., Hamilton, was a visitor in Toronto last Wednesday.

W. B. Jackson, hardware merchant, St. Thomas, spent a few days in Chicago last week.

Mr. Hymmen, Jr., of Peter Hymmen & Co., Berlin, was a visitor in Toronto during the week.

Louis Payette, general manager of Warden King & Son, Montreal, spent Tuesday in Toronto.

The Brooks-Sanford Co., Toronto, are opening a branch of their builders' supplies business at Hamilton.

Geo. W. Charles, representing the Hobbs Hardware Co., of London, was in Toronto during the week.

The Standard Bolt & Screw Company, of Toronto, have assigned, and a winding-up order has been called for.

Logan M. Waterous, of the Waterous Engine Works, Brantford, was married last week to Miss Hewit of that city.

Frank A. Kerr, of Kerr & Coombes Foundry Co., Hamilton, was married last week to Miss Lucas, of Hamilton.

James Hardy, Toronto, secretary of the Wholesale Hardware Association, is back at his office after his recent illness.

O. M. Hodson, Toronto representative of the H. R. Ives Co., Montreal, visited his old home in Bolton during the week.

Wm. N. Tallman, of Nelson Tallman & Sons, brass foundry, Hamilton, was married last week to Miss Wardell, of Smithville.

J. Sophus, of Montreal, manager Canadian branch of Schuchardt & Schutte, called at the Toronto office of Hardware and Metal on Wednesday.

Kenneth Stairs, of Stairs, Son & Morrow, Halifax, was a visitor in Toronto during the week, along with Gilbert S. Stairs, the senior Rhodes scholar from Nova Scotia.

The Jones Register Co., manufacturers of the Jones side wall warm air registers, have moved their factory from 669 Queen street west to 752 King street west, Toronto.

Hallett & Noden are opening a new hardware store at Toronto Junction. Both were formerly with the Rogers Hardware Company and Hope & Noden, recently succeeded by R. J. Bruce.

The Warren Sporting Goods Company, of 10 King street east, Toronto, are opening a new branch at 101 King street west, and intend carrying a full stock of shelf hardware and general sporting goods.

John Glover, hardware merchant, Aylmer, Ont., was married last week, considerable romance being connected with the event, Mrs. Glover having nursed her future husband back to health during his attack of typhoid fever a year ago.

Western Canada.

H. S. Price, hardware merchant, of Boissevain, Man., was in Winnipeg last week.

A. E. Hughes, hardware merchant, of McAuley, Alta., has sold his business to D. G. Smith.

L. A. Neads, hardware merchant, of Wawanesa, Man., has been succeeded by J. J. Storey.

O. Edwards, of Sedley, Sask., is building another warehouse in connection with his hardware store.

Butchart, Adkin & Haslen, of Rapid City, Man., have sold their hardware business to Butchart Bros. & Co.

Geo. D. Wood, of Geo. D. Wood & Co., Winnipeg, has been confined to his house through illness for the last fortnight.

The Marshall-Wells Co. and the Miller-Morse Hardware Co. have secured the contract to furnish the city of Winnipeg with galvanized iron.

Wm. C. Perry, assistant buyer for Geo. D. Wood & Co., Winnipeg, is enjoying a holiday this week in the neighborhood of Dauphin, Man.

J. N. Dougall, senior partner of McCaskill. Dougall & Co., Montreal, returned to the eastern metropolis last week after a fortnight's business visit to Winnipeg.

Jos. J. Wright, formerly with the Belknap Hardware & Manufacturing Co., Louisville, Ky., and more recently with the Miller-Morse Hardware Co., Winnipeg, joined the staff of Revillon Bros., Edmonton, on the first of the month and is taking charge of their hardware sales. Mr. Wright goes to the big Edmonton firm exceedingly well recommended, having for years acted as territorial manager for the Belknap Hardware & Manufacturing Co. Revillon Bros. are to be congratulated on having secured the services of one so well fitted for the position.

United States.

A meeting of the board of directors of the Republic Iron & Steel Co. will be held in New York soon, at which J. B. Duke and H. S. Black will be elected to the directorate. The latter is president of the United States Realty & Construction Co., and a Canadian. His family reside at Cobourg. A picture and sketch of him appeared in these columns some time ago. The Republic Company's earnings for the past year are estimated at $5,000,000.

Maxwell David, & Son.

THE RETAILER'S BANKER.

From practically every standpoint the interests of the jobber and retailer are mutual and each must depend to a certain extent upon the other. Price cutting and kindred evils which injure the retail trade and prevent a fair margin of profit from being secured hurt the jobber almost as much as the retail dealer. Consequently any movement upon the part of retailers to organize to better their position should meet with the approval of the wholesalers, whose capital is invested in stocks to be sold or already advanced to retail customers.

Few retail merchants are in a position to buy their goods for cash, when they are obliged to extend credit to their customers for varying terms from 30 days to one year—and rarely sure of payment of one hundred cents on every dollar of credit outstanding. The comparatively small number doing business on a cash basis might be able to pay spot cash, but the average dealer needs a banker and a bank credit, and he has them both in his jobber.

And how many manufacturers can afford to employ a force of salesmen sufficient to sell a bill of goods to every small buyer in the limited quantities his capital compels him to buy—a half dozen of this line and a twelfth of a dozen of another ?

Jobbers to-day must have ample capital before they can meet the demands made upon them. Great warehouses representing investments of hundreds of thousands of dollars, erected on valuable ground in the wholesale centre of the great cities, bear witness to the importance of the jobber.

The modern jobber knows about how many bales of wire, how many ranges, or how many dozens of shovels will be sold during the season, and he places the order for his season's supply with the different manufacturers. He exercises wisdom, visits the marts frequently, keeps posted on every phase of the situation, is on the watch for bargains, and keeps his large capital employed or husbanded as he reads the signs of the times.

An instance of how the retailers' association could be of assistance to the jobber came to light during the past week. An Ontario wholesaler found cutting going on in a line he sold to retail customers. He notified the manufacturer that the price of his line was not being maintained but as the price cutter was a large retailer who bought direct from manufacturers the manufacturer declined to interfere and the price cutting continued. If the jobber had been assured of the support of an organized retail trade the manufacturer would probably have acted in an entirely different manner.

The relations of banker and depositor should be maintained between jobber and retailer and each should conserve the interests of the other and help to strengthen their trade associations.

MORE ABOUT RETURNED DRAFTS.

In a recent issue the subject of returned drafts was discussed in some of its most common phases and the consideration of the retailer asked in facilitating transactions and saving extra charges. "Goods not yet checked over," "drawee out of town," or merely the word "refused," were quoted as endorsations with which a wholesaler or jobber's paper is frequently returned, resulting in inconvenience in bookkeeping and the loss of the bank's service fee and interest.

In a great many instances there is undoubtedly room for complaint against the retailer, but he, in turn, is not without a grievance. Sometimes he is presented with a draft several days before the goods arrive and he could not reasonably be expected to accept it. The wholesaler or jobber should time his drafts so that sufficient margin may be allowed for checking shipments.

Small shortages or overdrafts may be overlooked as adequate cause for refusal to execute an acceptance. A jobber or wholesaler of any standing would certainly hasten to adjust an error of this kind. However, we know of one case where the mistake amounted to over $50. Good business form, not a fear that he would lose the difference, renders a merchant loth to accept under such circumstances. He follows the principle that it is a good deal easier to keep an account straight than to make it straight once it gets out of plumb.

COMING TO THE FRONT.

Canada is rapidly coming to the fore among the nations of the world. The day has passed when those upon the other side of the water on hearing of Canada conjure up in their minds pictures of a savage country, populated by people who are scarcely civilized. Rather does the name bring before them a country which gives promise of developing into one of the greatest of nations. The mention of the name to a business man arrests his attention. Never before has this country been given as much attention. As a convincing proof of the interest taken in the Dominion by business men of other countries, it is but necessary to look up the trade inquiries from abroad received by the Department of Trade and Commerce at Ottawa. That department is in receipt of an average of one thousand inquiries a month from business men in Great Britain and elsewhere. When this is considered — over thirty inquiries a day—and compared with the number of inquiries received a few years ago, some eight or ten a week, the growing interest displayed in Canada is at once manifest. Up to the end of August this year there have been received over eight thousand inquiries, as compared with three thousand during the same period last year. And it must be remembered that these inquiries receive the best attention of the Government, which encourages them. Quite frequently the inquiries are for agents wanted, and result in the appointment of a Canadian representative. Again, some foreign firm wishes to hear from houses in Canada desirous of placing their goods on certain foreign markets as yet uncovered by them. These are only instances known to every merchant, but the volume of such inquiries cannot but show that the Dominion of Canada is rapidly acquiring an enviable place among the commercial countries of the universe. Her wonderful growth, particularly in the west, is attracting the attention of the world. Her commercial development this past few years has been astonishing, compelling outsiders to sit up and take notice. Business men are beginning to see in Canada a country possessing apparently unlimited possibilities in a commercial way, and are anxious to get in on the ground floor, as it were, to share in the general prosperity.

TYPICAL OCTOBER WINDOW.

On being asked by a Hardware and Metal representative how he would advise the dressing of a typical October window, one of the most successful window dressers in Montreal replied: "This is now the hunting season, and a window exhibiting sporting supplies of this nature will be found the most profitable. A good scheme would be to spread the floor of the window with an imitation of green grass, placing a tent in the corner. At the door of the tent a dummy dressed in hunting coat and full hunting equipment should be rigged up, and a realistic camp fire could be made by utilizing stones and pieces of iron to imitate a grate. A few half-burnt chips of wood and ashes should be placed on this grate, and at night, by using a red light under the chips, a still more real effect can be produced. A few guns, cartridge belts, etc., can be carelessly leaned against the tent."

It might be mentioned that one of Montreal's best known firms, H. Silvestre & Fils, have somewhat bettered the window described above, by an arrangement perfected by Mr. Silvestre, who is a mechanical genius. In addition to a scene somewhat similar to that described above, Mr. Silvestre has introduced a dear which moves around on a run-way. A hunter stands in the distance, and every time the deer reaches a certain spot the hunter raises his gun and points it at the animal.

Mr. Silvestre is famous for his windows introducing mechanical inventions, but this one is probably his best yet.

THE METAL SITUATION.

Higher prices still have resulted during the past few days from the ever-increasing scarcity of commercial metals. Weakness of ever so slight a nature is nowhere visible, and the prevailing impression is that the end of the present boom is by no means in sight. Even in the metals whose prices have soared the highest, there is a strong feeling that further advances are an immediate probability.

For some time past we have noted an exceedingly strong condition in the copper market. Producers have been regularly boosting their prices to importers and jobbers, so that higher prices for consumers became inevitable. Things have come to a head during the past week, and it will be noticed that our price list shows an advance of half a cent for ingots and one cent for sheets.

Tin has finally responded to persistent bullish efforts on the Exchange, as a sudden jump of two cents in our quotations will show. At time of writing word has just reached us of an advance of £1 on the English market, which, coming as it does on the top of a similar advance the previous day, inclines us to the belief that next week's jobbers' figures will again be higher.

A cabled report just received by one of the leading Canadian metal merchants, says: "Antimony scarce and advancing." The same may also be said of zinc spelter and pig lead, both of which, though unchanged in the list price, show a much higher tone than last week. All ingot metals may safely be described as strong and advancing.

Pig iron is in about the same situation as before. During the week considerable quantities of Clarence and Cleveland have been received at the port of Montreal, but only to be immediately distributed among the various consuming interests. These latter are continually clamoring for deliveries, and the situation may be judged from the fact that those who were formerly content with a carload every fortnight, or every ten days, are now pressing for weekly deliveries. This condition is general. All users of iron are in the same boat, consumers evidently being in bad shape for their raw material, with the consequence that the supply has run short.

Tin plates are steadily going up at the producing centres. At present figures jobbers would be making practically no margin by selling at our quotations, and it seems a surety that when new stock begins to come in they will have to ask higher prices. Gorbal's "Best Best" galvanized sheets are up 15 cents, while other grades are expected to follow very soon. Sheet zinc is higher, as are also galvanized Canada plates. Prices on brass have been withdrawn, and, in brief, it would be hard to mention one metal in the list which is not stronger than was the case last week.

"HASN'T GOT IT ALL."

Ailsa Craig, Oct. 2, 1906.

Hardware and Metal,
Toronto, Ont.

Gentlemen,—I have your valued favor of the 28th ult. enclosing cheque for $5 awarded me in the recent contest re hot water heating, and I have to thank you for the prompt and efficient manner of forwarding the above.

After reading over the several good answers to this question I find that "I haven't got it all" — not by any means, and it requires continual study and practical work to keep up with the times in the different modes of heating. I learned several things by the answers to your question as given in your paper and no doubt a great number of your readers will be equally benefitted and thereby make your paper more valuable by offering from time to time prizes to be contested for on technical and practical questions.

Upon your suggestion we might write up a short article on hot water heating for stores some time in the Winter months when I have more time at my disposal.

Thanking you again and wishing your paper every success, I remain,

Yours very respectfully,
J. E. WESTCOTT.

A SPECIES OF BLACKMAIL.

A few days ago the manager of a large manufacturing concern in a certain Canadian city was visited by a man who introduced himself as a merchant who occasionally bought goods from his firm. He stated that in his town the particular denomination to which he belonged was building a new church and he was soliciting subscriptions from the business men from whom he bought goods.

The manager in question was, on principle, opposed to contributions under such conditions. He considers them a species of blackmail. When he told the visiting merchant this, in as polite a way as possible, the latter took a note book and wrote some words therein, remarking as he did so, "I suppose you know what I am writing?" On answering that he did not, the merchant remarked: "Well, I am just marking down here the name of your firm so that when we are buying goods in your line again it will be a reminder for us to go somewhere else."

While there are a great many merchants, in fact the great majority of them, who will not lend themselves to any such species of blackmail, it is evident that there is still one here and there who is not above the practice.

Whether practiced by consumer or retailers, or by the latter on manufacturers or wholesalers, this species of blackmail should be discouraged on every occasion. And if retailers desire to be relieved of the evil they in their turn should not practice it upon those from whom they buy goods.

According to a recent U. S. consular report there is a good opportunity to sell silverware in Mexico in competition with German and French goods, the Mexican tariff not discriminating against any particular country.

* * *

The National Wholesale Hardware and American Hardware Manufacturers' Associations are to meet at Atlantic City on October 17, 18 and 19.

Markets and Market Notes

(For detailed prices see Current Market Quotations, page 66.)

THE WEEK'S MARKETS IN BRIEF.

MONTREAL.

Bolts—New discounts issued.
Copper—Prices up ½ cent for ingots and 1 cent for sheets.
Ingot Tin—Now quoted 46c. to 46½c.
Galvanized Iron—An advance in some grades.
Sheet Zinc—Prices up 25 cents per cwt.
Solder—Advanced 1 cent.
Turpentine—Advanced to 90 cents in single barrels.

TORONTO.

Plumbers' Oakum—Quoted at 4¾ cents.
Screws—An advance is talked of.
Poultry Netting—Prices have been readjusted.
Brass and Copper Wire—New discounts 47½ per cent.
Turpentine—Southern markets have advanced sharply.
Bolts—New lists have been issued.
Copper—Both ingots and sheets are higher.
Ingot Tin—Quotations are 2c. per pound higher.
Galvanized Iron—Some dealers have advanced prices.
Sheet Zinc—Quotations have been advanced.

Quebec Hardware Markets.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, October 5, 1906.

Hardware jobbers this week have been very busy, and a fine trade is being done in all seasonable lines. On the shipping floors of the various warehouses may be seen large shipments containing such articles as meat choppers, curry combs, traps, hinges and coil chain.

The sale for meat choppers just now is especially good, and the season for purchasing curry combs is also right at hand. While traps sell better somewhat late in the season, the demand is already commencing, and many dealers are stocking up in anticipation of a good business in this line.

It is a peculiar fact that almost every order leaving the local warehouses contained a generous supply of hinges. Undoubtedly the impression that higher prices are at hand is widespread.

Coil chain is becoming very seasonable, and as it is also scarce buyers are placing orders early so as to cover themselves. Prices in this line are very firm.

The only price change of any importance this week is in bolts, on which the producing mills have issued new discounts. These show an advance over former prices of approximately 5 per cent.

AXES—This is a good October line and jobbers are now shipping freely. We still quote: $7.60 to $9.50 per dozen; double bitt axes, $9.50 to $12 a dozen; handled axes, $7.50 to $9.50; Canadian pattern axes, $7.50 a dozen.

HANDLES — Business conditions remain very satisfactory, and we are still quoting: N. 3. $1.25; No. 2, $1.50; No. 1, $1.90 a dozen; adze handles, 34-inch, $2.20 a dozen; pick handles, No. 2, $1.70; No. 3, $1.50 a dozen.

LANTERNS—The predicted advance has not yet materialized We quote: "Prism," $7; "Prism" globes, $1.20; Cold Blast, $4; No. 0 Safety, $3.50 to $3.75.

COW TIES AND STALL FIXTURES —These goods are still being ordered in good quantities by the retail hardwaremen. We quote discounts as follows: Cow ties, discount 40 per cent. off list; stall fixtures, discount 35 per cent. off list.

SLEIGH BELLS—Although still a little early, considerable activity is being manifested. Our quotations are as follows: Back straps, 30c. to $2.50; body straps, 70c. to $3.50; York Eye bells, common, 70c. to $1.50; pear shape, $1.15 to $2; shaft gongs, 20c. to $2.50; Grelots, 35c. to $2; team bells, $1.80 to $5.50; saddle gongs, $1.10 to $2.60.

RIVETS AND BURRS—The market is firm and steady Our prices are: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., copper rivets and tin swede rivets, 60, 10 and 10 per cent.; swede iron burrs are quoted at 60 and 10 and 10 per cent. off new lists; copper rivets with the usual proportion of burrs, 35 per cent. off, and coppered iron rivets and burrs in 5-lb. carton boxes at 60 and 10 and 10 per cent.; copper burrs alone, 30 per cent., subject to usual charge for half-pound boxes.

HAY WIRE—In spite of reports that this season's hay crop was a short one, a very large volume of business is being done just now. We quote: No. 13, $2.45; No. 14, $2.55; No. 15, $2.70; net cash, f.o.b. Montreal.

MACHINE SCREWS— Discounts as follows: Flat head, iron, 35 per cent.; flat head, brass, 35 per cent.; Felisterhead, iron, 30 per cent.; Felisterhead, brass, 25 per cent.

BOLTS AND NUTS—The scarcity continues as keenly as ever, and manufacturers are away behind in their orders. Some sizes have advanced about 6 per cent. as a result of the new discount sheets recently issued. We quote: Carriage bolts, ⅝ and under, 60 and 10; 7-16 and larger, 55 per cent.; fancy carriage bolts, 50 per cent.; sleigh shoe bolts, ⅝ and under, 60 per cent.; 7-16 and over, 50 per cent.; machine bolts, ⅝ and under, 60 per cent.; 7-16 and larger, 55 per cent.

HORSE NAILS—We quote discounts: C brand, 40, 10 and 7 per cent.; M.R.M. Co., 55 per cent.; P.B. brand, 55 per cent.

WIRE NAILS—our announcement last week that a leading manufacturer had advanced prices has been followed this week by a general stiffening. We quote: $2.05 f.o.b. Montreal.

CUT NAILS—Business remains on about the same plane as at our last report, and we continue to quote: $2.20 base, f.o.b. Montreal.

HORSESHOES—Trade is very active. Our prices remain as follows: P.B. new pattern, base price $3.50 per 100 lbs.; M.R.M. Co., latest improved pattern iron shoes, light and medium pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; snow pattern, No. 2 and larger, $3.90; No. 1 and smaller, $4.15. Light steel shoes, No. 2 and larger, $4; No. 1 and smaller, $4.25; featherweight, all sizes, No. 0 to 4, $5.60. Toeweight, all sizes, No. 1 to 4, $6.85. Packing, up to three sizes in a keg, 10c. per 100 lbs. More than three sizes, 25c. per 100 lbs. extra.

BUILDING PAPER—As the close of navigation approaches the paper manufacturers are experiencing a more active demand. Prices are the same as last week.

CEMENT AND FIREBRICK — No change in conditions can be mentioned. We are still quoting as follows: "Lehigh" Portland in wood $2.54; in cotton sacks, $2.39; in paper sacks, $2.31. Lefarge (non-staining) in wood, $3.40; Belgium, $1.60 to $1.90 per barrel; ex-store, American, $2 to $2.10 ex-cars; Canadian Portland, $2 to $2.05. Firebrick, English and Scotch, $17 to $21, American $30 to $35; White Bros.' English cement, $1.80 in bags, $2.05 in barrels in round lots.

COIL CHAIN — This line is very scarce, the manufacturers being away behind in filling specifications. We give prices: 5-16 in., $4.30; 3-8 inch., $3.80; 7-16 inch, $3.60; 1-2 inch, $3.40; 9-16 inch, $3.35; 5-8 inch, $3.25; 3-4 inch, $3.10; 7-8 inch, $3.05; 1 inch, $3.

SHOT — Our prices remain: Shot packed in 25-lb. bags, ordinary drop AAA to dust, $7 per 100 lbs.; chilled, No. 1—10, $7.50 per 100 lbs.; brick and seal, $8 per 100 lbs.; ball, $8.50 per 100 lbs. Discount, 5 per cent. Bags less than 25-lbs., 1-2c. per lb. extra, net; f.o.b. Montreal, Toronto, Hamilton, London, St. John, Halifax.

AMMUNITION—This is the big season for retailers, and jobbers as well are still shipping large quantities. We still quote the following prices: Loaded with black powder, 12 and 16 gauge, per 1,000, $15; 10 gauge, per 1,000, $18; loaded with smokeless powder, 12 and 16 gauge, per 1,000, $20.50; 10 gauge, $23.50.

Ontario Hardware Markets.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto Oct. 5, 1906.

The hardware trade this week has been lively, and jobbers have done a good seasonable trade. The cold weather has brightened up business a good deal, creating a demand for lines which will be used during the Winter season.

Few price changes have occurred, but a readjustment has taken place on poul-

try netting, which has been advanced from 50-10-5 per cent. to 50-10 per cent. A new list on bolts has also been issued showing an advance of about 10 per cent. on the larger sizes. There are rumors, too, of a probable advance on wood screws.

Axes, handles, and cross cut saws are in better demand and from now on lumbermen's and mill supplies will be included in orders from the retailers. Other lines which are finding an increasing demand are halters and cow chains, while sleigh bells, horse blankets and other Winter lines are being shipped out with some orders. The most active trade at present, however, is in sporting goods, all classes of shooting materials being in lively demand. Cutlery is also starting to move and some dealers are already giving some thought to holiday goods.

The approach of the close of navigation will encourage larger orders for shipment during October.

AXES AND HANDLES—Sales are increasing and dealers are preparing for a good lumber season.

CUTLERY AND SILVERWARE — These lines are in steady demand and will have a very large sale during the present month.

SPORTING GOODS — All shooting goods are selling in large quantities and a record season seems probable.

CHAIN—We continue to quote : 1 inch, $6.60 ; 5-6 inch, $4.55 ; 3-8 inch, $3.95 ; 7-16 inch, $3.80 ; 1-2 inch, $3.65 ; 9-16 inch, $3.55 ; 5-8 inch, $3.45 ; 3-4 inch, $3.35.

EXTENSION AND STEP LADDERS —Prices continue as follows : Step ladders at 10c. per foot for 3 to 6 feet, and 11c. per foot for 7 to 10 feet ladders. Waggoner extension ladders, 40 per cent.

POULTRY NETTING—Prices have been readjusted and on 2-inch mesh are a trifle higher. 2-inch mesh, 19 w.g., discount 50 and 10 per cent. All others 50 per cent.

GALVANIZED WIRE — We quote : $2.17½ f.o.b. Cleveland.

BARB WIRE—We quote the following prices : On gauge 9, $2.40 ; gauge 12, $2.55 ; gauge 13, $2.65 ; f.o.b. Toronto.

OILED AND ANNEALED WIRE — (Canadian)—Gauge 10, $2.31 ; gauge 11, $2.37 ; gauge 12, $2.45 per 100 lbs.

WIRE NAILS — We quote nominally $2.05 base, but the market is open at $1.95. The advance in the east has not been followed in Toronto as yet.

CUT NAILS—We quote : $2.20 base, f.o.b. Montreal. Toronto, 20c. higher.

HORSENAILS—"C" brand, 40, 10 and 7½ off list. "M.R.M." brand, 55 per cent. off. "Monarch" brand, 50 and 7½ off. "Peerless," 50 per cent. off.

HORSESHOES—Our quotations continue as follows : P.B. base, $3.65 ; "M.R.M. Co., latest improved pattern" iron shoes, light and medium pattern, No. 2 and larger, $3.80 ; No. 1 and smaller, $4.05 ; snow, No. 2 and larger, $4.05 ; No. 1 and smaller, $4.30 ; light steel shoes, No. 2 and larger, $4.15 ; No. 1 and smaller, $4.40 ; featherweight, all sizes, 0 to 4, $5.75 ; toeweight, all sizes 1 to 4, $7. Packing, up to three sizes in a keg, 10c. per 100 lbs. extra ; more than three sizes in a keg, 25c. per 100 lbs. extra.

HORSE BLANKETS AND SLEIGH BELLS—Demand is picking up although it is early for large orders.

RIVETS AND BURRS—Tinned rivets are now quoted net extra 4c. per lb.

SCREWS—We quote : On gimlet point 70 and 5 per cent. off ; on cone point, 70 and 10 per cent. off list.

BOLTS AND NUTS—On larger sizes prices have been advanced. There is a marked shortage in all lines.

CEMENT—We quote : For carload orders, f.o.b. Toronto, Canadian Portland, $1.95. For smaller orders ex warehouse, Canadian Portland, $2.05 upwards.

FIREBRICK—English and Scotch fire brick, 27c. to 30c. ; American low-grade, 23c. to 25c. ; high-grade, 27½c. to 35c.

HIDES AND WOOL—The only variation is a reduction of a cent for washed wool.

Hides, inspected, steers, No. 1	....	0 12½

Canadian Metal Markets.

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, October 5, 1906.

We predicted in our last report that jobbers' prices on copper were almost sure to go up very shortly. This has already come to pass, as will be seen by our price list. Ingot casting copper is now up one-half cent per pound, while copper sheets have advanced a full cent for base sizes.

Another line on which a higher price was foreseen is ingot tin, which has justified our contention by going up two cents a pound. This has caused revisions in the quotations of several articles in which tin is an important constituent, notably solder.

Pig lead has not changed in price this week, but the tone of the market is decidedly higher. It would seem the five-cent lead is not far away now, especially as the English market advanced this week to a price which broke all previous records.

Galvanized sheets are still firmer, and the price of Gorbal's has been raised. It is expected that the advance will soon become general. Sheet zinc has gone up 25 cents a hundred above the prices quoted in our last issue, and galvanized Canada plates are also higher. In a word, the strength which the metal market has shown for some months past is not only still manifest, but more evident than ever.

It might be mentioned that one of the leading Montreal supply houses has withdrawn all prices on brass and iron. New prices will be given on application.

COPPER—Advances are noted on the Canadian market this week, to keep pace with conditions at the producing centres. We now quote : Ingot copper, 21½c. to 22c. ; sheet copper, base sizes, 26c.

INGOT TIN—A big jump has transpired this week, and the local jobbers are now quoting : **46c. to 46½c.** per lb.

ZINC SPELTER—The high tone of the market continues. We still quote : $7 to $7.25 per hundred pounds.

ANTIMONY—We are still quoting 27½c. to 28c. per pound.

PIG LEAD—In London the price is now higher than ever before. We still quote : $4.90 to $5 per cwt.

PIG IRON—It is becoming more and more difficult to obtain deliveries, and some manufacturers cannot keep up to orders on this account. We quote prices: Londonderry, $22.50 ; Carron No. 1, $23 ; Carron, special, $22 ; Summerlee, No. 2, selected, $22.75 ; Summerlee No. 3, soft, $21.75.

BOILER TUBES — We still quote British and American tubes, 1¼ inch, 8½c.; 2 inch, 8½c.; 2½ inch, 10c.; 3 inch, 12c.; 3½ inch, 15¾c.; 4 inch, 20c.; 5 inch, 45c. Price per foot net.

TOOL STEEL—Prices are : Colonial Black Diamond, 8c. to 9c.; Sanderson's, 8c. to 45c., according to grade; Jessop's, 13c.; Jonas & Colver's, 10c. to 20c.; "Air Hardening," 65c. per pound; Conqueror, 7½c.; Conqueror high speed steel, 60c.; Jowitt's Diamond J., 6¼c. to 7c.; Jowitt's best, 11c. to 11½c.

MERCHANT STEEL—We are still quoting : Sleigh shoe, 92.17½ ; tire, $2.27½; spring, $2.75; toecalk, $2.82½ ; machinery iron finish, $2.27½; ruled machinery steel, $2.75; mild, $2.15 base and upwards; square harrow teeth, $2.27½. Net cash 30 days. Rivet steel quoted on application.

COLD ROLLED SHAFTING — Our prices are : 3-16 inch to 1-4 inch, $6.80 ; 5-16 inch to 11-32 inch, $5.78 ; 3-8 inch to 17-32 inch, $4.76 ; 9-16 inch to 47-64 inch, $4.08; 3 1-8 inch to 3 7-16 inch, $3.60; 3-4 inch to 1 7-16 inch, $3.75 ; 1 1-2 inch to 3 inch, $3.50; 3 1-2 inch to 3 15-16 inch, $3.75; 4 inch to 4 7-16 inch, $4.08; 4 1-2 inch to 4 11-16 inch, $4.42.

GALVANIZED IRON—Conditions remain as firm as ever. An advance is shown in Gorbal's. We quote as follows: Queen's Head, 28 gauge, $4.35 to $4.60; 26 gauge, $4.20; 22 to 24 gauge, $3.65; 16 to 20 gauge, $3.50; Apollo, 28 gauge, $4.25 to $4.50; 26 gauge, $4.10; 22 and 24 gauge, $3.55; 16 to 20 gauge, $3.40; Comet, 28 gauge, $4.25 to $4.50; 26 gauge, $4.10; 22 and 24 gauge, $3.55; 16 to 20 gauge, $3.40; Bell brand, 28 gauge, $4.40 to $4.45; Fleur-de-Lis, 28 gauge, $4.20 to $4.45; 26 gauge, $4.05; 22 and 24 gauge, $3.50; 16 to 20 gauge, $3.35; Gorbal's "Best Best," 28 gauge, $4.25 to $4.50 ; "Windmill Best," 28 gauge, $4.15; Sword and Torch, 28 gauge, $4.15; Colborne Crown, 28 gauge, $4.40 to $4.65. In less than case lots 25c. extra.

BLACK SHEETS—We are quoting: 28 gauge, $2.40; 26 gauge, $2.35; 22-24 gauge, $2.30; 19-20 gauge, $2.30; 8-10 gauge, $2.45.

CANADA PLATES—Galvanized plates are still scarce, and high in price. We quote: 52's, $2.60; 60's, $2.65; 75's, $2.75; full polished, $3.75 to $4; galvanized, 52's, $4.25; 60's, $4.50.

TIN PLATES—Our prices remain as follows: Cokes, base size, IC 14x20, $4; charcoal, base size, IC, 14x20, $1.25.

TERNE PLATES—Our prices are: $6.85.

SHEET ZINC—An advance has occurred this week, and we are now quoting: $8 in casks, $8.25 in less than casks.

SHEET LEAD—We give prices: 2½ lbs. 6c. by the roll; 3 lbs., and heavier, 5¾c. by the roll; small quantities, 25c. per hundred pounds extra.

BAR IRON—Our price remains $2.05 base, f.o.b. Montreal.

OLD MATERIAL — Dealers' prices are as follows: Light copper, 14¾c.; heavy red brass, 14¼c.; yellow brass, 11½c.; light brass, 8½c.; lead, 3¼c.; zinc, 4c.; machinery cast scrap, $15.50; wrought scrap, $14 to $15; stove plate scrap, $12; mixed rags, $1 to $1.20 per 100 lbs.; old rubbers, 7¾c. to 8c.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, Oct. 5 1906.

Ingot tin and copper have been the features of the metal market this week, and as predicted by us in our last issue, higher prices are demanded for both these metals. In Great Britain there has been a steady advance on tin quotations, although a slight reaction occurred on Monday. We have advanced our quotations 2c. per pound, and present indications are that we will have to move them still higher.

Both ingot and sheet copper have been advanced, the former to $20.75 and the latter to $27 per 100 lbs. The copper interests in the States appear to be doing what they can to keep the market settled and prevent speculation, and as they are selling only in small quantities to consumers it is difficult to secure supplies. Prices are consequently very firm at the advanced quotations.

Lead is stationary in price but the market is active and there is no shading of prices evident.

The demand for pig iron, and, in fact, for most iron products, is much greater than the supply, and in response to inquiries jobbers say that conditions are growing worse and deliveries being put off for longer periods than ever. Stocks of bar iron are still very low, although some relief is being experienced by the withdrawal from the market of the agricultural implement manufacturers, and the mills are catching up a little with their orders. Delivery is still six or eight weeks behind orders. However, as the demand is brisk stocks are certain to be low for some time. Higher prices are being asked for larger sizes of bolts, and there is also some talk of an advance in screws.

Galvanized iron has been advanced slightly by some dealers, and the market is almost bare of some lines.

Sheet zinc prices have been advanced and the demand for both sheets and spelter is active.

PIG IRON—Both outside markets and local markets are very firm and all supplies here are rapidly being taken up. Our prices are: Randor at furnace, $33; Hamilton at furnaces, No. 1, $21.50; Londonderry, f.o.b. Toronto, No. 1, $23; Middleborough, $22.50 to $23.

BAR IRON — A brisk demand exists with stocks in slightly better shape. We quote: $2.15 base, f.o.b. Toronto, with discount of 2 per cent. net cash.

INGOT TIN—Dealers are asking from 44 to 45c. in response to the stiffening in foreign markets.

TIN PLATES—We quote: Cokes, base size, 14 x 20, $4; charcoal, base size, 14 x 20, $4.50.

GALVANIZED SHEETS — An advance of 10c. per 100 has been made on galvanized iron by some dealers. Stocks are almost bare. Canada plates and black sheets are also firm.

BRASS—Brass rod and tubing have been advanced two cents per pound. We quote: 23c. to 24c. per lb.

COPPER—Copper is stiffening and sharp advances are made this week. We now quote: Ingot copper, $20.75 per 100 lbs., and sheet copper, $27 per 100 lbs.

LEAD—The ruling quotations are now $4.95 to $5 for imported pig and $5 to $5.50 for bar lead.

ZINC SPELTER—The market is active and prices unchanged. We quote: 7¼c. per lb. for foreign and 6c. per lb. for domestic. Sheet zinc has been advanced 25 per cent.

BOILER PLATES AND TUBES—We quote: Plates, per 100 lbs., ¼ in. and up, $2.45; heads, per 100 lbs., $2.60; tank plates, 3-16 inch, $2.50; tubes, per 100 feet, 1½ inch, $8.50; 2, $8.80; 2½, $10.75; 3, $12; 3½, $15.80; 4, $21. Terms, 2 per cent. off.

ANTIMONY—Supplies are scarce and 27 to 28c. is being asked.

OLD MATERIAL — Prices are as follows: Heavy copper and wire, 15¼c. to 15¾c. per lb.; light copper, 13½c. to 14c. per lb.; heavy red brass, 13c. per lb.; heavy yellow brass, 11c. per lb.; light brass, 8¼c. per lb.; tea lead, $3.40 per 100 lbs.; heavy lead, $3.60 per 100 lbs.; scrap zinc, 4½c. per lb.; iron, No. 1 wrought, $11; No. 2 wrought, $3 to $5; machinery cast scrap, $15; stove plate, $10; malleable and steel, $5; old rubbers, 7¾c. per pound; country mixed rags, $1 to $1.25 per 100 lbs., according to quality.

COAL—We quote the following prices: Anthracite in cars at bridge, egg, stove and nut, $5.50; grate, $5.25; pea $3.50 per gross ton.

Standard Hocking, soft coal, in cars, f.o.b. at mines: Lump, $1.50; ¾ inch, $1.40; run of mine, $1.30; nut, $1.25; N. P. and S., $1.; slack, 75c.; box cars, 10c. per ton additional.

Youghiogheny soft coal in cars, bonded at bridges: 1¼ inch, $2.55; ¾ inch, $2.45; mine run, $2.35; slack, $2.05.

For Manitoba, British Columbia and Maritime Provinces markets see pages following.

LONDON METAL MARKETS.

From Metal Market Report, Oct. 3, 19 6.

PIG IRON — Cleveland warrants are quoted at 54s. 6d, and Glasgow standard warrants at 54s., making prices as compared with last week unchanged for Cleveland warrants and 9d lower for standard warrants.

TIN—Spot tin opened firm at £194, futures at £192 12s. 6d, and after sales of 250 tons of spot and 400 tons of futures closed firm at £194 5s. for spot, £193 10s. for futures, making price compared with last week £8 5s. higher on spot and £8 12s. 6d higher on futures.

COPPER—Spot copper opened easy at £92 5s., futures £92, and after sales of 100 tons of spot and 300 tons of futures, closed firm at £92 15s. for spot, and £92 10s. for futures, making price as compared with last week £2 10s. higher on spot and £2 5s. higher on futures.

LEAD—The market closed at £18 15s., making price as compared with last week 5s. higher.

SPELTER—The market closed at £27 7s. 6d, making price as compared with last week 5s. lower.

U. S. IRON AND METAL TRADES.

From the Iron Age, Oct. 4, 1906.

The pig iron market has made further progress upward, with no indications that the advance has reached its limit. Heavy buying of basic iron in the east is the feature, and fully 60,000 tons has been taken at $1 to $1.50 above the final prices in the July movement in basic, when the total reached 250,000 tons. From 30,000 to 40,000 tons of the recent purchases was for the first quarter of 1907, largely for delivery at Pencoyd, Pa. Further business for eastern basic steel works is pending.

In foundry iron the situation shows increasing feverishness. The demand for early shipments continues on a scale indicating that many melters are failing to get sufficient iron from usual sources to meet their requirements. Prices paid in such cases are coming steadily nearer to the basis of 1902. Eastern iron is going to central western points and vice versa, and the high freights paid on these cross shipments are proof of an urgency that has not existed hitherto. Forge iron as well as foundry has advanced sharply on such sales. Only moderate buying is reported for next year.

More is heard of negotiations for imports, both of Scotch and Middlesboro irons, and further shipments of British low phosphorus iron are on the way. It is questionable if foreign shipments can be made promptly enough to be of great avail, and opinion is divided as to the later need of importations.

The United States Steel Corporation had 96¾ per cent. of its blast furnaces in operation on October 1, the four idle furnaces being of less than the average capacity. October is counted on to make

a new record in the corporation's pig iron production. Significant of the judgment of the leading interest as to the duration of prosperity is the announcement that work will be started soon on three or four new blast furnaces in the Pittsburg district, probably at the Duquesne and Donora plants. Thirty 50-ton open hearth furnaces will be built, chiefly in the Pittsburg district and probably in part in the Cleveland district.

The situation in finished material is best shown in an average of 68,000 tons a day booked by the Steel Corporation in September, while shipments averaged 32,000 tons a day. The record of new business is without a parallel and all lines contributed. The exports of the corporation in plates, structural material and wire products have kept up well. September export orders in wire were particularly large.

Among rail orders the largest is approximately 25,000 tons additional for the Erie, which had already placed 38,000 tons for 1907. Foreign orders include 20,000 tons for the Philippines.

Plate mill order books have been filling up in recent weeks. In bars the list of mills asking the advance is increasing.

In the Chicago district the handicap of car shortage is such that uneasiness exists as to the situation later, when the Winter embargo begins.

Documentary details growing out of the numerous leases involved are now the sole cause of delay in the announcement of the Hill ore deal.

U. S. METAL MARKET.

From the Iron Trade Review, Cleveland, Oct. 4, 1906.

That leading interests are of the opinion that present prosperity in iron and steel making will continue is evidenced by the announcement of the United States Steel Corporation that it will erect three or four new blast furnaces in the Pittsburg district, and from 24 to 30 additional open hearth furnaces in the Pittsburg and Cleveland districts. This, in connection with the recently announced policy of the corporation to discontinue making long term contracts for billets and to abrogate present contracts as soon as that can be done, indicates the belief that its needs in the near future will consume more crude steel than it is now producing.

The market generally exhibits increased strength. Furnace men are showing no eagerness to place their products far into the future, although the past week has witnessed a distinctive renewal of the 1907 buying movement. No. 2 foundry has sold as high as $22 valley for prompt delivery, and $17.50 Birmingham for the southern product. A New York concern is inquiring in Chicago for 10,000 tons for delivery during this year and the first quarter of next.

Activity at the mills is divided among all lines. The scarcity of crude steel is unabated, and buyers are being approached with extraordinary inducements to reduce tonnages on contracts.

Heavy orders for cars continue to be placed, thereby strengthening the plate and bar markets especially. The scarcity of cars has grown more pronounced and is seriously interfering with rail, coke and ore shipments. The September ore movement, however, was the heaviest in the history.

Nova Scotia Trade News.

Halifax, N.S., Oct. 2.

The hardware trade this Autumn has been unusually good, and though this is considered to be a dull season, many of the dealers here are kept busy filling orders. It is stated that one of the big firms in this city has been so rushed that they are at the present time fully $5,000 behind in getting out their orders. The season right through has been a good one for plumbing supplies and builders' hardware generally. The price list remains pretty steady, no notable change having taken place since last report. Some of the market prices are higher, but the advances have not yet gone into effect here.

* * *

The wholesale hardware firm of William Stairs, Son & Morrow, has just completed the purchase of a four-storey stone warehouse on Sackville street. The firm's place of business is on Water street, but the newly acquired building adjoins their premises in the rear, and it will be remodelled and used almost exclusively as a goods entrance.

* * *

The city council has adopted the report of the board of fire commissioners recommending the purchase from the Gutta Percha & Rubber Manufacturing Company of Toronto, through their agents, Austen Bros., of Halifax, of 1,200 feet of 2½-inch Maltese Cross carbolized fire hose. This brand of hose has been used almost exclusively by Halifax for years, and this last purchase by the city makes a total of 2,700 feet of this brand within a few weeks.

* * *

The Marconi Wireless Telegraph Company have awarded to Rhodes, Curry & Co., of Amherst, the contract for the erection of a big building at Glace. The building will be 100 feet in length, 60 feet in width, and 35 feet in height.

New Brunswick Trade News

St. John, Sept. 24.

The customary between season dullness in hardware circles is gradually disappearing, and what is expected to be a brisk Fall trade is setting in. There is, of course, still a lingering inactivity, but the signs of good business are to be found. Hence the dealer's look of pleasurable anticipation. It is becoming monotonous to hear hardwaremen speak of the firmness of prices and the continued advances, and then to have to write of these things time and again. But the firmness and the advances are still prominent here, as elsewhere, and so the chronicling goes on.

* * *

Another striking aspect of the hardware world here is the difficulty experienced by dealers in getting their orders. Something, supposedly pressure of many orders, is preventing the manufacturers from delivering goods as rapidly as they are expected to do. Naturally the merchant is put to considerable inconvenience on this account, but a remedy does not present itself. Speaking of iron, it may be noted that the galvanized variety is among the firm "ones," and that there are indications of another advance in the price figures before very long.

* * *

The merchants generally seem to agree in declaring the assorting trade to be fairly good. In builders' and shelf hardware the sales are reported satisfactory. Of late the amount of building throughout the province has increased beyond what was expected a few months ago, and consequently the sale of builders' materials has also gone up. The demand for lumbermen's hardware, too, is picking up. This is, of course, only the preliminary call for such materials as are usually classed under the head of lumbermen's supplies, but it is indicative of the greater demand to follow. Ammunition and other articles called for by the Fall sportsman are, as is to be expected, among the things which the dealer is kept busy handling these days. The streams of hunters coming into New Brunswick this year, by the way, is going—if present signs indicate truly — to be greater than ever.

* * *

An important deal recently put through was the transfer of the stock and rights of the company concerned in the manufacture of the Mowry patent nut lock to a syndicate represented by C. V. Wetmore and W. A. Crowell, Sydney. The price paid is said to have been $150,000. A large plant will shortly be erected by the syndicate in the provinces. The nut lock is the invention of a St. John man.

British Columbia Trade News

Vancouver, B.C., Sept. 28, 1906.

Interesting indeed and busy has the week been to the business men of Vancouver. The return of the Manufacturers' Association for a visit after three years has been of especial importance, seeing that that representative body, mainly comprising eastern business men, has in this way tacitly avowed the keen interest aroused by things western. Piloted by R. P. McClennan, Vancouver's representative at the Winnipeg convention, the members on their special train reached the coast on Monday. Their visit to Vancouver, however, began on Wednesday, as on Monday the visitors went direct to Victoria, where a day or so was spent visiting points of interest at the capital.

Coincident with the visit of the manufacturers was the convention of the Dominion Forestry Association. That body, as well as the Manufacturers' Association, was entertained by the joint organization of Coast and Mountain Lumber Associations, Vancouver Board of Trade and Vancouver branch of the Manufacturers' Association. To add accentuated interest, the Forestry Association proceedings were opened by His Excellency Earl Grey, who was the guest of honor at a banquet on Wednesday evening, at which the entire membership of the two visiting associations was entertained.

The work of the Forestry Association is of especial interest to the Pacific Province, where a large part of the produced wealth comes from the forests, and the preservation of these vast tim-

(Continued on page 42).

Hardware and Metal Conditions in Manitoba

(Market quotations corrected by telegraph up to 12 a.m. Friday, Oct. 5, 1906.)

Office of HARDWARE AND METAL,
Room 511, Union Bank Building,
Winnipeg, Man.

There are no quotable price changes of any importance this week. Business is very active, particularly in heavy goods, which are being rushed in before the close of lake navigation.

LANTERNS—In spite of retail cutting wholesale prices are firmly maintained as follows: Cold blast, $5.25; coppered cold blast, $7.25; cold blast dash, $7.75; lift, $4.25 per dozen.

WIRE—We quote as follows: Barbed wire, 100 lbs., $2.90; plain galvanized, 6 to 8, $3.39; 10, $3.50; 12, $3.10; 13 $3.20; 14, $3.90; 15, $4.45; 16, $4.60; plain twist, $3; staples, $3.50; oiled annealed wire, 10, $2.96; 11, $3.02; 12, $3.10; 13, $3.20; 14, $3.30; 15, $3.45. Annealed wires (unoiled) 10c. less.

HORSESHOES — Quotations are as follows: Iron, No. 0 to No. 1, $4.65; No. 2 and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to No. 1, $5; No. 2 and larger, $4.75.

HORSENAILS — Lists and discounts are quoted as follows: No. 10, 20c.; No. 9, 22c.; No. 8, 24c.; No. 7, 26c.; No. 6, 28c.; No. 5, 32c.; No. 4, 40c., per pound. Discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent., "M" brand and other brands, 55 and 60 per cent. Add 15c. per box.

WIRE NAILS—Steady at $2.60 per keg.

CUT NAILS—Quoted now at $2.70 per keg.

PRESSED SPIKES—Prices are as follows: ¼ x 5 and 6, $4.60; 5-6 x 5, 6 and 7, $4.25; ⅜ by 6, 7 and 8, $4.10; 7-16 x 7 and 9, $4; ½ x 8, 9, 10 and 12, $3.90; ⅝ x 10 and 12, $3.75.

SCREWS—Discounts are as follows: Flat head, iron, bright, 85 and 10 p.c.; round head, iron, 80 p.c.; flat head, brass, 75 and 10 p.c.; round head, brass 70 and 10 p.c.; coach, 70 p.c.

NUTS AND BOLTS — Discounts are unchanged and continue as follows: Bolts, carriage, ⅜ or smaller, 60 and 5; bolts, carriage, 7-16 and up, 55; bolts, machine, ⅜ and under, 55 and 5; bolts, machine, 7-16 and over, 55; bolts, tire, 65; bolt ends, 55; sleigh shoe bolts, 65 and 10; machine screws, 70; plough bolts, 55; square nuts, case lots, 3; square nuts, small lots, 2½; hex nuts, case lots, 3; hex nuts, smaller lots, 2½ p.c.

RIVETS—Quoted now as follows: Iron, 60 and 10; copper, No. 8, 34½; copper, No. 12, 40 p.c.

COIL CHAIN—Unchanged in price. We quote: 3-16 inch, $9.25; 5-16, $5.20; 7-16, $4.45; ½, $4.10; ¼, $7.20; ⅜, $4.60; ½, $4.30; ¾, $4.

SHOVELS—Discounts on spades and shovels continue 40 and 5 p.c.

HARVEST TOOLS — Discounts continue 60 and 5 p.c.

AXE HANDLES—Quoted as follows: Turned, s.g. hickory, doz., $3.15; No. 1, $1.90; No. 2, $1.60; octagon, extra, $2.30; No. 1, $1.60.

AXES — Prices quoted as follows: Bench axes, 40; broad axes, 25 p.c. discount off list; Royal Oak, per dozen, $6.25; Maple Leaf, $8.25; Model, $8.50; Black Prince, $7.25; Black Diamond, $9.25; Standard flint edge, $8.75; Copper King, $9; Columbian, $10.75; handled axes, North Star, $7.75; Black Prince, $9.25; Standard flint edge, $10.50; Copper King, $11 per dozen.

BUTTS—The discount on wrought iron butts is 70 p.c.

CHURNS — The discounts from list continue as before: 45 and 5 per cent.; but the list has been advanced and is now as follows: No. 0, $9; No. 1, $9; No. 2, $10; No. 3, $11; No. 4, $13; No. 5, $16.

CHISELS—Quoted at 70 p.c. off list prices.

AUGER BITS—Discount on "Irwin" bits is 47½ per cent., and on other lines 70 per cent.

BLOCKS—Discount on steel blocks is 35 p.c. off list prices; on wood, 55 p.c.

FITTINGS—Discounts continue as follows: Wrought couplings, 60; nipples, 65 and 10; T's and elbows, 10; malleable bushings, 50; malleable unions, 55 p.c.

GRINDSTONES—As noted last week, the price is now 1½c. per lb., a decline of ¼c.

FORK HANDLES—The discount is 40 p.c. from list prices.

HINGES—The discount on light "T" and strap hinges is 65 p.c. off list prices.

HOOKS—Prices are quoted as follows: Brush hooks, heavy, per doz., $8.75; grass hooks, $1.70.

CLEVISES—Price is now 6½c. per lb.

STOVE PIPES—Quotations are as follows: 6-inch, per 100 feet length, $8.50; 7-inch, $9.25.

DRAW KNIVES—The discount is 70 per cent. from list prices.

RULES—Discount is 50 per cent.

WASHERS—On small quantities the discount is 35 p.c.; on full boxes it is 40 p.c.

WRINGERS—Quotations are: Royal Canadian, $33; B.B., $37.75 per doz.

FILES—Discounts are quoted as follows: Arcade, 75; Black Diamond, 60; Nicholson's, 62½ p.c.

BUILDING PAPER — Prices are as follows: Plain, Joliette, 40c.; Cyclone, 55c.; Anchor, 55c.; pure fibre, 60c.; tarred, Joliette, 65c.; Cyclone, 80c.; Anchor, 65c.; pure fibre, 80c.

TINWARE, ETC.—Quoted as follows: Pressed, retinned, 70 and 10; pressed, plain, 75 and 2½; pieced, 30; japanned ware, 37½; enamelled ware, Famous, 50; Imperial, 50 and 10; Imperial, one coat, 60; Premier, 50; Colonial, 50 and 10; Royal, 60; Victoria, 45; white 45; Diamond, 50; Granite, 60 p.c.

CORDAGE—Quotations are as follows: Rope, sisal, 7-16 and larger, basis, $11.25; Manila, 7-16 and larger, basis, $15.75; Lathyarn, $11.25; cotton rope, per lb., 21c.

SOLDER—Quoted at 27c. per pound. Block tin is quoted at 45c. per pound.

VISES — Prices are quoted as follows: "Peter Wright," 30 to 34, 14½c.; 35 to 39, 14c.; 48 and larger, 13½c. per lb.

ANVILS—"Peter Wright" anvils are selling at 11c. per lb.

CROWBARS—Quoted now at 4c. per lb.

POWER HORSE CLIPPERS — The "1902" power horse clipper is selling at $12, and the "Twentieth Century" at $6. The "1904" sheep shearing machines are sold at $13.60.

AMMUNITION, ETC.—As noted last week, shot has been advanced 25c. per cwt. We still quote: Cartridges, Dominion R. F., 50 and 5; Dominion, C. F., pistol, 30; military, 20; American R. F., 33½; C. F., pistol, 5 p.c.; C. F., military, 10 p.c. advance. Loaded shells: Dominion Eley's and Kynoch's soft, 12 gauge, black, $16.50; chilled, 12 gauge, $17.50; soft, 10 gauge, $19.50; chilled, 10 gauge, $20.50. Shot, ordinary, per 100 lbs., $7.25; chilled, $7.75; powder, F.F., keg, Hamilton, $4.75; F.F.G., Dupont's, $5.

IRON AND STEEL—Prices are Bar iron (basis, $2.50; Swedish iron (basis), $4.75; sleigh shoe steel, $2.75; spring steel, $3.25; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $9.50; Jessop, $13.

SHEET ZINC — The price is now $8.50 for cask lots, and $9 for broken lots.

PIG LEAD—The high price of $5.60 per cwt. is still firmly maintained.

AXLE GREASE—"Mica" axle grease is quoted at $2.75 per case, and "Diamond" at $1.60.

BLACK IRON PIPE—Quotations are: ¼ inch, $2.45; ⅜, $2.85; ½, $3.15; ¾, $4; 1, $5.75; 1¼, $7.85; 1½, $9.40; 2, $12.90.

LEAD PIPE—The price has been advanced to $7.80.

GALVANIZED IRON — Quotations are: Apollo, 16 gauge, $3.90; 18 and 20, $4.10; 22 and 24, $4.45; 26, $4.40; 28, $4.65; 30 gauge or 10¾ oz., $4.95; Queen's Head, 24, $4.65; 26, $4.65; 28, $4.90.

TIN PLATES—We now quote as follows: IC charcoal, 20 x 28, box, $9.50; IX charcoal, 20 x 28, $11.50; XXI charcoal, 20 x 28, $13.50.

TERNE PLATES—Quoted at $9.

CANADA PLATES—Prices have been steady since the recent decline. We quote: Canada plate, 18 x 21, 18 x 24, $3.15; 20 x 28, $3.40; full polished, $3.90.

BLACK SHEETS—Prices are: 10 to 16 gauge, 100 lbs., $3.50; 18 to 22, $3.75; 24, $3.90; 26, $4; 28, $4.10.

PETROLEUM AND GASOLINE — Prices are quoted as follows: Silver Star, per gal., 21c.; Sunlight, 22c.;

Eocene, 24c.; Pennoline, 25c.; Crystal Spray, 24c.; Silver Light, 22c.; gasoline, 70-72 (engine), 25½c., in barrels, f.o.b. Winnipeg.

PAINTS, OILS AND TURPENTINE — White lead, pure, $7; bladder putty in bbls., 2½c.; in kegs, 3¾c.; turpentine, pure, in barrels, 97c.; less than barrel lots, 92c.; linseed oil, raw, 64c.; boiled, 67c.

WINDOW GLASS—We quote: 16-oz. O.G., single, in 50-ft. boxes—16 to 25 united inches, $2.25; 26 to 40, $2.40; 16-oz. O.G., single, in 100-ft. cases — 16 to 25 united inches, $4; 26 to 40, $4.52; 41 to 50, $4.75; 50 to 60, $5.25; 61 to 70, $5.75. 21-oz. C.S., double, in 100-ft. cases—26 to 40 united inches, $7.35; 41 to 50, $8.40; 51 to 60, $9.45; 61 to 70, $10.50; 71 to 80, $11.55; 81 to 85, $12.60; 86 to 90, $14.75; 91 to 95, $17.30.

BRITISH COLUMBIA NEWS.

(Continued from page 39).

ber areas is already giving concern to those in authority as well as those engaged in the timber industry. Many valuable papers were read at the convention, which lasted two days. The most important consideration was that of the measures to protect forests from destruction by fire. In this regard the members of the British Columbia branch were rather outspoken in their criticism of the Provincial Government for the inadequate provision for fire protection. Many valuable suggestions were made, of which perhaps the most valuable was that of H. B. Gilmour, who pointed out that in setting fire and burning cuttings and refuse, in British Columbia at any rate, it was possible to make it the rule to begin burning on the highest levels. As an illustration of the intent of his suggestion, Mr. Gilmour spoke of the building of camp fires on the tops of the mountains across the Inlet, a frequent occurrence, but no fires ever spread down the hillside from these.

In another particular, that of regulating timber leases, F. W. Jones, of Golden, contributed a proposal by which the preservation of timber lands and their continued productiveness would be ensured. His idea was to institute a graduated scale of rentals, the maximum for the first five years' lease, reducing for each five year period as the timber was being cut off. In this way the owner of a lease would have some inducement to take care of the timber which was least valuable, in order to bring it in later on, whereas under present conditions the main object seemed to be to force the rapid denudation of a timber berth by cutting off all the timber available at as early a date as possible.

Among the valuable papers contributed was that of Overton Price, of the United States Forestry Service, his subject being a description of the measures taken in forest preservation in his country. Hon. R. F. Green, Provincial Commissioner of Lands and Works, in whose department the timber comes, was the contributor of a valuable paper on the industry, its extent, and its possibilities and new openings in this province. He also dealt at length with the features of revenue from timber and legislation controlling and regulating the cutting of timber on Government lands. A tribute was paid by the honorable gentleman to the efforts of Sir Henri Joly in the inception of the Forestry Association.

* * *

President Shaughnessy, of the C.P.R., has put it up to the lumbermen of British Columbia to correct the car shortage themselves to a certain extent at least. In conference over the vexed subject of supply of cars to carry out the lumber as fast as it is cut, the president stated that the shops at Angus were equipped to turn out a complete box car every thirty-five minutes, but he was willing to make them even faster than that. The difficulty was in the lack of material. His company was prepared to invest several millions in cars if the mills would supply them with the lumber from which to build them. In reply the mill men alleged that thousands of men were needed to cut logs in the lumber woods. The difficulty they experienced was in getting logs, and until the labor problem was settled they could not improve the matter of delivery very much.

* * *

The Alley Line steamer Pondo, on the direct New Zealand-Canada service, sailed on Friday last with a full cargo, almost all of which was of British Columbia production. The major portion consisted of 1,200,000 feet of lumber. some hundreds of tons of potatoes and onions, field produce of British Columbia ranches, was also shipped, and three hundred tons of Canadian manufacture exhibits to be placed at the New Zealand Exposition at Christchurch was also included in the cargo. The agents for the Alley Line announce that the return cargo for this vessel is already contracted for, showing that the line has a field to fill which will be a remunerative one to the owners, seeing that the first six months has not yet elapsed since its inception.

* * *

Two new saw mills of large capacity are to be added to the present shipping mills of the coast. The Rat Portage Lumber Co., which owns a large mill at Harrison River, a few miles up the Fraser and on the main line of the C.P.R., announces its intention of installing the plant in the mill, which has lain idle for the past two years since it was rebuilt. D. Drysdale, a Puget Sound capitalist, also announces that he intends erecting a large saw mill on Queen Charlotte Island, at a harbor selected near Skidegate. This development is in view of activity up-coast when G.T.P. construction begins.

A transfer of an interior mill to another combination of American capital is also reported. The Kamloops Lumber Co., with mills at that point and at Enderby and Mara, in the Okanagan, has sold to a Minneapolis syndicate of which J. T. Rogers is the head. Three-quarters of a million dollars is said to be close to the amount involved in the transfer.

* * *

Mills on the Fraser River at New Westminster have the advantage of sidings to both C.P.R. and Great Northern Railways. The big mill of the Fraser River Lumber Co., at Millside, is now having a siding constructed to connect with the Great Northern, the C.P.R. service having been in for years. The Railway Commission some time ago ordered that transfer facilities from one line to the other should be accorded, in cases where but one line had a siding in to a lumber mill. The Fraser River saw mills are, or will be now, all independent of that ruling, having the double facility.

* * *

As the Nicola and Similkameen district is developing capital is turning its activities in that direction. The C.P.R. branch line from Spences' Bridge is now operated, and is being extended further, and as it reaches the mining section attention is turning to the rich coal and mineral deposits partly developed there. The latest movement has been the bonding of the properties of the Diamond Vale Coal & Iron Mines, in the Nicola Valley for $100,000. The property is close to the new branch line at Coutlı, and Sir Thomas Shaughnessy stated when in Vancouver this week that the C.P.R. would take all the coal the mine could turn out. Nearly all the stock of the company is held by British Columbians, who have quietly worked on the development for some years.

* * *

It looks very much as if the C.P.R. were preparing for its campaign of development of Vancouver Island. A survey party is now en route to the west coast of the island, starting from Comox and going across to Alberni Canal. The branch proposed to be built across to Alberni would be only part of the plans of the railway, as an extension of the E. & N. (the island railway now owned by the C.P.R.) from Nanaimo, its present terminus, to Comox is included. The fact that the survey party was sent out just at the time of the visit of President Shaughnessy is considered significant. On the west coast there is considerable development in the vicinity of Alberni Canal, but across the island there will be miles of untrod forest to explore. When the size of Vancouver Island, 250 miles long by 100 broad in some places, is considered, and the facts taken in that it is heavily wooded with magnificent forests of fir and cedar as well as being mountainous in the interior, it will not be surprising that this survey party will have much exploratory work to do, in places where no white man ever yet set foot.

GOING AFTER FOREIGN TRADE.

Not a great many years since, while foreign firms were establishing branches in Canada, the Canadian concerns who were doing business outside the Dominion could be numbered almost on one's fingers. All this is materially changing, and every day one hears of Canadian firms opening branches in all parts of the world.

One of the latest Canadian firms to do this is Business Systems, Toronto, who have recently opened up in the British Isles at 32 Cheapside, London, England. H. J. King, the general manager of this concern, went over to the Old Country some months ago, and spent considerable time investigating the opening in the British market for his goods. The result is the opening of a London office completely equipped with a strong selling force.

The progress made by Business Systems is especially noteworthy in view of the fact that although this concern has only been in existence one year, they are already so thoroughly organized as to be able to extend after foreign trade.

The London office is equipped with writing rooms and stenographers for the use of Canadian business men who are invited to make this their headquarters while in the Old Country and to have their mail addressed in care of Business Systems, 32 Cheapside, London, E.C., England.

TRADE INQUIRIES.

Correspondents desiring to get in touch with any of the firms referred to should quote the reference number when requesting addresses. For information write to Superintendent of Commercial Agencies, Department of Trade and Commerce, Ottawa.

1124. Brushes.—A Yorkshire firm manufacturing all classes of household brushes, whisks, painting and tar brushes, and every description of brush handled by hardware stores, desire to place their goods on the Canadian market, and invite correspondence.

1125. Agent. — A Yorkshire firm manufacturing roller compositions, roller castings, typewash lye brushes, lead and metal furniture, and gas engine oils, invite correspondence with Canadian buyers, and desire to appoint an agent calling upon printers' engineers and printers.

1139. Chimney tops.—A Manchester firm asks for prices of revolving chimney tops (metal) from Canadian manufacturers.

1140. Washing machines. — A Manchester firm wish to get prices of washing machines from Canadian manufacturers.

1142. Refrigerators.—A Manchester firm ask for prices and description of refrigerators from Canadian manufacturers.

1145. Cycles.—A cycle company is seeking to extend its business with Canada and is desirous of communicating with dealers in such goods as they turn out.

1148. Pipes.—A firm manufacturing patent jointed pipes for gas and water mains, sewers, drains, etc., desire to get into touch with earthenware pipe manufacturers in Canada.

1149. Iron pipes.—An English firm holding patents for jointed pipes for municipal purposes desire to correspond with Canadian makers of iron pipes.

1150. Machinery.—An important English firm of mustard makers desire to have the names of Canadian manufacturers of automatic tin box making machinery.

Western Canada Factory, 797 Notre Dame Ave., Winnipeg, Man.

DIE STOCK PATENT.

H. J. Carmody, New York, N.Y., has recently patented an invention relating to die stocks, used in cutting threads upon rods, tubes, pipes, etc. Practical and convenient operating means are provided for threading a pipe located in some comparatively inaccessible position; also for cutting a thread upon a cylindrical bar which is more readily accessible; and also means if at any stage of cutting the device is desired to be operated backward.

FOUNDRY AND METAL INDUSTRIES

A by-law dealing with the new $300,000 foundry proposition will be voted on at Berlin, Ont.

The Cape Breton Foundry Company will commence the erection of its plant at Sydney, N.S.

Daniel O'Connor and W. A. Maus, representing Peterboro capitalists, may locate a rolled steel plate mill at St. Catharines.

The Canadian Iron & Foundry Company, of Fort William, are about to erect a large foundry. J. R. Duncan will be the manager.

The Smiths Falls Malleable Castings Company intend to duplicate their present plant, having bought about 12 acres of land to allow for the enlargement.

COLLINGWOOD STEEL PLANT RUNNING.

Men have been at work for several weeks fitting up the Northern Iron & Steel Company's plant at Collingwood, and the president, Major Currie, announced recently that the first bar would be rolled on September 27. An invitation was extended to all Collingwood citizens to be present and three hundred of the leading citizens of the town and surrounding country were present at the mills and witnessed the mill put in operation. The first bar, six by one inch in size, was cut up into souvenirs. The machinery worked to entire satisfaction and the officers of the company received the congratulations of all present. There is a large tonnage on the books for the mills and shipments of finished products commenced this week. The starting of the steel plant will mean a good deal to the wire company, whose plant adjoins. When the steel plant commences furnishing rods to the wire company it will mean a saving in freight to the latter company of over $100 per day. The wire company has been running on orders night and day and is booked up for the remainder of the season.

An Electric Light Hanger, Hand-Made, of Hammered Copper.

THE EXPERIENCE OF ONE DEALER.

This splendid testimonial from Mr. F. Barrington, a paint dealer and practical painter of Waterloo, Que., speaks convincingly for Sherwin-Williams Paints.

The S-W. Co.

Gentlemen:—I am writing you to-day in regard to Sherwin-Williams Paint, Prepared. I may say that I am a practical painter of over thirty year's experience, and, like many others, have had prejudices against ready mixed paints. But during the past two years I have been selling S.W.P. in this neighborhood and find an increasing demand for your goods.

Mr. F. Barrington

Carrying on the painting and decorating business, I have had opportunities for testing your paints, and, in this connection would say that in my opinion they are *the best on the market.* If properly applied they will work as satisfactorily and wear as long as paints mixed in the old-fashioned way, and they possess a fineness of texture and a covering capacity superior to hand mixed paints.

The great trouble is that people have an idea that any old way or any old thing will do to spread ready mixed paints. So in many cases the paint is carelessly put on—often too heavy—and as a consequence the job is unsatisfactory. Lead and oil do the same thing under similar circumstances. The fact is that the painter should use his skill and intelligence in the application of ready mixed paints as in those of his own mixture.

Mr. F. Barrington's Store, Waterloo, Que.

If the painter will take care in using S. W. P. and not try to make two heavy coats do the work of three well brushed ones, the results will be more satisfactory and just as durable and more economical than in any other way. See that the paint is properly applied and a good job is assured.

I am sure there is a large and increasing demand for Sherwin-Williams Paints.

Wishing you every success, I am,

Yours truly,

F. BARRINGTON.

Mr. Barrington's experience is the experience of other S. W. P. agents, too. It will pay any dealer to write The Sherwin-Williams Co., 639 Centre St., Montreal, Que., for their agency proposition.

ARTISTIC METAL WORK.

What is practically a new industry for Canada, has been launched in a modest way, at 40 Recollet street, Montreal, by the Decorative Metal Workers' Co., headed by Thos. Parsons, a craftsman who learned his art in England.

The modern craze for out-of-the-ordinary furniture and decorations has led to a considerable demand for chandeliers, and various bric-a-brac, made of hammered copper or brass. Hitherto, although some Canadian manufacturers have taken up this branch of the business, to a certain extent, the greater part of these goods, has been imported from England, or from Tiffany in New York.

Consequently, it will be seen that there is a good field for the manufacture of specialties of artistic metal work in Canada. Thos. Parsons, who has organized the new company, which will take up this line, had a long experience as craftsman and designer in England, and has also a good knowledge of Canadian trade conditions, by reason of his former connection with the Robert Mitchell Co., of Montreal.

The new company will make a specialty of grilles, electric and gas fixtures, bank railing, church metal work, door plates, fire dogs and, in fact, everything in artistic metal work. Designs and samples will be submitted upon application.

Mr. Parsons has met with a very encouraging reception from Montreal architects, and his products will be used in many of the large bank buildings, apartment houses, etc., now in course of construction in that city.

PAINT, OIL AND BRUSH TRADES

A ST. LOUIS MEDAL.

Although somewhat tardy in coming to hand, the silver medal won by the Canada Paint Co., at the Louisiana Purchase Exposition, has now been received

Silver Medal won by the Canada Paint Company at St. Louis.

and cuts of the obverse and reverse are herewith presented.

The medal is solid silver, and of a particularly pleasing design. In the composition of the obverse of the medal are shown two figures, one of which, Columbia, tall and stately, is about to envelope the youthful maiden by her side, typifying the Louisiana Territory, in the flag of the Stars and Stripes, thus receiving her into the sisterhood of states. The other figure is depicted in the act of diverting herself of the cloak of France, symbolized in the emblem of Napoleon, the busy bee, em-

Silver Medal won by the Canada Paint Company at St. Louis.

broidered thereon. In the background is shown the rising sun, the dawn of a new era of progress to the nation.

The reverse of the medal shows an architectural tablet bearing an inscription giving the grade of the medal. Below the tablet are two dolphins, symbolizing the eastern and western boundaries of the country, the whole surmounted by an American Eagle, spreading his wings from ocean to ocean.

The dies were engraved and the medals struck by the United States Government mint at Philadelphia. The cuts on this page are much smaller than the medal from which they are taken.

JAPANESE SEAWEED GLUE.

The manufacture of seaweed glue is one of the oldest industries of Japan, and dates back to the seventeenth century. The methods of manufacture vary slightly according to the nature of the seaweed used, and the purposes for which the finished product is to be employed. If slender and soft seaweed like Funori is used, it is first of all spread out on the ground and sprinkled with fresh water, after which it is kneaded with hands and feet. It is then placed in a basket, thoroughly washed by immersion in water, and afterwards spread out evenly in thin layers on straw or rush mats, on which it is sprinkled about every ten minutes with water from a watering can to prevent the edges from curling and also to assist the bleaching. Sometimes the seaweed is placed in shallow trays, which when the bleaching is completed, are inverted, and the seawed shaken out in the form of a loose sheet. When the process has reached a stage where a sticky juice begins to exude, no more water is sprinkled upon the seaweed, and it is left untouched for one night, after which bleaching is complete. A very good white color is imparted to it by allowing dew to fall upon it. When species like Tsunomata or Ginnanso, which have large and tough fronds are used, they are first of all soaked for some time in water and then steamed to render them more pliant; afterwards they are chopped up with hand knives and spread out to dry, the remainder of the process being the same as in the case of Funori. Funori is made into glue or starch by immensing it in boiling water, in which it readily dissolves.

NO WONDER

there has been such an increase in ELASTILITE VARNISH sales. Nothing remarkable about it though when you consider the quality of the varnish at such a reasonable price.

PAINT AND OIL MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, Oct. 5, 1906.

An advance to 90 cents in turpentine is the feature this week. This is partly due to natural causes, as the season is now in full swing, and at the best only a month or six weeks remain in which retailers may stock up. But another circumstance to be reckoned with is the great flood which is reported to have occurred in the southern pine belt. The demand at present is very large, being greatly in advance of the few preceding weeks. Prices throughout the list continue firm, with a good demand.

LINSEED OIL—The market is still somewhat unsteady, and our prices are subject to shading for round lots. We quote: Raw, 1 to 4 barrels, 52c.; 5 to 9 barrels, 51c.; boiled, 1 to 4 barrels, 55c.; 5 to 9 barrels, 54c.

TURPENTINE—Prices have sharply advanced, but they are still somewhat under the quotations at the corresponding period last year. We now quote as follows: Single barrel, 90c. per gal.; two barrels or over, 89c. per gal.; for smaller quantities than barrels, 5c. extra per gal. is charged. Standard gallon is 8.40 lbs., f.o.b. point of shipment, net 30 days.

GROUND WHITE LEAD—We quote: Best brand Government standards, $6.50 to $6.75; No. 1, $6.15 to $6.40; No. 2, $5.80 to $6.15; No. 3, $5.55 to $5.80, all f.o.b. Montreal.

DRY WHITE ZINC—The market remains unchanged at following prices: Red seal, 7c. to 8c.; French V.M., 6c. to 7c.; Lehigh, 5c. to 6c.

WHITE ZINC (ground in oil) — We quote: Pure, 8c. to 9c.; No. 1, 6½c. to 7½c.; No. 2, 5½c. to 6¼c.

PUTTY—Our quotations are: Pure linseed oil, $1.75 to $1.85; bulk in barrels, $1.50; in 2-lb. irons, $1.80; in tins, $1.90; bladdered putty in barrels, $1.75.

ORANGE MINERAL—We quote as follows: Casks, 8c.; 100-lb. kegs, 8½c.

RED LEAD—In common with all lead products this line continues very firm. We still quote: Genuine red lead in casks, $6; in 100-lb. kegs, $6.25; in less quantities at the rate of $7 per 100 lbs.; No. 1 red lead, casks, $5.75; kegs $6, and smaller quantities, $6.75.

GUM SHELLAC — Primary markets are constantly advancing, but Canadian jobbers quote the following prices: Fine orange, 60c. per lb.; med. orange, 55c. per lb.; bleached shellac (white) 65c. per lb.

SHELLAC VARNISH—Firm conditions continue, and there will no doubt be an advance before long. Meanwhile we quote: Pure white, $2.90 to $2.95; pure orange, $2.70 to $2.75; No. 1 orange, $2.50 to $2.55.

MIXED PAINTS—Prices range from $1.20 to $1.40 per gallon.

CASTOR OIL—We still quote as follows: Firsts in cases, 8½c.; in barrels, 8c.; seconds in cases, 8c.; in barrels, 7½c.

REFINED PETROLEUM — We quote as follows: American water white, 17c.; Canadian prime white, 15½c.; astral, 20c., ex warehouse.

GASOLINE—The ruling quotation at present is 24c. in bbls.

BENZINE—There is nothing new this week and we are still quoting 20½c. in barrels.

WINDOW GLASS—Business continues large. We quote: First break, 50 feet, $1.85; second break, 50 feet, $1.95; first break, 100 feet, $3.50; second break, 100 feet, $3.70; third break, 100 feet, $4.25; fourth break, 100 feet, $4.45; fifth break, 100 feet, $4.70; sixth break, 100 feet, $5.25. Diamond Star: First break, 50 feet, $2.30; second break, 50 feet, $2.50; first break, 100 feet, $4.40; second break, $4.80; third break, 100 feet, $5.75; fourth break, 100 feet, $6.50; fifth break, 100 feet, $7.50; sixth break, 100 feet, $7.50; seventh break, 100 feet, $8; eighth break, 100 feet, $9. Double Diamond: First break, 50 feet, $3.45; second break, 50 feet, $3.75; first break, 100 feet, $6.75; second break, 100 feet, $7.25; third break, 100 feet, $8.75; fourth break, 100 feet, $10; fifth break, 100 feet, $11.50; sixth break, 100 feet, $12.50; seventh break, 100 feet, $14; eighth break, 100 feet, $16.50; ninth break, 100 feet, $18; tenth break, 100 feet, $20; eleventh break, 100 feet, $24; twelfth break, 100 feet, $28.50.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East.
Toronto, October 5, 1906

Turpentine has jumped up in the south as predicted by us a week ago, the floods being responsible for a limitation of the supply and heavy buying by two large interests. On Thursday the market at Savannah jumped up four cents and if the increased price is held to local dealers will be asking 94 and 95 cents for single barrels during the coming week. At present some are still quoting 89 and 90 cents, but with a bullish market in the south it is quite possible that dollar turpentine may again be the rule during October. The price a year ago was $1 in single barrels.

Linseed oil remains stationary and it is too early to estimate the quantity to be crushed this year. In the States there is said to be a very large crop and shipments of seed may be made to Eng-

INCREASE YOUR OIL PROFITS

Profit on oil equals the selling price less the cost, the expense of handling and all losses resulting from leakage, evaporation, deterioration and carelessness. The cost you cannot lower because it is beyond your control. The selling price you cannot raise because you would then lose trade. But you can reduce the cost of handling to a minimum and entirely eliminate all unnecessary losses by simply installing a Bowser Oil Outfit.

The Bowser costs you nothing because it is paid for by the money you are now losing. It is not an expense, but a 100 per cent. investment.

CUT 15
Cellar Outfit.—There are many other styles

No matter what kinds of oil you handle, nor in what quantity, the Bowser can increase your profits. Catalog V. tells you why. Send for it to-day.

THE CANADA PAINT COMPANY, LIMITED

land to relieve the shortage from India and the Argentine. New crushing mills are to be established at Winnipeg and Montreal but these will not affect this year's product materially.

The cool weather has helped to brighten up trade considerably. September was not as good a month as usual because of the extremely warm weather. Little house-cleaning was done and retailers held their orders in consequence. A rush may be looked for from now until the close of the season.

WHITE LEAD — Ex Toronto, pure white, $6.55; No. 1, $6.17½; No. 2, $5.80; No. 3, $5.55; No. 4, $5.30. In packages of 25 pounds and upwards; 1-2c. per pound extra will be charged for 12 1-2 pound packages; genuine dry white lead in casks, $5.40.

RED LEAD—Genuine in casks of 500 lbs., $5.75; ditto., in kegs of 100 lbs., $6.60; No. 1 in casks of 500 lbs., $5.75; ditto., in kegs of 100 lbs., $6.

DRY WHITE ZINC—In casks, 7c.; in 100 lbs., 7 1-2c.; No. 1, in casks, 6c.; in 100 lbs., 6 1-2c.

WHITE ZINC (ground in oil)—In 25-lb. irons, 8c.; in 12 1-2 lbs., 8 1-2c.

SHINGLE STAIN—In 5-gallon lots, 75c. to 90c. per gallon.

PARIS WHITE—90c. to $1 per 100 pounds.

WHITING—60c. to $1 per 100 lbs. Gilders' whiting, 75c.

SHELLAC VARNISH—Pure orange in barrels, $2.80; white, $2.90 per barrel; No. 1 (orange) $2.25.

LINSEED OIL—Our quotations are: Raw, 1 to 4 barrels, 55c. to 56c.; 5 to 9 barrels, 53c. to 54c.; boiled, 1 to 4 barrels, 58c. to 59c.; 5 to 9 barrels, 56c. to 57c. Toronto, Hamilton, London and Guelph; net 30 days. Advance of 2c. for delivery to outside points.

TURPENTINE—Single barrels, 90c. to 94c.; 2 to 4 barrels, 89c. to 93c.; f.o.b. point of shipment, net 30 days. Less than barrels, 96c. to $1 per gallon.

GLUES—Broken sheet, in 200-lb. barrels, 5c. to 25c. per lb.; cabinet glue, in barrels, 11 1-2c. to 12c.; emery glue, in barrels, 15c.; bookbinders' ground, 11 1-2c.; finest American white, 19c. per lb.; No. 1 American white, 15c. per lb.

PUTTY—Ordinary, bladders in barrels, $1.80; pure linseed oil, $2 to $2.10; bulk, in 800-lb. casks, $1.50; pure, $1.95 to $2; 100-lb. kegs, 25c. extra.

LIQUID PAINTS—Pure, $1.20 to $1.35 per gallon; No. 1, $1.10 per gallon.

BARN PAINTS—70c. to 80c.

BRIDGE PAINTS—75c. to $1.

CASTOR OIL—English, in cases, 9 1-2c. to 10c. per lb., and 11c. for single tins.

REFINED PETROLEUM — Dealers are stocking up heavily for the Winter season and the movement of oil is consequently large. We still quote: Canadian prime white, 14c.; water white, 16c.; American water white, 16c. to 18c. ex warehouse.

CRUDE PETROLEUM—We quote: Canadian, $1.32; Pennsylvania, $1.58; Ohio, 96c.

SOFT GRAPHITE MADE ELECTRICALLY.

Edward G. Acheson, of Niagara Falls, N. Y., has announced that he has discovered a process for making unctuous or soft graphite. Heretofore, the graphite made by the International Acheson Co. has been hard graphite, and has been applied to a field not entered by the natural graphites, such as in the manufacture of electrodes, as a battery filler, and as a paint pigment The soft graphite will be used as a lubricant, as a stove polish and also for coating gunpowder, which is tumbled in graphite to coat or face it It will also be used for electrotyping.

As it can be manufactured at comparatively low cost, it is expected that the new, soft graphite will become a successful competitor of natural graphite. The product of the experimental furnaces has been very satisfactory as to uniformity. Mr. Acheson predicts that within a few years the manufacture of artificial graphite will be the largest industry at Niagara Falls.

DYNAMITE'S SUCCESSOR IN MEXICO.

Potasimite, the new explosive perfected in Monterey, Mexico, is attracting great attention, states the Mexican Investor. The factory for its manufacture will be completed within the year. Potasimite was used with success upon the construction of a Mexican Central Railroad branch, and is pronounced safer, cheaper, and more powerful than dynamite. Those explosives based upon nitrogen produce a gas that necessitates abandoning closed works, such as a mine or tunnel during the explosion, and the laborers can not return to work for a long time thereafter, depending upon the facility for carrying off the gas. Potasimite is said to produce no obnoxious gas, the only precaution being for the workmen to get out of the way of the flying particles of the blasted rock.

REMEDY FOR DUSTY ROADS.

A correspondent writing in the London (Eng.) Times states that if calcium chloride, which can be purchased at 30s. per ton in England, be used for heavy watering of macadam roads at a strength of 1 cwt. to 100 gallons of water, and afterwards for light waterings at half strength, the dust evil will be entirely disposed of. The correspondent writes: "I was in Woodbridge, Suffolk, recently, and was assured that the streets had not been thoroughly drenched with the solution for a month. They had been watered lightly once daily early in the morning. They were in perfect condition, and not a particle of dust was flying when I inspected them."

Perhaps some Canadian municipalities would think it worth while to make a trial of this remedy on some part of its streets where the dust nuisance has been most pronounced.

Hardware Catalogues

THERE is no trade which depends upon up-to-date trade catalogues from the large wholesale houses so much as the hardware. You probably issue several catalogues on different lines, they are very seldom kept together, and are not on hand when wanted.

Make them Loose-Leaf under one cover—all in one—and always at hand.

Any information you wish cheerfully furnished.

BUILDING AND INDUSTRIAL NEWS

HARDWARE AND METAL would be pleased to receive from any authoritative source building and industrial news of any sort, the formation or incorporation of companies, establishment or enlargement of mills, factories, foundries or other works, railway or mining news. All correspondence will be treated as confidential when desired.

The Henderson Roller Bearing Company, of Toronto, will locate their factory at Niagara Falls.

When the new electric light plant is installed at Calgary, Alta., it will cost in the neighborhood of $100,000.

The sales of binder twine to Canadian farmers totalled $4,000,000 this year, over $500,000 above last year's sales.

A cold storage plant is spoken of for Hamilton, to cost $100,000. R. J. Cochran, of Colborne, Ont., is the promotor.

The Meisel Manufacturing Company and the Port Huron Engine & Thresher Company are about to erect factories in Port Arthur.

A Canadian syndicate have bought the big saw mill of the Nester estate at Ashland, Wisconsin, and will move it to Thessalon, Ont.

A Canadian branch of the Kendel Bell Co., of St. Louis, will be located in Toronto. They will employ about twenty-five hands.

The boring for natural gas at Calgary has resulted in the discovery of a pocket of gas at 760 feet, but the pressure is very slight and not of value as yet.

Cecil B. Smith, Ontario power expert, has been commissioned by the Winnipeg City Council to prepare plans for the construction of a power plant at Point du Bois, on the Winnipeg River.

The Hall Elevator & Grain Co., of Vancouver, are letting contracts for a flour mill with a capacity of 500 barrels per day. It is the intention of this company to develop the grain and flour business of the Orient from Vancouver.

Bisset & Loucks, Winnipeg agents for the Caledonian Iron Works, of Montreal, have been awarded the contract to supply the city of Winnipeg with two turbine pumps at a cost of $21,063. The first pump is to be delivered within four months and the second not more than two weeks later.

Meyadyne Limited have been incorporated with a capital stock of $250,000 and will engage in the manufacture of explosives, powder, and ammunition of all kinds. The directors are : Charles A. Barnard, Casimir Dessaulles, Romuald Roy, Charles A. Sara, and William F. Sharswood, all of Montreal, Que., where the head office will be located.

Brandram-Henderson Limited have been incorporated with a capital stock of $1,750,000 as manufacturers and dealers in white lead, paints, oils and varnishes. The directors are Joseph R. Henderson, Henry B. Stairs, Charles H. Potts, George Henderson and James Heenan, all of Halifax, with head office at Montreal, Que.

The Century Telephone Construction Co. are locating their Canadian factory at 53-59 Adelaide street west, Toronto, where everything used in construction of independent telephone systems will be manufactured. They are at present in the market for cross-arms, toppins, side blocks, glass insulators, and galvanized telephone hardware, and insulated hardware in carload lots.

A remarkable showing was made this year in municipal ownership by the Port Arthur council. Although a great deal of public work was done, incidental to the growing municipality, the earnings of the various franchises have been so great that the council is able to strike a general rate of nine mills on the dollar. The net earnings of the street railway, light plants, telephone and water system were sufficient to take care of the total debenture debt.

The Grand Trunk Railway have placed an order with the Locomotive & Machine Company of Montreal for fifty-five new Richmond compound consolidation engines, to be in service on different divisions of the system before January 1 next. They are powerful machines, as large as any on the continent, except those used in the heavy mountain service, and are 40,000 pounds heavier than the compound freight engines that have been used as standard on the Grand Trunk in the past.

J. W. Lyon, of Guelph, secretary-treasurer of the Western Ontario Municipalities Power Association, has a flattering report to make in reference to the canvas made to ascertain the amount of power required by the various places in the Toronto district. The following are the applications so far sent in for power : Toronto, 30,000 horse-power ; London, 10,000 ; Woodstock, 1,200 ; Paris, 1,000 ; Galt, 2,500 ; Preston, 800; Hespeler, 760 ; Berlin, 3,000 ; Guelph, 2,000 ; Waterloo, 900 ; Stratford, 2,000, and Brantford, 3,000.

At the annual meeting of the Quebec Bridge Co., held at Quebec recently, the engineers' report was submitted showing the substantial progress in the work of building the new bridge across the St. Lawrence, On the south side the erection to date extends from the shore abutment to a distance of 900 feet, the quantity of metal put in place being 11,300 tons. In addition to this there are 20,700 tons manufactured and in storage. The manufacture of metal for the bridge is expected to be finished by May next. Hon. S. N. Parent was re-elected president.

The three largest Montreal steel companies have all plans completed for large additions to their present plants, that will result in the outlay of over $2,000,000 in the next year. The Montreal Steel Company will increase their capital to $2,000,000 by increasing their preferred stock from $700,000 to $1,050,000, and the common stock from $700,000 to $950,000. The company, according to the official announcement, intend to erect a large plant for the manufacture of manganese castings for intersection of street railway and steam railway tracks, and a large power plant and extensions to most of the present works. The plant will be 400 by 300 feet. The Montreal Rolling Mills will erect a large nut and bolt plant, and a large forging mill and

new stores department. The Peck Rolling Mills Co. will remove a large portion of their plant from Mill street to the bank of the Lachine Canal, where they intend erecting a large group of mills for the manufacture of nails and smaller kinds of steel. All these companies say they have never been so rushed with orders as at present.

BUILDING NOTES.

A $5,000 addition will be made to the King's Hotel, Vancouver.

P. A. Carleton, of Lowell, Mass., may establish a tannery at Moose Jaw, Sask.

The Polson Iron Works, Toronto, will erect new buildings to cost about $100,000.

The First Baptist Church, Montreal, will erect a new structure, costing about $60,000.

The Northern Brass Company, of Winnipeg, will erect a new building to cost about $25,000.

Tenders are being invited for a brick addition to the Children's Aid Shelter, Fort Rouge, Man.

The Vulcan Iron Works, of New Westminster, B.C., are erecting a large addition to their plant.

Cowan & Company, of Galt, Ont., are making extensive additions and improvements to their shops.

The Quebec Government have completed plans for a new jail in Montreal to cost about $1,000,000.

The Maritime Railway and Power Company are erecting a new power house at Chignecto, N.B.

The Chapman Double Ball Bearing Company are erecting a new factory on Sorauren avenue, Toronto.

Wm. Bentham, of Montreal, is about to build a $100,000 apartment house on Sherbrooke street, Montreal.

The Weir Wardrobe Co. of Canada will enlarge their factory at Mount Forest, Ont., to the extent of $8,000.

The Pincher Creek Mill & Elevator Company, of Pincher Creek, Alta., are about to erect a new building.

A new four-storey building costing $45,000 will be erected for the women of the Belmont Home in Toronto.

The Methodist Book Room, of Toronto, will build a six-storey addition to their factory to cost about $30,000.

A saw mill of a daily capacity of seventy-five thousand feet is to be erected by American capitalists on Cracroft Island.

The Acadia Sugar Refining Company, of Moncton, will double the capacity of the Moncton barrel factory, Moncton, N.B.

Contracts will soon be let for the work in connection with the erection of the Collegiate Institute at Brandon, Man.

The Canadian Northern Railway Company will erect shops at Montreal and at Fort Rouge, Manitoba, to cost about $1,000,000.

The Western Canada Coal & Cement Company, which is now preparing to operate in Kananaskis, Alta., will locate in Calgary.

The Toronto-Niagara Power Co. have purchased a block of land on Dufferin street, Toronto, and intend erecting

Paroid Roofing Will Make Money for You

READ THIS:

Thousands of dealers all over Canada and the United States are making with Paroid one of their most profitable lines. If you are not selling Paroid it will pay you to get our proposition.

Why Paroid is the Best Ready Roofing Made

Paroid is the best quality of ready roofing made. Railroads, manufacturers and farmers all over Canada and the United States are using it in place of shingles, tin, iron and other kinds of roofings, because it lasts longer and costs less.

We make Paroid from start to finish —we make our felt—the most important part of the roofing, while other manufacturers buy their felt where they can get it cheapest. That's the principle reason why Paroid lasts longest. We could not stand back of Paroid if we did not make the felt.

Paroid is **soaked** and coated with a thicker, smoother, more pliable and durable coating than is on other ready roofings. Send for samples of Paroid and compare it with other kinds. You can see and feel the difference.

Paroid is applied with the **only** anti rust-proof cap made. It insures a tight roof. Other roofs often fail because the cap rusts out. Paroid will not crack and break in cold weather. It is adapted for all kinds of buildings and will outlast other ready roofings.

How We Help You

Our advertising plan has doubled the sales of our dealers this year. It helps to sell their other lines, too.

Send for our proposition and we will mail advertising matter and samples to every likely user of roofing in your town. It will not cost you a cent and can't help bringing you orders. We'll send you all the electrotypes and special things you can use. We'll write letters to prospective customers and send our salesman to help you land orders. Write, telegraph or telephone at our expense at any time.

The Fall is the best season of the year to sell roofing. Can you afford not to sell Paroid?

It won't cost you a cent to try out our proposition and we stand back of every roll of Paroid you sell.

Sign your name to a postal to-day and we'll send you full particulars and samples.

their shops and transforming station on the site.

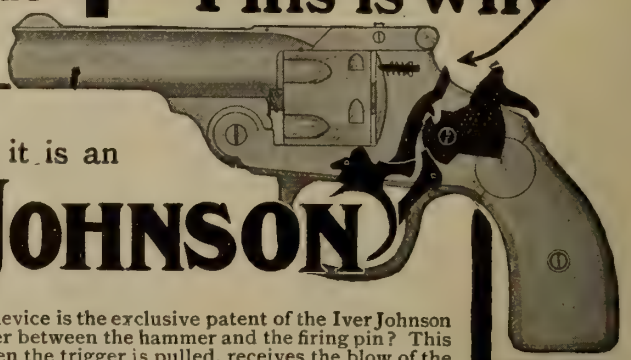
W. J. Hesson, of Sault Ste. Marie, whose store was burned down some time ago, will erect a new building to cost about $10,000.

The National Drug & Chemical Company of Canada will erect a five-storev building on Wellington street, Toronto, to cost about $50,000.

The plans for the four normal schools to be erected at Hamilton, Stratford, North Bay and Peterboro are ready for submission to the cabinet for approval.

Arrangements have practically been completed by Henry Coates, of Coates Bros., the English thread manufacturers, to establish a carpet factory at Peterboro with head offices in Toronto.

Building operations in Toronto still continue to surpass the record for last year, and up to the end of September amounted to $9,566,328, an increase of $1,620,544 for the first nine months.



THE DRUMMER.

The Drummer, with his heavy grips,
From town to town goes gliding,
And on his long and weary trips
He does a lot of riding ;
But, oh, he's genial, blithe and sunny
When things come 'round like easy money.

The Drummer is a pleasant lad,
With mirth his spirits bubble ;
And, though his luck is to the bad,
He casts aside all trouble,
And anywhere you chance to strike him,
Somehow you cannot help but like him.

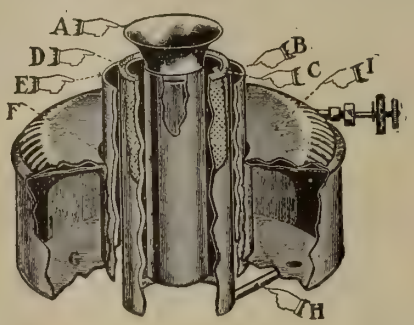
Accidental Discharge Impossible—

This is why

True only if it is an

IVER JOHNSON

The positive safety device is the exclusive patent of the Iver Johnson Revolver. See the lever between the hammer and the firing pin? This lever is raised only when the trigger is pulled, receives the blow of the hammer and transmits it to the firing pin. **That's why** you can throw a loaded Iver Johnson against a stone wall without fear—no discharge can possibly follow, as the hammer **never** touches the firing pin. An Iver Johnson never fails when you **pull the trigger** and never "goes off" when you don't.



Iver Johnson Safety Automatic

Prices—Hammer $6.50, Hammerless $7.50.

Iver Johnsons are sold by dealers the world over, or direct from us if your dealer won't supply

Please send for descriptive catalogue, free upon request. It tells all about it.

IVER JOHNSON'S ARMS AND CYCLE WORKS, FITCHBURG, MASS.

The Aluminum Oil Heater

Sales Over the Million Mark

The only Oil Heater absolutely safe because it is the only Oil Heater equipped with a perfect Safety Burner. Note the construction of our ***Grand Safety Burner:*** ***A***—Flame Spreader. ***B***—Air space outside wick tube. ***C***—Air space inside wick tube. ***D***—Wick. ***E***—Outside casing to Burner. ***F***—Air space between fount and outer casing. ***G***—Fount for oil. ***H***—Feed Pipe. ***I***—Shield resting on top of fount with air space underneath.

Bristles with selling points : no odor, no smoke, no perforations to clog up, no danger. Explosions impossible. Radiates heat like a base burner, from the sides and bottom as well as the top. Wick taken out and replaced in a minute. Easy to operate, convenient to handle, handsome in appearance. Sells at sight and stays sold—never comes back for repairs. The only Oil Heater equipped with ***Safety Burner***—and the burner is the very soul of an Oil Heater.

If you buy any other you'll be sorry. We guarantee every Aluminum Oil Heater. Money returned if not satisfactory. The demand for Aluminum Oil Heaters this year is double that of last year. Why ? Because of unusual satisfaction. Be on the safe side—let the other fellow have het trouble. We're making the prices that bring the everlasting smile. A postal will bring full information by return mail.

Article XI.

Non-Syphonable Traps.

Non-siphonable traps are especially made to withstand the action of siphonage without resorting to back-venting. The type most commonly used is the drum trap, Fig. 50. It consists of an enlarged body with the waste inlet at the bottom of the drum and the outlet at the top of the drum. The arrow shows the direction of the flow of the waste, and the dotted lines indicate the seal of the trap.

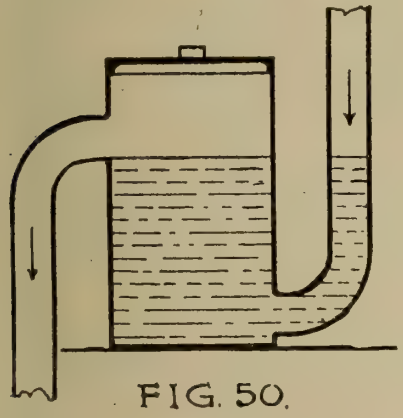

FIG. 50.

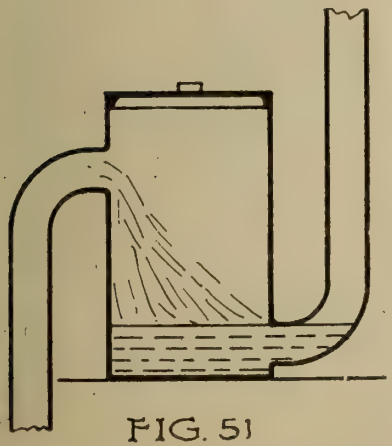

FIG. 51

The effect of siphonage on the trap is illustrated in Fig. 51. The vacuum formed in the waste pipe draws the water from the drum in the manner shown, but it can never draw enough water from it to break the seal, for the reason that when the water in the drum lowers to the inlet, as shown in the cut, the air also enters through the inlet and destroys the vacuum. As soon as the vacuum is broken, the water which has been raised up to the outlet by the action of siphonage falls back into the drum and again seals the trap.

Fig. 52 shows the effect of back pressure. The drum is usually made four times the area of the waste pipe, so to break the seal by this action it would require a pressure sufficient to sustain a column of water equal in height to five times the depth of the water seal. It rarely happens that the pressure is great enough to do this.

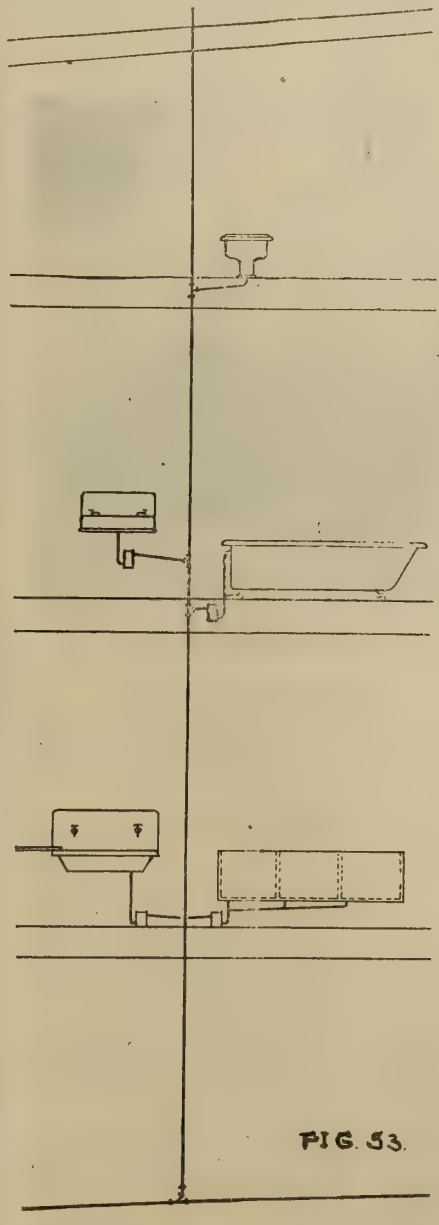

FIG. 53.

The effect of evaporation on non-siphonable traps is much the same as on unvented siphonable traps; that is, the water evaporates at the same rate, but, owing to the large body of water in the drum and the fact that only the inlet surface is open to evaporation, it would take about five times as long to break the seal in the drum trap that it would take to break a seal of the same depth in an unvented siphonable trap, or ten times as long as for a vented siphonable trap.

There are many other types of non-siphonable traps now on the market, but this one serves to illustrate their use.

There are also several types in which the seal is maintained by means of a mechanical device, and some by means of both a mechanical device and a water seal; but this type should be avoided, as the device (usually a ball of slightly greater specific gravity than water) is likely to catch filth and eventually obstruct the passage.

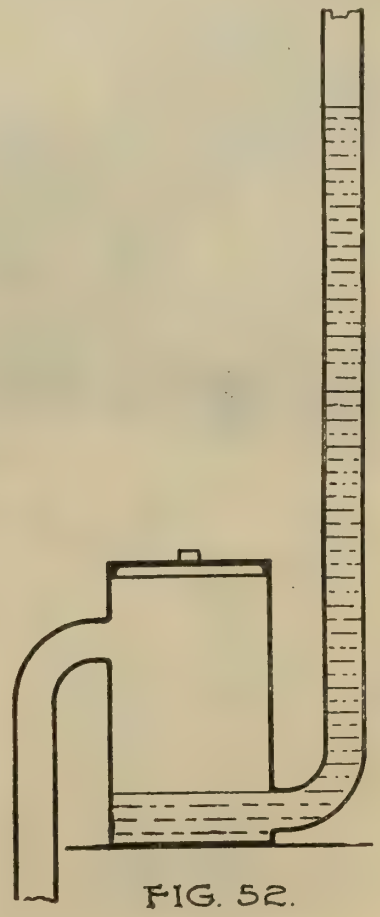

FIG. 52.

Fig. 53 shows the application of non-siphonable traps to a stack of fixtures.

E. A. Rogers, of the James Robertson Co., Toronto, has returned from a month's trip to the Pacific coast. Mr. Rogers reports that complaints are being registered all along the line about the low prices work is being taken at owing to the keen competition being indulged in.

MUELLER'S NEW CATALOGUE.

A fine new 500-page catalogue in loose-leaf style is being prepared by the H. Mueller Mfg. Co., Decatur, Ill., to be known as catalogue "D." in their series. It will probably be the beginning of the year before it is ready for distribution, but as the demand for copies is certain to be large, applications should be sent in at once in order to secure a copy of the book.

A prominent feature of the book will be the completeness of the lines illustrated. It will be divided into sections representing different classes of goods, and each section will contain an illustration of every known article in that particular class. Besides the standard styles and patterns many original with the company will be illustrated for the first time, it being intended to make it the standard book of reference for brass goods in the water, gas and plumbing trades.

Another interesting feature will be the thorough system of indexing. Besides having a general index for the sections, the separate items will be indexed and cross indexed, by name alphabetically and by plate number. The company's compilers have been at work for nearly two years preparing the literary matter, tables, etc. Upwards of 2,000 engravings will be used, and an estimate of the weight of the completed book may be had from the statement that for an edition of only 10,000 copies over 35 tons of paper will be required. The five dray loads of paper shown in the accompanying engraving represent only a portion of the paper which will be necessary for the job.

Part of the Thirty-five Tons of Paper to be Used in Mueller's New Catalogue of Brass Goods

JENKINS' NEW MONTREAL PLANT

In addition to the information already given in these columns regarding the new Jenkins valve works at Montreal, the following information is of interest. The capitalization of Jenkins Brothers, Limited, who have secured Canadian manufacturing rights of Jenkins valves, is $250,000, the president being A. B. Jenkins, who is also chief executive officer of the New York company. W. R. Stavert, of Montreal, who formerly represented the Jenkins' interests in the Dominion, is a director of the Canadian company, and a large percentage of the capital is held by employes of the company.

A tract of land has been purchased in St. Henri between the tracks of the Grand Trunk Railroad and the Lachine Canal, on which a complete valve-making plant will be constructed. The main building is to be built of brick and will be 50 by 200 feet. There will be three storeys. There will also be a foundry building, 64 by 150 feet, and an engine and boiler house, 45 by 60 feet. The company will later on build a second foundry, 60 feet by 100 feet. The initial plant, which is expected to be in operation by April, will give employment to at least 300 men.

In addition to catering to the Canadian trade, the St. Henri works will make a specialty of export trade, more particularly with such foreign countries as maintain discriminating duties against the products of the United States.

PLUMBING ITEMS.

The Town of Dunnville, Ont., asks tenders for the laying of water mains, etc.

Parry Sound ratepayers carried a by-law voting $10,000 for water works extension.

Moosomin ratepayers voted the raising of $32,000 for water works and drainage.

Hastings (Ont.) ratepayers carried a by-law to bonus the Peterborough Boiler & Radiator Co.

The Toronto city clerk asks tenders for plumbing in Toronto Police Station No. 2, also for a new steam boiler in the jail.

Thorold (Ont.) Council is again considering the question of a water works system. The contemplated cost is $80,000.

F. R. J. McPherson, Peterboro, was in Toronto during the week buying samples for the fine plumbing show-room he is fixing up in his shop.

H. R. Flett, of the Taylor-Forbes Company, Toronto, returned on Sunday from a selling trip for Sovereign radiators and boilers through Western Canada.

The American Street Lighting & Supply Co., represented by A. Keith, Toronto, have secured a contract to supply 250 street lights to the city of Hamilton.

The Journeymen Plumbers' International Union concluded their convention in Toronto a few days ago. J. Priestly, of Calgary, was elected one of the vice-presidents.

An application has been received by the Railway and Municipal Board from the town of Mount Forest for approval of a debenture by-law for $5,000 to extend and improve the town's waterworks.

AIR WASHER SYSTEM.

It is a well recognized fact that the ventilating of office buildings is of great benefit to the inhabitants. The great difficulty, however, in supplying air for ventilating is to keep a pure source to draw from. Where air is supplied for ventilation, each room acts as a settling chamber for the dust and soot which is brought in to collect on walls and furnishings, rendering ventilation objectionable in places where it is most needed.

In every city the amount of solid matter in the air is enormous. The greater part of this consists of soot or unconsumed carbon from soft coal burning furnaces. In addition to this all manner of impurities from the surface of the street and sidewalks, are kept in circulation by air currents. These air currents carry filth and disease germs into our dwellings, schools, offices and stores. How important it is, then, that the fresh air supply for ventilating systems should be above suspicion.

To cleanse the air supplied by the ventilating fan the Sovereign Bank have installed in their Montreal building the Buffalo Air Washer, consisting of a cold water spray and baffle plates removing free moisture together with the impurities from the air current. The equipment, which is manufactured by the Canadian Buffalo Forge Co., Montreal, presents a neat appearance and a glass door in the side allows an inspection of the apparatus in operation. While designed primarily as a cleanser and purifier, it is stated that by varying the temperature of the spray chamber the humidity of the air supplied can be controlled through a very wide range. In the Summer months this will be of great advantage in cooling the air and removing moisture, and in the Winter months the air will be warmed and moisture supplied to bring the air to its normal condition.

To furnish an air supply which is clean and pure and of the proper moisture contents, these briefly are the main considerations. It must be remembered that the space allowed for the apparatus in a building of this kind is very limited and that every particle of air passing at a high velocity must be thoroughly purified and moistened in the instant between entering and leaving the spray chamber. Not only this, but every particle of free moisture must be separated and removed from the air before passing into the main ducts. These results have been obtained, and tenants of the Sovereign Bank building have the benefit of a healthy atmosphere to work in.

PLUMBING MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, October 5, 1906.

As predicted, iron pipe is becoming more and more scarce, while the heating goods season is getting under full swing. This shortage is only one of many in the various lines of manufactured goods whose raw material is pig iron. This article is so difficult to obtain that mills are in some cases forced to curtail production because of inability to get deliveries of the raw material.

A sharp advance in ingot tin has affected one item in the plumbing list, and solder prices have gone up one cent for both half-and-half and wiping.

All finishing goods are in very active demand, and trade in general is exceptionally good.

RANGE BOILERS—Business is brisk, at unchanged prices. We still quote as follows: Iron clad, 30 gallon, $5 ; 40 gallon, $6.50 net list. Copper, 30 gallon, $25; 35 gallon, $29.50; 40 gallon, $32 net.

LEAD PIPE—Primary markets are even stronger than at our last report, but no changes have occurred on lead pipe quotations. We still give the following discount: 10 per cent. f.o.b. Montreal, Toronto, St. John, N.B., Halifax; f.o.b., London, 15c. per hundred lbs. extra; f.o.b. Hamilton, 10c. per hundred lbs. extra.

IRON PIPE FITTINGS—An unusually heavy demand is being felt, and prices are firmly held. We quote : Discounts on all sizes of nipples up to 6 inch, 67½ to 70 per cent.

IRON PIPE—Many sizes are almost impossible to obtain. From present appearances, no relief from the scarcity seems to be in sight. Our prices are : Standard pipe in lots of 100 feet, regular lengths. 1-4 inch, $5.50; 3-8 inch, $5.50; 1-2 inch, $8.50; 3-4 inch, $11.50; 1 inch, $16.50; 1 1-4 inches, $22.50; 1 1-2 inches, $27; 2 inches, $36.50; discounts on black pipe, 1-4 inch, 62 per cent.; 3-8 inch, 62 per cent.; 1-2 inch, 71 1-2 per cent.; 3-4 inch and upwards, 73 1-2 per cent. Discounts on galvanized pipe: 1-4 inch, 47 per cent.; 3-8 inch, 47 per cent.; 1-2 inch, 61 1-2 per cent.; 3-4 inch, and upwards, 63 1-2 per cent. Extra heavy pipe of 100 feet lots are quoted as follows: 1-2 inch, $12; 3-4 inch, $15; 1 inch, $22; 1 1-4 inches, $30; 1 1-2 inches, $36; 2 inches, $50. The discount for black pipe is 71 per cent., and for galvanized, 61 per cent.

SOIL PIPE AND FITTINGS—Montreal prices are unchanged and the following discounts are still generally quoted : Standard soil pipe, 50 per cent. off list. Standard fittings, 50 and 10 per cent. off list; medium and extra heavy soil pipe, 60 per cent. off. Fittings, 60 per cent. off.

SOLDER—Owing to a big jump in ingot tin we have been advised by jobbers that their price on solder has advanced 1 cent, and we are now quoting : Bar solder, half-and-half guaranteed, 25c. ; No. 2 wiping solder, 22c.

ENAMELWARE—We are still quoting as follows : Canadian bath tubs, plate E1, 5 ft., 1st quality, $20.65, special $18.65; plate E11 and E21, 5 ft., 1st quality, $19.50, special $17.15; plate E35, 5 ft., 1st quality, $24.65, special $22.40. American baths, rolled rim, 5 feet 2 1-2 inch rim, $22.25; 3 inch rim, $29.25. Lavatories, discounts, 1st quality, 30 to 30 and 5 per cent.; special, 30 and 10 to 40 per cent. Sinks, 18 x 30 inch, flat rim, 1st quality, $2.60, special, $2.45.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, October 5, 1906.

Trade is rushing in every quarter, the demand for all classes of goods being greater than the supply, the consequence being that shipments are delayed for a greater or lesser period. In enamelware and in iron pipe the greatest shortage is noted. It is very difficult to get any pipe less than 1½ inches in size and it will be good news to the trade to know that the Page-Hersey plant is to be quadrupled in size, according to plans now under way.

Prices are all very firm, the only change being in plumbers' oakum, which is now quoted at from 4¾ to 5 cents.

Heating supplies are in brisk demand and work on new buildings is being rushed to the limit.

LEAD PIPE — The discount on lead pipe remains at 10 per cent. off the list price of 8c. per pound.

SOIL PIPE AND FITTINGS — We quote : Medium and extra heavy pipe and fittings, 65 per cent. off ; light pipe and fittings, 60 per cent. off ; 7 and 8 inch pipe, 40 and 5 per cent.

IRON PIPE—The supply of both galvanized and black pipe continues very light. We quote : Black, 1-in. pipe, $4.37 ; galvanized, 1-in. pipe, $6.02. See current market quotations for other sizes.

IRON PIPE FITTINGS—There is no change since last week, and as demand is keen prices are firm. We quote: Cast iron elbows, tees, crosses, etc., 67½ per cent.; cast iron plugs and bushings, 67½ per cent.; flange unions, 65 per cent.; nipples, 75 and 5 per cent.; iron cocks, 60 per cent.; Canadian malleable, 35 per cent.; American malleable, 25 per cent.; malleable unions, 65 per cent.; malleable bushings and plugs, 60 and 10 per cent.; C. I. ceiling plates, plain or N. P., 70 per cent.; C. I. floor, 80 per cent.; hook-plates, 65 per cent.; expansion plates, 65 per cent.; headers or branch tees, 65½ per cent.; ring hangers, black or galvanized, 70 per cent., American list.

GALVANIZED IRON RANGE BOILERS—We quote : 12 gallon capacity, standard, $4.50; extra heavy, $6.50; 18 gallon standard, $4.75 ; extra heavy, $6.75 ; 24 gallon, standard, $4.75; extra heavy, $6.75; 30 gallon, standard, $4.75 ; extra heavy, $7.50; 35 gallon, standard, $5.75; extra heavy, $8.50; 40 gallon, standard, $6.75; 40 gallon, extra heavy, $9.50; 52 gallon, $11; extra heavy, $14; 66 gallon, standard, $18; extra heavy, $20 ; 82 gallon, standard, $21; extra heavy, $24 ; 100 gallon, standard, $29; extra heavy, $34; 120 gallon, standard, $34; extra heavy, $40; 144 gallon, standard, $47 ; extra heavy, $55. The discount on copper and range boilers continues at 15 per cent.

RADIATORS — Prices are the same. We quote : Hot water, 50 and 2½ per cent. ; steam, 50 and 5 per cent. ; wall radiators, 50 per cent.

SOLDER — Quotations remain very firm as follows : Bar solder, half-and-half, guaranteed, 26c.; wiping, 24c.

ENAMELWARE—Quotations continue as follows: Plate E1, 5 ft., first quality, $20.65, special $18.65; plate E11, 5 feet, first quality, $19.15, special $17.15 ; plate E21, 5 feet first quality, $14.15, special $17.15; plate E35, 5 feet, first quality, $24.65, special $22.90. Fittings extra.

JUST one of the eleven Oxford betterments

Every boiler with rubber-gasket-joints is bound to leak sooner or later. As a rule, it's a great deal sooner.

But you will never hear of a leaky Oxford Hot Water Boiler. That's on account of the ALL-METAL joints, made with the Oxford push-nipple.

Every nipple is smooth-tapered to a perfect driving fit for the smooth-tapered holes,—exactly as our radiator loops are fitted.

That makes a joint absolutely leak-proof. It's a joint that will last almost forever

It's a joint that saves you time and money when you instal the Boiler. It's the one joint you never have to go back to repair after you've got it installed. That's two savings.

The Oxford Boiler is made so easy for you to sell—and the profit on it is so sure to please you, that you can't go wrong asking for our proposition to really live dealers.

EVAPORATION REDUCED TO A MINIMUM

is one of the reasons why PATERSON'S WIRE EDGED READY ROOFING will last longer than any other kind made.

Mr. C. R. Decker, Chesterfield, Ont., used our 3 Ply Wire Edged Ready Roofing fourteen years ago, and he says it is apparently just as good as when first put on.

We have hundreds of other customers whose experience has been similar to Mr. Decker's.

Hardware and Plumber—

We have pumps suitable to any demand made upon you by most exacting customers.

Our pumps will do anything that a pump can do, and we will be pleased to give the benefit of many years' experience to any one having pump troubles.

McDougall Pumps are Standard Pumps, and with us it is quality first, last and always, while we ask just as little money as we can get along with.

We have a few catalogues for distribution

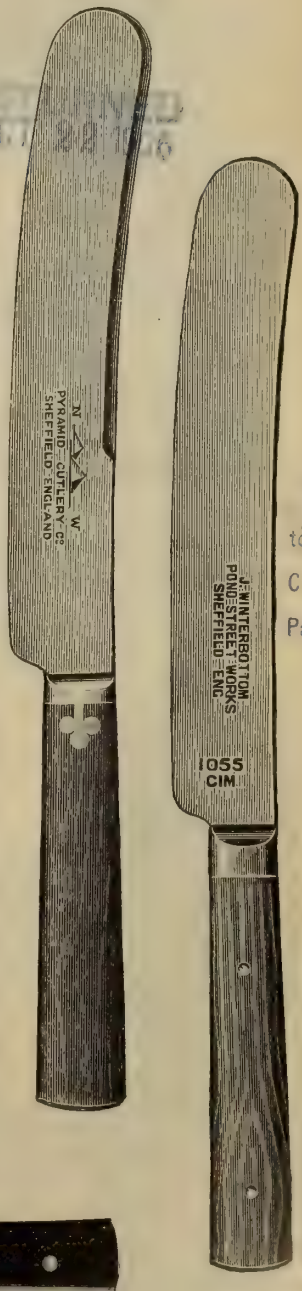
JUST WHAT YOU WANT

VARIETY —— SMALL STOCK

In order that retail merchants may carry a nice variety of Table Cutlery, with the smallest possible stock, we have made up two assortments, each containing one gross table knives and forks.

Assortment No. 1 contains 11 different styles (there being 2 doz. of one popular seller and 1 doz. each of ten other styles).

Assortment No. 2 contains 12 different styles (1 doz. of each).



These are put up in packages of one doz. and the whole packed in a neat box.

This enables you to have a variety of Table Cutlery that will sell at prices that range from $1.00 to $3.00 per doz.

Want of space prevents us showing them **all** here, but we will be pleased to send you illustrated sheets showing the full line, together with prices that will **make** you buy.

This is something that every merchant should have for his Christmas Trade.

Get your enquiries in early—they're going fast.

Factory: Dufferin Street, Toronto, Ont.

Our Prices are Right

Mr. Dealer, Does It Pay

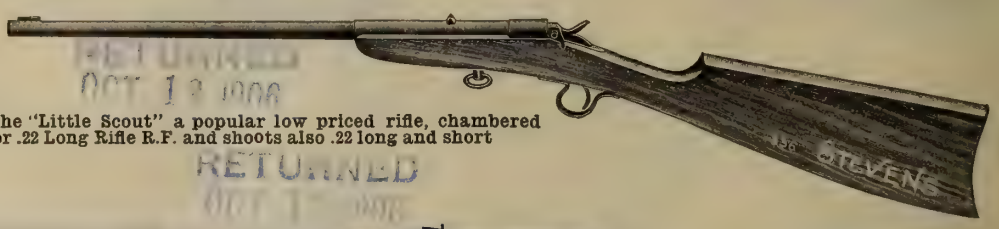
To spend effort and time trying to sell unknown goods?

You know it does not, and handle as few of such as possible.

The Stevens Arms and Tool Co. lines sell without the waste of effort and time used in selling less known goods.

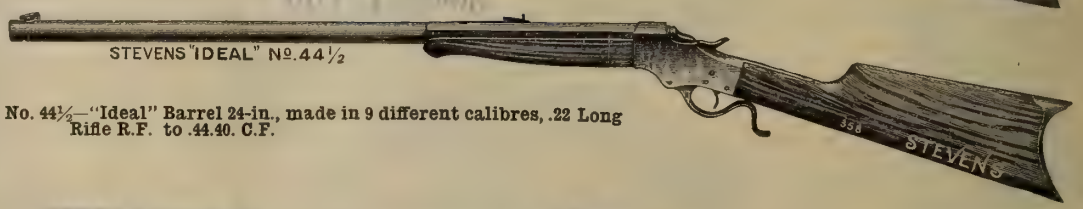
They have been favorably known since 1864.

They are made in a large variety of gauges, calibres and style and sell at popular prices.



The Stevens Arms line includes guns, rifles and pistols for every use.

The Stevens Arms are widely advertised, and goods well advertised move quickly out of your store.



Don't you think your stock should include some Stevens Arms?

We show here a few you will do well to stock. If interested let us send you a complete Stevens catalogue.

A large line of fire arms including the Stevens, shown in our "sporting and fall goods" catalogue. A copy for the asking.

No. 14—The "Little Scout" a popular low priced rifle, chambered for .22 Long Rifle R.F. and shoots also .22 long and short

No. 44½—"Ideal" Barrel 24-in., made in 9 different calibres, .22 Long Rifle R.F. to .44.40. C.F.

No. 180—Hammerless Ejector Single Barrel Shot Gun. This is one of the guns that is displacing the low priced German double barrel guns.

No. 325—Hammerless Double Barrel Gun of high grade at a moderate price. Retails at $22 to $23 and affords a good profit.

Too Expensive For My Business!

BUSINESS SYSTEMS LIMITED
SYSTEM THE SECRET OF SUCCESS
TORONTO

Any retailer who says that about Business Systems, is laboring under a delusion.

The size of a business is the factor that determines the cost of installing Business Systems.

Business Systems are, proportionately, just as much an economy for the smallest retail store as for the largest factory.

■ ■ ■ ■ ■ ■

In different businesses, Business Systems are designed to fit different ends.

In your business, Mr. Retailer, Business Systems, instead of being "too expensive," are time savers and an actual economy.

You can understand why a system that posts your books and writes out your bills at the same time, is economical, can't you?

That's only one of the things Business Systems will do for you.

■ ■ ■ ■ ■ ■

Let us tell you more.

Drop us a post card and we will send you all the details.

It will only cost you a cent to know more.

Business Getters for Tinsmiths

Are there any defective chimneys in your locality ?
Then it is your chance to get business.

—THE—

ZEPHYR Ventilator

saves the expense of building a high chimney.

It is so constructed as to guarantee a perfect draft, and, therefore, easy combustion.

By using the ZEPHYR, it is possible to burn soft coal with the best results.

The smoke is easily drawn off, enabling an even heat to be generated.

THE ZEPHYR IS STRONGLY PUT UP AND WILL RESIST ANY STORM

This is what others think of it :

Montreal, February 20th, 1901.

WANTS

MADE KNOWN IN "HARDWARE AND METAL" COLUMNS ARE SOON SATISFIED.

TRY IT YOURSELF

Get the Habit

of handling "BEST" mops. Once acquired it's mighty hard to break off.

WHY? That's the point

First: It's the strongest, simplest, neatest, and most durable made. You can't break it with a hammer.

Second: The easiest operated. Impossible to get out of order.

Third: The most satisfactory in use. The result is satisfied customers, and the consequence is more business.

Fourth: The "BEST" is a combined profit-maker and trade-builder.

"CUMMING'S GOODS ARE GOOD GOODS"

AN XMAS WINDOW DISPLAY

to be productive of results must be well thought out and it isn't too early to do the thinking. To encourage thought on the part of hardware dealers or their clerks, "Hardware and Metal" offers

FIVE SPECIAL PRIZES

for the best photos of Christmas window displays of hardware goods, the photos to be accompanied by short descriptions of how the displays were constructed, and to be mailed to us not later than Dec. 31st, 1906.

In addition to first and second prizes of $5.00 and $4.00 we will give to the senders of the best three other photos a year's subscription to "Hardware and Metal." None of the five prizes are intended to be given for other than window displays of cutlery, silverware, sporting goods or hardware novelties suitable for use as Christmas presents. See future announcements.

OUR "FAMOUS" QUICK-SELLING TRI-USE COOKER

Can be used in various ways, viz., as a double boiler for cooking cereals of all kinds, as a steamer for vegetables, puddings, stale buns, bread or cake, or as two separate saucepans, etc.

Sufficient room has been allowed for the steam to circulate between the two saucepans and under the outer cover into the inner saucepan, thus cooking the food by steam, making it appetizing and more easily digested.

Patented

SUGGESTIONS FOR PUSHING SPORTING GOODS

By Eugene L. Johnson, of the Norvell-Shapleigh Hardware Company, St. Louis.

It is safe to say that no retail business requires more technical knowledge or closer application than the hardware business. A successful hardware dealer is a sort of compendium of useful information. The mechanic advises with him about his work—about the material to use in his work—about the tools which he needs to execute his undertakings. The farmer relies on him for advice about his planting and harvesting; the rotation of crops; the enrichment of the soil and general market conditions. Even the thrifty housewife regards him as an expert on all the equipment and utensils necessary in a well ordered kitchen, and it is largely through his efforts that modern improvements in the line of household conveniences are introduced to the ultimate users. To use an electrical term—he is the contact of the manufacturer, for it is through his energy and skill that the manufacturer most successfully reaches the consumer.

The hardware dealer's range of information must be just about as wide as all out-doors and it is not beyond the truth to say that as a rule he is so versatile in his accomplishments, that he is at least credited with being a sort of past-master in all these varied arts and industries.

Must Use His Think-Tank.

Every dealer has a right to determine for himself what he shall handle. The variety of merchandise which comes under the head of hardware and house furnishing goods is almost unlimited. The dealer must either direct his energy and the efforts of his employes toward the more profitable goods he may handle, or inevitably drift toward the staple lines which, while easy to sell at low prices, cannot be made productive of more than nominal profits.

If there ever was a time when the retail hardware dealer should have his wits about him and working his "Think-tank" every hour of the day, it is now. Competition of all sorts is more pronounced, more energetic, more ingenious than ever before. Competitors in their keenness for business forget all about geographical difficulties, overlook the boundaries which supposedly separate one class of merchandise from another and unhesitatingly invade every branch of business which seems to promise opportunities of extending their influence and increasing their profits.

Locally he must contend with self-styled "cheap stores" whose method of doing business consists chiefly of offering baits or leaders on a few well known articles and realizing strong profits on other goods sold to those who are attracted by the "bait." This class of dealers do business only on spot cash basis—their popularity is dependent upon mere cheapness, but if permitted to do so, they will prosper at his expense. He must compete with dealers who, nominally engaged in other lines of merchandise, don't hesitate to take up some of the more profitable branches of hardware to use in stimulating the sale of their own goods; and this is not all—the retail catalogue houses in distant cities look upon every man with a dollar as their legitimate and prospective customer; they never sleep; with their glowing type talk, pictured stories and alluring descriptive matter, they strive to beguile his neighbors and customers into sending their hard earned shekels away after doubtful bargains.

All these things make it necessary for the retail dealer to be constantly on the alert for every profitable opportunity. He must diligently study his business and the conditions confronting him and must ever strive to stimulate the sale of those classes of merchandise which are capable of yielding the greatest profit. It is of course necessary for every retail dealer to handle nails, wire, horseshoes, sash weights, sash cords, and numerous other items of similar character which cannot be expected to yield even a reasonable percentage of profit. But it is not necessary for the dealer to permit these staple goods to occupy too important a place in his business. On the contrary, they should be looked upon as necessary and useful only so far as they can be made productive of profitable business on other goods.

Depend on Your Clerks.

Did you ever think of dividing the responsibilities of your business? Instead of trying to be the "whole thing" yourself, of giving your clerks some opportunity of bearing responsibilities and demonstrating what they can do? Dealers who have tried this plan have been surprised at results. You may have an embryo Wanamaker in your employ who simply needs "discovering;" every man who works for you is capable of doing more and better work if he can be made to believe he must.

A dealer in Iowa had a clerk named John, who was a pretty good fellow, seemed to have the faculty of selling goods but who never was thoroughly posted on anything they had in the shop. One day the dealer said to John, "Mr. So-and-So has a contract for six houses and he wants us to figure on the hardware. You go to his office and take a memorandum from the plans, of what he will need." The dealer was pretty sure John couldn't do it and if the truth was known, John was dubious about it himself; but he went on the errand and discovered for the first time that "taking off plans" was rather a complicated piece of business; nevertheless he pitched in and with the help of the contractor's assistant, succeeded after some little time in drawing off the plans. He went back to the store and figured out just what the cost of the necessary hardware was. In doing this he consulted a number of catalogues, studied the cost book and when his list was ready for the proprietor, John knew more about builders' hardware than he had ever dreamed he could learn. They got the contract and it was turned over to John to handle. He bought what was necessary to complete the order; he laid out the goods and when the time came to deliver it, he was so interested he made the delivery himself. The contractor was very much pleased with the manner in which the hardware was packed and marked and complimented John on his work. The result was that John found he liked builders' hardware better than any other branch of the business. The proprietor found that John could do better with builders' hardware than any one else, himself included, so he made John the builders' hardware man. John got extremely enthusiastic on the subject and the outcome of this incident was that in a few months' time, John was selling about all the builders' hardware that was used in the town and surrounding country, just because he was enthusiastic and he was devoting special attention to it.

Every hardware dealer will find it to his personal advantage to encourage his employes to develop their talents; the surest way to accomplish this is to assign to each clerk certain line of goods, and make him absolutely responsible for the results obtained, both in buying and selling. Thus, one man can give his time and attention to builders' hardware and tools; another to housefurnishing goods and stoves; another cutlery and sporting goods, etc.

Sporting Goods.

Speaking of sporting goods — right here is where many hardware dealers overlook magnificent opportunities for real profitable work. If you haven't a sporting goods department, you are making a great mistake. By a "sporting goods department" we don't mean that you should fence off half your capital in sporting goods — this is altogether unnecessary. Suppose you select one of your clerks, a bright, wide-awake young fellow, popular and a good mixer—have a talk with him on the subject of cutlery and sporting goods; tell him you believe he has the capacity to work up a fine business on these lines. Jolly him a little on the good work he is doing. The faculty of handing out the right kind of a "jolly" is a valuable one which you should cultivate. With him, make a memorandum of what you should have in stock that can serve as a basis for this sporting goods department. There is cutlery, ammunition, perhaps a few guns, some odds and ends in base ball goods—whatever there may be, suggest that if he is willing to undertake it, you will turn the whole thing over to his management. Give him a few days to think it over and then have another talk with him if he seems interested.

Send him on a week's visit to some jobber who has made a pronounced success of the sporting goods line; write the jobber just what you are doing and ask that the young man be given a thorough posting on all classes of sporting goods. He will meet with a very cordial reception and will absorb a lot of information and enthusiasm which will not only prepare him for success in the sale of sporting goods, but make him a better hardwareman in every way. He will come back ambitious, eager to begin. He will have new ideas and altogether different conception of the question of profit.

If you put this plan into operation this Fall, start him out on guns and ammunition, and all the accoutrements and equipment which the hunter and shooter buys. Don't load up on a great big stock to start with but let him select a good assortment—if it is only a line of samples. Give him suitable space in the store for his department—let him have the use of a show window—let him spend a little money advertising—in his own way. Encourage him to make your store a sort of headquarters for the "nimrods" of your town or village—back him up in the organization of a gun club, even if it does take a few afternoons of his time to work up the organization—let him arrange for a trap shooting tournament; first thing you know he will be the centre of a bunch of enthusiasts who will be spending their money freely for sporting goods and your new department will begin to make itself felt.

We know a young man who went into the hardware business in a very small village located some distance from the railroad. He tried the gun club scheme, drew trade from all directions; customers even came out from the county seat, a town of ten thousand or more. In a very short time after he opened up his line of sporting goods, he had increased his general business surprisingly. He sold a lot of cutlery; he didn't carry much stock of hunters' clothing but he took a good many orders which were filled by drawing on his jobber. He bought a fine gun for himself—sold a dozen others of the same kind or better to farmer boys, who before this had never even thought of owning anything better than a ten dollar shot gun. In short, he made a success of his business by building up this one department.

Your sporting goods man will have learned during his visit to the jobber, that there are fine opportunities for big profits in fishing tackle—even if your store is not located in the immediate vicinity of good fishing waters; for in every neighborhood there is a coterie of disciples of Isaak Walton—good fellows who go away to the lakes once or twice a year, and when they make their fishing excursions they always load up liberally on tackle—if not from you, from some one else. You can lay in an excellent assortment of tackle for a small sum of money and it is almost impossible to find any place in the United States where the right sort of tackle will not sell, and sell rapidly at large profits.

Put the Boys Next.

While all this is going on, the boys should not be neglected. Your school would have a foot ball team if some one would only take the initiative. Let your sporting goods man do this and the boys who are on the team, and the boys who are simply rooters, will become foot ball enthusiasts. Foot ball equipment, including uniforms, pays a splendid profit. It is not necessary for you to carry uniforms in stock, but by having at hand full information about their cost and construction, you will find it easy enough to fit your team. The training necessary will make it easy for your sporting goods man to work up sentiment in favor of a gymnasium. In fact it may not be at all difficult with proper agitation to organize a modest athletic club—all of which will be creating more and more demand for sporting goods.

Beside foot ball, the Autumn and Winter bring business on skates, hockey clubs, snow shoes, skis, and other out-of-door goods, while indoor athletics will require apparatus for basket ball, bag punching, fencing, club swinging, etc. Just as soon as New Year's day is past, have your sporting goods man get busy on base ball. Get up a senior and junior team. Stir up things in the nearby towns. Get your local newspaper interested. The first thing you know you will have a sporting column or two columns—maybe a half page devoted to the preliminaries of the base ball season. What is the matter with a two-county or three-county league? Base ball fever is as catching as measles, and a good deal more fun. In a little town down east last Spring one of the newspapers was so interested in the base ball proposition, that its owners offered a prize of a hundred and forty dollars' worth of uniforms and equipment to the most popular team in their own and adjoining counties, to be decided by a vote, the ballots to be cut from their base ball column. This popularity contest served not only to largely increase the circulation of the paper but brought about the organization of something like fifteen base ball teams, a local league and the greatest base ball season that the neighborhood has even known. The newspaper got its enthusiasm from a young fellow who was in the sporting goods business. Pretty good scheme wasn't it?

Other Sports.

Lawn tennis is constantly becoming more popular for it is one of the few out-door sports that may be termed "co-educational"—it is one in which the young ladies may participate. You will find them of great assistance in introducing or encouraging this game in your vicinity. Tennis only needs to be started properly to become very popular. Persons who take absolutely no interest in other forms of out-door exercise often become regular tennis "fiends." And what a lot of sporting goods is used by tennis players—rackets, nets, markers, balls—more balls, sweaters, etc.

Then tennis is helpful in working up golf sentiment. One of the distinguishing characteristics of the game of golf is that its followers never stop spending money for supplies. The caddy bag must be well stocked with all sorts of clubs, brassies, etc., and golf balls have such a habit of getting all "cut up" and disappearing mysteriously that the player is always in the market for at least a few more.

If you are located within reach of a respectable stream or body of water, you will find it profitable to sell canoes, steel row boats, oars, paddles, etc. Even if you are not justified in carrying them in stock, your sporting goods man will find it advantageous to keep posted on prices; be familiar with what is best adapted to your local needs, for by so doing, he can make numerous sales without investing any capital in advance.

Bicycles have not gone out of style. They do not occupy the spectacular position with the public that they did a few years ago, but are now in steady demand. A very large number of them are being sold this year. You can obtain a first-class machine at moderate cost and will be able to make a nice profit on it. The sale of bicycle sundries is extremely profitable and while it may not amount to a great deal in volume it is certainly worth your attention.

The good old Summer time brings a natural demand for a wide variety of sporting goods, including hammocks, tents, camp furniture, bathing suits, water wings, and many other things too numerous to mention.

Worth all it Brings.

Your sporting goods man profiting by experience, learning from his customers, will become better posted all the time. His department will be showing a profit that will delight you. As for profits and percentage of profits, etc., you can safely leave that to the man in charge. In selling this class of goods to the retailer the old-fashioned rule that an article is worth all that it will bring, is a pretty good one to go by. If you can buy a bait for $4 per dozen and sell it for $1 to $1.25 each, you ought to be satisfied. If you can buy a jointed rod and double and treble your money on it, it is better than you can do on many other things which you must handle. Percentage of profit is something that cannot be accurately stated; something which should not be definitely settled; leave that to your sporting goods man; he will see that he gets a plenty.

About the management of the department—don't overlook the necessity for your own careful supervision of all that is done. Let your sporting goods man keep a separate account of his purchases and his sales. Charge him up with his proportion of floor space and with all the expenses which are necessary in his department. Have him keep an accurate record of his receipts, insist upon him doing a "spot cash" business. Encourage him if he get blue—take him down a few pegs if he gets cockey—let him understand all the while that you are the proprietor and that the proprietor is always the boss; but don't nag or peck at him. If he works intelligently, he cannot fail to make a success of the sporting goods business wherever or however your store is located.

If he succeeds, his success will be a spur to the builders' hardwareman and the implement man and the housefurnishing goods man. Your store will attract more attention than it ever did before. You will be drawing trade from much longer distances and it is "dollars to doughnuts" that at the end of the first year's existence of the sporting goods department, you will vote it an absolute necessity in your business.

RETAIL HARDWARE ASSOCIATION NEWS

Official news of the Ontario and Western Canada Associations will be published in this department. All correspondence regarding association matters should be sent to the secretaries. If for publication send to the Editor of Hardware and Metal, Toronto.

Officers Retail Hardware and Stove Dealers' Association of Western Canada:

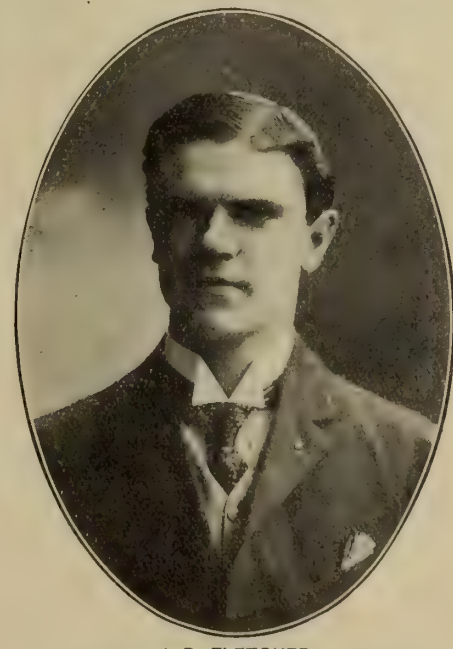
Auditors—J. W. Peacock and C. F. Moorhouse, Toronto.

ORGANIZER OR TRAVELER.

Like every organization, the Ontario Retail Hardware Association must gain experience with age, and in some cases must pay for it in ready cash. For an association of less than a half year's existence it is a decidedly healthy infant with its over 150 members. And even opponents of organization will give the association and its executive credit for both aggressiveness and progressiveness.



An important problem before the Association is to do something tangible in order to show disbelievers that trade organizations are worth while. The Ontario association is in a fair way of doing this, as if any one of its three works undertaken (negotiation with the jobbers for the elimination of certain trade evils and the proposed establishment of mutual insurance and debt collection departments) succeed the permanent success of the organization is assured.

But probably the most important work of all is that of increasing the membership at the least possible expense. In Michigan, where the association has been in existence twelve years, there are about 650 members enrolled. And Ontario must have 300 members before the executive officers will have a fair chance of getting the best results for the organization. In unions as well as in onions there is strength.

To send an organizer to all parts of the province would cost a lot of money. True, Organizer Hodson paid all traveling expenses and turned in money to the association, but on the other hand, the association's brief experience of six or seven days with Organizer Fletcher cost the treasury about $40. As that is too fast a gait at which to travel the members already enrolled should do all they can to bring in new members without cost to the association.

But there is another source from which assistance may be extended. Some traveling salesmen have already shown their friendship to the retail association by helping in the work of organization. And as the jobbers are begining to see the advantages to be gained by having a strong Retail Hardware Association in existence, more salesmen will probably earn the appreciation of the retail trade by their co-operation in securing members between now and next March, when action is to be taken on a proposed amendment to the constitution allowing traveling salesmen to become associate members of the association.

Every particle of work done so far for the association by its officers has been purely voluntary and without salary, the members of the executive

J. D. FLETCHER,
Recently Appointed Organizer of the Ontario Association, but not now connected with the Organization.

not even charging traveling expenses, except on organization work. Both travelers and retailers have an opportunity to do some voluntary work and they should rise to the occasion and add a few bricks to the structure of organization already so well under way towards completion.

PLAIN TALK.

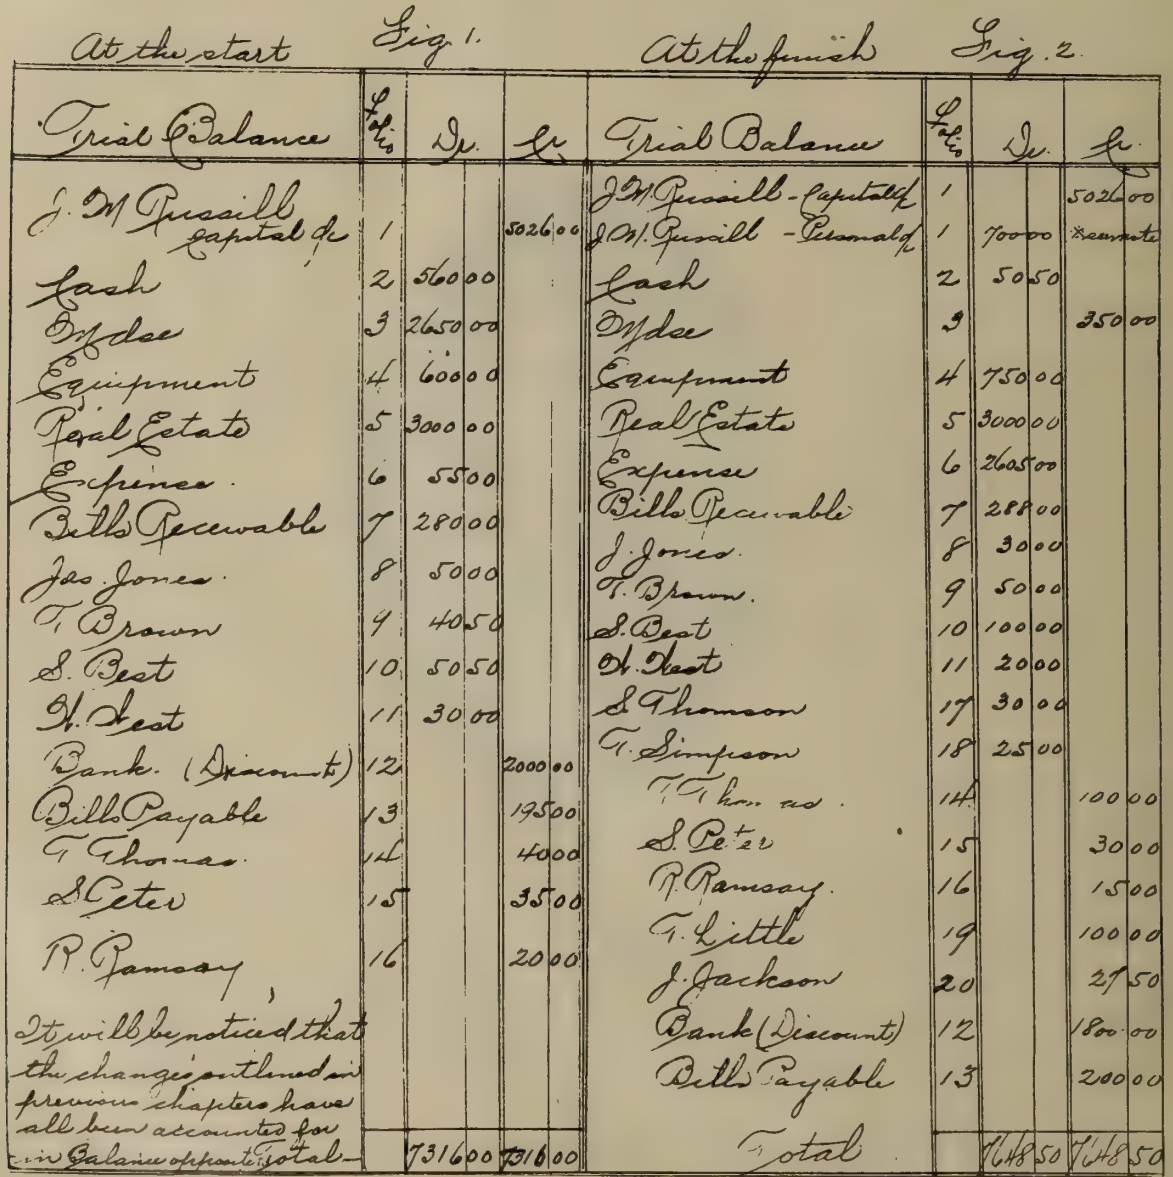
It is not the object of the Retail Hardware and Stove Dealers' Association of Western Canada, or of any other sane and sensible association of retailers, to eliminate competition. It is not the object or the business of this association to decide at what prices goods shall be sold. The association could not do this if it would, and it is doubtful whether it would do so if it could. It does seek to discourage cut-throat methods of doing business by educating its members to see a better way, but it can not control, and it does not seek to control the prices at which individual members may sell certain lines of hardware. This is not the end or aim of the association.

All this should be so well understood that it would not require to be stated but Secretary J. E. McRobie informs this paper that many western hardwaremen seem to have an utterly wrong idea. Now and then a hardwareman will write to the secretary, saying that the association is of no use to him because John Smith in the same town or John Jones in a neighboring town, is cutting the price of lanterns or wire or nails. Because of the cut-throat tactics of Smith and Jones he doesn't think it worth while to stay in the association. Perhaps Smith and Jones are association members, perhaps they are not.

Complaints and excuses of this kind come in so often that it is evident that many dealers do not understand the true function of their association. It would be not only impracticable but illegal for the association to form what would be virtually a combine, and any members who expect action of this kind will be sadly disappointed. All that the association can do is to educate its members to the folly of reckless price cutting and the wisdom of doing business in a businesslike way. With many dealers this is a slow process, but it is the only thing possible.

But the association has other very important work to do. The retail hardwaremen urgently require some organization which can represent them and protect their interests. The manufacturers and wholesalers have their own associations and act as united bodies. In the conflict of interests what chance has the individual hardwareman as opposed to an organization of wholesalers and manufacturers. It is not suggested that either wholesalers or manufacturers intend to be unfair to the retailers, but business is essentially selfish, and it is the duty of each to protect his own. If the retailer is not prepared to protect his own, the jobber will gradually encroach upon the best of his trade. It is strictly up to the retailer and the game will be a losing one for him if he plays it alone. United with his fellow dealers in a strong retail association he is assured of success.

This is an age of organization and consolidation, and the retail hardwaremen of the west have set the pace for hardwaremen in other provinces. A few seem to misunderstand the objects for which they are organized, but the majority are men of broader outlook and are prepared to wait for the tangible results which are bound to come from intelligent organization. In the meantime they are not afraid to spend 20c. per week in the experiment. That is more than the annual fee of $10 amounts to.



Business Management

By HOWARD R. WELLINGTON.

The Eighth in a Series of Articles on a Subject of Interest to Every Retailer.

HAVING all the transactions now recorded in closing the books, we will proceed to take off a trial balance and open a trading account, to ascertain the profits for the period.

It is not at all probable that a small retailer will devote the time necessary each month to take off a trial balance, but this should be done at least once in three months. Customers should receive monthly accounts in order that any existing differences may be adjusted before the transaction has been so old that neither party recollects the circumstances, and, besides, collections will be looked after to much better advantage. It is the dealer who is regular with his accounts, sending invoices or memos with the goods when delivered, and statements on the first of each month, who collects his accounts first. It will be noticed in the trial balance for the end of the period that the proprietor's account stands the same as at the start, although a period of business transactions has been entered through the books. In this connection it might be explained that as soon as the profit for the period has been ascertained from the trading and profit and loss account, the net amount is credited to the proprietor's account, which shows the additional capital investment in the business, less any withdrawals as ascertained from his personal account, which account may be transferred at the end of each period to the debit of the proprietor's account.

At the start Fig. 1.

Trial Balance	Fol.	Dr.	Cr.
J. M. Pursaill Capital A/c	1		5026 00
Cash	2	560 00	
Bills Rec.	3	2650 00	
Equipment	4	600 00

HARDWARE TRADE GOSSIP

Quebec.

T. E. Argue, general merchant, of Carp, was a visitor at the metropolis this week.

A. J. Teakle, buyer for H. & J. Young, Quebec, has been in Montreal for a few days, on business.

C. C. Ballantyne, of the Sherwin-Williams Co., Montreal, paid a brief visit to Ottawa this week.

S. E. Elkin, manager of the Maritime Nail Works, St. John, N.B., was in Montreal early this week.

Lieut.-Col. Kent, of Kent Bros., mica dealers, Kingston, spent a few days in Montreal during the week.

J. N. Warminton, manufacturers' agent, Montreal, visited the trade in Western Ontario this week.

J. W. Davis, advertising manager of the Canadian Rand Drill Co., Limited, is visiting New York this week.

A. P. Gosselin, general merchant, of St. Alexandre, was a visitor at the Montreal wholesale houses this week.

A. A. Bittnes, manager Canadian branch of the Gillette Safety Razor Co., is in Boston visiting the home factory.

Major Lockerby, of Lockerby & McComb, building paper manufacturers, Montreal, was in New York on Friday.

A. Albin, of A. Albin & Co., general merchants, Glen Robertson, was noticed among the hardware buyers in Montreal this week.

H. W. Aird, secretary of the Canada Paint Co., has returned to Montreal after attending the C.M.A. convention at Winnipeg.

A. H. Campbell, of A. C. Leslie & Co., Montreal, has returned from accompanying the C. M. A. excursion to Winnipeg and across the continent.

J. R Henderson, of Brandram-Henderson Limited, was in Montreal this week in connection with the firm's new lead-corroding plant, now under construction.

A. A. Bird, of the firm R. A. Bird & Co., Glasgow, Scotland, is visiting in Montreal, the guest of Robert Munro, managing director of the Canada Paint Co.

Gus McLeod, son of Angus McLeod, hardware merchant, Sydney, C.B., was in Montreal last week on his annual vacation. He was accompanied by Mrs. McLeod.

F. C. Graham, who has been in charge of the sporting goods department of Lewis Bros., Montreal, has accepted a position in a retail hardware store in New York city.

J. M. Curry, secretary-treasurer of Rhodes, Curry & Co., Amherst, called at the Montreal office of Hardware and Metal this week on his return from a trip to the Pacific Coast.

Geo. R. Nimmo, A. S. Leblanc and W. D. Hamilton, members of the eastern traveling staff of the Canada Paint Co., were at the head office in Montreal this week for a short conference.

Henry Timmons, formerly in business at Mattawa and now the owner of one of Cobalt's best paying silver mines, visited Montreal business friends last week and received their congratulations on his great luck.

Ontario.

Walker Holborn, of Sutton West, Ont., was in Toronto last Saturday.

W. Holborn, Sutton West, is erecting a new hardware store building.

J. H. Bundy, Pickering, was a hardware buyer in Toronto this week.

E. A. Button, of Stouffville, Ont., was a visitor in Toronto Thursday last.

R. Blain, M.P., Brampton, Ont., was a visitor in Toronto during the week.

Jas. Elliot has opened a plumbing shop at 838 College street, Toronto.

G. A. Binns, of Newmarket, Ont., was a visitor in Toronto during the week.

Charlton & Wilson are erecting a hardware store building at Haileybury.

Duncan L. Myers, of Stratford, Ont., was a visitor in Toronto during the week.

R. J. Cluff, of Cluff Bros., Toronto, returned on Tuesday from a trip to New York.

T. N. Healy, of Rice, Lewis & Son, Toronto, has recovered from his recent illness.

Geo. Stevenson, plumber, Hamilton, was a visitor in Toronto during the week.

T. Mortimer, of the Ontario Silver Co., Toronto, left on a business trip to Winnipeg on Monday.

R. L. Ritchie, of the Canadian Buffalo Forge Co., Montreal, called on the Toronto trade this week.

J. J. Little, painter, Toronto, is putting in a stock of hardware on Bloor street west, near Margueretta.

Geo. Haughton, hardware merchant, Dundas street, Toronto, has assigned to E. R. C. Clarkson, of that city.

William Woodruff, aged 53, employed in the Capewell Horse Nail Co., Toronto, was severely injured on Wednesday.

F. R. Knox, of Byng Inlet, Ont., has been a visitor in Toronto for the past fortnight buying a stock of hardware.

E. M. Sheldreck, of Paris, Ontario, who recently disposed of his hardware business in that town, is now residing in Toronto.

A. T. Harland, late of E. P. Paulin's staff at Goderich, is now on the road for the Electro-Surgical Instrument Co., Rochester, N.Y.

The Fort William Hardware Co., of Fort William, Ont., was entered by burglars last week and about $100 in unendorsed cheques and $15 in cash was stolen.

The factory employes of the Gutta Percha Rubber Co., Toronto, presented John M. Ogilvie with a handsome silver tea service. Mr. Ogilvie is leaving the company to accept another important position.

L. N. Vanstone, for twelve years was with H. S. Howland & Sons and who is now looking after the Ontario sales for the Canada Steel Goods Co., Hamilton, was presented with a handsome library table and chair by his old comrades on Howland's traveling staff when leaving to accept his new position.

J. B. Hawkins, who recently sold his hardware stock at Goderich to E. P. Paulin, of Dashwood, is again on the road for the Electro Surgical Instrument Co., Rochester, N.Y., and will cover his old ground, Quebec and the Maritime Provinces. During his short respite from business cares J. B. has been making himself useful in booming the Great Northwestern Exhibition and other affairs of interest to Goderich.

Western Canada.

F. W. Gerber has opened a new hardware store at Birch Hill, Sask.

Geo. B. Jameson, of Melfort, Sask., has built a large addition to his hardware store.

Mr. Moore, of Kemptville, Ont., has joined the hardware firm of Johnson Bros., Rouleau, Sask.

Jas. Sutherland, of Moose Jaw, has started a plumbing business in connection with his tinsmithing business.

The Moose Jaw Hardware Co., of Moose Jaw, Sask., have completed the erection of a new three-storey warehouse.

Harold Kelley, of the Kelley Hardware Co., Brandon, was in Winnipeg last week calling on several of the jobbing houses.

J. H. Agnew, of the Agnew Hardware Co., Prince Albert, Sask., intends making a visit in the near future to his old home in Jersey, in the Channel Islands.

W. J. Monaghan, of Weyburn, Sask., has completed the erection of his new hardware store. Mr. Monaghan is one of the pioneers in the "Soo Line" district.

Ed. Hawke, of the Moose Jaw Hardware Company, Moose Jaw, was presented with a handsome secretary by his fellow employes on the occasion of his recent wedding.

Maritime Provinces.

Wm. Stairs Son & Morrow, hardware merchants, Halifax, are removing into fine new premises.

Great Britain.

Sir William Treloar, an alderman of the city of London since 1892, has been elected Lord Mayor in succession to Walter Vaughman Morgan, one of the publishers of the Ironmonger.
expected.

NEW ADVERTISERS.

Warmington, J. N.

THE METAL SITUATION.

It is a wonderful fact that the metal market this week is even stronger than at the time of our last issue. Among all the items on the list only one has shown the slightest appearance of weakness at any moment during the week. Zinc spelter declined somewhat during the early part of the week but a reaction soon began, bringing prices up to their former level.

Pig lead has broken all bounds and for a so-called "base metal" the price now being asked is simply fabulous. Last week's quotations have been bettered by fully twenty-five cents a hundred pounds, with indications that still higher figures are near at hand.

Copper is very much stronger and is apparently on the edge of a great boom. We are quoting one cent higher than last week for ingots, but some dealers are said to be getting 25 cents a pound—two and a half cents in advance of our prices. A large demand exists and stocks are light.

Pig iron presents the same features as last week—high prices and a market bare of stock. English prices have gone up considerably and the difficulty of securing freights has added still further to the delivered price in this country. The difference is approximately six shillings.

Shipments of Glasgow iron are rather better than the English pig, and somewhat easier prices are obtainable. At that, it is very difficult to secure deliveries. Everything points strongly to a continuance throughout the Winter of depleted pig iron stocks. Consumers will have to make up their minds that it will more than likely be necessary for them to accept substitutes for their favorite brands this Winter.

A shortage of cars has added to the troubles of metal dealers. Even when stocks are sufficiently large to ship, it is next to impossible to obtain cars. It is said that foreign roads are now refusing to send their cars to Montreal, as they are promptly appropriated by the Canadian railways.

Some gauges in black sheets are now commanding higher prices, and a general revision may occur at any moment. Sheet lead is bound to advance in sympathy with the tremendous strides in the primary markets. It is expected that new prices will be made next week.

Tin plate quotations will probably be increased in the near future. This, however, will not affect import orders. As they are probably all placed for the year. In fact, it would be impossible to secure delivery before the close of navigation, on orders placed now. All other sheets are strong and steady.

MANY MARKET CHANGES.

Particular attention should be paid to the market reports given in Hardware and Metal from week to week. We make no pretence of being prophets, but we give the result of close observance of market conditions on the part of members of the editorial staff, who also interview weekly many of the keenest buyers in various markets.

The changes made this week make up one of the longest lists ever presented to the trade in Canada, many of the advances having been predicted by us in recent issues.

One of the investments most certain to produce dividends for a retail merchant is a subscription to his trade paper and the merchant who hasn't time to read a trade paper hasn't time to make money.

Don't give a customer a chance to lose confidence in you by making claims for a stove that cannot be fulfilled.

Styles in shooting materials have not changed this season, except that the jug is a little larger and the neck shorter.

THANKSGIVING.

Probably no other country in the world can so heartily give thanks for long-continued peace and prosperity, as our own Canada. Bumper crops for many successive years, have brought wealth to our farmers, and thereby benefitted merchants and manufacturers. Constantly new discoveries of mineral deposits have increased our resources, not only by affording means of investment to our monied interests and regular employment to our workingmen, but also by atracting to our land the capital of foreign investors. The same may be said, and with even greater truth, of the railways which are being pushed across the continent, and the mighty electric power developments at our numerous waterfalls. Our fisheries year after year, yield fame and fortune to our country, while our forests are among the greatest lumber producers in the world.

Surely Canada has cause to be thankful. And, among those who may reasonably be expected to feel grateful for past blessings, the hardwareman is among the first. The country's prosperity affects him to an even greater extent than the majority of his fellows. So he rejoices just now in a prosperity which gives every promise of long continuance.

Thanksgiving Day, however, possesses a more peculiar significance to the hardware dealer, and this year, this will come home to him with more than the usual force, by reason of the fact that the Government has decreed a much earlier date than usual for the holiday. The weather from all appearances at present, will be very mild, which will admirably suit the trade.

To descend to the commonplace, the hardware merchant always looks forward to the Thanksgiving trade, for a boom in such lines as small tools, nails, screws, hooks and eyes and innumerable sundries. It is a well known fact that consumers are fond of using this day for the small repairs incidental to the approach of cold weather. The double windows are put on, the storm doors and Winter porches placed in position, and coal stoves are cleaned and set up for their Winter's duty.

It is not too late to catch the trade in articles which will be used in the "tinkering around" process. A good window display of weather strip, hooks and eyes, axes, furnace scoops, stove polish, stove pipes and stove pipe wire would "help some."

FARMERS AND TINPLATE DUTY.

The following letter, which appeared in last week's Picton Times, shows how the farmers of Prince Edward County feel about the proposed duty of 33 1-3 per cent. on tin plate:

To the Editor of the Picton Times.

Dear Sir,—Knowing the interest your valuable paper takes in the prosperity of this county the writer takes the liberty to place a few cold facts before the farmers and your readers.

A company of promoters organized as the "Canadian Tin Plate and Sheet Steel Coroporation" are asking the Federal Government to place the duty on tin plate and sheet steel at 33 1-3 per cent.. (it now comes practically free) at the revision of the tariff to begin next month.

The duty of 33 1-3 per cent. on the importation of tin plate would force the price up to the consumer just to that extent. The price of tin plate 1c. 14 x 20 was $3.92 in the United States in 1905, supposing this to be the price of English goods the tariff will increase the price nearly $1.30 per box, or nearly 1-4c. per can. What does that mean to the canning industry of this county?

Take a conservative estimate of the output of the eleven factories this year and we have fifteen million cans, and if this duty goes on the snug sum of $37,-500 is taken in tribute out of the county and not a dollar spent here.

Take the Old Homestead Canning Co., with its three million output the tribute to the tin plate company would be $7,500.

Take the Bloomfield Packing Co., with its three million and one-half output, and when the axe falls $8,750 goes from that establishment to swell the coffers of an "unnatural" industry.

Again let us look at it from the farmer's point of view.

An acre of tomatoes is allowed to produce 250 bushels. At fifteen cans to the bushel it means 3,750 cans per acre. 33 1-3 per cent. duty or 1-4c. per can mean a tax of $9.37 1-2. Or take five acres, the average plant of a farmer, the duty would be $46.87 1-2, and if this company can induce the Government to come to their way of thinking, these figures, which are close to the mark, will have to be paid as sure as death and taxes.

To avert this the duty of the hour is to sign a petition against this increase to contribute along with the factories to Ottawa a strong farmers' delegation to protest along with the canners against this iniquitous tax. We, as farmers, feel keenly that we cannot grow tomatoes and corn and other canning produce at any less price than at present. The factories know they cannot pay this enormous tax and do business.

To increase the price to the consumer would largely handicap the trade. The situation is a grave one and means to our old county "success or failure" as our industrial situation stands to-day. Let us be true to ourselves and our own best interests and to our homes we have struggled so hard to maintain.

Let us put up a protest and disclaimer that will echo at Ottawa with no uncertain sounds.

JOHN W. HYATT.

West Lake, Sept. 27, 1906.

AUSTRALIA'S TARIFF CHANGES.

The changes in the Australian tariff seem likely to have a marked effect on Canadian trade with that country, especially with reference to agricultural implements, on which increases have been made in the import duty varying from ten to one hundred per cent. It has been suggested that with the high wages and short hours which govern in Australia, the market might still be retained for Canadian makers despite any increased duties, but it must be remembered that the factories at the antipodes are also to have their raw material entered free of duty, and with this and 25 per cent. protection they would appear to have a pretty sure thing. The whole situation would appear to be one

XMAS WINDOW DISPLAYS.

To make the window produce its share of profits during the holiday season, a number of catchy displays should be well thought out before the rush of holiday trade begins. Now is the opportune time.

Last year Hardware and Metal awarded prizes for the three best displays made during the Xmas season. This year we will give five prizes but the displays must be of goods sold in hardware stores and suitable for Christmas presents, such as silverware, razors, cutlery, sporting or house furnishing goods, hardware specialties, etc. The prizes are:

1st prize $6.00
2nd prize 4.00
3rd, 4th and 5th, a year's subscription to Hardware and Metal.

All photographs of displays must be mailed to us not later than December 31, 1906, and they should be accompanied by a short description of how the display was constructed, the display artists' name and, if possible, samples of the Christmas advertisements in the local papers backing up the window display advertising.

In a recent issue we suggested that hardware dealers having a number of clerks offer a prize for the best suggestion for an Xmas window display. Our prize offer provides an additional incentive. Get the clerks at work planning original window displays, or if you haven't a clerk to do it, do some planning yourself. But don't neglect the window, particularly during the holiday season

RUNNING A MUNICIPALITY.

Government by a commission of experts each endowed with executive ability of superior order is, theoretically, the ideal system of municipal administration. Practically it is impossible. The first question confronting the "commissionist" is "how would you elect or appoint the commission.

It is becoming a habit with city and towns people when condemning their municipal government, to remark "government by commission is the only way." Not one in a thousand has given the matter careful consideration.

Municipal government in Canada—and to the average citizen it is the most important government we have—must be worked out on the basis of popular representation. There are now two opposite tendencies in municipal method, the one growing in favor in Canada, is to concentrate executive authority in the hands of a small committee or board, in Ontario called the Board of Control and make the functions of council legislative and supervisory. The other tendency, almost universal in Great Britain, is to divide executive authority among a great number of standing committees. Some councils have scores of such standing committees each devoting itself to a minute detail of civic administration. Of course, the councils are large.

The former system seems the more natural on this side the Atlantic. Nowhere yet has it approached perfection, but it has given good results thus far.

Wishing for municipal government by commission is like crying for the moon. In the first place, it isn't likely to be forthcoming and in the second place they wouldn't know what to do with it if they had it.

If people would only learn that they themselves are the rulers of their city, appreciate their responsibilities of citizenship and vote and act accordingly, the great and pressing problems of municipal government would be quickly solved.

J. H. McKenzie, of Hanley, Sask., has completed a 66-foot addition to his hardware store.

Markets and Market Notes

(For detailed prices see Current Market Quotations, page 62.)

THE WEEK'S MARKETS IN BRIEF.

MONTREAL.

Galvanized Wire—Advance of about 10 cents.
Tacks—Adanced about 10 per cent.
Lead Pipe—Now 7 cents per pound.
Lead Waste Pipe—Now 8c. per pound, discount on these items 5 per cent.
Shot—Net list now quoted.
Turpentine—Now 91 cents per gal.
Copper—Ingot copper 1c. higher.
Pig Lead—Advanced 25c.
Old Material—Several changes.

TORONTO.

Pig Iron—Prices advanced and great scarcity in winter predicted.
Copper—Sensational advances made.
Brass Goods—An advance imminent.
Pig Lead—Advanced 25 cents per hundred.
Shot—Advanced to net list.
Lead Pipe—Discount lowered to 5 off.
White Lead—Further advances probable.
Iron Pipe—Advance predicted.
Cast and Malleable Fittings—Advanced.
Bar Iron—Advance expected next week.
Turpentine—Predicted advance made.
Tacks—New lists with lower discounts.
Galvanized Wire—New lists to be issued.
Barb and Plain Twist Wire—Advancing.
Wire Nails—Advancing—now firm at $2.00.
Screws—Advance on set and cap screws considered likely.
Old Material—Advances all round.

Quebec Hardware Markets.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, October 12, 1906.

Heavy shipments are being made this week in all seasonable lines. The demand seems to have been quickened by the cold snap of the present week. This has been felt particularly by weather strip. The Montreal city trade in this line, which does not usually commence until later in the season, has been very active this week.

Ammunition orders have been coming forward so steadily that one of the largest Montreal wholesale houses has been compelled to cable a repeat order to England. This is the first time they have been compelled to do this.

Several price changes have occurred this week, nearly all of them being the result of the remarkably high prices which now rule throughout the metal market. Galvanized wire has advanced about 10 cents per hundred, Montreal prices. Cleveland prices are now about 7½ cents higher than the old ones. Shot has advanced, as will be seen in our quotations, prices now being net list. Tacks, in many grades, are now higher in price. These may be seen by consulting our current market quotations.

It is reported that western jobbers have advanced the price of cold blast lanterns to $5.50. In Montreal, in spite of the efforts of manufacturers to bring prices back to a normal level, there has been no change in this direction.

AXES—As being one of the most seasonable lines, axes are going forward steadily. We still quote: $7.60 to $9.50 per dozen; double bitt axes, $9.50 to $12 a dozen; handled axes, $7.50 to $9.50; Canadian pattern axes, $7.50 a dozen.

HANDLES — Business conditions remain very satisfactory, and we are still quoting: No. 3, $1.25; No. 2, $1.50; No. 1, $1.90 a dozen; adze handles, 34-inch, $2.20 a dozen; pick handles, No. 2, $1.70; No. 3, $1.50 a dozen.

LANTERNS—No change has taken place in the Montreal lists, and we are still quoting: "Prism," $7; "Prism" globes, $1.20; Cold Blast, $1; No. 0 Safety, $3.50 to $3.75.

COW TIES AND STALL FIXTURES—Large quantities are going forward in almost every order. We quote discounts as follows: Cow ties, discount 40 per cent. off list; stall fixtures, discount 35 per cent. off list.

SLEIGH BELLS—Shipments are increasing right along. Quotations are as follows: Back straps, 30c. to $2.50; body straps, 70c. to $3.50; York Eye bells, common, 70c. to $1.50; pear shape, $1.15 to $2; shaft gongs, 20c. to $2.50; Grelots, 35c. to $2; team bells, $1.80 to $5.50; saddle gongs, $1.10 to $2.60.

RIVETS AND BURRS—An excellent demand is maintained. Our prices are: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., copper rivets and tin swede rivets, 60, 10 and 10 per cent.; swede iron burrs are quoted at 60 and 10 and 10 per cent. off new lists; copper rivets with the usual proportion of burrs, 35 per cent. off, and coppered iron rivets and burrs in 5-lb. carton boxes at 60 and 10 and 10 per cent.; copper burrs alone, 30 per cent., subject to usual charge for half-pound boxes.

HAY WIRE—Our quotations remain: No. 13, $2.45; No. 14, $2.55; No. 15, $2.70; net cash, f.o.b. Montreal.

MACHINE SCREWS— Discounts as follows: Flat head, iron, 35 per cent.; flat head, brass, 35 per cent.; Felisterhead, iron, 30 per cent.; Felisterhead, brass, 25 per cent.

BOLTS AND NUTS— There is still an acute scarcity. We quote as follows: Carriage bolts, ⅜ and under, 60 and 10; 7-16 and larger, 55 per cent.; fancy carriage bolts, 50 per cent.; sleigh shoe bolts, ⅜ and under, 60 per cent.; 7-16 and over, 50 per cent.; machine bolts, ⅜ and under, 60 per cent.; 7-16 and larger, 55 per cent.

HORSE NAILS—We quote discounts: C brand, 40, 10 and 7 per cent.; M.R.M. Co., 55 per cent.; P.B. brand, 55 per cent.

WIRE NAILS—Prices are now firmer, and there is an absence of price-cutting. We quote: $2.05 f.o.b. Montreal.

CUT NAILS—Business remains on about the same plane as at our last report, and we continue to quote: $2.20 base, f.o.b. Montreal.

HORSESHOES—A good trade is being done. Our prices remain as follows: P.B. new pattern, base price $3.50 per 100 lbs.; M.R.M. Co., latest improved pattern iron shoes, light and medium pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; snow pattern, No. 2 and larger, $3.90; No. 1 and smaller, $4.15. Light steel shoes, No. 2 and larger, $4; No. 1 and smaller, $4.25; featherweight, all sizes, No. 0 to 4, $5.60. Toeweight, all sizes, No. 1 to 4, $6.85. Packing, up to three sizes in a keg, 10c. per 100 lbs. More than three sizes, 25c. per 100 lbs. extra.

BUILDING PAPER—Business is picking up with the cold weather. Other conditions remain the same, and prices are unchanged.

CEMENT AND FIREBRICK — The situation is unchanged. Dealers cannot fill orders, owing to the scarcity of cars as well as the scarcity of cement. We quote: "Lehigh" Portland in wood $2.54; in cotton sacks, $2.39; in paper sacks, $2.31. Lefarge (non-staining) in wood, $3.40; Belgium, $1.60 to $1.90 per barrel; ex-store, American, $2 to $2.10 ex-cars; Canadian Portland, $2 to $2.05. Firebrick, English and Scotch, $17 to $21, American $30 to $35; White Bros.' English cement, $1.80 in bags, $2.05 in barrels in round lots.

COIL CHAIN — Our remarks of last week still apply. We give prices as follows: 5-16 in., $4.30; 3-8 inch, $3.80; 7-16 inch, $3.60; 1-2 inch, $3.40; 9-16 inch, $3.35; 5-8 inch, $3.25; 3-4 inch, $3.10; 7-8 inch, $3.05; 1 inch, $3.

SHOT—An advance has taken place, net list being now quoted. Shot packed in 25-lb. bags, ordinary drop AAA to dust, $7 per 100 lbs.; chilled, No. 1—10, $7.50 per 100 lbs.; brick and seal, $8 per 100 lbs.; ball, $8.50 per 100 lbs. Net list. Bags less than 25 lbs., ½c. per lb. extra, net; f.o.b. Montreal, Toronto, Hamilton, London, St. John, Halifax.

AMMUNITION—This is the big season for retailers, and jobbers as well are still shipping large quantities. We still quote the following prices: Loaded with black powder, 12 and 16 gauge, per 1,000, $15; 10 gauge, per 1,000, $18; loaded with smokeless powder, 12 and 16 gauge, per 1,000, $20.50; 10 gauge, $23.50.

Ontario Hardware Markets.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto Oct. 12, 1906.

Lively business is being done in builders' hardware by the jobbing houses, there being quite a rush to complete contracts under way before Winter sets in. The few days of Autumn weather has started a sorting up in general lines and has made building paper, weather strip, etc., move in fair quantities.

Wire nails have firmed up and while there is no agreement between manufacturers, prices are likely to be higher. Several of the mills have booked heavy orders for shipment to Western Canada before the close of navigation and as they are temporarily off the market for local shipments the other mills have an opportunity to move prices up in keeping with existing market conditions, especially if heavy orders are placed under present low prices.

Galvanized, barb, and plain twist wires have all advanced about ten cents per hundred as a result of the higher quotations on iron. Tacks have also advanced in response to the same conditions and shot is now quoted at net list following the rise in pig lead, while set and cap screws are said to be likely to move upward shortly.

AXES AND HANDLES—Large shipments are being forwarded by jobbers and a good season is looked for. Sorting is being largely done.

CUTLERY AND SILVERWARE — Orders are heavy for Christmas trade.

SPORTING GOODS — All shooting goods are selling in large quantities, while football supplies are selling well. Skate shipments are being made and hockey sticks are being bought liberally.

CHAIN—We continue to quote : 1 inch, $6.60 ; 5-6 inch, $4.55 ; 3-8 inch, $3.95 ; 7-16 inch, $3.80 ; 1-2 inch, $3.65 ; 9-16 inch, $3.55 ; 5-8 inch, $3.45 ; 3-4 inch, $3.35.

EXTENSION AND STEP LADDERS —Prices continue as follows : Step ladders at 10c. per foot for 3 to 6 feet, and 11c. per foot for 7 to 10 feet ladders. Waggoner extension ladders, 40 per cent.

POULTRY NETTING—We quote : 2-inch mesh, 19 w.g., discount 50 and 10 per cent. All others 50 per cent.

WIRE—Advances of ten cents per hundred have been made on barb, plain twist and galvanized wire.

OILED AND ANNEALED WIRE — (Canadian)—Gauge 10, $2.31 ; gauge 11, $2.37 ; gauge 12, $2.45 per 100 lbs.

WIRE NAILS — We quote nominally $2.10 base, the market having advanced about five cents. Some mills are working on heavy western orders and higher prices are probable. The market is firm at $2.

CUT NAILS—We quote : $2.20 base, f.o.b. Montreal. Toronto, 20c. higher.

HORSENAILS—"C" brand, 40, 10 and 7½ off list. "M.R.M." brand, 55 per cent. off. "Monarch" brand, 50 and 7½ off. "Peerless," 50 per cent. off.

TOOLS—A heavy trade has been done in mechanics' tools and the demand is still brisk.

SHOVELS—Demand is brisk and dealers are sorting in snow shovels.

LANTERNS—Prices are firmer as a result of an effort to readjust the quotations existing during the open market. Lamps and lighting fixtures are selling well.

STABLE FITTINGS—This line is being included in most sorting orders and cow ties are in good demand.

BUILDING PAPER—Trade has livened up as a result of the cool weather.

HORSESHOES—Our quotations continue as follows : P.B. base, $3.65 ; "M.R.M. Co., latest improved pattern" iron shoes, light and medium pattern, No. 2 and larger, $3.80 ; No. 1 and smaller, $4.05 ; snow, No. 2 and larger, $4.05 ; No. 1 and smaller, $4.30 ; light steel shoes, No. 2 and larger, $4.15 ; No. 1 and smaller, $4.40 ; featherweight, all sizes, 0 to 4, $5.75 ; toeweight, all sizes 1 to 4, $7. Packing, up to three sizes in a keg, 10c. per 100 lbs. extra ; more than three sizes in a keg, 25c. per 100 lbs. extra.

HORSE BLANKETS AND SLEIGH BELLS—Demand is increasing.

RIVETS AND BURRS—Prices hold firm and demand is keen.

SCREWS—An advance in set and cap screws is looked for.

BOLTS AND NUTS—Stocks are light and prices firm at last week's advance.

CEMENT—We quote : For carload orders, f.o.b. Toronto, Canadian Portland, $1.95. For smaller orders ex warehouse, Canadian Portland, $2.05 upwards.

FIREBRICK—English and Scotch fire brick $27 to $30 ; American low-grade, $23 to $25 ; high-grade, $27.50 to $35.

HIDES AND WOOL—The market is very dull and inclined to weakness. Plenty of hides are coming in, but the out-go is limited.

Hides, inspected, steers, No. 1		0 12½

Canadian Metal Markets.

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, October 12, 1906.

Metal men seem resigned to the constantly higher prices which are being commanded by their products, from day to day. The past week has been no exception to the general rule of the past couple of months, and there is still the cry of short supplies and increased quotations. How long this situation will continue, it is impossible to say, but, from present indications the boom must continue for some time longer before easier prices are forthcoming.

Pig lead has astonished even the most experienced metal experts by jumping up 25c. a hundred. Even at these advanced figures, which undoubtedly constitute the record it is a matter of the greatest difficulty to secure deliveries within a reasonable time. This condition has had the result of forcing up the price of general articles such as lead pipe and shot in which pig lead is the main raw material.

Copper is firmer again this week. We are quoting an advance in ingot copper of one cent over last week's prices making the current quotation from 22 1-2 to 23 cents. Some dealers however are asking as high as 25c. and it is generally agreed that our price is very close, in the present circumstances. The higher quotations seem to be fully warranted by the market.

Ingot tin is advancing all the time in European markets, and is now considerably higher than it was a week ago. Nevertheless, Montreal jobbers are still quoting the same figures, though it is conceded that there is every likelihood of higher prices within a few days. By some, it is even predicted that the record price of last January will again be reached.

Zinc spelter declined slightly in the early part of the week, but has firmed up again and is now being quoted at about the same prices as ruled last week.

Antimony is unchanged, but very firm in tone. In fact, it is a long time since the firmness in the metal market has been so general.

Pig iron conditions are practically unchanged. English prices are considerably higher, this week, and, in addition, great difficulty is being experienced in securing freights before the close of navigation. This has made a difference of about six shillings in the price delivered at Montreal. Glasgow shipments seem to be rather better and prices have not advanced as rapidly as those of English iron. Summing up the situation as a whole, we may say that indications point strongly to a scarcity of pig iron throughout the coming Winter. The probability is that consumers who have formerly stuck religiously to favorite grades, will have to submit to a mixture.

Black sheets are much firmer and prices will probably be amended very soon. Tin plates are higher in tone and import prices have advanced. There has been no change in local quotations from stock, but almost beyond a doubt they will soon be changed. Lead sheets have been affected by the steady advance of pig lead, and it is expected that within the next week or so, new prices will be declared.

COPPER—A full cent has been added to our quotations this week, and in some quarters an even greater advance has been made. Our prices now are: Ingot copper, 22 1-2c. to 23c.; sheet copper, base sizes 26c.

INGOT TIN—Last week's quotations still rule, although the English market continues to advance. We quote: 46c. to 46 1-2c. per pound.

ZINC SPELTER—A slight decline in the early part of the week was offset by an upward movement which brought the price back to $7 to $7.25 per 100 lbs.

ANTIMONY—We still quote 27 1-2c. to 28c. per lb.

PIG LEAD—There does not seem to be any end to the present boom, and an-

other big advance took place this week. We are now quoting: $5.15 to $5.25 per 100 lbs.

PIG IRON—Last week's situation is duplicated in this. The difficulty of securing freights before the close of navigation, has added to the delivered price. We are quoting prices as follows: Londonderry, $22.50; Carron No. 1, $23; Carron, special, $22; Summerlee, No. 2, selected, $22.75; Summerlee No. 3, soft, $21.75.

BOILER TUBES — We still quote British and American tubes, 1½ inch, 8½c.; 2 inch, 8½c.; 2½ inch, 10c.; 3 inch, 12c.; 3½ inch, 15¾c.; 4 inch, 20c.; 5 inch, 45c. Price per foot net.

TOOL STEEL—Prices are: Colonial Black Diamond, 8c. to 9c.; Sanderson's, 8c. to 45c., according to grade; Jessop's, 13c.; Jonas & Colver's, 10c. to 20c.; "Air Hardening," 65c. per pound; Conqueror, 7½c.; Conqueror high speed steel, 60c.; Jowitt's Diamond J., 6¼c. to 7c.; Jowitt's best, 11c. to 11½c.

MERCHANT STEEL—We are still quoting: Sleigh shoe, 92.17½; tire, $2.27½; spring, $2.75; toecalk, $2.82½; machinery iron finish, $2.27½; ruled machinery steel, $2.75; mild, $2.15 base and upwards; square harrow teeth, $2.27½. Net cash 30 days. Rivet steel quoted on application.

COLD ROLLED SHAFTING — Our prices are: 3-16 inch to 1-4 inch, $6.80; 5-16 inch to 11-32 inch, $5.78; 3-8 inch to 17-32 inch, $4.76; 9-16 inch to 47-64 inch, $4.08; 3 1-8 inch to 3 7-16 inch, $3.60; 3-4 inch to 1 7-16 inch, $3.75; 1 1-2 inch to 3 inch, $3.50; 3 1-2 inch to 3 15-16 inch, $3.75; 4 inch to 4 7-16 inch, $4.08; 4 1-2 inch to 4 11-16 inch, $4.42.

GALVANIZED IRON — We are still quoting the following prices: Queen's Head, 28 gauge, $4.35 to $4.60; 26 gauge, $4.20; 22 to 24 gauge, $3.65; 16 to 20 gauge, $3.50; Apollo, 28 gauge, $4.25 to $4.50; 26 gauge, $4.10; 22 and 24 gauge, $3.55; 16 to 20 gauge, $3.40; Comet, 28 gauge, $4.25 to $4.50; 26 gauge, $4.10; 22 and 24 gauge, $3.55; 16 to 20 gauge, $3.40; Bell brand, 28 gauge, $4.40 to $4.45; Fleur-de-Lis, 28 gauge, $4.20 to $4.45; 26 gauge, $4.05; 22 and 24 gauge, $3.50; 16 to 20 gauge, $3.35; Gorbal's "Best Best," 28 gauge, $4.25 to $4.50; "Windmill Best," 28 gauge, $4.15; Sword and Torch, 28 gauge, $4.15; Colborne Crown, 28 gauge, $4.40 to $4.65. In less than case lots 25c. extra.

BLACK SHEETS—New prices are expected shortly. Meanwhile, we are quoting: 28 gauge, $2.50; 26 gauge, $2.45; 22 and 24 gauge, $2.30; 20 gauge, $2.25; 17 and 18 gauge, $2.25; 8, 10, 12 and 14 gauge, $2.55.

CANADA PLATES— We are still quoting: 52's, $2.60; 60's, $2.65; 75's, $2.75; full polished, $3.75 to $4; galvanized, 52's, $4.25; 60's, $4.50.

TIN PLATES—It is believed that advances will soon be declared, as prices for import are higher. Our quotations are: Cokes, base size, 1C 14 x 20, $4; charcoal, base size, 1C, 14x20, $4.25.

TERNE PLATES—Our prices are: $6.85.

SHEET ZINC—Conditions are unchanged and we continue to quote: $8 in casks, $8.25 in less than casks.

SHEET LEAD—Our prices this week remain unchanged, but owing to the tremendous advances in pig lead, it is said that higher prices will soon be given out. Meanwhile we quote: 2 1-2 lbs. 6c. by the roll; 3 lbs., and heavier, 5¾c. by the roll; small quantities, 25c. per hundred pounds extra.

BAR IRON—Our price remains $2.05 base, f.o.b. Montreal.

OLD MATERIAL—Firmness in the copper market is responsible for increased prices in copper and brass scrap. Rubbers also have advanced and manufacturers are said to be creating a more active demand. As stocks are light, further advances are looked for. We quote the following dealers' prices: Light copper, 15c.; heavy red brass, 15c.; yellow brass, 11 1-2c.; light brass, 8 1-2c.; lead, 3 1-4c.; zinc, 4c.; machinery cast scrap, $15.50; wrought scrap, $14 to $15; stove plate scrap, $12; mixed rags, $1 to $1.20 per 100 lbs.; old rubbers, 8c. to 8 1-4c.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East.
Toronto, October 12, 1906

Sensational advances in iron, copper and lead, and the products of these metals have been the feature of the week and it is probable that never before has there been such great changes made in so many lines as have taken place during the past week. Prices are soaring high and still moving upward, the tremendous demand and the great scarcity of stocks tending to make conditions continue to stiffen.

Pig iron is probably the most difficult article to procure and present indications are that a marked scarcity will develop during the coming Winter. The American producers have their hands full with their local market and the increasing prosperity in Great Britain is taking exporters off their feet and shipments are becoming harder to secure as time goes on. Many foundries in Canada are very short of stocks having looked for lower prices, but with the early close of navigation still further increases are likely. This week we are advancing Middleborough and Londonderry, the latter being booked ahead for nine months. Another Canadian furnace is understood to be a year and a half ahead with orders.

Bar iron is slated for an early advance, probably during the coming week. Iron pipe and fittings have advanced and in addition to last week's rise in bolts, this week sees firmer conditions in galvanized wire, wire nails and a possibility of an advance in screws.

Copper has made sensational advances in outside markets and is now about 10 cents higher than the low level reached in 1902. This will mean additional profits of $90,000,000 a year to the copper companies of the United States taking the present selling price and the low price in 1902 as a basis for calculation. Brass is also being advanced on account of the upward move of copper.

Pig lead has made a tremendous jump of 25 cents per hundred and is now well beyond all former record prices and as supplies are not in keeping with the demand prices are very stiff. Lead pipe and shot have already advanced in response and white lead, red lead, solder, sheets, etc., are certain to advance as a result of pig lead's continued firmness.

Spelter is remarkable as being about the only metal to remain quiet during the present excitement.

PIG IRON—Conditions continue to stiffen and advances are made in several lines. A marked scarcity seems probable next Winter. Our prices are as follows: Radnor at furnace, $33; Hamilton at furnaces, No. 1, $21.50; Londonderry, f.o.b. Toronto, No. 1, $24; Middleborough, $23 to $24; Summerlee, $25.

BAR IRON—An advance is looked for next week. We quote: $2.15 base, f.o.b. Toronto, with discount of 2 per cent. net cash.

INGOT TIN—Prices are unchanged. In small lots business is very brisk. We quote: 44c. to 45c. per pound.

TIN PLATES—Trade is active and higher prices are looked for. We quote: Cokes, base size, 14 x 20, $4 to $4.25; charcoal, base size, 14 x 20, $4.50 to $5.

GALVANIZED SHEETS — Stocks are almost bare. Canada plates and black sheets are firm. Black sheets are expected to advance.

BRASS—There is a fair business doing with higher prices certain. We quote: 23c. to 24c. per lb.

COPPER—A big jump has been made and we now quote: Ingot copper, $24 per 100 lbs., and sheet copper $30 per 100 lbs.

LEAD—With this week's big advance we now quote: $5.15 to $5.25 for imported pig and $5.50 for bar lead.

ZINC SPELTER—The market is quiet and prices unchanged. We quote: 7¼c. per lb. for foreign and 6c. per lb. for domestic. Sheet zinc has been advanced 25 per cent.

BOILER PLATES AND TUBES—We quote: Plates, per 100 lbs., ¼ in. and up, $2.45; heads, per 100 lbs., $2.65; tank plates, 3-16 inch, $2.50; tubes, per 100 feet, 1½ inch, $8.50; 2, $8.80; 2½, $10.75; 3, $12; 3½, $15.80; 4, $21. Terms, 2 per cent. off.

ANTIMONY—Business is fair with 27c. to 28c. asked.

OLD MATERIAL — Prices are as follows: Heavy copper and wire, 16 1-4c. to 16 1-2c. per lb.; light copper, 14 1-2c. to 15c. per lb.; heavy red brass, 13 1-2c. per lb.; heavy yellow brass, 12c. per lb.; light brass, 8¼c. per lb.; tea lead, $3.40 per 100 lbs.; heavy lead, $3.60 per 100 lbs.; scrap zinc, 4½c. per lb.; iron, No. 1 wrought, $12; No. 2 wrought, $5; machinery cast scrap, $15; stove plate, $11; malleable and steel, $6; old rubbers, 7¾c. per pound; country mixed rags, $1 to $1.25 per 100 lbs., according to quality.

COAL—We quote the following prices:

Anthracite in cars at bridge, egg, stove and nut, $5.50 ; grate, $5.25 ; pea $3.50 per gross ton.

Standard Hocking, soft coal, in cars, f.o.b. at mines : Lump, $1.50 ; ¾ inch, $1.40 ; run of mine, $1.30 ; nut, $1.25 ; N. P. and S., $1 ; slack, 75c. ; box cars, 10c. per ton additional.

Youghiogheny soft coal in cars, bonded at bridges : 1¼ inch, $2.55 ; ¾ inch, $2.45 ; mine run, $2.35 ; slack, $2.05.

For Manitoba, British Columbia and Maritime Provinces markets see pages following.

LONDON METAL MARKETS.

From Metal Market Report, Oct. 9, 19.6.

PIG IRON— Cleveland warrants are quoted at 56s. 3d, and Glasgow standard warrants at 55s. 9d, making prices as compared with last week 1s. 9d higher for Cleveland warrants and 1s. 9d higher for standard warrants.

TIN—Spot tin opened steady at £196 futures at £194 10s., and after sales of 160 tons of spot and 150 tons of futures closed quiet at £195 15s. for spot, £194 10s. for futures, making price compared with last week £1 10s. higher on spot, and £1 higher on futures.

COPPER—Spot copper opened strong at £96 10s., futures £96 5s., and after sales of 600 tons of spot and 900 tons of futures, closed strong at £96 15s. for spot, and £96 10s. for futures, making price as compared with last week £4 higher on spot and the same on futures.

LEAD—The market closed at £19 10s making price as compared with last week 15s. higher.

SPELTER—The market closed at £27 7s. 6d, making price as compared with last week unchanged.

U. S. METAL MARKETS.

From the Iron Trade Review, Cleveland, Oct. 11, 1906.

The pig iron market has for the past fortnight witnessed a distinct and extensive second buying movement for 1907 delivery. Prices, already high, have advanced sharply and are threatening to reach a dangerous level. Even for first half delivery Bessemer has advanced 50 cents during the week and basic has sold as high as $20 valley. On foundry grades, $10 valley and $16 Birmingham are the minimum for delivery up to July 1. For spot iron on anything like early delivery prices are much higher.

The B. & O. Railroad has allotted about 100,000 tons of rails, 37,000 tons going to Pittsburg mills. In other finished lines, activity is undiminished. Light rails have advanced $2 per ton at Chicago and an important independent interest has advanced tank and structural grades of plates. The extensive fleet for the Lackawanna Steel Co. to be built in 1907 will also serve to strengthen the plate market.

While conservative ore interests expect an advance for 1907 over this season's price, they are generally of the opinion that it must not exceed 50 cents, and are strong in denunciation of certain attempts which have been made to contract at a higher rate. September shipments were almost one-quarter greater than during the coresponding month last year.

The consummation of the Hill ore deal is still a topic of wide discussion. Independent ore producers are of the opinion that the centering of ore holdings in the corporation's hands will tend toward the maintenance of steady conditions. Furnace men who are purchasers of ore see in the gradual absorption of these lands increasing difficulty in securing a hold there to supply their own needs. It is taken for granted that the corporation will not become a shipper of ore.

U. S. IRON AND METAL TRADES.

From the Iron Age, Oct. 11, 1906.

Returns from the coke and anthracite blast furnaces show that pig iron production in the 30 days of September was 1,970,962 gross tons, as compared with 1,926,736 tons in August, with 31 days. The daily rate was 65,699 tons in September, an increase of 3,546 tons a day over the average in August. September has thus substantially checked the decline in production which has been noticed month by month since March. The weekly capacity of 311 furnaces active October 1, was 469,665 tons; on September 1 it was 441,426 tons. A monthly increase of 120,000 tons is thus indicated.

The purchases of basic pig for the Pencoyd Works amounted to 61,500 tons for delivery during the first half of 1907 and about 7,000 tons for prompt delivery. One large steel plant in eastern Pennsylvania has taken 10,000 tons for this year and 25,000 tons for 1907. One tidewater plant purchased 10,000 tons and another 4,000 tons for 1907 and a third plant 5,000 tons for this year. Altogether these and some minor sales foot up close to 125,000 tons, with further inquiries in the market. It may be noted that at the same time eastern Pennsylvania steel makers purchased between 25,000 and 30,000 tons of heavy melting scrap at $18 to $18.50.

Some good sales of foundry iron are reported in this section, and quite a good deal of forge iron has also been marketed. The southern iron makers do not seem to be pushing sales in any direction.

Importers have been studying the chances of placing Middlebrough and Scotch irons, and some moderate business has been done. Middlebrough No. 3 is being offered at $19.50 ex ship, duty paid, but consumers are slow to take hold, many being adverse to changing their mixtures. It is understood that quite a tonnage of pig iron warrants has been bought for American account, but it is yet an open question whether the buyers will take the profit available from the rise, or will ultimately decide to ship the iron.

Only moderate transactions in steel rails are reported, but it is probable that some important negotiations now pending will be closed at an early date.

There has been quite a good run of contracts for structural material, chiefly for shops and buildings. In bridge material the most important transaction now being closed is for 19,000 tons for the Canadian Pacific Railroad.

In the merchant pipe trade makers are figuring on some good orders for line pipe.

Nova Scotia Trade News.

Halifax, N.S., Oct. 9, 1906.

The hardware trade is now booming and the firms in this city are rushed with orders. During the latter part of the Exhibition, trade commenced to go ahead in good style and it has continued so ever since. From the present outlook this year's Autumn trade promises to be big, as times are good all over the province. Collections are most satisfactory all round and no complaint is heard from any quarter regarding business.

Prices generally have a tendency to advance and already increases are noted in a number of lines. Builders' hardware manufacturers have advanced prices on bronzes and brass goods 11 per cent. Lead is higher, sheet being quoted at $6.50 per roll for three pound and heavier, $6.75 per roll for 2 1-2 pound, and $7 per roll for two pound. Less than full rolls 1-2 cent advance. Rope has also advanced, pure Manila being quoted at 15 1-2c. base, which is 1-2c. increase over last quotation. Ordinary shot has also advanced, and is quoted to-day at $1.67 per bag of 25 pounds. Nails are steady at $2.25 base for wire, and $2.40 base for cut. There is a good demand for powder, but there is no change in the price. Loaded shells (black) are quoted at $1.50 per hundred and smokeless at $2.10.

* * *

Walter B. Reynolds, a former prominent hardware merchant of this city, died last week. He served his time with H. H. Fuller & Co., hardware merchants, and afterwards became a member of the firm of Fraser, Reynolds & Co., and later on became a partner in the firm of W. B. Reynolds & Co. Upon retiring he became traveling representative for a prominent Canadian house, and in this branch of work, he proved his ability becoming one of the most successful men on the road. There were few more popular than Mr. Reynolds and in many portions of the province, news of his death will be heard with very sincere regret. He leaves a widow, three sons, and two daughters.

* * *

George Fitzpatrick, a popular young man of this city, and for years a clerk in the hardware establishment of H. H. Fuller & Co., died at the Sanitorium at Kentville, last week of tuberculosis.

YOU CAN MAKE QUICK SALES

and save much of your valuable time usually taken up in explaining points in the average range which are, for the most part, but theoretical. Show your customers

THE GARNET GOOD CHEER

Its points almost speak for themselves. Argument and explanation are hardly necessary, as the buyer can see for himself, but what you do say about the Garnet

You Can Demonstrate on the Spot

The Semi-Plain Finish. Could anyone wish for anything neater! How much easier it is to keep a nice polish on its plain surface than on the highly ornamented and dust gathering carving of the average range. The neat housekeeper appreciates a neat looking range, and the "Garnet" will immediately catch her eye.

The Removable Nickel. This is a decidedly new feature in range construction, and is another point which will appeal to the housekeeper. No more dull, dingy nickel trimmings, for they can all be removed without turning a bolt, and be polished at a table in the same way as the silverware is taken care of. Then on preserving or washing days or at any time when anything of a mussy nature is to be handled, all nickel may be laid aside for the time and afterwards replaced as bright as ever.

The Fire-box. We have made a special study of fire-box construction and in the "Garnet" it will be found to be as near perfect in operating and lasting qualities as it is possible to make them. Its linings are all cast, and are made with proper allowance for expansion. The size has been duly proportioned to that of the oven, and fuel consumption will therefore be most moderate and satisfactory. For wood burning a 22-inch fire-box is provided.

The Oven. The oven is square, 18 x 18 x 11, and has same dimensions on rack as on bottom, making it equal to all average requirements.

Constructive Quality. Ranges of the Garnet's design and finish cannot possibly be made from other than the highest grade of iron. What better evidence of the quality of material could you have than in the uniformly smooth finish of the castings in this range.

Hardware and Metal Conditions in Manitoba

(Market quotations corrected by telegraph up to 12 a.m. Friday, Oct. 12, 1906.)

Office of HARDWARE AND METAL,
Room 511, Union Bank Building,
Winnipeg, Man.

Lanterns have been advanced and revised prices will be found below. It remains to be seen whether the advance in wholesale prices will have any effect in stopping the severe cutting among the retail trade which has prevailed for some time. A new list in harvest tools will be issued in a few days, but the discounts remain the same. "Copper King" and "Columbian" axes have been advanced in price, but the standard flint edge axes have been reduced. There is a big movement of heavy goods before the close of navigation and general business is reported very active. Money is moving more freely than at this time last year but some alarm is expressed owing to the reports of wheat blockades due to car shortages.

LANTERNS—As noted above, there has been a general advance in lanterns and prices are now quoted as follows: Cold blast, per dozen, $6.50; coppered cold blast, per dozen, $8.50; cold blast dash, per dozen, $8.50.

WIRE—We quote as follows: Barbed wire, 100 lbs., $2.90; plain galvanized, 6 to 8, $3.39; 10, $3.50; 12, $3.10; 13 $3.20; 14, $3.90; 15, $4.45; 16, $4.60; plain twist, $3; staples, $3.50; oiled annealed wire, 10, $2.96; 11, $3.02; 12, $3.10; 13, $3.20; 14, $3.30; 15, $3.45. Annealed wires (unoiled) 10c. less.

HORSESHOES — Quotations are as follows: Iron, No. 0 to No. 1, $4.65; No. 2 and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to No. 1, $5; No. 2 and larger, $4.75.

HORSENAILS — Lists and discounts are quoted as follows: No. 10, 20c.; No. 9, 22c.; No. 8, 24c.; No. 7, 26c.; No. 6, 28c.; No. 5, 32c.; No. 4, 40c., per pound. Discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent., "M" brand and other brands, 55 and 60 per cent. Add 15c. per box.

WIRE NAILS—Steady at $2.60 per keg.

CUT NAILS—Quoted now at $2.70 per keg.

PRESSED SPIKES—Prices are as follows: ¼ x 5 and 6, $4.60; 5-6 x 5, 6 and 7, $4.25; ⅜ by 6, 7 and 8, $4.10; 7-16 x 7 and 9, $4; ½ x 8, 9, 10 and 12, $3.90; ⅝ x 10 and 12, $3.75.

SCREWS—Discounts are as follows: Flat head, iron, bright, 85 and 10 p.c.; round head, iron, 80 p.c.; flat head, brass, 75 and 10 p.c.; round head, brass 70 and 10 p.c.; coach, 70 p.c.

NUTS AND BOLTS — Discounts are unchanged and continue as follows: Bolts, carriage, ⅜ or smaller, 60 and 5; bolts, carriage, 7-16 and up, 55; bolts, machine, ⅜ and under, 55 and 5; bolts, machine, 7-16 and over, 55; bolts, tire, 65; bolt ends, 55; sleigh shoe bolts, 65 and 10; machine screws, 70; plough bolts, 55; square nuts, case lots, 3; square nuts, small lots, 2½; hex nuts, case lots, 3; hex nuts, smaller lots, 2½ p.c.

RIVETS—Quoted now as follows: Iron, 60 and 10; copper, No. 8, 34½; copper, No. 12, 40 p.c.

COIL CHAIN—Unchanged in price. We quote: 3-16 inch, $9.25; 5-16, $5.20; 7-16, $4.45; ⅝, $4.10; ¼, $7.20; ⅜, $4.60; ½, $4.30; ¾, $4.

SHOVELS—Discounts on spades and shovels continue 40 and 5 p.c.

HARVEST TOOLS — Discounts continue 60 and 5 p.c.

AXE HANDLES—Quoted as follows: Turned, s.g. hickory, doz., $3.15; No. 1, $1.90; No. 2, $1.60; octagon, extra, $2.30; No. 1, $1.60.

AXES—As noted above, the price of Copper King and Columbian axes has been reduced, while standard flint edge axes have been advanced. New prices are as follows: Bench axes, 40; broad axes, 25 p.c. discount off list; Royal Oak, per dozen, $6.25; Maple Leaf, $8.25; Model, $8.50; Black Prince, $7.25; Black Diamond, $9.25; Standard flint edge, $8.75; Copper King, $8.25; Columbian, $9.50; handled axes, North Star, $7.75; Black Prince, $9.25; Standard flint edge, $10.75; Copper King, $11 per dozen.

BUTTS—The discount on wrought iron butts is 70 p.c.

CHURNS — The discounts from list continue as before: 45 and 5 per cent.; but the list has been advanced and is now as follows: No. 0, $9; No. 1, $9; No. 2, $10; No. 3, $11; No. 4, $13; No. 5, $16.

CHISELS—Quoted at 70 p.c. off list prices.

AUGER BITS—Discount on "Irwin" bits is 47½ per cent., and on other lines 70 per cent.

BLOCKS—Discount on steel blocks is 35 p.c. off list prices; on wood, 55 p.c.

FITTINGS—Discounts continue as follows: Wrought couplings, 60; nipples, 65 and 10; T's and elbows, 10; malleable bushings, 50; malleable unions, 55 p.c.

GRINDSTONES—As noted last week, the price is now 1½c. per lb., a decline of ¼c.

FORK HANDLES—The discount is 40 p.c. from list prices.

HINGES—The discount on light "T" and strap hinges is 65 p.c. off list prices.

HOOKS—Prices are quoted as follows: Brush hooks, heavy, per doz., $8.75; grass hooks, $1.70.

CLEVISES—Price is now 6½c. per lb.

STOVE PIPES—Quotations are as follows: 6-inch, per 100 feet length, $8.50; 7-inch, $9.25.

DRAW KNIVES—The discount is 70 per cent. from list prices.

RULES—Discount is 50 per cent.

WASHERS—On small quantities the discount is 35 p.c.; on full boxes it is 40 p.c.

WRINGERS—Quotations are: Royal Canadian, $33; B.B., $37.75 per doz.

FILES—Discounts are quoted as follows: Arcade, 75; Black Diamond, 60; Nicholson's, 62½ p.c.

BUILDING PAPER — Prices are as follows: Plain, Joliette, 40c.; Cyclone, 55c.; Anchor, 55c.; pure fibre, 60c.; tarred, Joliette, 65c.; Cyclone, 80c.; Anchor, 65c.; pure fibre, 80c.

TINWARE, ETC.—Quoted as follows: Pressed, retinned, 70 and 10; pressed, plain, 75 and 2½; pieced, 30; japanned ware, 37½; enamelled ware, Famous, 50; Imperial, 50 and 10; Imperial, one coat, 60; Premier, 50; Colonial, 50 and 10; Royal, 60; Victoria, 45; white 45; Diamond, 50; Granite, 60 p.c.

CORDAGE—Manila rope has been advanced 50 cents per cwt. and quotations are now as follows: Rope, sisal, 7-16 and larger, basis, $11.25; Manila, 7-16 and larger, basis, $16.25; Lathyarn, $11.25; cotton rope, per lb., 21c.

SOLDER—Quoted at 27c. per pound. Block tin is quoted at 45c. per pound.

VISES — Prices are quoted as follows: "Peter Wright," 30 to 34, 14½c.; 35 to 39, 14c.; 48 and larger, 13½c. per lb.

ANVILS—"Peter Wright" anvils are selling at 11c. per lb.

CROWBARS—Quoted now at 4c. per lb.

POWER HORSE CLIPPERS — The "1902" power horse clipper is selling at $12, and the "Twentieth Century" at $6. The "1904" sheep shearing machines are sold at $13.60.

AMMUNITION, ETC.—As noted last week, shot has been advanced 25c. per cwt. We still quote: Cartridges, Dominion R. F., 50 and 5; Dominion, C. F., pistol, 30; military, 20; American R. F., 33½; C. F., pistol, 5 p.c.; C. F., military, 10 p.c. advance. Loaded shells: Dominion Eley's and Kynoch's soft, 12 gauge, black, $16.50; chilled, 12 gauge, $17.50; soft, 10 gauge, $19.50; chilled, 10 gauge, $20.50. Shot, ordinary, per 100 lbs., $7.25; chilled, $7.75; powder, F.F., keg, Hamilton, $4.75; F.F.G., Dupont's, $5.

IRON AND STEEL—Prices are Bar iron (basis, $2.50; Swedish iron (basis), $4.75; sleigh shoe steel, $2.75; spring steel, $3.25; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $9.50; Jessop, $13.

SHEET ZINC — The price is now $8.50 for cask lots, and $9 for broken lots.

PIG LEAD—The high price of $5.60 per cwt. is still firmly maintained.

AXLE GREASE—"Mica" axle grease is quoted at $2.75 per case, and "Diamond" at $1.60.

BLACK IRON PIPE—Quotations are: ¼ inch, $2.45; ⅜, $2.85; ½, $3.15; ¾, $4; 1, $5.75; 1¼, $7.85; 1½, $9.40; 2, $12.90.

LEAD PIPE—The price has been advanced to $7.80.

GALVANIZED IRON — Quotations are: Apollo, 16 gauge, $3.90; 18 and 20, $4.10; 22 and 24, $4.45; 26, $4.40; 28, $4.65; 30 gauge or 10¾ oz., $4.95; Queen's Head, 24, $4.65; 26, $4.65; 28, $4.90.

TIN PLATES—We now quote as follows: IC charcoal, 20 x 28, box, $9.50; IX charcoal, 20 x 28, $11.50; XXI charcoal, 20 x 28, $13.50.

TERNE PLATES—Quoted at $9.

CANADA PLATES—Prices have been

steady since the recent decline. We quote: Canada plate, 18 x 21, 18 x 24, $3.15; 20 x 28, $3.40; full polished, $3.90.

BLACK SHEETS—Prices are: 10 to 16 gauge, 100 lbs., $3.50; 18 to 22, $3.75; 24, $3.90; 26, $4; 28, $4.10.

PETROLEUM AND GASOLINE — Prices are quoted as follows: Silver Star, per gal., 21c.; Sunlight, 22c.; Eocene, 24c.; Pennoline, 25c.; Crystal Spray, 24c.; Silver Light, 22c.; gasoline, 70-72 (engine), 25½c., in barrels, f.o.b. Winnipeg.

PAINTS, OILS AND TURPENTINE — White lead, pure, $7; bladder putty in bbls., 2½c.; in kegs, 3¾c.; turpentine, pure, in barrels, 97c.; less than barrel lots, 92c.; linseed oil, raw, 64c.; boiled, 67c.

WINDOW GLASS—We quote: 16-oz. O.G., single, in 50-ft. boxes—16 to 25 united inches, $2.25; 26 to 40, $2.40; 16-oz. O.G., single, in 100-ft. cases — 16 to 25 united inches, $4; 26 to 40, $4.52; 41 to 50, $4.75; 50 to 60, $5.25; 61 to 70, $5.75. 21-oz. C.S., double, in 100-ft. cases—26 to 40 united inches, $7.35; 41 to 50, $8.40; 51 to 60, $9.45; 61 to 70, $10.50; 71 to 80, $11.55; 81 to 85, $12.60; 86 to 90, $14.75; 91 to 95, $17.30.

WESTERN NEWS.

The Moose Jaw Hardware Co., of Moose Jaw, Sask., have installed a drinking fountain in their store. It was very popular during the hot days in August and September.

Skelling & Jackson, of Neepawa, Man. have made large extensions to their hardware store, building around their old premises until they have now what is practically a new store.

H. V. Lawlor, "English" paint specialist for the Marshall-Wells Co., Winnipeg, called at the Winnipeg office of Hardware and Metal last week before starting west on an extended trip through Saskatchewan and Alberta.

J. A. Lindsay, of Winnipeg, formerly president of the Retail Hardware and Stove Dealers' Association of Western Canada, is in Scotland at present visiting his old home. Mr. Lindsay has been in poor health for some months past and his friends hope the trip will prove beneficial.

A. Robert Munro, managing director of the new Glasgow, N.S., works of the Munro Wire Works, was a caller at the Winnipeg office of Hardware and Metal last week. Mr. Munro came west with the Canadian manufacturers' party and in company with his brother, Jas. Munro, of Winnipeg, took in the manufacturers' trip to the coast. He returns east this week.

A. J. Falconer, of Deloraine, Man., president of the Retail Hardware and Stove Dealers' Association of Western Canada, was in Winnipeg last week. In conversation with Hardware and Metal he said that business conditions in Deloraine are good. The crop has averaged 20 bushels to the acre, the grain is grading high and about 90 per cent. has been threshed. He considers the outlook good.

Alderman Hopkins, of Saskatoon, in addition to conducting a live hardware business is an enthusiastic farmer. He secured splendid results from his farm lands this year. He had 200 acres of wheat land which yielded 40 bushels to the acre, and 125 acres in oats which yielded close to the 100-bushel mark, according to the Saskatoon Phoenix. Mr. Hopkins also has a half interest in another big block of land and expects to have over 1,000 acres under crop next year.

TRAVELER WANTED.

WANTED by manufacturer of high-grade paints, travelling salesman with connection and experience for Ontario and Quebec, give all particulars and salary expected. Address "Traveller," care Hardware and Metal, Montreal.

BRONZING SEASON

means bronze business, and the question you should ask yourself is: "Am I prepared to take care of this business?"

We have a large stock of Bronzing Materials—Gold, Aluminum and Colored Bronzes, Flitters, Metallics, Banana Oil, Gold Leaf Substitute, on which we would be pleased to quote you for immediate delivery.

WINNIPEG, CANADA

QUIET SUMMER'S TRADE IN BRITAIN

London, Eng., Sept. 29, 1906.

Summer is now quickly drawing to a close, and with its departure disappears also much of that irregularity and uncertainty so characteristic of the vacation season. It is a long time since Great Britain has enjoyed such a long sequence of sunny weeks. It has been an ideal holiday Summer, and all the world seems to have been on travel. But, unfortunately, such merry times bring little money to the retail hardwareman. To him the opening up of a new season is more than welcome. He will require to do good business indeed, if he is to make up for a bad Spring and a quiet Summer.

Trading Direct with Consumers.

The English hardwareman's lot is scarcely an enviable one, for probably in no other trade are there so many adverse conditions to combat. There is a superabundance of retailers throughout the Old Country, and competition is consequently very keen. Then again, the range of goods, which are expected to be carried, are so great and so varied that to buy rightly and to sell seasonably becomes a high art. It is the easiest thing imaginable to overcrowd one's store and it must be confessed that the English hardwareman has not yet nearly grasped the importance of periodical bargain sales for the clearance of old stock. A third hostile condition rests in the ever increasing burden of advancing rates and taxes, which are characteristic of almost all the English leading towns and cities. Yet another evil arises from the fact that some manufacturers are showing a tendency to sell directly to the public. This movement is at present small, but the chances for its gaining ground, at any rate in some lines of hardware, are by no means insignificant. It is not for a moment suggested that things will arrive at such a point as to put the retailer over here out of business, but it is inferred that before long many manufacturers will find that, since they have to do the best part of the trade promoting work themselves, by advertising, circularizing, etc., they may just as well invite the public to buy direct, and leave the hardware retailers to catch such custom as they can. One may pick up any English daily or weekly newspaper and find therein manufacturers making direct appeal to consumers. As to factors, or middlemen, already there are numerous English manufacturers who give them scant encouragement, arguing that these factors distribute too many lines to allow of their giving each one that individual attention which is necessary to secure a volume of business large enough to cope with competition. Often the manufacturer feels that the extra cost of distributing his products without regard to middlemen is more than repaid by the consequent extra sales.

One cannot help thinking that it is this inclination of producers to overlook middlemen, and in some cases retailers themselves, that accounts in part for the curious position in which British trade now stands. While board of trade statistics reveal conclusively that English commerce is growing in prosperity month after month, hardware retailers declare that they seem to be receiving a mighty small portion of that prosperity. Presumably it is manufacturers and their employes who are making money.

Exports Indicate Prosperity.

The total value of exports of all kinds from Britain during August of this year was £33,492,614 as against £29,517,836 for the same month of last year; for the eight months, January to August, 1906, the total exports were £247,529,092, as against £213,045,108 for the same period of 1905. During these eight months of 1906 Canada has bought from Britain, cutlery to the value of £59,017, which is £3,072 more than during the same period of 1905; of pig iron she has bought from Britain £32,959, which is £3,623 more than 1905; of tinplates Canada has bought £3,623 less than in 1905, although during August she purchased about £400 more than in August, 1905. In iron railroad rails there has also been a falling off as well as in galvanized sheets. These figures, taken altogether, are certainly very wonderful. One must not lose sight, however, of the fact that Britain's commercial rivals, more particularly in the hardware and allied trades, are equally, if not more, prosperous and are making their competition more keenly felt the world over month after month.

British manufacturers have got to respond to this competition with a wholehearted determination, and if reference in this correspondence to the shortcomings of the British consular and commercial service is rendered stale through constant repetition in the press on both sides of the Atlantic, one must plead, without excuse or apology, that it is only by constantly reminding those in authority what they are expected to do that the desired end will be attained. England wants a thorough system of commercial agents working methodically and solely in the interests of the country under a competent chief. England also wants a Minister of Commerce. Much as has been written about the half-hearted manner in which British manufacturers tackle the foreign markets, but it would seem that many of the writers have forgotten how small is the encouragement given to manufacturers in Britain by their Government, and how difficult it is for them to obtain accurate knowledge of what these foreign markets require. On the other hand merchants and manufacturers themselves could well afford to show a more progressive spirit than they do in their attempts to study other than the domestic market. For instance, even though a man could not read more than a dozen words of German or a dozen words of French, by merely looking through the advertisements of, say, a French or German hardware trade paper, he could see for himself what styles and patterns of goods are being sold. Even when exploiting the markets where English is spoken, English manufacturers have been known to show, and that not infrequently, an undue hesitation in changing their patterns, or their sizes, or their packing.

Brass Trade Looking Brighter.

This reference to patterns at once recalls an interesting reference to Canadian manufacturers; which appeared in one of the trade journals on this side. It says: "We would point out that within our knowledge the ornamental work executed by a well-known Canadian house in metal castings is well adapted to the embellishments of hotel saloon bars, etc., if properly pushed in this country." This authoritative statement, curiously enough, comes just at a time when the Birmingham brass trade with Canada is looking brighter than for some while past. In fact, Birmingham hardware manufacturers in most lines are getting busy just now, although they are paying high prices for raw material without being able to realize anything extra in the finished articles. Incidentally it might be mentioned that there is no truth in the statement that a steel tube combination is in course of formation over here. The truth of the matter is that the Tube Association, which eighteen months ago ceased advising its members as to the discounts to which they were to adhere, has begun to reissue its list, and this fact by some extraordinary process has been magnified into a combination. The association work applies to all kinds of tubes for home and export markets except boiler tubes. An association of iron and steel, but not brass, hinges, has also been formed.

Large Movement of Cement.

It looks as though the cement trade on this side really is recovering from the

depression of the past few months. Whilst the San Francisco disaster did bring unexpected orders to manufacturers, there was a noticeable improvement even before that time, and this happy state of affairs has continued ever since. During 1905 the total shipments from the United Kingdom to the United States amounted to 11,590 tons, to British South Africa 85,019 tons, to British East Indies 97,864 tons. During the first seven months of 1906 the total exports were 358,551 tons, as against 456,558 tons for the whole of 1905, of which 60,932 tons went to America, 48,638 tons to British South Africa, and 68,448 tons to the British East Indies. The annual production of Portland cement in Great Britain is estimated at 3,000,000 tons.

The brick and pottery trades are still improving and Staffordshire manufacturers speak more hopefully of the outlook. The engineering trade is on a very satisfactory footing and Scottish shipbuilders are booking a fair number of new orders. During August forty-one vessels of 58,645 tons were launched, total for the eight months now being 201 vessels of 416,311 tons. The Sheffield cutlery and plate trade is experiencing a welcome revival, caused chiefly by a number of orders for export, of which Canada has had a good share. Unfortunately, several strikes are threatened in various parts of Britain. 10,000 Clyde boiler makers are going on strike in two or three days' time, and in both Scottish and Welsh collieries strikes, which it seems impossible to prevent under present circumstances, are threatened.

British Trade Gossip.

On September 15 there was opened the Engineering and Machinery Exhibition in London. Although there were only about 180 exhibitors, occupying 247 stands, the machinery display was thoroughly representative of modern invention, and the lectures include such interesting topics as "Sewage disposal," "Development of the Steam Turbine," "Sanitary Appliance as Applied to Marine Engineering," "Gas Engines," and "Steam Pipes and their Explosion." The exhibition continues till well on into October.

At the ninth annual meeting of the British Empire League, Lieut.-Col. George Denison, president of the Canadian branch, informed the meeting that the present prosperity of Canada was due to the adoption of a protective policy and that a man might go through Canada from end to end and he would hardly find a native-born Canadian who was a free-trader. He assured the league also that pauperism "was even more scarce."

A curious question in regard to the prosecution of a Toronto house for the illegal use of the word "Sheffield" has arisen, a question of considerable importance to British manufacturers generally, namely, who ought to be responsible for the expenses incurred in prosecuting the offenders? Of course, the Cutlers' Co., of Sheffield, who did the prosecuting, are legally responsible, but the fact remains that the company, now divested of all its ancient power and wealth, can ill afford to part with the several hundreds of pounds incurred. Moreover, its membership only includes about thirty-three members, some of whom are not, strictly speaking, cutlery manufacturers. It seems only fair that those Sheffield cutlers outside the company, to whom the fraudulent use of the word "Sheffield" was likely to do harm, should share in the cost of prosecution. Whether they will do so remains to be seen.

O. P.

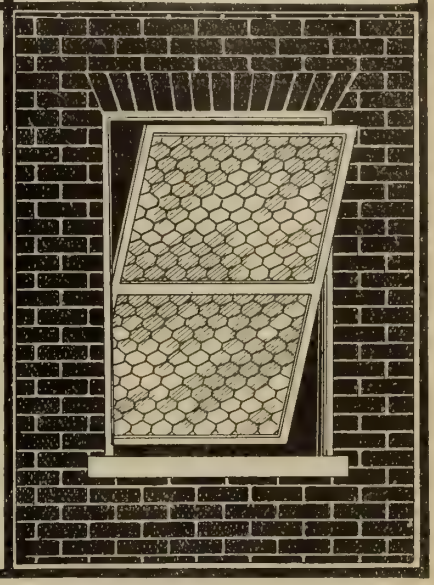
FIRE-PROOF GLASS WINDOWS THAT ARE FIRE-PROOF

These windows in a fire-proof building, complete the security, and in any building will thoroughly prevent the spread and advancement of the fiercest flames.

Better than iron shutters (even if they happened to be closed at the needed time); fire-proof glass remains intact, resisting both the intense heat of the fire and the action of water.

Many practical tests have proved it's efficiency.

Used in conjunction with our hollow sheet-metal frames and other fire-proof fittings, it gives the most perfect protection available.



It's adoption lessens insurance rates.

If you want to know more about "fire-proof windows," write us, it's an interesting subject.

...THE...

Metallic Roofing Co., LIMITED,

TORONTO, Canada.

Western Canada Factory, 797 Notre Dame Ave., Winnipeg, Man.

A COIL CHAIN PROPOSITION.

In the present stringent condition of the market in coil chain when it is next to impossible to obtain early deliveries on specified grades, it will be interesting to note that a well known English firm is beginning to pay more particular attention to this end of their Canadian business. John Shaw & Sons, Wolverhampton, England, have just completed arrangements with one of the most reliable Cradley Heath makers, to supply chain of a special grade, for Canadian consumption. This will be made of a particular grade of soft steel, and, owing to the prejudice which has up to the present time existed in the Canadian market, against English chain, special offers will be made to give entire satisfaction with this new brand. The firm's Canadian representative, J. H. Roper, Montreal, is now quoting to the trade, and is booking some good orders.

MECHANICS' SUPPLY CO. ENLARGING.

As a result of increased business, the Mechanics' Supply Co., Quebec, are making plans to provide for the future increase trade, and have let contracts for the enlargement of their present commodious and handsome buildings at 80-90 St. Paul street. W. H. Wiggs, the manager of the company, states that two flats 50 x 50 will be added during the coming Winter to the warehouse capacity of his company, and another flat will double their present office space. Mr. Wiggs has every confidence in the growth and development of Quebec as a business centre.

FOUNDRY AND METAL INDUSTRIES

J. I. MacCracken, of Ottawa, will erect an iron clad foundry at that city.

An addition is to be made to the foundry department of the Nelson, B.C., Iron Works, providing 5,000 square feet more floor space.

The Stanley Smelting Works, whose mines and plant are located at Bannockburn, Ont., are disposing of stock worth $500,000 to increase the producing capacity of their works.

For the eight months ended July 31 the Dominion Copper Company smelted 133,084 tons of ore, producing 3,200 tons of matte and the net profit for the eight months was $139,144.

I. E. Shantz & Company's foundry, of Berlin, Ont., was in danger of being destroyed by fire on Wednesday last, but the efforts of the fire department prevented the flames from spreading to the main building. The molding shop suffered loss of $2,000, covered by insurance.

The Canadian Northern Railway Company are asking Toronto for land in Ashbridge's Bay as a site for blast furnaces, which they intend to erect in the near future in conjunction with the entrance of their railway into the city. The company require at least fifty acres of land for their enterprise.

Platinum has been discovered at many points in Canada—in the sands of the North Saskatchewan River in Alberta; in British Columbia; in the Cariboo region; in the copper sulphide of the Yale district; in the copper nickel ores of Sudbury, Ontario; and on the south bank of the St. Lawrence River, in the Eastern Townships of Quebec. Hitherto, however, Canada's contribution to the world's supply has been insignificant.

While the reports from the subsidiary companies of the United States Steel Corporation have not yet been received at the headquarters of the corporation, steel manufacturers estimate the earnings for the quarter ended September 30 at between $39,000,000 and $40,000,000. One steel representative figures they will be around $39,500,000, or about $600,000 lower than they were in the second quarter of the year. The slight falling off in the third quarter is due, as generally known, to the hot weather, which always retards the operations of the steel mills and furnaces.

The United States Steel Corporation is forced to the constant expenditure of millions of dollars in order to keep pace with its business. On October 1 the Steel Corporation had, in all, 94 completed furnaces, of which all but seven were in operation. Notwithstanding the fact that it now has practically 97 per cent. of its active blast furnace capacity blowing, it will erect four large blast furnaces in the Pittsburg district at once. Six other furnaces now are in course of erection, four at Gary, Ind., the new $75,000,000 steel town, by the Indiana Steel Co., with a capacity of 600,000 tons, and two at Rankin, Pa., with an annual capacity of about 430,000 tons. All these furnaces will make a specialty of pig iron.

Week in and week out we have been telling you about the advantages of our *Agency Proposition*—the *satisfaction*, the *good business*, the *profit*, and the *prestige* in handling *S-W. Products*. We've told you, too, about our *advertising* and *selling helps;* how we put our strength behind our agent and through co-operation brought him every time two dollars in trade to his one.

Well, then, with these advantages constantly before you, if we haven't heard from you yet, don't you think it's about time to write?

Our *Agency Proposition* will prove the *best* proposition you ever had put up to you.

"GALVANIZING" WITH ZINC-ALUMINIUM ALLOY.

In order to get a "galvanizing" bath that shall be quite liquid and yield a brighter surface than is attainable by the use of zinc alone, Guhrs uses an alloy composed of about one-half of one per cent. of aluminium, and one-fifth per cent. of bismuth with the zinc. In order to get this alloy in proper state of diffusion it is necessary to melt the aluminium at the same time with the zinc: the bismuth can be melted in at the same time if desired. It is claimed that simultaneous melting of the zinc and the aluminium prevents the formation of oxide and of hard dross. In order to effect this desirable simultaneous melting of these two metals, it is best to prepare beforehand an alloy of zinc and aluminium, or of these with bismuth, in stronger proportions of aluminium than is desired in the bath—for instance, 20 parts of aluminium and the same of zinc, with five of bismuth, well stirred while melting. This "mix" is to be melted with the rest of the zinc, in such proportions as will give to the resulting melted mass the requisite proportions for the bath.

A higher percentage of aluminium can be used than one-half (one two-hundredths of the entire weight), but it effects no improvement above that brought about by the use of the smaller quantity. The bismuth may be used in even smaller quantities than the above-quoted one-fifth of one per cent.

PAINT AND OIL MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, October 12, 1906.

A continuance of storms in the south, coupled with the difficulty of obtaining labor in the pine belt, has resulted in very seriously limiting the supply of turpentine, on the local market. In consequence, a sharp advance in price is this week recorded. The quotation generally given is 91c. for single barrels, but considering present conditions at the producing centres, this is away low, and many dealers are asking and getting 93c.

Linseed oil is firmly held at last week's prices, with a good demand for manufacturing and painting purposes.

White lead steadily maintains the recently advanced price, and, judging from the very rapid advances in primary markets, there will be an even higher level struck before long. During the present week, pig lead has gone up 20c. per hundred, and has reached the highest price ever recorded.

The various manufacturers report an overwhelming pressure on the putty department, and general business is extremely brisk. Indeed, it is doubtful if all shipments can be cleared up before the close of navigation.

LINSEED OIL—Firmer conditions now prevail. We are quoting as follows: Raw, 1 to 4 barrels, 52c.; 5 to 9 barrels, 51c.; boiled, 1 to 4 barrels, 55c.; 5 to 9 barrels, 54c.

TURPENTINE—Still further advances have taken place this week and close followers of the market are of the opinion that turpentine at a dollar a gallon is a possibility of the near future. We quote: Single barrel, 90c. per gal.; two barrels or over, 89c. per gal.; for smaller quantities than barrels, 5c. extra per gal. is charged. Standard gallon is 8.40 lbs., f.o.b. point of shipment, net 30 days.

GROUND WHITE LEAD—We quote: Best brand Government standards, $6.50 to $6.75; No. 1, $6.15 to $6.40; No. 2, $5.80 to $6.15; No. 3, $5.55 to $5.80, all f.o.b. Montreal.

DRY WHITE ZINC—The market remains unchanged at following prices: Red seal, 7c. to 8c.; French V.M., 6c. to 7c.; Lehigh, 5c. to 6c.

WHITE ZINC (ground in oil) — We quote: Pure, 8c. to 9c.; No. 1, 6½c. to 7½c.; No. 2, 5¼c. to 6¼c.

PUTTY—A great demand exists for this product. We quote prices: Pure linseed oil, $1.75 to $1.85; bulk in barrels, $1.50; in 2-lb. irons, $1.80; in tins, $1.90; bladdered putty in barrels, $1.75.

ORANGE MINERAL—We quote as follows: Casks, 8c.; 100-lb. kegs, 8½c.

RED LEAD—Conditions are unchanged and we still quote: Genuine red lead in casks, $6; in 100-lb. kegs, $6.25; in less quantities at the rate of $7 per 100 lbs.; No. 1 red lead, casks, $5.75; kegs $6, and smaller quantities, $6.75.

GUM SHELLAC — Primary markets are constantly advancing, but Canadian jobbers quote the following prices: Fine orange, 60c. per lb.; med. orange, 55c. per lb.; bleached shellac (white) 65c. per lb.

SHELLAC VARNISH—Firm conditions continue, and there will no doubt be an advance before long. Meanwhile we quote: Pure white, $2.90 to $2.95; pure orange, $2.70 to $2.75; No. 1 orange, $2.50 to $2.55.

MIXED PAINTS—Prices range from $1.20 to $1.40 per gallon.

CASTOR OIL—We still quote as follows: Firsts in cases, 8½c.; in barrels, 8c.; seconds in cases, 8c.; in barrels, 7½c.

REFINED PETROLEUM — We quote as follows: American water white, 17c.; Canadian prime white, 15½c.; astral, 20c., ex warehouse.

GASOLINE—The ruling quotation at present is 24c. in bbls.

BENZINE—There is nothing new this week and we are still quoting 20¼c. in barrels.

WINDOW GLASS—Business continues large. We quote: First break, 50 feet, $1.85; second break, 50 feet, $1.95; first break, 100 feet, $3.50; second break, 100 feet, $3.70; third break, 100 feet, $4.25; fourth break, 100 feet, $4.45; fifth break, 100 feet, $4.70; sixth break, 100 feet, $5.25. Diamond Star: First break, 50 feet, $2.30; second break, 50 feet, $2.50; first break, 100 feet, $4.40; second break, $4.80; third break, 100 feet, $5.75; fourth break, 100 feet, $6.50; fifth break, 100 feet, $7.50; sixth break, 100 feet, $7.50; seventh break, 100 feet, $8; eighth break, 100 feet, $9. Double Diamond: First break, 50 feet, $3.45; second break, 50 feet, $3.75; first break, 100 feet, $6.75; second break, 100 feet, $7.25; third break, 100 feet, $8.75; fourth break, 100 feet, $10; fifth break, 100 feet, $11.50; sixth break, 100 feet, $12.50; seventh break, 100 feet, $14; eighth break, 100 feet, $16.50; ninth break, 100 feet, $18; tenth break, 100 feet, $20; eleventh break, 100 feet, $24; twelfth break, 100 feet, $28.50.

Fire destroyed the paint factory of the Wadsworth-Howland Co., Chicago, recently. The loss is estimated at $100,000, with insurance of $68,250. A new factory will be erected at once.

PAINT, OIL AND BRUSH TRADES

SAFE HANDLING OF AN OIL LAMP.

All the facts of the chemistry of fire, and of explosion as well, can be told in a simple story, says the Ohio State Fire Marshal, of what occurs in the light of an oil lamp. While the lamp burns the oil slowly disappears, and there is an apparent but not a real loss of matter. Kerosene, being the thinnest of safe oils, is drawn rapidly by capillary attraction to the top of a wick. When a match flame is touched to the oil in the wick's top its heat liberates the atoms of carbon and hydrogen, of which the oil is composed, and permits them to unite with the oxygen of the air, for which they have a greater affection than they have for each other.

Each carbon atom, being a bigamist seizes two atoms of oxygen to form a carbonic acid gas, while each pair of hydrogen atoms take one of oxygen to form water, which is carried out of the chimney as vapor. Estimated by weight, instead of numerically by atoms, 1 1-3 grains of oxygen combine with 1 grain of carbon to make 3 1-3 grains of carbonic acid and 1 grain of hydrogen united with 8 grains of oxygen to make 9 grains of water. Gunpowder and the high explosives have constituents which furnish oxygen enough to burn them instantly in the absence of aid when heat is furnished by a spark, flame or blow. Guncotton is 60 per cent. oxygen.

The chimney forces the current of fresh air from below, caused by the rising of the heated air within it, to pass close to the flame so that it can be robbed of its oxygen. The heat is lost energy. Light is produced by the particles of carbon becoming incandescent before they are consumed. Coal oil, which is above the state requirement that it shall not give off a vapor which will ignite from a flame until it is 120 degrees F., burns with a light that is almost white. If it has dropped below the test, as it will if stored for a few months, it burns yellower. These facts apply in a general way to the combustion of all sorts of material.

In Ohio, where the "flashing test" is 10 degrees higher than in any other state, a proper lamp in careful, intelligent hands is safe enough—safer than a candle. To raise the test would be to lessen the brilliancy of the light while adding to its cost. It is the "fool-killer" rather than the legislator who is needed to lessen accidents from kerosene lamps. When the light is put out the wick should be lowered from the top of the tube to prevent oil being drawn into the burner.

In low test oils the heat transmitted by the metal warms the oil to a point at which it gives off an inflammable vapor which forms under pressure in the globe. A burner which is kept bright radiates heat, while a dirty one conducts the heat to the lamp. If the wick is too small flame will travel down the tube; if there is a leak at the collar escaping gas ignites; and if the burner is removed for the purpose of filling it, after the lamp has been burning, the gas within the globe expands and may reach a nearby light. Air one-eighth oil vapor will explode if it touches a flame.

Most accidents are from dropping or upsetting the lamp. A lamp of glass should weigh one pound for each pint it will hold, and its foot should be broader than its bowl and heavier. Metal lamps are not liable to break, but they heat the oil more. A lamp should not be filled within fifteen feet of any blaze, and the oil should be kept in a cool place always.

ALCOHOL FOR INDUSTRIAL PURPOSES.

Dr. W. P. Cohoe, a professor of chemistry, has prepared a paper in which he points out that "free" alcohol for industrial purposes would be a boon to many Canadian industries. He details at some length the uses to which denatured alcohol may be put, including making finish varnishes, lacquers, stains, paints, enamels, etc., soap manufacture, hat-making, celluloid, xylonite, ether, chloroform, iodoform, fulmination of smokeless powder and other explosives, preparation of solid medicinal extracts, medicaments, fine chemicals, dissolving dyes and colors, making photographic plates, making linoleum, lotions, liniments, incandescent lamp filaments, piano making, manufacturing aniline and other dyes, silk and embroidery manufactures, fireworks, plant washes, insecticides, cleaning paint, manufacture of rubber, manufacture of steel pans, making blacking and leather dressings, silvering mirrors, corset making, making sheep dips, preparing surgical dressings, oil refining, electrotyping, making inks, engraving, oil gas generators and various other miscellaneous manufacturing. Broadly speaking, he says, alcohol is used as a solvent or medium, as a reagent or raw material from which other products are made, and for purposes of heat, light and power.

NO WONDER

there has been such an increase in ELASTILITE VARNISH sales. Nothing remarkable about it though when you consider the quality of the varnish at such a reasonable price.

In tins only from ½ pints to 1 gallons. For outside or inside. "Wears on the job, not off it."

(Atlantic Avenue) TORONTO

WE OWN AND CONTROL FOR THE DOMINION OF CANADA THE FAMOUS "AMBERITE" BRAND OF VARNISH.

WIDELY SOLD IN CANADA AND THE MOST SATISFACTORY VARNISH MADE ANYWHERE.

THE CANADA PAINT COMPANY, LIMITED

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, October 12, 1906.

Turpentine made the predicted jump last week and is being held quite firm now at 93c. to 94c., an advance of about four cents. In the south the market is firm, but further advances talked of have not yet materialized. The market is very unsettled just now and as stocks are light still higher prices may develop during the coming fortnight. Linseed oil remains stationary.

White lead is firm and there is no shading of recent advanced quotations. In fact shrewd market observers are predicting still further increases on account of the scarcity of stock and the record price to which pig lead has risen.

Trade generally is picking up on account of the advent of colder weather. Putty is in brisk demand, particularly in the better grades made of pure oil and whiting.

WHITE LEAD — Ex Toronto, pure white, $6.55; No. 1, $6.17½; No. 2, $5.80; No. 3, $5.55; No. 4, $5.30 in packages of 25 pounds and upwards; 1-2c. per pound extra will be charged for 12 1-2 pound packages; genuine dry white lead in casks, $5.40.

RED LEAD—Genuine in casks of 500 lbs., $5.75; ditto., in kegs of 100 lbs., $6.60; No. 1 in casks of 500 lbs., $5.75; ditto., in kegs of 100 lbs., $6.

DRY WHITE ZINC—In casks, 7c.; in 100 lbs., 7 1-2c.; No. 1, in casks, 6c.; in 100 lbs., 6 1-2c.

WHITE ZINC (ground in oil)—In 25-lb. irons, 8c.; in 12 1-2 lbs., 8 1-2c.

SHINGLE STAIN—In 5-gallon lots, 75c. to 90c. per gallon.

PARIS WHITE—90c. to $1 per 100 pounds.

WHITING—60c. to $1 per 100 lbs. Gilders' whiting, 75c.

SHELLAC VARNISH—Pure orange in barrels, $2.80; white, $2.90 per barrel; No. 1 (orange) $2.25.

LINSEED OIL—Our quotations are: Raw, 1 to 4 barrels, 54c.; 5 to 9 barrels, 53c.; boiled, 1 to 4 barrels, 51c.; 5 to 9 barrels, 56c. Toronto, Hamilton, London and Guelph; net 30 days. Advance of 2c. for delivery to outside points.

TURPENTINE—Single barrels, 94c.; 2 to 4 barrels, 93c.; f.o.b. point of shipment, net 30 days. Less than barrels, 98c. per gallon.

GLUES—Broken sheet, in 200-lb. barrels, 5c. to 25c. per lb.; cabinet glue, in barrels, 11 1-2c. to 12c.; emery glue, in barrels, 15c.; bookbinders' ground, 11 1-2c.; finest American white, 19c. per lb.; No. 1 American white, 15c. per lb.

PUTTY—Ordinary, bladders in barrels, $1.80; pure linseed oil, $2 to $2.25, bulk, in 800-lb. casks, $1.70; pure, $2; 100-lb. kegs, 25c. extra.

LIQUID PAINTS—Pure, $1.20 to $1.35 per gallon; No. 1, $1.10 per gallon.

BARN PAINTS—70c. to 80c.

BRIDGE PAINTS—75c. to $1.

CASTOR OIL—English, in cases, 9 1-2c. to 10c. per lb., and 11c. for single tins.

REFINED PETROLEUM — Dealers are stocking up heavily for the Winter. We still quote: Canadian prime white, 14c.; water white, 16c.; American water white, 16c. to 18c. ex warehouse.

CRUDE PETROLEUM — We quote: Canadian, $1.32; Pennsylvania, $1.58; Ohio, 96c.

NEW PAINT FACTORY.

The Blanchite Process Paint Co., 785 King street west, Toronto, a purely Canadian concern, are introducing into Canada a new process of paint manufacture for which they have control of the entire rights for the Dominion.

"Blanchite products are the first paints and enamels made containing no white lead," said B. M. Armstrong, jr, secretary of the new company, to Hardware and Metal. The discovery of a process to do away with the use of white lead in paint products has been the aim of all paint manufacturers for years. The white lead's only use is as a covering medium. Its disadvantages have been proven to be that after the linseed oil in paint has oxidized the disintegrating atmospheric influences cause the white lead to pulverize and become useless as a covering. The inventor of Blanchite is the first scientist or chemist to discover an ingredient superior to white lead, and has overcome the other difficulty by the discovery of a process for oxidizing all oils."

"The success the New York company, which first placed this product on the market, has been remarkable, as they have won practically every large competition entered into in the last three years, the most striking instances being the winning of the New York subway contracts for both paints and enamels in open competition with over fifty of the leading paints made in the United States and Europe, in a test which lasted for over ten months, and their subsequent adoption and use by the chief engineer and the Rapid Transit Commissioners of New York. Blanchite has also been adopted by several of the largest transatlantic lines, and by many of the best known architects, decorators and contractors of New York, where the most enduring and finest decorative work had to be done. In England, Blanchite has also met with good success."

The factory of the Canadian Co. is located at Toronto, and will be in active operation about November 1. The machinery will be the most specialized and most up-to-date that can be obtained, and altogether the plant will be a creditable acquisition to the growing industries of Toronto.

CANADIAN LINSEED WANTED.

British importers of linseed would welcome Canadian competition with the Argentine, Indian, and foreign supplies, says a British exchange. Until the Canadian production of flaxseed exceeds a million bushels, and it is now little more than half that amount, there is no possibility of Canada becoming an exporter of seed to the British market.

BUILDING AND INDUSTRIAL NEWS

HARDWARE AND METAL would be pleased to receive from any authoritative source building and industrial news of any sort, the formation or incorporation of companies, establishment or enlargement of mills, factories, foundries or other works, railway or mining news. All correspondence will be treated as confidential when desired.

The Montreal Steel Co. will increase their capital by $500,000.

The Berlin Rubber Co., Berlin, Ont., will establish a branch at Calgary, Alta.

The Dominion Steam Heating Co. propose to erect a large plant at Galt, Ont.

Allis-Chalmers-Bullock, Limited, of Montreal, will largely increase their plant.

The Alberta Biscuit Co. will erect a factory at Calgary, Alta., to cost about $55,000.

The Seaman Kent Co., of Meaford and Toronto, will erect a factory at Winnipeg, Man.

The Canadian Bridge Co., of Walkerville, Ont., are building extensive additions to their shops.

Hastings has voted to give the Peterborough Boiler & Radiator Co. a bonus of $5,000 and exemption from taxes for ten years.

The Manufacturers' Gas Co. have struck another gusher near Selkirk, Ont., the flow is said to exceed 1,500,000 feet per day.

The Canadian Pacific Railway Co. will build another big extension to the Angus shops at Montreal to cost about $70,000. The new building will be 672 x 100 feet.

The Canadian Westinghouse Co., of Hamilton, Ont., have secured a quarter of a million dollar contract for electrical machinery and equipment for the Montreal Power & Light Co.

Work has been commenced on the Canadian Iron & Foundry Co's foundry at Fort William, Ont. Railway car wheels, castings and cast iron water and gas pipes, will be manufactured.

The Morgan Cement Works, Montreal, Que., have been purchased by a syndicate of New York and Montreal capitalists who will establish a plant with a capacity of 1,200,000 barrels annually.

The Maritime Coal Co. will establish an electrical plant at their coal mines near Amherst, N.S. The electric current will be carried to Amherst on a high tension wire and in a short time will be carried on to Moncton a distance of 50 miles.

The Canada Forge Co. have been incorpoarted with a capital of $100,000 to manufacture steel and iron forgings. The directors are: T. J. Dillon, J. T. Dillon, C. Burgess, E. O. Emerson and J. L. Emerson, all of Titusville, Penn. The head office will be at Welland, Ont.

The Kindel Bed Co. have been incorporated with a capital of $15,000 to carry on their usual business. The directors are: C. J. Kindel, J. M. Kindel, D. Robertson, R. Coopersmith, all of New York, and J. W. Abbott, of Toronto. The head office will be at Toronto.

The Lehigh Portland Cement Co. have been incorporated with a capital of $1,000,000 as manufacturers and dealers in cement, lime, whitening and builders' supplies. The directors are: H. C. Tryler, E. M Young, C. A. Matcham, and G. G. Sykes, all of Allentown, Penn. The head office will be at Thurlow, Ont.

There is at present great rivalry between the various electrical companies at Welland to supply electric power to the industries located there, the Welland Iron Works, M. Beatty & Son, the Robertson Machine Co., Heslop's Roller Mills, Plymouth Cordage Co., Ontario Iron & Steel Co., Automobile Co., Supreme Heater Co., and the Forging Co.

Dartmouth, N.S., has awarded the contract to the Canadian Fairbanks Co., Limited, for their complete lighting plant for the town, consisting of a 150 h.p. Fairbanks-Morse suction gas producer plant and a 10 k.w. alternator to be belt driven. The Canadian Fairbanks Co. will make the complete installation consisting of the producer engine, alternator, switchboard, etc.

The Canadian Westinghouse Co. claim to have abolished the fire engine with the Westinghouse-McDougal turbine pumps, now being installed by the City of Toronto. They have a capacity of 5,000,000 gallons of water every 24 hours, are always ready to work—the steam is always up—and when fire occurs it is only necessary to couple the hose to the fire plug and the water pours out.

Canadian failures for nine months, as reported to Bradstreet's, number 901, involving $6.803,125 of liabilities, a decrease of 11.6 per cent. in number and of 36.2 per cent. in liabilities from a year ago. Failures, assets and liabilities in Canada in nine months for a period of years past follow:

	Number.	Assets.	Liabilities.
1906	901	$2,983,773	$6,803,125
1905.....	1,020	5,162,992	10,676 595
1904.....	832	3,238,256	7,696,688
1903.....	712	2,887,323	6,274,132
1902.....	851	2,759,989	6,300,413
1901.....	1,041	4,160,670	9,376,495
1900.....	1,002	3,017,784	7.441,667
1899.....	975	3,501,274	8 585,901
1898.....	1,091	3,271.772	7,592,510
1897.....	1,501	4,141,860	10,653,212

Ten years ago the total assets of Canada's chartered banks amounted to only $320,000,000, while to-day they are over $890,000,000. The liabilities ten years ago were $230,000,000, as against $710,000,000 at the present time. The total deposits ten years ago were only $185,000,000, while now they aggregate $607,-

000,000. The loans and discounts in 1896 were but $222,000,000, while they now aggregate nearly $665,000,000. The paid-up capital ten years ago was $62,-200,000, with a rest or reserve fund of 42 per cent. of this amount. Paid-up capital to-day is $93,000,000, and the reserve fund is 70 per cent. on capital. The circulation of bank notes has more than doubled in ten years, while the banks now hold in specie and legal tender nearly $61,000,000, as against $22,-000,000 ten years ago.

BUILDING NOTES.

A $10,000 hotel will be erected at Cobalt, Ont.

Chas. E. Ireson will erect a twelve-storey hotel at Toronto.

T. Prefontaine will erect a sash and door factory at Montreal.

American capitalists will build a $1,-000,000 hotel at Montreal, Que.

Thos. M. Ruston, Brantford, Ont., will erect a planing mill at that place.

The Bank of Hamilton will erect a $4,000 building at Battleford, Sask.

The Adams Wagon Works, of Brantford, are building a new warehouse.

The Miller Cartage Company, of Toronto, will erect a $10,000 brick stable.

The Sutherland Rifle Sight Company will erect a $20,000 factory at Westville, N.S.

An apartment house will be built on Spadina Crescent, near Russell street, Toronto, Ont.

The Toronto Railway Company will erect an electric sub-station to cost about $10,000.

The Cockshut Plow Company, Winnipeg, will add a three-storey addition to their warehouse.

Mrs. W. R. West, Edmonton, Alta., will erect a dwelling in that city to cost about $3,000.

The Sherwin-Williams Paint Company have started work on a $40,000 warehouse at Winnipeg.

A Vancouver syndicate will build a large hotel on property adjoining Stanley Park, Vancouver.

A $15,000 addition will be made to Neilson's ice cream factory on Gladstone avenue, Toronto.

Edmonton, Alta., records show building operations during September amounting to $191,696.

The Merchants' Rubber Company, of Berlin, Ont., will erect a four-storey cement block at Berlin.

The Wm. Buck Stove Company, of Brantford, will erect two brick dwellings valued at $1,550 each.

The Ottawa Electric Company, of Ottawa, Ont., will erect a two-storey addition to their present plant.

The Dunlop Rubber Tire Company, of Toronto, will enlarge their factory on Booth avenue to the extent of $18,500.

Cameron & Campbell, manufacturers of hardware shelving, Toronto, will erect a two-storey factory to cost about $8,000.

The Massey-Harris Company will build a warehouse at Prince Albert,

Paroid Roofing Will Make Money for You

READ THIS:

Thousands of dealers all over Canada and the United States are making with Paroid one of their most profitable lines. If you are not selling Paroid it will pay you to get our proposition.

Why Paroid is the Best Ready Roofing Made

Paroid is the best quality of ready roofing made. Railroads, manufacturers and farmers all over Canada and the United States are using it in place of shingles, tin, iron and other kinds of roofings, because it lasts longer and costs less.

We make Paroid from start to finish —we make our felt—the most important part of the roofing, while other manufacturers buy their felt where they can get it cheapest. That's the principle reason why Paroid lasts longest. We could not stand back of Paroid if we did not make the felt.

Paroid is **soaked** and coated with a thicker, smoother, more pliable and durable coating than is on other ready roofings. Send for samples of Paroid and compare it with other kinds. You can see and feel the difference.

Paroid is applied with the **only** anti rust-proof cap made. It insures a tight roof. Other roofs often fail because the cap rusts out. Paroid will not crack and break in cold weather. It is adapted for all kinds of buildings and will outlast other ready roofings.

How We Help You

Our advertising plan has doubled the sales of our dealers this year. It helps to sell their other lines, too.

Send for our proposition and we will mail advertising matter and samples to every likely user of roofing in your town. It will not cost you a cent and can't help bringing you orders. We'll send you all the electrotypes and special things you can use. We'll write letters to prospective customers and send our salesman to help you land orders. Write, telegraph or telephone at our expense at any time.

The Fall is the best season of the year to sell roofing. Can you afford not to sell Paroid?

It won't cost you a cent to try out our proposition and we stand back of every roll of Paroid you sell.

Sign your name to a postal to-day and we'll send you full particulars and samples.

Building permits at Regina have reached a total of $1,578,000. One of the largest issued was for a $50,000 apartment house for J. H. Haslam.

CATALOGUES AND BOOKLETS

When sending catalogues for review, manufacturers would confer a favor by pointing out the new articles that they contain. It would assist the editor in writing the review.

By mentioning HARDWARE and METAL to show that the writer is in the trade, a copy of these catalogues or other printed matter will be sent by the firms whose addresses are given.

Silverware.

G. Bishop, Mary Ann street, Birmingham, England, has forwarded a price list of table silverware, the discount being 40 per cent.

Stable Fittings.

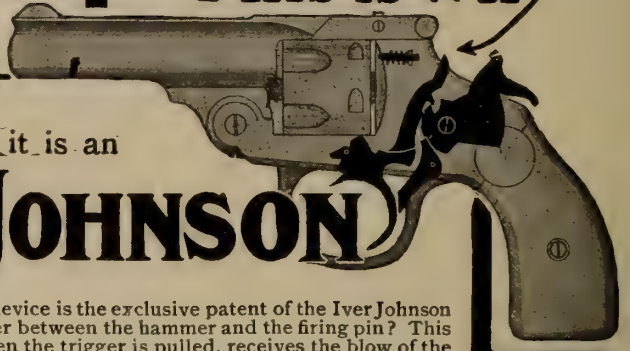
The Dennis Wire & Iron Works Co., London, have issued illustrated catalogue A, devoted to cast and wrought iron stable fittings, a neat little pocket sized book of 36 pages and cover, and price list and general illustrated Catalogue No. 8, comprising 32 pages and cover. The former presents an interesting line of hay racks, mangers, feed boxes, stall guards, gutters, cess pools, traps, water troughs, floor drains, drinking fountains, harness hooks, hitching posts, etc., many of these being lines for which hardwaremen could find a ready sale.

Special Numbers,

The Autumn number of the Ironmonger, London, Eng., dated Sept. 29, is to hand, the issue comprising nearly 400 pages of advertising to less than 100 of reading matter. As usual, however, the advertising pages are of special interest to anyone in the trade, both old and new firms uniting in placing their latest productions before their customers and the trade generally. The reading pages, too, are filled with interesting matter for anyone connected with the British ironmongery trade.

Australasian Hardware and Machinery's Spring issue, dated Sept. 1, has also been received. It contains about 120 pages of interesting advertisements, an increasing number of Canadian and American industries being noted as looking for Australian trade. The 48 pages of reading matter is well arranged and calculated to be of much value to the trade.

Selling Help.



The Yale & Towne Manufacturing Company, 9 Murray street, New York City, have gotten out some rather original matter to assist dealers in working up a good trade in their locks. The idea is not by any means new, but the Yale & Towne treatment of the problem is calculated to be very productive in results. "Suggestions for Selling Yale Padlocks" and "A Book About Padlocks" contain a lot of useful matter for hardware dealers, while the little vest pocket sized short story booklet entitled "The Little Black Box," gotten up for distribution amongst the retailer's customers, is particularly good. Besides these there are a number of envelope size leaflets, etc. Any dealer who desires to secure samples can do do by mentioning this paper when writing the above address.

Accidental Discharge Impossible—

This is why

True only if it is an

IVER JOHNSON

The positive safety device is the exclusive patent of the Iver Johnson Revolver. See the lever between the hammer and the firing pin? This lever is raised only when the trigger is pulled, receives the blow of the hammer and transmits it to the firing pin. **That's why** you can throw a loaded Iver Johnson against a stone wall without fear—no discharge can possibly follow, as the hammer **never** touches the firing pin. An Iver Johnson never fails when you **pull the trigger** and never "goes off" when you don't.

Iver Johnson Safety Automatic

Prices—Hammer $6.50, Hammerless $7.50.

Iver Johnsons are sold by dealers the world over, or direct from us if your dealer won't supply

Please send for descriptive catalogue, free upon request. It tells all about it.

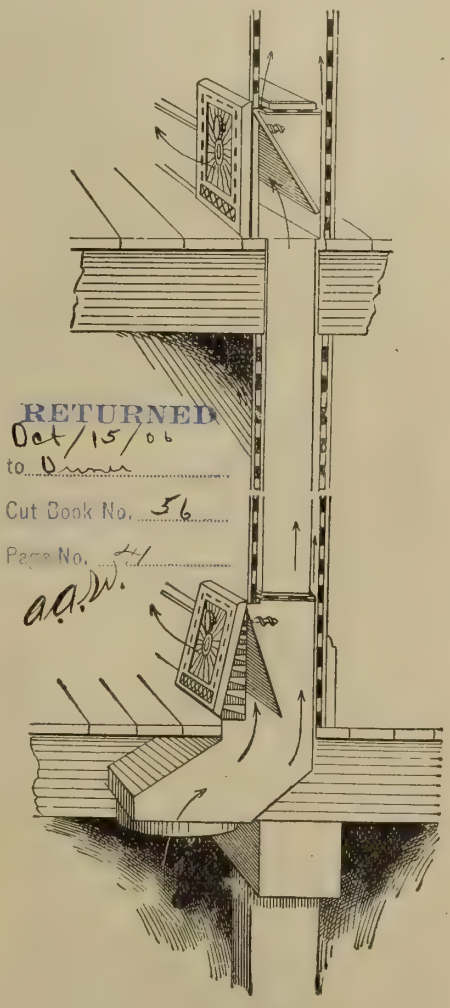
PLUMBING AND STEAMFITTING

IMPROVED APPLICATION OF HOT-AIR HEATING

Read by A. O. Jones, before the American Society of Heating and Ventilating Engineers, at their recent meeting at Chicago.



An improved warm-air heating system which has rendered modern furnace work less complicated—an ever increasing number of practical and perfectly working heating plans—make it possible to describe a thoroughly tested and practical heating system, a system insuring the greatest amount of heat from a given quantity of fuel, and one enabling the operator to control the supply of warm air, directing it at will into the rooms to be heated, securing ventilation at a small expense and reducing the cost of installing warm-air furnaces, at the same time increasing their efficiency, is, in the writer's estimation, and in the face of rapidly disappearing prejudices, a system worthy of universal adoption.

The system under consideration differs from those in common use in that ventilation is secured in all rooms and the basement is not filled with warm-air pipes, but consists of the placing of any modern warm-air furnace of the correct size in an ordinary basement of reasonable height. The furnace should be centrally located and supplied with fresh air of an amount equal to at least 90 per cent. of the combined area of the basement pipes, and the warm-air chamber connected by one-half the number of warm-air pipes ordinarily used to improved warm-air registers placed in the wall of each room on the first floor, with a wall pipe continuing from the top of each register box to the rooms on the second floor, using for heating each two rooms—one on the first floor and one on the second—a basement pipe with capacity equal to the capacity of two pipes necessary for heating these two rooms separately. The manner of connecting the wall pipe to the top of the improved side wall register is shown in the illustration; also the method of pipe construction in the basement.

The advantages to be gained are that ventilation is secured in all the rooms, as these registers are provided with a double metal box, arranged with an air space between the inner and outer casing, and a ventilating opening, where air is drawn out of the rooms being heated and is conducted through the air space upwards, around the wall pipe—if single wall pipes are used—or through the space between the two casings of a double wall pipe when the latter are used.

The heat of the wall pipe causing an upward current insures a rapid movement of the foul air to a point in the attic directly above the registers, where it should be conducted through vent pipes to a chimney flue not used for any other purpose.

It will be seen that cellar air—as ordinarily used for protection when double wall pipes are used—is not allowed to enter the space between the two casings of the wall pipe, but, instead, air is drawn from the rooms; therefore, coal dust and fine ashes are not found escaping through the registers, as is sometimes the case with the systems that have been in use before the introduction of this system, which has been adopted

Improved Warm Air Heating System.

by a great many furnace dealers who testify to the practicability of the system described.

The advantages of being able to utilize all of the warm air from the furnace in the first floor rooms when the second floor rooms are not in use should not be overlooked, for as is well known—with the old plan of installation—the closing of the second floor registers or the dampers in the pipes leading to the second floor registers, does not increase the amount of air delivered to the first floor rooms, but simply causes the air to be overheated, which is very objectionable—often giving rise to the argument which is advanced regarding vitiated air, while with this improved system the full amount of the air supply is constantly moving, and when the second floor rooms are not in use the fire in the furnace must necessarily be checked and a larger amount of air is supplied at a lower temperature.

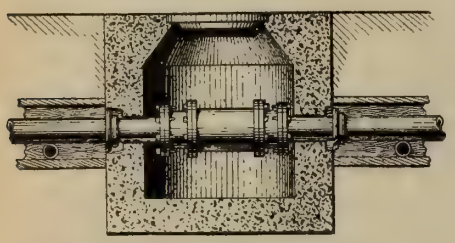
When the second floor rooms are in use the increased velocity of the air in the perpendicular or wall pipes makes it possible to heat rooms on the first floor located some distance from the furnace, which is difficult without the assistance of the suction caused by the wall pipe.

The reduced number of warm-air pipes in the basement makes it possible to connect the larger warm-air conductor at a point on the bonnet of the casings where it can run straight to the register. This makes angles unnecessary, excepting in rare cases, and as a straight line is the shortest distance between two given points, the least possible amount of piping is used with very few angles; therefore, the friction and radiation is reduced to a minimum, which means cooler basements and warmer living rooms, to say nothing of the reduction of cost in installation.

This system, therefore, renders modern furnace work less complicated, insures perfectly working warm-air heating plants, securing the greatest possible amount of warm air from a given quantity of fuel and reduces the cost of installing furnaces.

HOT WATER SUPPLIES TO TOWN.

Fortunately for some of the inland towns of Queensland, good supplies of potable water from artesian wells have been obtained within the municipal areas, and the towns have been reticulated with pipes to convey the water throughout. When the temperature of the water is not too high, the water mains are connected direct to the bore pipe at the surface, and the water is used, at its original pressure, for domestic and fire-extinguishing purposes. These waterworks have been a great boon to up-country towns, where hitherto the only water supply was derived from stagnant surface tanks, and obtained, in most cases, very irregularly, and at the expense of a long haulage. As wooden buildings are the rule in these towns, the value of the water supply for fire purposes is very great indeed.



When, however, the heat of the artesian water is abnormal, or, say, over 120 deg. Fah., it has been customary to cool the water by spraying it into a cool water tank of iron elevated 60 feet, thus losing part of the pressure of the water, or by conducting a portion of the supply into an earthen water tank containing coils of pipes, through which the hot water from the well is

passed before entering the town mains. Otherwise, the expansion of the mains, due to the heat of the water coming into them direct from the artesian well, would cause breaks at the lead joints of the pipes in the streets.

Recently, however, a scheme has been designed by the writer, and carried out successfully in two towns, for conveying the water hot, and direct from the bore well to the town. As this method has been found to be much less expensive than the usual cooling schemes, and as it retains the full pressure of the bore supply, so valuable for fire purposes, it has been considered a great improvement on the old method of cooling the water before conveying it to the consumers. The heat of the water is also found to be valuable for baths and laundry purposes.

A description of the reticulation of the Town of Muttaburra, in Central Queensland, on this new method will give a good idea of the system. The site of the bore which supplies the water is about half a mile from the centre of the town. The depth of the artesian well is 2,707 feet, and the flow is about 750,000 gallons per day. The temperature of the water is 138 deg. Fah.

Before entering the town mains, the water passes through a stone trap, the gratings in this trap serving to keep back from the mains the gravel or stones which are sometimes thrown up

Expansion Joint for Hot Water Mains.

by these underground water springs. The trap has a large base, and is set upon a concrete foundation, about 4 feet below the street level, and the whole is surrounded by a concrete-walled chamber, and a cover at the ground surface.

From this stone trap the mains are carried about 3 feet below the surface of the streets, and incased in wooden boxing. The pipes rest upon rollers, formed of short lengths of one-inch galvanized iron piping, laid crosswise on the bottom of the wooden boxing. At intervals of about 200 feet, expansion joints are inserted in the mains, which are so set as to allow the lengthening and shortening of the sections of the mains between the fixed points, which will be afterward described. When the hot water is turned into the mains, the system works in the following way: The heat of the water causes the pipes to expand and increase in length, and each end of the section of main, which enters the expansion joint at opposite ends, moves toward the centre of the expansion joint, like the piston in a steam cylinder. Here, between the ends, a space of three inches is left to allow for the lengthening of the section of main, without allowing them to touch each other. The expansion and lengthening of a section of main, about 200 feet in length, does not amount to over half an inch, so that the 3-inch expansion space at the ends of the lengths of pipes allows ample margin of expansion space. The reverse process and movement, of course, takes place when the water is—on rare occasions—shut out from the mains, and the pipes cool. The section of main affected by cooling shortens, and the ends draw back within the expansion joints, like the back stroke of the piston in a steam cylinder. The wooden boxing in which the street mains are inclosed is formed of 1½-inch planks of cypress pine of the locality, a timber which has been found, by repeated tests, to be proof against the ravages of white ants, which are very prevalent, and destructive of timber constructions, in the district, and, indeed, in the State of Queensland generally. At each intersection of the streets, a fixed point is constructed. This consists of a cast-iron cross piece, with four ways, bedded firmly in a large block of concrete. The cross streets are about 700 feet apart; this being the interval between the fixed points, the expansion and contraction of each section of main takes place within these limits. The four ways of the cross piece are made with socket ends to receive the main pipes.

In each section of the mains a sluice valve of the usual type is placed to control the section. Fire plugs are also provided at intervals of about 250 feet apart, to which a hose can be attached for fire extinction. At the lowest point of the town a pressure valve is placed, which can be set to open at any pressure, and is intended to act as a safety or escape valve, to relieve the mains from any accidental shock, or occasional undue pressure, from the too quick opening or shutting of valves, or undulation of the original pressure of the water at the bore pipe. This latter pressure is about 60 pounds per square inch, and the pipes and other castings of the system were all tested with a hydraulic pressure up to 100 pounds per square inch. The cost of the bore was about £2,707, and of the reticulation of the town about £2,013, making a total expenditure of about £4,720.

One of the hitherto undeveloped resources of artesian wells in Queensland is the available power due to the pressure and flow of the water. At one Queensland town it is estimated the flow from the bore will develop nearly 30 h.p., and it is intended by the municipal authorities to utilize this power for electric lighting purposes.—Thomas Parker, in Scientific American.

STEAM CONTROL SYSTEMS.

Much attention is being directed by builders at present toward the Thermograde system of low pressure steam heating, the principle of which is the control of the heat emitted by radiators by regulating the admission of steam to them. The advantages claimed for this system are numerous, such as quietness of operation, saving in fuel and quick heating.

A control valve is connected with the inlet of each radiator. These valves may be adjusted to admit enough steam to fill one-quarter, one-half, three-quarters or a fractional part of the radiator. When the handle is turned a lug rides up on a cam and raises the disc from the seat.

At the return end of each radiator is placed a combined air valve and expansion trap. This so-called auto-valve allows water and air to escape from the radiator, but prevents the escape of steam. It is operated by a liquid sealed in a copper receptacle. When the steam comes in contact with it the liquid is vaporized and creates a pressure sufficient to force the valve disc against the seat. When the liquid cools the valve is opened by a spring.

With this system, radiators of the hot water type are preferable to those of the ordinary steam pattern, as the control may be more conveniently located and because the circulation in the radiator is somewhat better. But steam radiators may be and have been used with satisfactory results, both as regards graduation and circulation.

When a control valve is partially closed the steam is condensed in the upper portion of the radiator, and the lower portion is filled with air that backs up through the return valve or trap, the return risers being open to the atmosphere at the top and free from pressure.

The piping of a Thermograde system is practically the same as a regular two-pipe system except that the returns must be open to the atmosphere.

BATH TUBS ON WHEELS.

Several bathing establishments in Rheims, and this is true of other French cities, have portable bath tubs, which are placed on two-wheel vehicles provided with a large iron boiler filled with hot water. As orders for baths to be delivered at the doors of the residences are received the boilers are filled with hot water and the bath-laden vehicles, each pulled by two men, start out for the delivery. The bath tub is filled with the hot water and carried into the residence, and while the family bath is going on the vehicle may fill another order, returning again for the tub, which is in regular commission as a visitor to the residences throughout the city. The price of a delivered-at-your-residence bath in Rheims is 30c., while at the establishment it costs 20c.

PLUMBING ITEMS.

David A. Keith, late of Keith Bros., plumbers, Moose Jaw, died a few days ago.

K. J. Allison, plumber, will erect a residence on Isabella street, Toronto, to cost about $4,500.

The Monarch Brass Manufacturing Company, of Port Colborne, Ont., have begun to manufacture quick-opening valves.

The Stratford Board of Works have made a recommendation to the council for an extensive storm drainage system involving an expenditure of $15,000.

GUILTY OF SECURING REBATE.

The Camden Iron Works Co., Philadelphia, Pa., has been found guilty in the United States District Court of accepting rebates in connection with the shipment of iron pipe to Winnipeg. The published through rate of 49½c. a hundred pounds was in effect at the time the shipment was made, but the purchasing company secured a rate of 45c. through the Mutual Transit Co., operating on the great lakes.

PLUMBING MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, Oct. 12, 1906.

With pig lead soaring high above the five dollar mark, the probable advance in lead pipe this week will come as no surprise to careful followers of our weekly market report. The present condition in the primary markets is very abnormal, being, in fact, a record in the history of lead. Under the circumstances, it cannot be expected that lead pipe can be held at the prices now ruling. Solder is also likely to advance, especially as tin remains firm, with an upward tendency.

It is undeniable that the scarcity of iron pipe is being more keenly felt every day. The mills are doing their best to keep up the supply, but as raw materials are also very scarce, the situation is a difficult one to overcome.

Business in all general plumbing lines is very brisk, while heating goods are particularly active.

RANGE BOILERS—A good turn-over is the experience of all the supply houses. We quote prices: Iron clad, 30 gallon, $5; 40 gallon, $6.50 net list. Copper, 30 gallon, $25; 35 gallon, $29.50; 40 gallon, $32 net.

LEAD PIPE—Primary markets show a big jump in quotations, and it is likely that pipe will soon be advanced. At present, we quote: 10 p.c. f.o.b. Montreal, Toronto, St. John, N.B., Halifax; f.o.b., London, 15c. per hundred lbs. extra: f.o.b. Hamilton, 10c. per hundred lbs. extra.

IRON PIPE FITTINGS—Business is very active in all sizes. We quote discounts as follows: Discounts on all sizes of nipples up to 6 inch, 67½ to 70 per cent.

IRON PIPE—Still more complaints are heard about the scarcity, which is becoming keener, as the heating season is in full swing, and consumption is at its highest point for the year. We quote: Standard pipe in lots of 100 feet, regular lengths, 1-4 inch, $5.50; 3-8 inch, $5.50; 1-2 inch, $8.50; 3-4 inch, $11.50; 1 inch, $16.50; 1 1-4 inches, $22.50; 1 1-2 inches, $27; 2 inches, $36.50; discounts on black pipe, 1-4 inch, 62 per cent.; 3-8 inch, 62 per cent.; 1-2 inch, 71 1-2 per cent.; 3-4 inch and upwards, 73 1-2 per cent. Discounts on galvanized pipe: 1-4 inch, 47 per cent.; 3-8 inch, 47 per cent.; 1-2 inch, 61 1-2 per cent.; 3-4 inch, and upwards, 63 1-2 per cent. Extra heavy pipe of 100 feet lots are quoted as follows: 1-2 inch, $12; 3-4 inch, $15; 1 inch, $22; 1 1-4 inches, $30; 1 1-2 inches, $36; 2 inches, $50. The discount for black pipe is 71 per cent., and for galvanized, 61 per cent.

SOIL PIPE AND FITTINGS—Trade is naturally quiet at this season. Discounts remain as follows: Standard soil pipe, 50 per cent. off list. Standard fittings, 50 and 10 per cent. off list; medium and extra heavy soil pipe, 60 per cent. off. Fittings, 60 per cent. off.

SOLDER—Tin continues firm and a big advance has taken place in lead. Solder quotations are unchanged, however, and we are still quoting: Bar solder, half-and-half, guaranteed, 25c.; No. 2, wiping solder, 22c.

ENAMELWARE — Our prices remain as follows: Canadian bath tubs, plate E1, 5 ft., 1st quality, $20.65, special $18.65; plate E11 and E21, 5 ft., 1st quality, $19.50, special $17.15; plate E35, 5 ft., 1st quality, $24.65, special $22.40. American baths, rolled rim, 5 feet 2 1-2 inch rim, $22.25; 3 inch rim, $29.25. Lavatories, discounts, 1st quality, 30 to 30 and 5 per cent.; special, 30 and 10 to 40 per cent. Sinks, 18 x 30 inch, flat rim, 1st quality, $2.60, special, $2.45.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, Oct. 12, 1906.

Big jumps in practically all iron, lead and brass goods are the feature of the week. Trade in plumbing supplies has been only about the average, but before the month passes a tremendous volume of orders are expected. The advances this week will not tend to check this business, as most of the lines are scarce and the prices of the basic metals are advancing steadily. The rush of work in order to complete contracts before cold weather forces a hold-up is bound also to encourage active buying.

Lead pipe has been advanced from 10 to 5 per cent. off, as predicted by us in recent issues, the steady rise in pig lead making this advance an expected one.

A new list on brass goods showing advances on the various lines of compression and fuller work will be issued in a few days, this advance also being a natural sequence to the advances in copper reported by us during the past month.

Cast and malleable iron fittings all show increased quotations, the advance being close to 5 per cent. all round. Following the scarcity on iron pipe and the practical impossibility of supply men to fill orders with any measure of completeness, prices have been withdrawn and a new list will be issued at once. With the increasing firmness in the pig iron market and the inability of existing pipe mills to supply the demand, higher prices must be looked for to last for a considerable period.

Demand for all heating goods is very lively and no respite is looked for before the beginning of the new year.

LEAD PIPE — The discount on lead pipe has been advanced to five per cent. off the list price of 8c. per pound.

SOIL PIPE AND FITTINGS — We continue to quote: Medium and extra heavy pipe and fittings, 65 per cent. off; light pipe and fittings, 60 per cent. off; 7 and 8 inch pipe, 40 and 5 per cent.

IRON PIPE—Prices have been withdrawn and an advanced list is looked for next week.

IRON PIPE FITTINGS — New lists are being issued showing advances of about 5 per cent. on both malleable and cast. The new figures will be about as follows: Cast iron elbows, tees, crosses etc., 65 per cent.; cast iron plugs and bushings, 65 per cent.; flange unions, 65 per cent.; nipples, 75 per cent.; iron cocks, 60 per cent.; Canadian malleable, 30 per cent.; malleable unions, 65 per cent.; malleable bushings and plugs, 60 per cent.; C. I. ceiling plates, plain or N. P., 70 per cent.; C. I. floor, 80 per cent.; hook-plates, 65 per cent.; expansion plates, 65 per cent.; headers or branch tees, 65½ per cent.; ring hangers, black or galvanized, 60 per cent., American list.

GALVANIZED IRON RANGE BOILERS—We quote: 12 gallon capacity, standard, $4.50; extra heavy, $6.50; 18 gallon standard, $4.75; extra heavy, $6.75; 24 gallon, standard, $4.75; extra heavy, $6.75; 30 gallon, standard, $4.75; extra heavy, $7.50; 35 gallon, standard, $5.75; extra heavy, $8.50; 40 gallon, standard, $6.75; 40 gallon, extra heavy, $9.50; 52 gallon, $11; extra heavy, $14; 66 gallon, standard, $18; extra heavy, $20; 82 gallon, standard, $21; extra heavy, $24; 100 gallon, standard, $29; extra heavy, $34; 120 gallon, standard, $34; extra heavy, $40; 144 gallon, standard, $47; extra heavy, $55. The discount on copper and range boilers continues at 15 per cent.

RADIATORS — Prices are the same. We quote: Hot water, 50 and 2½ per cent.; steam, 50 and 5 per cent.; wall radiators, 50 per cent.

SOLDER — Quotations remain very firm as follows: Bar solder, half-and-half, guaranteed, 26c.; wiping, 24c.

ENAMELWARE—We quote as follows: Plate E1, 5 ft., first quality, $22.65, special $20.65; plate E11, 5 feet, first quality, $20.15, special $19.15; plate E21, 5 feet first quality, $16.15, special $19.15; plate E35, 5 feet, first quality, $26.65, special $24.90. Fittings extra. Lower prices in quantities.

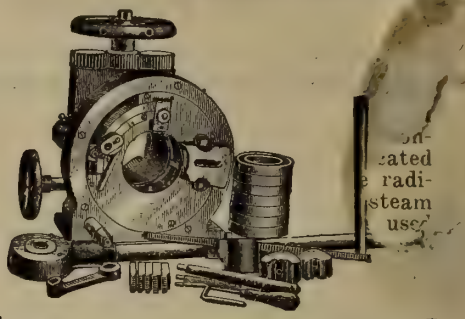
A cement for closing leaks in iron pipe, recommended by the Mechanical Engineer, consists of coarsely powdered iron borings, 5 pounds; powdered sal ammoniac, 2 ounces; sulphur, 1 ounce; and water sufficient to moisten it. This composition hardens rapidly, but if time can be allowed it sets more firmly without the sulphur. It must be used as soon as mixed.

FIVE DOLLARS EASY MONEY

Can be earned by sending us a practical answer to the following question:

In your judgement is it essential that every closet connection to soil pipe stack should be provided with a Breaksyphon?

If not, illustrate by a rough sketch the conditions which would render unnecessary the use of a Breaksyphon, and give the reasons why it would not be required.



For the best answer received we will send a cheque for $5.00 and to every one sending a satisfactory reply for publication we will give a year's subscription to Hardware and Metal. Send in a reply next week and answer the question as fully as possible.

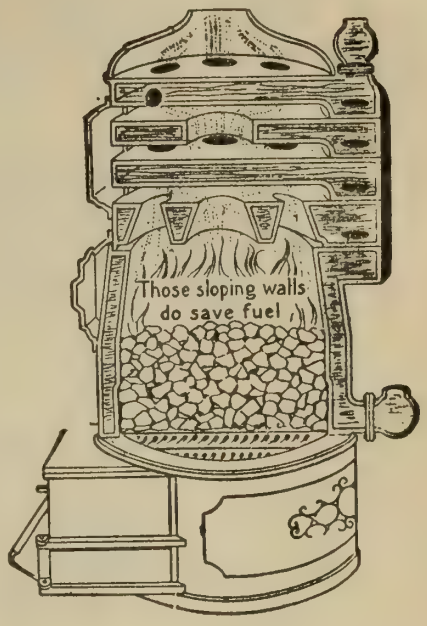
That Queer-Shaped Grate-Bar is Another Strong Oxford Argument—

People who see the Oxford Boiler's grate-bars for the first time always want to know why they're hollow and three-sided—

They're hollow, because that's the way to make them so the utmost amount of air can get into the fire—and get in evenly and constantly under every inch of the bed of coals.

That's one great big fuel-saver, the hollowness of the Oxford Boiler's grate-bars.



They're three-sided (pyramidal, properly) because that's the shape that stands most hard usage, has most strength for its weight of metal, and wears out very much slower than any flat or square bar must. Besides, no clinkers can jam them.

These bars are mounted on positive gears. These gears make it easy to clean the fire, and the way the bars are mounted also makes it easy to take out one bar for repair and never disturb any other.

Economy all the way ; and fuel economy most of all—that's the selling-power of the Oxford Hot Water Boiler.

There are fourteen things that make it the one Boiler that really profits the dealer in the long run.

If you look ahead at all, you ought to know the whole fourteen. Why don't you ask?

EVAPORATION REDUCED TO A MINIMUM

is one of the reasons why PATERSON'S WIRE EDGED READY ROOFING will last longer than any other kind made.

Mr. C. R. Decker, Chesterfield, Ont., used our 3 Ply Wire Edged Ready Roofing fourteen years ago, and he says it is apparently just as good as when first put on.

We have hundreds of other customers whose experience has been similar to Mr. Decker's.

Hardware and Plumber—

We have pumps suitable to any demand made upon you by most exacting customers.

Our pumps will do anything that a pump can do, and we will be pleased to give the benefit of many years' experience to any one having pump troubles.

McDougall Pumps are Standard Pumps, and with us it is quality first, last and always, while we ask just as little money as we can get along with.

We have a few catalogues for distribution

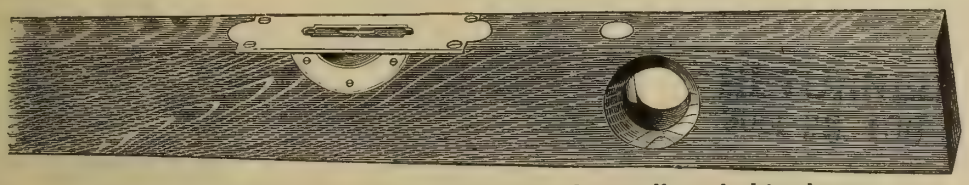
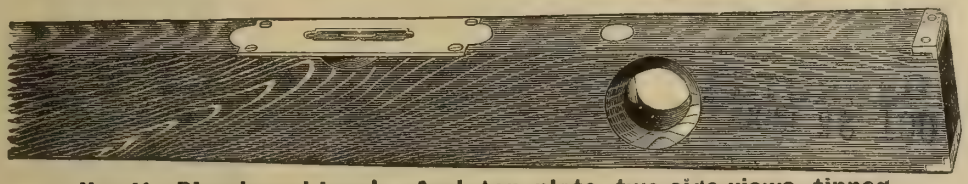
DISSTON'S PLUMBS AND LEVELS

No. 100—Plain Level. Length 12 inches, solid hardwood, stained and polished, with nickel top plate.



No. 9D—Plain Plumb and Level. 24 to 30 inches assorted, arch top plate, two side views polished.

No. 09—Same as above, only 18 to 24 inches assorted



No.16—Adjustable Plumb and Level. 26 to 30 inches assorted, arch top plate, two side views, solid brass ends and polished

No. 21—Same as above, only mahogany with two brass-lipped side views

No. 10—Plumb and Level. Arch top, brass-lipped side views, poliohed, assorted, 19 to 24 inches

No. 11—Plumb and Level. Arch top plate, two side views, tipped and polished, assorted, 24 to 30 inches

No. 24 Patent Adjustable Plumb and Level—Arch top plate, improved duplex side views, solid brass ends and polished, assorted, 26 to 30 inches

FOR PROFIT

No large amount of talking is necessary to convince people of the quality and value of **Disston's Plumbs and Levels** — the name is sufficient.

Like **Disston's Saws,** they are the result of high-class workmanship and modern machinery, and the product of one of the greatest factories in the world.

If you have never bought this line before, you will be surprised what a dollar will buy compared with other well-known makes.

If you want the **best** in plumbs and levels, at moderate prices, specify **Disston's** and tell us the numbers you require.

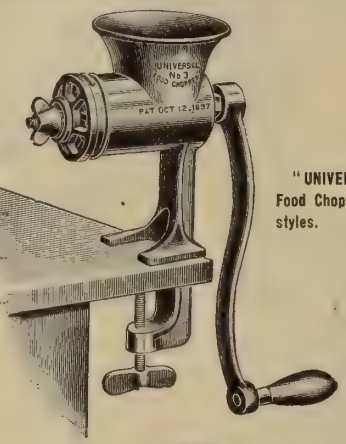
GRAHAM NAILS ARE THE BEST



We Ship promptly

Factory: Dufferin Street, Toronto, Ont.

Our Prices are Right

"UNIVERSAL" Bread Maker, two sizes, 4 and 8 loaves

"UNIVERSAL" Meat and Food Choppers, 8 sizes and styles.

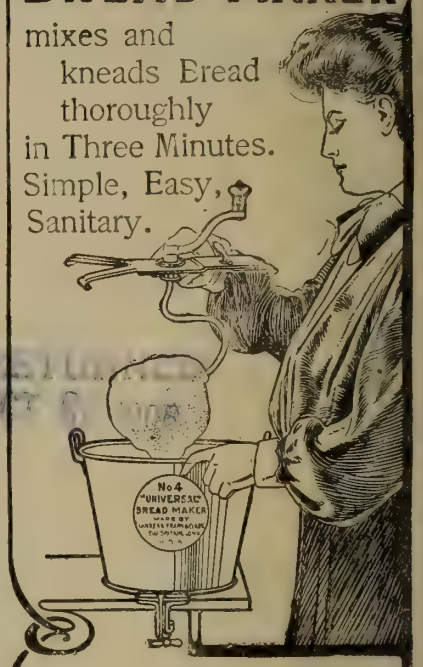
"COLONIAL" Pattern—"Universal" Coffee Percolator, two designs, 4 sizes each

Every Hardware Dealer

recognizes the favor with which the "Universal" Kitchen specialties have been received by the public.

The maker's extensive advertising brings them to the notice of house-keepers everywhere. Their own merits do the rest.

They sell rapidly, and are fast becoming a part of the equipment of every kitchen.



The fixed price arrangement under which they are sold guarantees the retailer an assured profit.

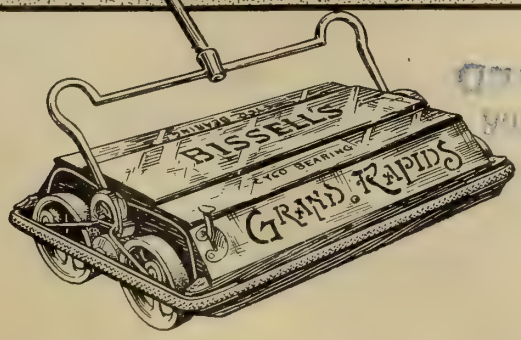
It pays to keep in stock the goods women ask for.

Our travellers will tell you more about the . . . . . "Universal" line, or write direct.

THE "UNIVERSAL" BREAD MAKER

mixes and kneads Bread thoroughly in Three Minutes. Simple, Easy, Sanitary.

YOUR NAME AND ADDRESS GOES HERE



Electros of this description, one or two columns wide, advertising "Universal" bread makers, cake mixers, meat choppers and coffee percolators, sent free to hardware dealers for use in their local newspaper advertising. Let us know how much space you use and we will send you electros.

Pembroke, Ont., Canada.

Always Remember These Features

Keep the following Points of Merit in mind regarding

DILLON HINGE-STAY FENCE

1. The Dillon has no locks to rust, break or come loose.
2. The Dillon is the strongest wire fencing made in Canada, is easily erected and always looks well.
3. The Dillon strand wires, whether heavy or light, are all High Carbon Hard Spring Wire.
4. The Dillon stays are of medium temper and are never broken by warping.
5. The Dillon strands and stays are both extra well galvanized.
6. The stays are hinged to prevent bending when the fence is weighed down, between the posts.
7. The Dillon is less expensive than other wire fencing of similar weight.

You, of course, have the Dillon in stock.

Get the Habit

of handling "BEST" mops. Once acquired it's mighty hard to break off.

WHY? That's the point

First : It's the strongest, simplest, neatest, and most durable made. You can't break it with a hammer.

Second : The easiest operated. Impossible to get out of order.

Third : The most satisfactory in use. The result is satisfied customers, and the consequence is more business.

Fourth : The "BEST" is a combined profit-maker and trade-builder.

"CUMMING'S GOODS ARE GOOD GOODS"

Ask your jobber for the "BEST"

THE "BEST" MOP

Insist on the "BEST"

QUALITY COMES FIRST

in a Revolver. If you do not wish to sell a customer a second time, then it might pay you to offer him a cheap and worthless weapon on which you make a big profit. If you want his future trade, sell him the famous

H. & R. REVOLVER

Recognized as the greatest revolver value for the money. H. & R. Revolvers are noted for their accuracy, safety and durability. Made of the best obtainable materials, in a factory fitted with the most improved modern machinery, operated by highly skilled mechanics, each one is rigidly inspected to insure absolute freedom from flaws of any kind. Every part is accurate to the thousandth of an inch. H. & R. Revolvers are free from shake or rattle, and if treated with ordinary care will last a lifetime and can always be depended on. When you sell one you make a friend of your customer, and he'll come again to buy cartridges or other goods he may need in your line. If you have never handled these goods, it is to your interest to put in a stock at once. They are the kind that don't stay on the shelf, and that make satisfied customers.

THE WALLACE BARNES CO., - Bristol, Conn.

Small Springs of Every Description.

Bowser Oil Tanks Save

Oil Because they absolutely prevent any leaks, evaporation, waste, over measurement, etc.

Time Because they enable any desired quantity of oil to be pumped directly into the customer's can in one-tenth the time it takes to fill a can under the ordinary system.

Labor Because measures and funnels are not necessary. The pump can be placed at the most convenient point. Bowser pumps compute the price while the oil is being measured and drawn.

And, because the Bowser tanks save oil, time and labor, all of which are of value to the dealer, they save **Money.**

Write To-day for Catalog V. It Explains the Bowser System.

The "Good Cheer" Art

For 1906=7

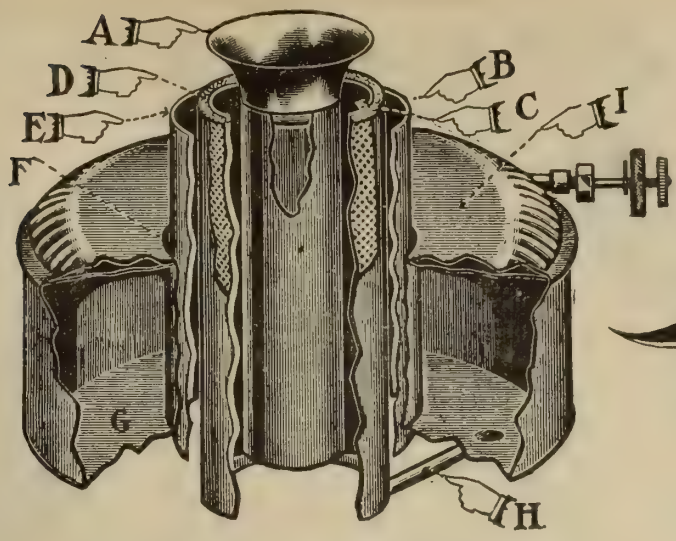
Handsomer than Ever

The Best Proportioned Heater in the Market.

Note its well balanced curves and graceful lines throughout; the prominent cornice; artistic ornamentation of mica doors and wings; the full size ash-pit section, and the substantial foot rails and base—**and it costs you no more than the average base burner of similar size and class.**

No change in internal construction—no room for improvment there. Up to the mark in every detail. Firepot removable through side doors without moving a bolt. Ransom duplex shaking ring grate. Good sized ash pan and every stove a double heater, made in size No. 55 (14" fire pot) as here shown, with or without oven.

Our celebrated No. 44 (13" fire pot) with or without oven, supplied in same design as last year.



THE

JAS. STEWART MFG. CO.,

LIMITED

WOODSTOCK, ONT.

Western Branch—Foot of James St., Winnipeg, Man.

Like a Watch

It's the inside and not the outside that makes a reliable Oil Heater as well as a reliable watch. It's the ***Burner*** that tells the story—the ***Burner*** does the work. Note the construction of our ***Grand Safety Burner.***

A.—Flame spreader. B.—Air space outside of Wick Tube. C.—Air space inside of Wick Tube. D.—Wick; E.—Outside Casing to Burner. F.—Air space between Fount and Outer Casing. G.—Fount for oil, entirely separate from Burner. H.—Feed Pipe conducting Oil from Fount to Burner. I.—Shield resting on top of Fount with air space underneath.

ALUMINUM OIL HEATERS

Radiate heat like a base burner, from sides and bottom, as well as the top. No smoke, no smell, no odor. Absolutely safe, and a furnace for heat. The only Oil Heater with a partition in the drum to deflect the heat downwards and thus secure universal radiation. This partition is only possible because of our Grand Safety Burner with its liberal air passages, which render explosions impossible.

Can you afford to sell your trade any other kind of an Oil Heater? Dare you put out an oil heater without a burner that is absolutely safe? Dare you take chances of blowing up your neighbor's home? The Aluminum Oil Heater is the quick seller—a hot proposition. Its merits are at once apparent to the customer, because of the common sense, scientific principles of its ***Grand Safety Burner.***

They are the finest finished Oil Heaters on the market. Every one is a model of mechanical perfection, is thoroughly tested before sending out from the factory, and everyone is guaranteed to satisfy or money back.

Our perfect smoking device makes it impossible for the careless operator to turn the wick too high.

Any child can take out the wick and re-wick the Aluminum Oil Heater in a minute. You won't have to send a man out to show your customers how to keep the Aluminum Oil Heater in operation.

The Aluminum Oil Heater is what your business demands. Get your orders in early. Prices are right. Profits are pleasing.

One Woman said "it is the best cooker I have ever seen."

Patented

OUR "FAMOUS" QUICK-SELLING TRI-USE COOKER

Can be used in various ways, viz., as a double boiler for cooking cereals of all kinds, as a steamer for vegetables, puddings, stale buns, bread or cake, or as two separate saucepans, etc.

Sufficient room has been allowed for the steam to circulate between the two saucepans and under the outer cover into the inner saucepan, thus cooking the food by steam, making it appetizing and more easily digested.

Patented

The Tri-use Cooker is a great seller and every one of your customer's should have one. Introduce it and follow results.

Oak Department

Cheerful Oak

SINGLE OR DOUBLE HEATER.

A perfect fire-keeper and a handsome looker. Corrugated fire-pot and revolving grate.

The Cheerful burns coal or wood, and is as economical as a miser.

MADE IN FOUR SIZES.

Each size can be fitted with a magazine, if desired.

Favorite Oak

A popular-priced Oak, with large double doors, and particularly adapted for localities where wood is burned part of the time.

It is quite an advantage to have a heating stove that will burn wood Fall and Spring, and coal, if you wish when Winter sets in for keeps.

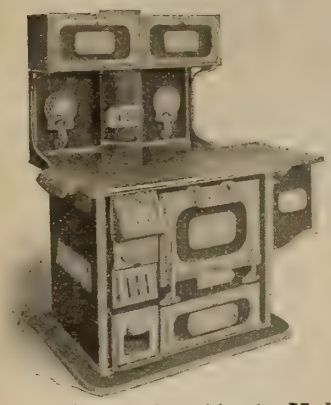
MADE IN THREE SIZES.

Coal magazine supplied for 13 and 15.

Winner Oak

The daintiest and most attractive low-priced, perfectly constructed Oak Stove on the Canadian market. The Winner is our response to the general demand for a cheap Oak, and while the price will surprise you, the quality, design and finish of the stove will please you.

MADE IN FOUR SIZES.



14 and 16 can be fitted with magazines.

You Take No Risk. Every Oak is Fully Warranted and Guaranteed by the Makers:

FOLLOW UP SYSTEMS BRING RESULTS

"Keeping Everlastingly at it Brings Success." By Geo. H. Pedlar, Jr.

The general idea of the "follow up," either by letter or by personal solicitation, over the counter or otherwise, is now recognized by all live business people, as being the essence of salesmanship. No up-to-date business man would think that he had served a customer fully, when, in answer to a question as to the price of a cake of soap, a pair of boots, or a sixty-six foot tape, he should say 5c., $3.00 or 75c., as the case might be, and let it go at that. That would have answered, perhaps, once upon a time, because there may have been no other cake of soap, pair of boots or sixty-six foot tape carried in stock nearer than Hogs' Hollow, seven miles down the pike.

To-day, however, conditions are different—so very different that one has to say much more than the mere giving of prices, and the things you say, determine even more than the price quoted, whether your customer purchases or not, because it is sure true, that almost anyone will pay 25 cents or 50 cents or even more, in addition to the price he figured on paying, provided what is told him by the salesman, sounds good to him.

Every business house must determine for itself, what is proper to say in a follow-up as well as how and when to say it. We adopted a crude follow-up, as long ago as ten years, which, as time has passed, has been closely watched as to results, until now we are as perfect as we know how, though always looking for better results.

Following Up Letters.

With the receipt of a letter, we make our answer, as far from the general stereotyped style as possible. The letter gives the clue. In two days' time, we take up the same letter, and go after the prospective customer again, from another point of view, but still on the same subject. Then if, after a reasonable time, we have no response, we present the subject from some other point of view, because, while one argument might interest one man, it might take a much different one to interest another. Failing to get a reply of any kind, to this effort, we write a straight appeal, asking a reply. Generally, we have a response to this and it gives us a new chance for continuing the subject.

Sometimes, however, even this remains unanswered, but we do not stop there. Oh, no! The man may have gotten married in the meantime, and forgotten, for the time, that his barn ever needed a new roof. So we file his and our letters away—to give him a chance—and, in three months, take up the subject again. We get many orders from people after the "second round," and, as our business motto is, "Keeping everlastingly at it brings success," we could not very well drop any communication, until something definite had resulted.

Our customers in Canada are served from our warehouses located in most of the principal cities, necessitating our maintaining a follow-up system in each office. But they all work as a unit, each adopting the same general scheme as outlined.

We believe in the follow-up idea so much, however, that a weekly letter is sent from this office, to all agencies on one subject or another, appertaining to the business, and our letter on the follow-up system was:

In our business a man may write for prices with the intention of ordering some kind of building materials right away, and for some unknown reason his

G. H. PEDLAR, Jr., Oshawa.

plans may be altered. He might have a death in his family, or sell his place, and buy another, or for a hundred and one reasons change his plans, but the point is, that having once received an inquiry from a man he should not be lost track of till you receive a definite understanding or order from him.

Inquiries cost money. Every post card you receive saying "Send catalogue and best prices" costs money, much more than you imagine, very much more. For instance, the "ads" we are now carying cost $500 per month. Suppose all told we get ten inquiries per day or three hundred per month (and we don't) that is say $1.50 that each inquiry costs. One dollar and a half to get an inquiry. It's a lot of money, but it pays provided the inquiry is properly handled after received. It's alright for one to say that such and such a postal received is N.G. and calls for nothing more than a reply, and then to be passed up and forgotten. That's wrong. I have tried it myself and was very much surprised later on to get an order from the same man, who in the beginning inquired in the tone of a school boy. There is no rule to follow except the correct one, of treating them all as if they were from the largest concern in the world. One is very apt to slight a reply to a man rated at nil, while giving minute attention to a man of position. Nevertheless, one is just as apt as the other to use some goods. A "Follow Up" system is simple, and while involving some trouble—like anything else that's worth while—it pays without a doubt.

If you have not got a small card index let me know and I will get you one. If you have, this is being written first with an idea of giving you some slight idea of the cost of each inquiry, and second with the idea of impressing you with the importance of following up thoroughly. The most profitable business you can get is the business that comes in by mail. It's also the best, because you can write twenty letters a day at the expense and time of going personally to one man, and while the chances for orders solicited by mail are not to be compared with the chances of getting an order by personal solicitation, still the cost is not so great.

Letters Should be Original.

The form in which letters are written is the basis of all successful mail order propositions. Every one agrees that the live business man of to-day avoids entirely the stereotyped form of business letter of fifty and even a dozen years ago. Don't say "Yours of the 6th inst., received and in reply beg to say." That's antiquated and does not serve the purpose. Throw it right into a man from the first word. Go right at your subject on the first line.

Ninety-nine inquiries give you some clue as to what the man had in mind when writing, and if it does, go after that particular point on the jump. People are not interested now in anything that pertains to dead wood they want the meat.

Another thing. Don't trust to your memory. You may have the best memory of anybody in the world, but you will forget. Besides it doesn't pay. A man to make a success of his business now-a-days has enough to think of without cramming his head full of details. Who ever heard of the president of any company keeping his cash book in his head? It could not be done, and done correctly neither can a "Follow Up" system.

CANADA'S EXHIBIT AT THE MILAN EXPOSITION

Canada's exhibit at the International Exposition at Milan has evidently made a great impression in Italy. Returned Canadians who have seen the Canadian pavilion give a most favorable report of it. It is said to have been one of the finest buildings of all those erected at the great fair, while the showing of the products of the Dominion was no less excellent.

In Italy, Canada was not very well known before the exposition. With many, it was but a name. Its commerce, its agriculture, its mineral wealth were unknown and the Italian was equally ignorant of Canada's undeveloped possibilities.

This ice of ignorance preventing Italian trade interest in Canada has been broken by the Dominion exhibit at the Milan exhibition. The Canadian pavilion was visited daily by thousands of Italians from all parts of Italy, and the size and beauty of the building, the variety and all round excellence of the exhibit created such an impression on the mind as will not soon wear off. The Italian Minister of Agriculture, who visited the Canadian pavilion, was very much impressed at the showing made by the Dominion, and expressed himself to that effect. The Italian farmers were particularly enthusiastic over the exhibit. They returned day after day to wander through the aisles gazing in admiration at the products of the young country across the seas. It is not unlikely Canada's showing at the exposition will result in the immigration of a great number of Italians of the farming class.

MILAN EXPOSITION—Canadian Pavilion.

The Canadian Pavilion.

The Canadian pavilion, which was built of sheet iron, was in itself very attractive. Its external appearance was excellent and did not at all belie the interior arrangements. No better compliment can be paid the Canadian building than the fact that some of the other countries exhibiting, whose buildings were burned by the fire which occurred shortly after the opening of the fair, modelled their new pavilions after the Canadian structure. Over the arched entrance to the building was a large maple leaf emblematic of Canada. This was a beautiful piece of workmanship. Inside everything was neatly and artistically arranged. The decorative scheme was carried out in Canadian grains. Every cereal was used, and, as may be seen by the accompanying illustration, the effect was exceedingly attractive. On the walls were hung pictures depicting harvesting and other incidents of farm life, views of the Canadian Rockies, and other scenes known to the inhabitants of Canada, but new and instructive to the Italians. Maple leaves were everywhere in evidence, being worked out in grain and other materials. On one wall was a large map of Canada showing the lakes, rivers, mountains and natural features. This was always a centre of interest to visitors. At all times the pavilion was well lighted, so that everything was shown to the best advantage.

The Exhibits.

The central portion of the building was occupied by the exhibit of minerals, agricultural implements and other such lines, while all around the sides were small arched rooms partitioned off from one another, which contained every product of the ground, and a great variety of manufactured goods. To be seen were samples of all the grains, fruits, vegetables, mineral waters, flours, biscuits, and other products of the Dominion. In a word, almost everything produced in the Dominion of Canada was on view. Explanatory signs were placed before each exhibit, while an abundance of descriptive literature was distributed daily. A noticeable feature in the Canadian pavilion was that the exhibits were arranged in natural rotation, thus flour followed wheat, biscuits flour, and so on

Three lines shown attracted particular attention. These were wheat, flour and apples. The quality of the wheat was pronounced by experts to be above anything imported by Italy at present. The apples on exhibition, which were of last year's growth, were thought to be remarkable. It was hard to convince visitors that the fruit was not artificial. They did not think it possible that such apples could be grown and kept for such a period.

The minerals also caused much comment. Canada is rich in ore of every description, and every metal produced in the Dominion was shown.

Taken all in all, Canada acquitted herself very creditably, and her exhibit, as compared with those made by other countries, was an excellent one.

Canada's Representatives.

The exhibit was made by the Canadian Government, there being no private interests. Mr. Hutchison, who had acted in like capacity for the Government before, was in charge, and he certainly is deserving of praise for his work. Others who worked in the interests of the Dominion were C. H. Catelli, president

of the Montreal Chambre de Commerce, and C. Mariotti, the Italian consul at Montreal. Mr. Catelli acted as honorary commissioner of the Canadian Government.

Prospects of Trade.

When seen on his return by a representative of Hardware and Metal, Mr. Mariotti expressed himself as satisfied with the exhibit made by Canada. "We made a great showing," said he, "and without doubt there will be results. Already Italian business men are making inquiries with a view to establishing relations with Canada in a business way. Of course the great handicap to the development of trade relations between the two countries at present is the lack of direct communication. Had we a direct steamship connection, I have no doubt that the trade between the two countries would soon grow to large proportions. I believe that there is a certain large Italian steamship company which would be only too glad to run a monthly service between Canada and Italy if it were made any way profitable for them. But they must have the assistance of the two Governments. The two peoples must understand each other and this they do not at present. It would be necessary that there should be a revision of the tariff also. But the first thing is the direct steamship line. Let us get that and we shall have started. At present I believe there are only three or four direct steamers a year. But say we should have one direct steamer a month plying between Canada and Italy. We should soon have results which would be of mutual benefit. There are, as you know, many lines which could be exported profitably from Canada to Italy, and just as many lines which could be exported from Italy to Canada. We require lemons, oranges, marble, while Italy must have grain, apples, coal and other things. Why, the Canadian wheat would command a record price over in Italy, and there is no reason in the world why a large trade should not be built up between the two countries in this commodity alone. The Marquis Doria, representing the Italian Government, has done much to promote trade relations between the two countries. Let us have direct connection by water and the rest will come naturally.

MILAN EXPOSITION—Partial View of Canada's Grain Exhibit.

OUR LETTER BOX

Correspondence on matters of interest to the hardware trade is solicited. Manufacturers, jobbers, retailers and clerks are urged to express their opinions on matters under discussion.

Any questions asked will be promptly answered. Do you want to buy anything, want some shelving, a silent salesman, any special line of goods, anything in connection with the hardware trade? Ask us. We'll supply the necessary information.

Wickless Oil Stoves.

A correspondent in Western Canada asks if he can be supplied with the name of anyone handling "Sunbeam" wickless oil burning stoves, made in Sweden. If no one in Canada handles them can the name of the Swedish manufacturers be supplied?

Letters for Cement Walks.

James Kingsboro, Coldwater, Ont., asks where he can buy bronze letters for imbedding in cement and letters to stamp impressions in cement.

The James Morrison Brass Mfg. Co., Toronto, or the Toronto Brass Mfg. Co., Toronto, can supply brass and bronze letters while B. Cairns, 23 Adelaide street west, Toronto, or the Toronto Stamp & Stencil Works, 82 Adelaide street west, Toronto, can supply the stamps for impressions.—Editor.

Hardware Store Arrangement.

McGregor Co., Caledonia, Ont., write: "Have you any books on hardware store arrangement and have you any cuts for use in advertising? If not, where can we get them?

"The American Hardware Store," by R. R. Williams, deals with store arrangement and display as well as many other subjects. It is sold for $3 by the publishers of Hardware and Metal. For cuts for advertising purposes write the National Hardware Bulletin, Argos, Indiana, or the Iron Age, 14-16 Park Place, New York.—Editor.

Linen Clothes Lines.

E. H. Briggs & Co., Winnipeg, ask for the names of the different manufacturers of linen clothes lines in Canada.

M. B. Perine & Co., Doon, Ont., are the only manufacturers of linen clothes lines in Canada, but the Consumers' Cordage Co., and other concerns make cotton and jute lines.—Editor.

RETAIL HARDWARE ASSOCIATION NEWS

Official news of the Ontario and Western Canada Associations will be published in this department. All correspondence regarding association matters should be sent to the secretaries. If for publication send to the Editor of Hardware and Metal, Toronto.

Officers Retail Hardware and Stove Dealers' Association of Western Canada:

Auditors—J. W. Peacock and C. F. Moorhouse, Toronto.

SHORTENING CREDIT.

A Thanksgiving Story by a Member of the Western Retail Hardware and Stove Dealers' Association.

Very few merchants take this serious matter really in hand and give it the attention it really deserves. Why is it that so many of us don't want to touch on this matter which rests so close to our welfare? Do we want the opposition to have the stiffest backbone and start shortening up first? And, also, that we are afraid of offending our customers. If we let the other fellow shorten up first, then there is no doubt but that he will have the longest bank account in the end. If we give a certain number of customers offence, better let them take it that way. It will pay you merchants better in the end, as we shall presently see.

The writer some years ago suddenly woke up one day in December to find that he had about $12,000 on his books still uncollected, and this at a time when the best part of the collecting season was over, and customers who had paid and those who had not paid were still telling us to "charge," and wholesale houses were writing as usual to know why certain drafts were returned. Certainly we were between the devil and the deep sea, and those were warm times.

But it was a good lesson and we suddenly got our backbone stiffened and up went the notice, "Our Books are Closed Until March 1st," and then we started in to collect in earnest. There was a howl, of course, and customers wanted to know why we had departed from the good old year-long credit system, and we felt that we had put our foot in the puddle sure and would have very few patrons left in a short while. However, we had put our hand to the wheel and there was no backing up. So we sailed right on. Although every few days some one would come in and tell us their money was all gone now, and they must get credit somewhere, but the reply that we were not in a position to give any credit until March 1st was always given.

The following Fall we again shortened up, and up went the notice: "Customers who are threshed will please consider their accounts closed for the season," and later on in the Winter used this sign: "Our books are closed until April 1st."

We had a hard tussle to keep them to it, what with a succession of poor crops and low prices, and the implement men pushing their collections, the farmer had a hard time of it. But we were not bankers, and advised them accordingly to borrow from those institutions. The following season we put up the notice: "Our books are closed from November 1st to April 1st."

That about settled the credit business in the Winter months, and during the past few seasons we have found very little trouble in keeping our books clear in those months, and have not found it necessary to use any farther notices in that line. Our customers were educated to know by that time that they could get reasonable accommodation during the Summer months, providing they squared up in the Fall and immediately their grain was sold.

We have also made it a rule during the past few seasons that if a customer did not pay off all his account in the Fall, not to allow him any further credit the following season until the account was squared off.

Did we lose any customers? We certainly did lose quite a number. But without any exception whatever the ones we lost turned out to be our best loss, for they were sold out or had to move out since that time, as they were of the N.G. type, and those kind of mortals I find are always the first to take offence. I wish a few more of the same kind had quit us too.

Well, brother merchant, you will want to know what kind of a location I had to start away from the time or tick question. We are in a very small country village, one of those small insignificant little places where, if an Ontario merchant stepped off the cars (as I have seen and talked with them) he would wonder where we got out trade from. When we started our shortening up system there were two good businesses in our town. Death a couple of years later took the best man away, and since then we have had no opposition right in our town. But we had within twenty miles of us or less a city where merchants were slashing prices right and left to get trade. (In fact the said city had earned the name at that time of being the slaughter house of the west).

We had also three other small towns within a six and ten mile radius. So you see we had no lack of opposition. Our trade is entirely with the hardy tiller of the soil, and if we may flatter ourselves just the least little bit, we are of the opinion that our methods of shortening credit helped in a great measure to turn our farmers' attention to a system of mixed farming, to raise stock on some of the fodder which heretofore always went up in smoke, and which now, in the shape of fat swine and cattle, etc., brings him in cash at all seasons of the year, and is gradually making him independent of the credit system. We further succeeded in reducing our book accounts by about $10,000, and this, with our regular monthly accounts included.

It may be that some of our merchants in this Great West do not require to shorten up, but in my own case it was simply a case of root or die, and we rooted.

If the above is of any assistance to any of my brother merchants in our young but vigorous associations, I shall feel amply repaid for these few lines. Apologizing. Mr. Editor, for taking up so much valuable space in your paper.

Manitoba General Merchant.

OUR THANKSGIVING STORY.

The interesting article published this week by a general merchant in Manitoba who carries builders' hardware and harness will be read with interest by every member of the Western and Ontario associations, if not by every hardware merchant in Canada.

The writer touches the point when he says it took backbone to tell his customers that he had "cut out" the giving of credit, and to stand firm by his decision when he saw some of his customers walk out of the door.

That all haven't got that amount of backbone is evidenced by the fact that the credit evil still exists but that an increasing number are getting it is certain. Out in the Western Provinces, for instance, it is probable that the great majority of the trade will follow the plan of "shortening up" from November to April during the coming and succeeding Winters.

As a result of getting together as members of the Retail Hardware Association they are now discussing the question of taking united action in this matter. Organization means agitation and agitation results in education.

"Shortening credits" is only one of many advantages to be gained through organization, but it in itself is sufficient to justify the existence of the retail hardware associations. If through organization the western trade decides to "shorten credits" every member's ten dollar fee will be returned a hundred times over.

Let's overcome personal jealousies and all unite in making the two retail hardware associations the power for good they can be made if they receive the support they deserve. And let other members write their experiences for publication on this page as the Manitoba member has done in his Thanksgiving story.

HARDWARE TRADE GOSSIP

Ontario.

Magladery Bros., Parkhill, have sold out.

Thomas B. MacDonald, of Kingsville, has sold to H. R. Scratch.

J. M. Winters, King, called on Toronto jobbers on Wednesday.

C. Beirl, Markham, was a hardware buyer in Toronto during the week.

H. E. Moore, hardware merchant, Oakville, was a visitor in Toronto during the week.

J. A. Brown, 502 Queen east, Toronto, has sold his hardware business to P. Rosenburg.

Mr. Russell, Victoria Harbor, called on the hardware jobbing houses in Toronto this week.

J. J. Small, who for several years conducted a tinware business in Uxbridge, has left for Cuba.

Geo. R. Plumb has removed into his new hardware store premises at 171 McCaul street, Toronto.

C. H. Whiteworth, hardware merchant and tinsmith, Smith's Falls, is disposing of his business.

Michael Schmidt, tinsmith, of Chepstow, is moing to Preston, where he has a position with Clare Bros.

The wife of J. Walton Peart, of the St. Marys Hardware Co., St. Marys, is dangerously ill with typhoid fever.

S. A. Connor, manager of the Odell Cartage Co., London, has been appointed manager for the Massey-Harris Co. in Toronto.

Fred Hatch, formerly of Hatch Bros., Whitby, but now a buckle manufacturer in that town, was a visitor in Toronto on Wednesday.

John C. Wilson, city representative of Cluff Bros., Toronto, takes up work next week as their traveling salesman in Eastern Ontario.

D. McLachlan, Glencoe, has disposed of his tin and hardware business to John Henry & Son. Mr. McLachlan has been ten years in Glencoe.

Geo. L. Allan, formerly in the hardware business in Goderich, has accepted a position with the W. S. Piper Hardware Co., of Fort William.

T. J. Nagle, of the Hays Mfg. Co., makers of McNamara hydrants and other brass goods, called on the plumbing supply houses in Toronto during the week.

Stanley Mills & Co. have purchased the building and business of Boulter & Gilmour, hardware merchants, Hamilton. Nelson Mills, of Vancouver, will conduct the new store.

Wm. Mosier, Blyth, has sold his hardware business there, and is going west. Mr. Mosier is a very popular young business man and his departure will be much regretted; he leaves for Saskatoon on the 22nd.

The marriage of A. H. Purdom, of the Purdom-Gillespie Hardware Co., London, to Miss Mary Edna Bell, daughter of John Bell, inspector of Wabash locomotives in Canada, took place on October 10.

Mr. Kitely, of Toronto, is erecting a building at Welland which he will occupy as a hardware store. This lot was sold a few months ago for $600, but Mr. Kitely had to pay $2,000 to get it. This shows some of the advances of property in Welland.

Jas. B. West, of the Queen City Oil Co., Toronto, died on the 7th inst., in his 71st year. He had been connected with the oil business for the last 20 years, having been with Samuel Rogers and the Royal Oil Co. before joining the Queen City Co.

G. W. Good, for the past ten years with Stewart & Wood, Toronto, has accepted a position with the Winnipeg Paint & Glass Co. Before leaving Toronto, Mr. Good was the recipient of a purse as a token of his esteem by his fellow employees of Stewart & Wood.

Quebec.

V. E. Milot, of Ste. Therese, was in Montreal on a purchasing trip this week.

H. Pitts, hardware merchant, of Cornwall, was a visitor in Montreal this week.

Thos. S. Baker, of the Ontario Steel Ware Co., Toronto, called on the Montreal trade this week.

J. C. Harbec, dealer in hardware and paints, St. Johns, paid a business visit to Montreal last week.

Mr. Pringle, of Pringle, Starke & Co., general merchants, Huntingdon, was noticed in Montreal recently.

Mr. Ayr, of the Walworth Manufacturing Co., Boston, called on the Montreal wholesale trade during the week.

The Montreal Steel Works will spend $250,000 during 1907 on land, buildings and plant to keep pace with their business.

E. C. Dingman, advertising manager of Frothingham & Workman, Montreal, will spend three or four days next week in Quebec City.

T. H. Newman, of Caverhill, Learmont & Co., Montreal, is attending the National Hardware Association convention at Atlantic City.

Mr. Ten Eyck, Canadian representative of E. C. Atkins & Co., saw manufacturers, was in Montreal on Wednesday, calling on the wholesale trade.

G. B. Lamarche and Mr. Pratt, of St. Vincent de Paul, called on the hardware trade in Montreal this week in connection with supplies for the penitentiary.

G. D. Pearson & Co., manufacturers of cone ventilators, Montreal, have received, through Jos. Lamarche, an order to instal eleven ventilators in the St. Famille convent at Sherbrooke.

Lewis Bros., Montreal, have installed a pneumatic tube service in their head offices, to facilitate the sending of letters and invoices from the sales to the purchasing and order departments, and vice versa.

W. H. Whitehead has been appointed manager of the Montreal branch of H. G. Vogel & Co., manufacturers of automatic sprinklers and water curtains, New York, succeeding H. Glassford, who has resigned.

A. G. Walker, formerly with Williams & Wilson, Montreal, has taken over the Canadian agency of the Jeffrey Manufacturing Co., engineers, founders and machinists, Columbus, Ohio. He has secured suitable quarters at the corner of Lagauchetiere and Cote streets.

George Gurry, retiring general superintendent of the Locomotive & Machine Company, Montreal, was tendered a banquet at the Windsor, Monday night, by the heads of departments, foremen and assistants. Mr. Gurry is leaving for Pittsburg to act as general superintendent of the American Locomotive Company's plant at that place.

Western Canada.

C. J. Winkler, Treherne, has joined the tinsmith shop of J. A. Thompson, Elm Creek, Man.

The capital stock of the Winnipeg Paint & Glass Co. has been increased from $250,000 to $500,000.

C. W. Shepherd, Vancouver, formerly in the hardware business at Leduc and Fernie, paid a visit to Strathcona lately.

The Northern Hardware Company, Winnipeg, Man., have purchased the bankrupt stock of F. M. Jean, of St. Boniface.

J. F. Wright has opened a new hardware store at Medale, Sask. Formerly he was in business with his brother at Lang, Sask.

The Togo Supply Co. have opened a new hardware store in Togo, Sask., one of the new towns which has sprung up in that province during the last twelve months. They have built a big two-storey shop and warehouse and are evidently making preparations for a large trade. The manager is G. R. Fogg, who for several years traveled for the Great West Saddlery Co. in what is now Western Saskatchewan. Mr. Fogg is overseer of the newly incorporated village of Togo.

JOBBERS AT ATLANTIC CITY.

The National Hardware Association is in session at Atlantic City this week, about 600 of the leading men in the trade in America being present.

T. H. Newman, of Caverhill, Learmont & Co., Montreal, president, and James Hardy, Toronto, secretary of the Canadian Wholesale Hardware Association, delivered addresses at the opening meeting of the convention and with Messrs. Thomas Dexter, of H. S. Howland & Sons, Toronto, W. Starke, of the Starke Hardware Co., Montreal, and Cyrus Birge, of the Canada Screw Co., Hamilton, will represent Canada during the remainder of the gathering.

FOLLOWING UP.

It is not a difficult matter for the retail hardwareman to adapt to his own use the principles brought out in our first article this week. There is no reason in the world why retail business methods should not be as aggressive as those of the wholesaler and manufacturer. In fact, present day conditions are rapidly driving storekeepers from the old time formula of "What can I do for you?" to "I would like to show you —— etc." and finally, to going "out into the highways and byways" digging up business wherever possible.

The most obvious "follow up" is suggested in our first article—that of personal solicitation over the counter. A judicious salesman can and will suggest wants to a buyer, which he is bound to recognize. This method is attempted by all clerks and employers, though with varying success. Many retailers, too, now send their clerks out to call on customers and canvas orders, and they find that astonishing returns are yielded, in this way.

But the most fruitful "follow up" system, that of using the mails, is almost entirely neglected. Some hardwaremen never think of sending out letters to their customers, except when they are forwarding their monthly accounts. This is a mistake, especially as using the mails, is the cheapest method of keeping in touch with a constituency.

It is not our purpose to outline a system of follow up by correspondence, suitable for a hardwareman. This he should be able to adapt to his own individual needs. After reading the article referred to. We would only suggest that if our readers are not already following this plan, they should fall into line. The field would be especially profitable, where farmers or mechanics form the greater part of the constituency. It is well known that people in this class do not, as a rule, receive a great deal of correspondence, so that they are almost sure to read a circular letter before consigning it to the waste basket. And they are large consumers of hardware. Of course, the more personal the letter, the stronger will be its effect. A typewriter is a good investment for a hardwareman who has this kind of constituency.

HARDWARE PLANTS EXTENDING.

Work was commenced this week on an extension of 120 x 80 feet to the hardware foundry of the Taylor-Forbes Co., at Guelph, the increase in manufacturing capacity being necessary in order to keep up with the tremendous demand for all lines produced at the plant. This demand taxes the factory and shipping departments to the fullest extent, but so far few delays have occurred in getting goods into the hands of customers.

Speaking to Hardware and Metal, however, a representative of the company said jobbers would have to learn to place their orders farther ahead than they have been accustomed to if they desire to avoid a shortage. The exceptional conditions which have arisen during the past few months make it necessary for manufacturers to order their raw materials for months ahead, the period becoming longer and longer all the time. In view of this situation the necessity of placing advance orders will be plainly seen.

Costs, too, are steadily advancing and as manufacturers have to pay more for labor and raw materials, they in return are finding it necessary to advance their quotations on the finished products. Each week sees new changes, the lists of articles published by us during the past month subject to higher quotations being exceptionally large.

Another concern making a large addition to their plant at present is the Canada Steel Goods Co., Hamilton, they having found that the large building erected by them less than a year ago has not been able to accommodate their rapidly growing business in hinges, butts, gate hooks, wrought staples, hasps, shelf brackets, and other iron and bright steel goods.

U. S. CURRENCY REFORM.

For years business interests in the United States have been hampered by the inelastic nature of their systems of currency and banking. In March last the New York Chamber of Commerce appointed a committee to report a plan for the remedy of the defects in the currency system. The committee after investigation and study covering a wide field of experience and suggestion reported last week, submitting alternative plans.

It recommends as its first choice the creation of a central bank of issue similar to the Bank of Germany or the Bank of France, such bank to deal exclusively with banks, and its stock to be owned in part by banking institutions and in part by the Government, but with the proviso that the representatives of the Government shall be supreme in the management. Under the plan proposed this central bank would issue currency, rediscount for other banks, hold public money, and act as agent of the Government in redeeming its paper money and making its disbursements.

The committee has not shut its eyes to the fact that public sentiment in the United States may not be found in a receptive state as regards what it deems the more desirable solution of the currency problem, and it presents as an alternative a plan under which national banks whose bond-secured circulation equals 50 per cent. of their capital should be allowed to issue additional notes equal in amount to 35 per cent. thereof, such additional notes to be subject to a graduated tax, ranging from 2 per cent. on the first issue of 5 per cent. of the capital to 6 per cent. on the last issue of 10 per cent. thereof. It is proposed that the proceeds of the graduated tax should constitute a guarantee fund in the custody of the Government for the redemption of the notes of failed banks.

Other recommendations are that the law restricting the retirement of national bank notes to $3,000,000 a month be repealed; that future issues of United States bonds be not made available as a basis for the issue of national bank notes, and that a law be enacted requiring all money in the general fund in the treasury above a reasonable working balance be deposited in national banks.

A SHINING JUDGE.

The delays of the law have become notorious, and many a business man in venge has pocketed a loss rather than entangle himself in the net of the lawyers. The lawyers at the bar are not wholly to blame; for some of the responsibility for this tardiness of litigation must be shouldered by the lawyers on the bench.

"Judgment deferred," how often have those leaden words weighed down the hopes of litigants looking for a speedy solution of their differences. It has become a habit of the judiciary. They must sleep over a case and some of them hybernate. Probably seventy-five per cent. of decisions are in regard to questions of fact and not in regard to law at all. These decisions could more easily and more accurately be arrived at when the facts and arguments are fresh and clean than when they have withered to a few skeleton notes.

This habit of procrastination, and that's all it is, a habit, and one of the hardest to overcome—is brought into relief by the practice of an Ontario High Court judge, not many years elevated. His appointment was regarded somewhat dubiously when made, but litigants and honest lawyers, at any rate lawyers who are given to getting their clients' business cleaned up, have lived to bless his name, just because he has forsaken the traditions of his elders and refusing to be bound by the habits of generations of judges, has endeavored so far as possible to give his decisions on the spot. To facilitate this procedure he has looked up the law bearing on cases to come before him so that when sized of the facts he was in a position to give a decision before leaving the court.

Praise this course as one may, it is nothing more than business. Any wide-awake man of business or affairs would spurn to do otherwise. Dilatoriness is the death of business. It's a cardinal sin of commerce. If the judiciary could rid themselves of it they would stand infinitely higher in the regard of the business interests of the country.

THE METAL SITUATION.

Bullish reports on copper are filling all the metal bulletins this week. The visible supply seems to be considerably behind the demand, and prices are rapidly advancing. On the Canadian market quotations have now reached 24 cents and jobbers who have any stock are considering themselves very fortunate. In some quarters the prediction is made that ingot copper will go as high as 30 cents, while sheet is expected to reach 30 cents before the end of the month, and ultimately 35 cents. New York interests are refusing to make contracts beyond the end of this year, owing to the recognized shortage. A report from a well known agency says in reference to copper: "There are no stocks stored up. The article is absolutely scarce, and we are now cabling all over the world, and without any regard to lowest figures. The question is to get the material. A great many of the large consumers are protected, but the small users are not, as a rule."

Pig lead still maintains the high record price reported last week, with the result that prices on sheet lead have been forced up. The scarcity of pig lead is quite as pronounced as that of copper. Under the circumstances, it will be bad news to learn that, owing to the strike of coal miners at Fernie and other points in the Crow's Nest coal district, the Canadian Pacific Company's smelter at Trail was shut down and blown out on Sunday. It will not be re-opened until the trouble is settled and a full supply of coke is assured. Meanwhile it is being repaired and put into shape for the resumption of operations. In addition to the Canadian smelters, several on the American side of the line will have to shut down, as they are dependent upon the Crow's Nest Pass fields for their fuel supply.

Ingot tin went up and then down in the early part of the week, but at the time of writing it is somewhat firmer than when we last quoted. The figures remain unchanged, however. Zinc spelter is also firming up. All other ingot metals are in the same position as last week.

Sheet metals in general are as strong as ever, with a likelihood of advances in some lines before long. As already noticed, sheet lead has already gone up, and ruling prices are now 25 cents per cwt. higher than last week.

SALVATION IN THE SOIL.

Back to the farm is the motto James J. Hill, president of the Great Northern Railway, would have the American people adopt. In the course of an after dinner speech in Chicago the other night after stating that by 1950 the population of the republic would be more than 200,000,000, he said:

"Practically speaking, our public lands are all occupied. The irrigation of land by the general Government will do something, but all present plans will furnish land for less than 1,500,000 small farms of forty acres each or for a population of 7,000,000 or 8,000,000. Our other natural resources have been exploited with a lavish hand. Our exports, of which we love to boast, consist mostly of the products of the soil. Our iron and coal supplies will begin to show signs of exhaustion before fifty years have passed. The former, at the present rate of increasing production, will be greatly reduced.

"Our forests are rapidly going, our vast supply of mineral oil flows to the ends of the earth. We cannot continue to supply the whole world and recruit our own resources by the methods of trade that now obtain, because the minerals stored in the ground do not recreate themselves. Once used they are gone forever. We shall, with these coming millions to provide for, be thrown back upon the soil, the only resource of mankind that is capable of infinite renewal. Upon the cultivation of the soil depends the future of mankind, and the nature and stability of its institutions.

"In some things we are going backward. The soils of the country are being impoverished by careless treatment. Forests are cut down that the sun may bake it, and the floods scour it into the ocean. It has been cropped with the same grain year after year until its productive power has deteriorated. The census returns show an actual decrease in farm values in a large number of the states. It is easily demonstrable that a reform of methods of cultivation would double the agricultural products and add from five to six billion dollars to the national wealth, while the resort to small farms and the adoption of intensive cultivation would give an equal increment.

"The costliest error will be in a clinging to the delusion that we are to continue to increase our exports and to live upon the profits of the foreign market. The time is coming when we shall need our wheat crop for home consumption and seed, when our mines will not yield, except at increased cost, the iron and coal required to manufacture commodities consumed at home, and when the cheap labor of the Orient, whose wages we cannot hope to meet, equipped with our machinery will vanquish all competitors. To a return to agriculture, to a jealous care of our land resources, we must come without delay if we are to escape disaster."

On Tuesday morning of this week the marriage of Edouard Surveyer, son of L. J. A. Surveyer, the Montreal hardware dealer, to Miss E. Barnard, took place at St. James Cathedral in that city, Archbishop Bruchesi officiating. The bride was attended by her nephew and niece, Master and Miss Doherty, and was given away by Mr. Chas. Barnard. Mr. L. J. A. Surveyer was witness for his son. Mr. and Mrs. Surveyer have left for Cuba and Mexico, where they will spend their honeymoon.

Markets and Market Notes

(For detailed prices see Current Market Quotations, page 62.)

THE WEEK'S MARKETS IN BRIEF.

MONTREAL.

Bar Iron—$2.10 base, f.o.b. Montreal.
Forged Iron—$2.35 base, f.o.b. Montreal.
Refined Iron—$2.50 base, f.o.b. Montreal.
Horseshoe Iron—$2.50 base, f.o.b. Montreal.
Wire Nails—Now $2.15 per keg base.
Escutcheon Pins—Bars 50 per cent.; steel 45 per cent.
Pressed Spikes—$3.15 base.
Felloe Plates—¾ in. to 2 inch rims 10 cents per lb.
Screw Hooks and Hinges—An advance.
Heavy T and Strap Hinges—A little higher.
Wringers—Up $1.50 per doz.
Wrought Washers—40 per cent. discount.
Turpentine—Up to 95 cents.
Coil Spring Wire—Advanced15 cents.
Ingot Copper—Up half a cent. Now 24c., 24½c.
Sheet Copper—Advanced 3 cents.
Sheet Lead—¼ cent higher.
Lead Pipe—Discount 5 per cent.
Iron Pipe—New discounts and a new list expected.

TORONTO.

Pig Iron—Famine in spot tin.
Ingot Tin—Advanced one cent.
Copper—Record prices quoted.
Lead Waste—Now 5 per cent discount.
Traps and Bands—Advanced to 50 off list.
Caulking Lead—Quoted at 5½ cents per lb.
Iron Pipe—New list shows advances.
Turpentine—Quoted at 95 cents in single barrels.
Hinges—Advances on different lines.
Coiled Spring Wire—Prices 10 cents higher.
Wringers—New list showing advances.
Wrought Iron Washers—New list.
Wrought Iron Butts—Now 70 and 5 off.
Wrought Hooks and Staples—Advanced.
Escutcheon Pins—Advanced on brass and steel.
Pressed Spikes—Five-eighths now $3.15.
Pliers—Advances on Button's imitations.
Lace Leather—Advanced quotations.
Cold Blast Lanterns—Now $6.50 per dozen.
Bar Iron—Advanced to $2.20 base.

Quebec Hardware Markets.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, October 19, 1906.

The holiday coming this week tended to make things a little quieter among the jobbers. Even so, however, a good movement of Fall goods was kept up, the lines going out, being about the same as last week. It is stated that business would be heavier, if a little broken weather would set in.

Goods are very scarce. Jobbers are experiencing the greatest difficulty in securing deliveries from manufacturers, and many orders are going out only partially filled. Higher prices, too, are constantly in order, as will be seen from the formidable list of advanced goods printed at the top of this column. In addition to those given, an early advance in all copper goods such as rivets, is confidently expected. Ingot copper is now very high with the market still advancing, so that this prediction seems fully warranted.

AXES—As being one of the most seasonable lines, axes are going forward steadily. We still quote: $7.60 to $9.50 per dozen; double bitt axes, $9.50 to $12 a dozen; handled axes, $7.50 to $9.50; Canadian pattern axes, $7.50 a dozen.

HANDLES — Business conditions remain very satisfactory, and we are still quoting: No. 3, $1.25; No. 2, $1.50; No. 1, $1.90 a dozen; adze handles, 34-inch, $2.20 a dozen; pick handles, No. 2, $1.70; No. 3, $1.50 a dozen.

LANTERNS—No change has taken place in the Montreal lists, and we are still quoting: "Prism," $7; "Prism" globes, $1.20; Cold Blast, $4; No. 0 Safety, $3.50 to $3.75.

COW TIES AND STALL FIXTURES—Large quantities are going forward in almost every order. We quote discounts as follows: Cow ties, discount 40 per cent. off list; stall fixtures, discount 35 per cent. off list.

SLEIGH BELLS—Many orders have gone out this week. Quotations are as follows: Back straps, 30c. to $2.50; body straps, 70c. to $3.50; York Eye bells, common, 70c. to $1.50; pear shape, $1.15 to $2; shaft gongs, 20c. to $2.50; Grelots, 35c. to $2; team bells, $1.80 to $5.50; saddle gongs, $1.10 to $2.60.

RIVETS AND BURRS—It is believed in many quarters that advanced prices are at hand, owing to the continued soaring of copper. Meanwhile, our prices remain as follows: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., copper rivets and tin swede rivets, 60, 10 and 10 per cent.; swede iron burrs are quoted at 60 and 10 and 10 per cent. off new lists; copper rivets with the usual proportion of burrs, 35 per cent. off, and coppered iron rivets and burrs in 5-lb. carton boxes at 60 and 10 and 10 per cent.; copper burrs alone, 30 per cent., subject to usual charge for half-pound boxes.

HAY WIRE—Good lots are still going forward, but the busiest season is now over. We still quote as follows: No. 13, $2.45; No. 14, $2.55; No. 15, $2.70; net cash, f.o.b. Montreal.

MACHINE SCREWS— Discounts as follows: Flat head, iron, 35 per cent.; flat head, brass, 35 per cent.; Felisterhead, iron, 30 per cent.; Felisterhead, brass, 25 per cent.

BOLTS AND NUTS— There is still an acute scarcity. We quote as follows: Carriage bolts, ⅝ and under, 60 and 10; 7-16 and larger, 55 per cent.; fancy carriage bolts, 50 per cent.; sleigh shoe bolts, ⅝ and under, 60 per cent.; 7-16 and over, 50 per cent.; machine bolts, ⅝ and under, 60 per cent.; 7-16 and larger, 55 per cent.

HORSE NAILS—We quote discounts: C brand, 40, 10 and 7 per cent.; M.R.M. Co., 55 per cent.; P.B. brand, 55 per cent.

WIRE NAILS—A nominal advance in price has taken place, and the general tone of the market is higher. We now quote $2.15 per keg base, f.o.b. Montreal.

CUT NAILS—Business remains on about the same plane as at our last report, and we continue to quote: $2.20 base, f.o.b. Montreal.

HORSESHOES—A brisk demand is being maintained. Prices remain as follows: P.B. new pattern, base price $3.50 per 100 lbs.; M.R.M. Co., latest improved pattern iron shoes, light and medium pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; snow pattern, No. 2 and larger, $3.90; No. 1 and smaller, $4.15. Light steel shoes, No. 2 and larger, $4; No. 1 and smaller, $4.25; featherweight, all sizes, No. 0 to 4, $5.60. Toeweight, all sizes, No. 1 to 4, $6.85. Packing, up to three sizes in a keg, 10c. per 100 lbs. More than three sizes, 25c. per 100 lbs. extra.

BUILDING PAPER—The situation is about the same as last week. Prices remain unchanged.

CEMENT AND FIREBRICK—There is still a great scarcity of material, due to the inability to secure transportation. Prices are as follows: E.D(ntT s tion. Our quotations are as follows: "Lehigh" Portland in wood $2.54; in cotton sacks, $2.39; in paper sacks, $2.31. Lefarge (non-staining) in wood, $3.40; Belgium, $1.60 to $1.90 per barrel; ex-store, American, $2 to $2.10 ex-cars; Canadian Portland, $2 to $2.05. Firebrick, English and Scotch, $17 to $21, American $30 to $35; White Bros.' English cement, $1.80 in bags, $2.05 in barrels in round lots.

COIL CHAIN—The scarcity of chain is still evident. We are quoting as follows: 5-16 in., $4.30; 3-8 inch, $3.80; 7-16 inch, $3.60; 1-2 inch, $3.40; 9-16 inch, $3.35; 5-8 inch, $3.25; 3-4 inch, $3.10; 7-8 inch, $3.05; 1 inch, $3.

SHOT— We still quote: Shot, packed in 25-lb. bags, ordinary drop AAA to dust, $7 per 100 lbs.; chilled, No. 1—10, $7.50 per 100 lbs.; brick and seal, $8 per 100 lbs.; ball, $8.50 per 100 lbs. Net list. Bags less than 25 lbs., ½c. per lb. extra, net; f.o.b. Montreal, Toronto, Hamilton, London, St. John, Halifax.

AMMUNITION—An astonishing demand is still being experienced by the Montreal jobbers We still quote:

Loaded with black powder, 12 and 16 gauge, per 1,000, $15; 10 gauge, per 1,000, $18; loaded with smokeless powder, 12 and 16 gauge, per 1,000, $20.50; 10 gauge, $23.50.

Ontario Hardware Markets.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto Oct. 19, 1906

Although broken by the holiday the volume of business transacted this week has been very large, general sorting and builders' hardware being included in most orders. Cutlery and silver goods are having a splendid sale and the demand for firearms and ammunition keeps up well. Some skates and sleighbells are being shipped out, but the call for them is by no means general as yet. Horse blankets are in general request, however. Booking for next Spring is heavy on account of the expected advances as a result of higher metal quotations. Calls for present delivery are subjected to many delays owing to manufacturers being behind in their shipments to jobbers.

Many advances have occurred during the week, and next week will see more changes. Hinges and butts, wrought hooks and staples, escutcheon pins, pressed spikes, pliers, lace leather, wringers, coil spring wire and cold-blast lanterns have all been marked up higher. The lantern manufacturers have gotten together and, having tired of the slaughter of the past year or more, are now getting their quotations back to former standard prices. Wringers have advanced from $1.50 to $3 per dozen, according to size.

AXES AND HANDLES—A good season is looked for and sorting is being largely done.

CUTLERY AND SILVERWARE — The shipment of both cutlery and silverware are very large, and few dealers are neglecting to stock up well for holiday business.

SPORTING GOODS — All shooting goods are selling in large quantities, while football supplies are selling well. Skate shipments are being made and hockey sticks are being bought liberally.

CHAIN—We continue to quote: 1 inch, $6.60; 5-6 inch, $4.55; 3-8 inch, $3.95; 7-16 inch, $3.80; 1-2 inch, $3.65; 9-16 inch, $3.55; 5-8 inch, $3.45; 3-4 inch, $3.35.

EXTENSION AND STEP LADDERS —Prices continue as follows: Step ladders at 10c. per foot for 3 to 6 feet, and 11c. per foot for 7 to 10 feet ladders. Waggoner extension ladders, 40 per cent.

TOOLS—A heavy trade has been done in mechanics' tools and the demand is still brisk.

SHOVELS—Demand is brisk and dealers are sorting in snow shovels.

LANTERNS — A readjustment has been effected and Cold Blast lanterns are now quoted at $6.50 per dozen. Shipments of lanterns, lamps and all lighting goods are extraordinarily large.

POULTRY NETTING—We quote: 2-inch mesh, 19 w.g., discount 50 and 10 per cent. All others 50 per cent.

WIRE—Barb, plain, twist and galvanized wire hold firm at the advanced prices, while coiled spring wire has also been moved up ten cents.

OILED AND ANNEALED WIRE — (Canadian)—Gauge 10, $2.31; gauge 11, $2.37; gauge 12, $2.45 per 100 lbs.

WIRE NAILS — We quote nominally $2.10 base, the market having advanced about five cents. Some mills are working on heavy western orders and higher prices are probable. The market is firm at $2, the advance in the east strengthening the local market.

CUT NAILS—We quote: $2.20 base, f.o.b. Montreal. Toronto, 20c. higher.

HORSENAILS—"C" brand, 40, 10 and 7½ off list. "M.R.M." brand, 55 per cent. off. "Monarch" brand, 50 and 7½ off. "Peerless," 50 per cent. off.

STABLE FITTINGS—This line is being included in most sorting orders and cow ties are in good demand.

HORSESHOES—Our quotations continue as follows: P.B. base, $3.65; "M.R.M. Co., latest improved pattern" iron shoes, light and medium pattern, No. 2 and larger, $3.80; No. 1 and smaller, $4.05; snow, No. 2 and larger, $4.05; No. 1 and smaller, $4.30; light steel shoes, No. 2 and larger, $4.15; No. 1 and smaller, $4.40; featherweight, all sizes, 0 to 4, $5.75; toeweight, all sizes 1 to 4, $7. Packing, up to three sizes in a keg, 10c. per 100 lbs. extra; more than three sizes in a keg, 25c. per 100 lbs. extra.

HORSE BLANKETS AND SLEIGH BELLS—Call for horse blankets is becoming general and shipments are fairly large. Bells are not so active.

RIVETS AND BURRS—Prices hold firm and demand is keen.

SCREWS—The expected advance in set and cap screws has not yet been made.

BOLTS AND NUTS—Stocks are light and prices firm.

BUILDING PAPER—Trade has livened up as a result of the cool weather.

CEMENT—We quote: For carload orders, f.o.b. Toronto, Canadian Portland, $1.95. For smaller orders ex warehouse, Canadian Portland, $2.05 upwards.

FIREBRICK—English and Scotch fire brick $27 to $30; American low-grade, $23 to $25; high-grade, $27.50 to $35.

HIDES AND WOOL—There is little change in the situation. Lambskins are advanced 5c.

Hides, inspected, steers, No. 1	0 12½
" " " No. 2	0 11½
" " cows, No. 1	0 12½
" " " No. 2	0 11½

Rendered tallow, per lb.	0 05 0 05½
Pulled wools, super, per lb.	0 25
" " extra "	0 27
Wool, unwashed fleece	0 15 0 16
" washed fleece	0 25

The Sydney Cement Co. is doing a rushing business, and the plant is kept running to its full capacity supplying orders. The company has just closed a contract for one thousand barrels for a firm in Cuba.

Canadian Metal Markets.

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, October 19, 1906.

Copper is the metal market "headliner" this week. It is still going steadily up, and, even before this appears in print, it is very likely that higher prices will have been declared. The recent course of copper seems to justify the statements previously made that the producing interests were trying to control the market and keep the price within reasonable bounds by distributing deliveries as evenly as posible. If that was true, then it would seem that the market has at last run away from this artificial control and is now being forced up by the combination of a short supply and an enormous demand. It is to be expected that all copper products will instantly advance in price to keep pace with the primary markets.

Pig lead is not so firm in tone this week. There has not, however, been any falling off in price, and a quick recovery may be effected. In any case, though, even granting that a shortage existed the present abnormal quotations cannot much longer continue without at least a temporary break.

All other ingot metals maintain the same position as last week, with zinc spelter, if anything, a trifle firmer. In sheet metals too the same strength is still shown, while an advance of 1-4c. in lead sheets has resulted directly from the ruling high price of pig lead.

COPPER — Another advance has transpired this week, and still higher prices are in prospect. We are now quoting: Ingot copper, 23c. to 23 1-2c.; sheet copper, base sizes, 29c.

INGOT TIN—The market remains firm at 46c. to 46 1-2c. per lb.

ZINC SPELTER—This week spelter is a little higher in tone, though the price remains $7 to $7.25 per 100 lb.

ANTIMONY—No change in conditions is recorded and we still quote: 27 1-2c. to 28c. per lb.

PIG LEAD—Although somewhat weaker in tone, the market is not such as would justify lower prices. We still quote: $5.15 to $5.25 per 100 lbs.

PIG IRON—The situation is not likely to change much before the close of navigation. We give prices as follows: Londonderry, $22.50; Carron No. 1, $23; Carron, special, $22; Summerlee, No. 2, selected, $22.75; Summerlee No. 3, soft, $21.75.

BOILER TUBES — We still quote British and American tubes, 1¼ inch, 8½c.; 2 inch, 8½c.; 2½ inch, 10c.; 3 inch, 12c.; 3½ inch, 15½c.; 4 inch, 20c.; 5 inch, 45c. Price per foot net.

TOOL STEEL—Prices are: Colonial

Black Diamond, 8c. to 9c.; Sanderson's, 8c. to 45c., according to grade; Jessop's, 13c.; Jonas & Colver's, 10c. to 20c.; "Air Hardening," 65c. per pound; Conqueror, 7½c.; Conqueror high speed steel, 60c.; Jowitt's Diamond J., 6½c. to 7c.; Jowitt's best, 11c. to 11½c.

MERCHANT STEEL — We are now quoting: Sleigh shoe, $2.22 1-2; tire, $2.32 1-2; spring, $2.75; toecalk, $2.87 1-2; machinery iron finish, $2.32 1-2; ruled machinery steel, $2.75; mild, $2.15 base and upwards; square harrow teeth, $2.27½. Net cash 30 days. Rivet steel quoted on application.

COLD ROLLED SHAFTING — Our prices are: 3-16 inch to 1-4 inch, $6.80; 5-16 inch to 11-32 inch, $5.78; 3-8 inch to 17-32 inch, $4.76; 9-16 inch to 47-64 inch, $4.08; 3 1-8 inch to 3 7-16 inch, $3.60; 3-4 inch to 1 7-16 inch, $3.75; 1 1-2 inch to 3 inch, $3.50; 3 1-2 inch to 3 15-16 inch, $3.75; 4 inch to 4 7-16 inch, $4.08; 4 1-2 inch to 4 11-16 inch, $4.42.

GALVANIZED IRON — We are still quoting the following prices: Queen's Head, 28 gauge, $4.35 to $4.60; 26 gauge, $4.20; 22 to 24 gauge, $3.65; 16 to 20 gauge, $3.50; Apollo, 28 gauge, $4.25 to $4.50; 26 gauge, $4.10; 22 and 24 gauge, $3.55; 16 to 20 gauge, $3.40; Comet, 28 gauge, $4.25 to $4.50; 26 gauge, $4.10; 22 and 24 gauge, $3.55; 16 to 20 gauge, $3.40; Bell brand, 28 gauge, $4.40 to $4.45; Fleur-de-Lis, 28 gauge, $4.20 to $4.45; 26 gauge, $4.05; 22 and 24 gauge, $3.50; 16 to 20 gauge, $3.35; Gorbal's "Best Best," 28 gauge, $4.25 to $4.50; "Windmill Best," 28 gauge, $4.15; Sword and Torch, 28 gauge, $4.15; Colborne Crown, 28 gauge, $4.40 to $4.65. In less than case lots 25c. extra.

BLACK SHEETS—No change has yet taken place. We continue to quote as follows: 28 gauge, $2.50; 26 gauge, $2.45; 22 and 24 gauge, $2.30; 20 gauge, $2.25; 17 and 18 gauge, $2.25; 8, 10, 12 and 14 gauge, $2.55.

CANADA PLATES—Our prices remain: 52's, $2.60; 60's, $2.65; 75's, $2.75; full polished, $3.75 to $4; galvanized, 52's, $4.25; 60's, $4.50.

TIN PLATES—The expected advance has not yet materialized. Our quotations are: Cokes, base size, 1C 14 x 20, $4; charcoal, base size, 1C, 14x20, $4.25.

TERNE PLATES—Our prices are: $6.85.

SHEET ZINC—Conditions are unchanged and we continue to quote: $8 in casks, $8.25 in less than casks.

SHEET LEAD—As predicted last week, advanced prices are in order now and we are quoting: 2 1-2 lbs., 6 1-4c. by the roll; 3 lbs. and heavier, 6c., by the roll; small quantities, 25c. per 100 lbs. extra.

BAR IRON—Advances in primary markets have compelled the rolling mill to raise their prices and we are now quoting: $2.10 base, f.o.b. Montreal.

OLD MATERIAL — We quote the following dealers' prices: Light copper, 15c.; heavy red brass, 15c.; yellow brass, 11 1-2c.; light brass, 8 1-2c.; lead, 3 1-4c.; zinc, 4c.; machinery cast scrap, $15.50; wrought scrap, $14 to $15; stove plate scrap, $12; mixed rags, $1 to $1.20 per 100 lbs.; old rubbers, 8c. to 8 1-4c.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, October 19, 1906.

Copper reached £102 in London on Wednesday, this being probably the highest price in the history of the metal. It can be said to be firm at almost any price the controlling interests seeming to have lost their grip and the short supply and brisk demand are now the controlling features of the situation. With copper climbing skyward, all copper and brass goods can be looked to for increases.

Other metals seem to be following in the wake of copper and tin, a weakening in lead early this week having been followed by an immediate reaction to former high figures. Lead, therefore, remains at our last week's figures, while ingot tin has been advanced one cent.

Bar, refined and horseshoe iron has been advanced as predicted by us a week ago, but owing to shortages some dealers are not quoting on any but bar. Pig iron is experiencing almost a famine so far as spot deliveries are concerned.

Other metals are firm in response to the general strength and buying is brisk in the face of the high prices owing to the bareness of stocks and expected stiffness during the Winter.

PIG IRON—There is almost a famine in the States and the market is rapidly advancing in Great Britain. There is no spot iron available anywhere. Our prices are: Radnor at furnace, $33; Hamilton at furnaces, No. 1, $21.50; Londonderry, f.o.b. Toronto, No. 1, $24; Middleborough, $23 to $24; Summerlee, $25.

BAR IRON—As predicted, we advance our quotations this week. We quote: $2.20 base, f.o.b. Toronto, with discount of 2 per cent net cash.

INGOT TIN—Prices are still climbing and business is very brisk. We quote: 45c. to 46c. per lb.

TIN PLATES—Conditions are unchanged with higher prices looked for. Our quotations are as follows: Cokes, base size, 14 x 20, $4 to $4.25; charcoal, base size, 14 x 20, $4.50 to $5.

GALVANIZED SHEETS — Stocks are light and buying good. Canada plates and black sheets are firm.

BRASS—Business is active and it is difficult to obtain deliveries. We quote: 23c. to 24c. per lb.

COPPER—Copper is quoted at record prices and owing to short stocks, is firm at almost any price. We quote prices as follows: Ingot copper, $24 per 100 lbs., and sheet copper $30 per 100 lbs.

LEAD—Despite fluctuations the market is firm and active. We quote as follows: $5.15 to $5.25 for imported pig and $5.50 for bar lead.

ZINC SPELTER—The market is quiet and prices unchanged. We quote: 7¼c. per lb. for foreign and 6c. per lb. for domestic. Sheet zinc has been advanced 25 per cent.

BOILER PLATES AND TUBES—We quote: Plates, per 100 lbs., ¼ in. and up, $2.45; heads, per 100 lbs., $2.65; tank plates, 3-16 inch, $2.50; tubes, per 100 feet, 1½ inch, $8.50; 2, $8.80; 2½, $10.75; 3, $12; 3½, $15.80; 4, $21. Terms, 2 per cent. off.

ANTIMONY—More business is being done and 27c. to 28c. is asked.

OLD MATERIAL — Prices are as follows: Heavy copper and wire, 16 1-4c. to 16 1-2c. per lb.; light copper, 14 1-2c. to 15c. per lb.; heavy red brass, 13 1-2c. per lb.; heavy yellow brass, 12c. per lb.; light brass, 8¼c. per lb.; tea lead, $3.40 per 100 lbs.; heavy lead, $3.60 per 100 lbs.; scrap zinc, 4½c. per lb.; iron, No. 1 wrought, $12; No. 2 wrought, $5; machinery cast scrap, $15; stove plate, $11; malleable and steel, $6; old rubbers, 7¾c. per pound; country mixed rags, $1 to $1.25 per 100 lbs., according to quality.

COAL—We quote the following prices: Anthracite in cars at bridge, egg, stove and nut, $5.50; grate, $5.25; pea $3.50 per gross ton.

Standard Hocking, soft coal, in cars, f.o.b. at mines: Lump, $1.50; ¾ inch, $1.40; run of mine, $1.30; nut, $1.25; N. P. and S., $1; slack, 75c.; box cars, 10c. per ton additional.

Youghiogheny soft coal in cars, bonded at bridges: 1¼ inch, $2.55; ¾ inch, $2.45; mine run, $2.35; slack, $2.05.

For Manitoba, British Columbia and Maritime Provinces markets see pages following.

LONDON METAL MARKETS.

From Metal Market Report, Oct. 16, 19 6.

PIG IRON — Cleveland warrants are quoted at 57s., and Glasgow standard warrants at 56s. 7d., making prices as compared with last week 9d. higher for Cleveland warrants and 10d. higher for standard warrants.

TIN—Spot tin opened strong at £197 7s. 6d., futures at £196 15s., and after sales of 350 tons of spot and 670 tons of futures, closed strong at £197 15s. for spot, £197 5s. for futures, making price compared with last week £2 higher on spot, and £2 15s. higher on futures.

COPPER—Spot copper opened strong at £99 17s. 6d., futures £99 10s., and after sales of 400 tons of spot and 1,000 tons of futures, closed strong at £99 17s. 6d. for spot, and £99 12s. 6d. for futures, making price as compared with last week £3 2s. 6d. higher on spot and £3 2s. 6d. higher on futures.

LEAD—The market closed at £19 7s. 6d., making price as compared with last week 2s. 6d. lower.

SPELTER—The market closed at £28 5s., making price as compared with last week 17s. 6d. higher.

British Columbia Trade News

Vancouver, B.C., Oct. 11, 1906.

Saturday evening, Oct. 6th, was marked by the worst fire in the history of the city, or of the province, for many a day. The big saw mills and attached properties of E. H. Heaps & Co. were almost completely consumed. The fire broke out—no one knows how—about 7 o'clock in the evening, and all that night and late the next morning the fire brigade covered the plant with streams of water. The only big items saved from destruction were the boilers and the $15,000 brick refuse burner, only completed this year. The estimate of loss is fixed at $200,000, of which $90,000 was covered by insurance. The mill was one of the largest and best equipped in the city. Large orders of lumber from local builders and contractors were in hand for completion, as a large part of the local trade was supplied from this mill. It is quite possible the mill will not be rebuilt in the present location, owing to the increased value of the water-front comprised in the property. A site a mile or so east of the city, yet on the water-front, is available.

* * *

As good an authority as General Manager Hays, of the G.T.P., made the statement when in Vancouver recently that it was not the intention to place any of the townsite property of Prince Rupert on the market until the preliminary surveys for the line were completed and reports made. To accommodate any business which may arise in the meantime, the railway company intends erecting temporary buildings which will be rented to the public. The interesting announcement has been made public that Robert Kelly, of Kelly, Douglas & Co., wholesale grocers, has entered into a partnership with the United Supply & Construction Co. to put in a large general store at Prince Rupert, which it is intended shall be open by Feb. 1st next. The company with which Mr. Kelly is now associated is a Montreal combination headed by Jas. Carruthers. This concern is popularly supposed to be in close touch with G.T.P. matters.

Contracts for clearing 320 acres of land on the Prince Rupert townsite have been awarded and work has been commenced. Much of the land is heavily timbered. A temporary hotel is to be erected by the company at once.

* * *

Rails are being laid on the Cloverdale-Sumas extension of the Great Northern Railway, and the construction of the Midway-Princeton branch is also being pushed rapidly forward, towards the Hope Mountains, through which the line will emerge westward on its way to the Coast via the Fraser Valley.

Rails are also being laid on the Nicola extension of the Spence's Bridge branch of the C.P.R., and considerable progress is noted. The new portion will soon be ironed ready to open.

* * *

In all building lines the season is yet very active on the Coast, there being much unfinished work, though comparatively little new work being projected. The unprecedentedly high price of lumber has been the chief cause of the lull in building activity, and the recent further increase of $1 per thousand feet is not likely to encourage or promote building operations. Houses are in keen demand in Vancouver, as less than the usual number have been built this season. The requirements of newcomers are as large as usual, if not greater.

Nova Scotia Trade News.

Halifax, N.S., Oct. 16, 1906.

Travelers who have just returned from Cape Breton brought in good orders. There is great activity in the various towns on the Island, and the season promises well. In the mining centres business is booming, particularly at Mabou, Port Hood and Inverness. In the fishing centres trade is not quite so good. The jobbers here are very busy and heavy orders are now going out, lumbermen's supplies being in good demand. Many of the large orders are for axes and tree saws. Single-bit axes are quoted at $5.50, and double-bit at $9. Tree saws, lance tooth, five feet, are quoted at $1.35 each, and leader saws at $2.50. There is good sale here for enamelware. The stove dealers are now very busy, and there is a good demand for stovepipe.

* * *

The Halifax City Council has just completed the purchase of the steam fire engine, Alexandra, from the Canadian Fire Engine Co. The engine, which has a capacity of one thousand gallons per minute, was built to the order of Halifax, but owing to delay in construction the contract was cancelled. The engine was brought here and placed on exhibition at the recent fair, and the city's representatives were so impressed with the machine that they decided to purchase it for $7,000.

* * *

Stories of gold discoveries in Cape Breton are being circulated. The latest mining news of importance from Whycocomagh Mountain, where a party of provincialists prospecting in that district is reported to have discovered a rich vein of quartz showing good quantities of the yellow metal.

* * *

Active operations are being carried on at the iron properties at Logan's Glen, four miles from Whycocomagh, where men are engaged in sinking a shaft to prove the quantity of the ore, the quality having been satisfactorily shown already.

* * *

Representatives of English capitalists were in Sydney recently looking over the ground with a view to establishing a coal bricketting plant in that city. They have already opened negotiations with the Dominion Coal Co. relative to the price for which suitable coal for this purpose can be purchased.

* * *

Business is booming at the Amherst Car Works. New orders have been coming in very plentifully for the past three weeks and more new machinery is being installed to enable the company to increase the output. The foundation of the new rolling mill is completed and brick work has been started and it is expected the building will be completed and machinery going in full blast by Christmas.

New Brunswick Trade News

St. John, N.B., Oct. 13, 1906.

A brisk trade with excellent prospects for the coming months—that is the general report from the hardware people in and about St. John. The effect of the weather upon a business cannot, of course, be judged with mathematical precision, but in the nature of things trade is likely to be best when weather conditions are favorable to the coming and going of the people. In this regard the weather clerk has been unusually kind to the hardware dealers of the province. The Fall has been exceptionally fine and business generally has benefitted in consequence.

Naturally one of the strong selling lines has been guns and ammunition. The sale of these articles has, on the main, been unprecedentedly good. More than one dealer has confessed to having this year had sales of these goods that were practically double those of last year and much in advance of those of any previous season. And the end of the season has yet to be reached though the heaviest of the orders may be counted upon as received. The price of shot has been advanced with that of other articles of which lead forms a part. But the advance of price has not affected the sale for hunters in their ardor for sport are not prone to be held back by so small a matter as that referred to.

* * *

This season has seen the lead prices at the highest figures they have reached in some fifteen or twenty years. All lead products have, of course, shared in the advance. Lead paints, for instance, have recently been quoted at an advance of about forty cents per hundred pounds. The conclusion of the general advance in metal prices is not yet in sight. Everything in the metal line is still showing the tendency for higher figures. Shelf hardware, too, is on the upward grade still. Despite the advances in the price of this line, however, there is prospect of a continuance of the demand.

* * *

A new company concerned in the manufacture of saws has recently been formed in the province. This is the Fox Sawtooth Co. The applicants for incorporation are H. W. Woods, Welsford; H. G. Venness, J. S. Scott, A. A. Slipp, and Hilda F. Fox, Fredericton. The company is to have a capital stock of $25,000. Its chief place of business is to be Welsford, Kings County.

The location of the Morning Safety Nut Works is still a matter of conjecture. Several towns are desirous of securing the works, but the syndicate that has acquired the rights of the old owners of the nut has not yet announced its plans.

* * *

The Enterprise foundry people have recently moved into new offices at Sackville.

* * *

Mr. Stanley Emerson, of Emerson & Fisher, returned on Friday from an extended western trip.

Hardware and Metal Conditions in Manitoba

(Market quotations corrected by telegraph up to 12 a.m. Friday, Oct. 19, 1906.)

Office of HARDWARE AND METAL,
Room 511, Union Bank Building,
Winnipeg, Man.

Large shipments of heavy goods are the feature of the hardware trade at present as shipments are being rushed in from the east before the close of navigation. General business continues very active in all seasonable lines, and collections are reported very satisfactory. Prices are steady and there are no quotable changes of importance.

LANTERNS—Prices are steadily maintained at revised quotations given in last issue. We quote as follows: Cold blast, per dozen, $6.50; coppered cold blast, per dozen, $8.50; cold blast dash, per dozen, $8.50.

WIRE—We quote as follows: Barbed wire, 100 lbs., $2.90; plain galvanized, 6 to 8, $3.39; 10, $3.50; 12, $3.10; 13 $3.20; 14, $3.90; 15, $4.45; 16, $4.60; plain twist, $3; staples, $3.50; oiled annealed wire, 10, $2.96; 11, $3.02; 12, $3.10; 13, $3.20; 14, $3.30; 15, $3.45. Annealed wires (unoiled) 10c. less.

HORSESHOES — Quotations are as follows: Iron, No. 0 to No. 1, $4.65; No. 2 and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to No. 1, $5; No. 2 and larger, $4.75.

HORSENAILS — Lists and discounts are quoted as follows: No. 10, 20c.; No. 9, 22c.; No. 8, 24c.; No. 7, 26c.; No. 6, 28c.; No. 5, 32c.; No. 4, 40c., per pound. Discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent., "M" brand and other brands, 55 and 60 per cent. Add 15c. per box.

WIRE NAILS—Steady at $2.60 per keg.

CUT NAILS—Quoted now at $2.70 per keg.

PRESSED SPIKES—Prices are as follows: ¼ x 5 and 6, $4.60; 5-6 x 5, 6 and 7, $4.25; ⅜ by 6, 7 and 8, $4.10; 7-16 x 7 and 9, $4; ½ x 8, 9, 10 and 12, $3.90; ⅝ x 10 and 12, $3.75.

SCREWS—Discounts are as follows: Flat head, iron, bright, 85 and 10 p.c.; round head, iron, 80 p.c.; flat head, brass, 75 and 10 p.c.; round head, brass 70 and 10 p.c.; coach, 70 p.c.

NUTS AND BOLTS — Discounts are unchanged and continue as follows: Bolts, carriage, ⅜ or smaller, 60 and 5; bolts, carriage, 7-16 and up, 55; bolts, machine, ⅜ and under, 55 and 5; bolts, machine, 7-16 and over, 55; bolts, tire, 65; bolt ends, 55; sleigh shoe bolts, 65 and 10; machine screws, 70; plough bolts, 55; square nuts, case lots, 3; square nuts, small lots, 2½; hex nuts, case lots, 3; hex nuts, smaller lots, 2½ p.c.

RIVETS—Quoted now as follows: Iron, 60 and 10; copper, No. 8, 34½; copper, No. 12, 40 p.c.

COIL CHAIN—Unchanged in price. We quote: 3-16 inch, $9.25; 5-16, $5.20; 7-16, $4.45; ⅜, $4.10; ¼, $7.20; ⅜, $4.60; ½, $4.30; ¾, $4.

SHOVELS—Discounts on spades and shovels continue 40 and 5 p.c.

HARVEST TOOLS—As noted in last issue there is a new list in harvest tools, but discounts continue as before, 60 and 5 per cent.

AXE HANDLES—Quoted as follows: Turned, s.g. hickory, doz., $3.15; No. 1, $1.90; No. 2, $1.60; octagon, extra, $2.30; No. 1, $1.60.

AXES—The revised prices are as follows: Bench axes, 40; broad axes, 25 p.c. discount off list; Royal Oak, per dozen, $6.25; Maple Leaf, $8.25; Model, $8.50; Black Prince, $7.25; Black Diamond, $9.25; Standard flint edge, $8.75; Copper King, $8.25; Columbian, $9.50; handled axes, North Star, $7.75; Black Prince, $9.25; Standard flint edge, $10.75; Copper King, $11 per dozen.

BUTTS—The discount on wrought iron butts is 70 p.c.

CHURNS — The discounts from list continue as before: 45 and 5 per cent.; but the list has been advanced and is now as follows: No. 0, $9; No. 1, $9; No. 2, $10; No. 3, $11; No. 4, $13; No. 5, $16.

CHISELS—Quoted at 70 p.c. off list prices.

AUGER BITS—Discount on "Irwin" bits is 47½ per cent., and on other lines 70 per cent.

BLOCKS—Discount on steel blocks is 35 p.c. off list prices; on wood, 55 p.c.

FITTINGS—Discounts continue as follows: Wrought couplings, 60; nipples, 65 and 10; T's and elbows, 10; malleable bushings, 50; malleable unions, 55 p.c.

GRINDSTONES—As noted last week, the price is now 1½c. per lb., a decline of ¼c.

FORK HANDLES—The discount is 40 p.c. from list prices.

HINGES—The discount on light "T" and strap hinges is 65 p.c. off list prices.

HOOKS—Prices are quoted as follows: Brush hooks, heavy, per doz., $8.75; grass hooks, $1.70.

CLEVISES—Price is now 6½c. per lb.

STOVE PIPES—Quotations are as follows: 6-inch, per 100 feet length, $8.50; 7-inch, $9.25.

DRAW KNIVES—The discount is 70 per cent. from list prices.

RULES—Discount is 50 per cent.

WASHERS—On small quantities the discount is 35 p.c.; on full boxes it is 40 p.c.

WRINGERS—Quotations are: Royal Canadian, $33; B.B., $37.75 per doz.

FILES—Discounts are quoted as follows: Arcade, 75; Black Diamond, 60; Nicholson's, 62½ p.c.

BUILDING PAPER — Prices are as follows: Plain, Joliette, 40c.; Cyclone, 55c.; Anchor, 55c.; pure fibre, 60c.; tarred, Joliette, 65c.; Cyclone, 80c.; Anchor, 65c.; pure fibre, 80c.

TINWARE, ETC.—Quoted as follows: Pressed, retinned, 70 and 10; pressed, plain, 75 and 2½; pieced, 30; japanned ware, 37½; enamelled ware, Famous, 50; Imperial, 50 and 10; Imperial, one coat, 60; Premier, 50; Colonial, 50 and 10; Royal, 60; Victoria, 45; white 45; Diamond, 50; Granite, 60 p.c.

CORDAGE—Manila rope has been advanced 50 cents per cwt. and quotations are now as follows: Rope, sisal, 7-16 and larger, basis, $11.25; Manila, 7-16 and larger, basis, $16.25; Lathyarn, $11.25; cotton rope, per lb., 21c.

SOLDER—Quoted at 27c. per pound. Block tin is quoted at 45c. per pound.

VISES — Prices are quoted as follows: "Peter Wright," 30 to 34, 14½c.; 35 to 39, 14c.; 48 and larger, 13½c. per lb.

ANVILS—"Peter Wright" anvils are selling at 11c. per lb.

CROWBARS—Quoted now at 4c. per lb.

POWER HORSE CLIPPERS — The "1902" power horse clipper is selling at $12, and the "Twentieth Century" at $6. The "1904" sheep shearing machines are sold at $13.60.

AMMUNITION, ETC.—As noted last week, shot has been advanced 25c. per cwt. We still quote: Cartridges, Dominion R. F., 50 and 5; Dominion, C. F., pistol, 30; military, 20; American R. F., 33½; C. F., pistol, 5 p.c.; C. F., military, 10 p.c. advance. Loaded shells: Dominion Eley's and Kynoch's soft, 12 gauge, black, $16.50; chilled, 12 gauge, $17.50; soft, 10 gauge, $19.50; chilled, 10 gauge, $20.50. Shot, ordinary, per 100 lbs., $7.25; chilled, $7.75; powder, F.F., keg, Hamilton, $4.75; F.F.G., Dupont's, $5.

IRON AND STEEL—Prices are Bar iron (basis, $2.50; Swedish iron (basis), $4.75; sleigh shoe steel, $2.75; spring steel, $3.25; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $9.50; Jessop, $13.

SHEET ZINC — The price is now $8.50 for cask lots, and $9 for broken lots.

PIG LEAD—The high price of $5.60 per cwt. is still firmly maintained.

AXLE GREASE—"Mica" axle grease is quoted at $2.75 per case, and "Diamond" at $1.60.

BLACK IRON PIPE—Quotations are: ¼ inch, $2.45; ⅜, $2.85; ½, $3.15; ¾, $4; 1, $5.75; 1¼, $7.85; 1½, $9.40; 2, $12.90.

LEAD PIPE—The price has been advanced to $7.80.

GALVANIZED IRON — Quotations are: Apollo, 16 gauge, $3.90; 18 and 20, $4.10; 22 and 24, $4.45; 26, $4.40; 28, $4.65; 30 gauge or 10¾ oz., $4.95; Queen's Head, 24, $4.65; 26, $4.65; 28, $4.90.

TIN PLATES—We now quote as follows: IC charcoal, 20 x 28, box, $9.50; IX charcoal, 20 x 28, $11.50; XXI charcoal, 20 x 28, $13.50.

TERNE PLATES—Quoted at $9.

CANADA PLATES—Prices have been steady since the recent decline. We quote: Canada plate, 18 x 21, 18 x 24, $3.15; 20 x 28, $3.40; full polished, $3.90.

BLACK SHEETS—Prices are: 10 to 16 gauge, 100 lbs., $3.50; 18 to 22, $3.75; 24, $3.90; 26, $4; 28, $4.10.

PETROLEUM AND GASOLINE — Prices are quoted as follows: Silver Star, per gal., 21c.; Sunlight, 22c.; Eocene, 24c.; Pennoline, 25c.; Crystal Spray, 24c.; Silver Light, 22c.; gasoline, 70-72 (engine), 25½c., in barrels, f.o.b. Winnipeg.

PAINTS, OILS AND TURPENTINE — White lead, pure, $7 ; bladder putty in bbls., 2½c. ; in kegs, 3¾c. ; turpentine, pure, in barrels, 97c. ; less than barrel lots, 92c.; linseed oil, raw, 64c.; boiled, 67c.

WINDOW GLASS—We quote : 16-oz. O.G., single, in 50-ft. boxes—16 to 25 united inches, $2.25; 26 to 40, $2.40; 16-oz. O.G., single, in 100-ft. cases — 16 to 25 united inches, $4; 26 to 40, $4.52; 41 to 50, $4.75; 50 to 60, $5.25; 61 to 70, $5.75. 21-oz. C.S., double, in 100-ft. cases—26 to 40 united inches, $7.35; 41 to 50, $8.40; 51 to 60, $9.45; 61 to 70, $10.50; 71 to 80, $11.55; 81 to 85, $12.60; 86 to 90, $14.75; 91 to 95, $17.30.

U. S. METAL MARKETS.

From the Iron Trade Review, Cleveland, Oct. 18, 1906.

To the prospect that the better grades of ore will be extremely scarce both during the Winter and next season is added the danger that the coke supply will prove inadequate with unusually high prices resulting. The principal producer, which was for years a heavy seller until it disposed of its product to the steel corporation, has entered the market as a buyer and has closed for some 360,000 tons of coke for 1907 delivery, it is understood, at about $3 per ton ovens. Some independent furnaces are already paying more, and shipments are badly hampered with the near approach of Winter. No sales of iron ore for 1907 have as yet been announced though it is pretty well agreed that the advance over this season's prices will not exceed 50 cents for Bessemer and 25 cents for non-Bessemer.

The pig iron market of the week, especially in the Pittsburg district, has been one of activity and excitement. Prices have soared to heights not touched since 1902, on certain grades of pig iron the advance being as much as $1.50 per ton within a few days. No. 2 foundry has sold as high as $25 in both the east and west with other grades at almost the same level. It is no longer denied that there is a pig iron scarcity throughout the country, at least for delivery before April of next year. Several instances were noted during the week of large plants closing down because of inability to secure iron and numerous foundrymen are already in dire straits.

In the finished material line activity continues unabated with mills running further behind on deliveries. Merchant steel pipe has been advanced some $4 per ton, and railway spikes are selling at fancy prices. The crude steel situation is not improved.

GASOLINE LIGHTING.

M. W. Howell, who in May sold his hardware business in Goderich, to C. C. Lee, and was recently appointed special representative for Western Ontario of the Pitner Gasoline Lighting Co., reports business good. He has installed the Pitner lights in Thamesville, Windsor, Dresden, Wallaceburg, Wingham, Seaforth, Exeter, London, Crediton, Goderich and other places, and states that in most cases the light replaced is electric light. The Pitner people, whose head office is in Chicago, have been located also in Winnipeg for some time, and are opening up in Toronto. The Pitner light is said to be giving excellent satisfaction where it has been installed, in dry goods stores, groceries, hardwares and private houses; in fact, it is claimed for it that 600 candle power is obtained at the cost of 32 c.p. from the incandescent lamps.

WESTERN TRADE ITEMS.

John W. Morrison, electrical contractor, Winnipeg, has assigned to C. H. Newton.

Golden & Hatton, hardware merchants, Winnipeg, have excavated a large cellar under their store.

Thomas Dunn, of Vancouver, will manage a large hardware supply house to be established at Prince Rupert, the new Pacific terminus of the G.T.P.

Frank R. Oliver, of Oliver & Kempthorn, Saskatoon, has been appointed manager of the Perrin Plough Co., Smith's Falls, Ont., at a salary of $5,000 a year. He will continue his interest in the hardware firm.

James Ashdown, the millionaire hardware dealer, of Winnipeg, has been asked by the Board of Trade, the Manufacturers' Association, the Trades and Labor Council, and other important organizations of that city to run for mayor.

W. A. Staples, electrical engineer and contractor, has rented Perham & Stewart's premises, Fredericton, N.B.

BRONZING SEASON

means bronze business, and the question you should ask yourself is: "Am I prepared to take care of this business?"

We have a large stock of Bronzing Materials—Gold, Aluminum and Colored Bronzes, Flitters, Metallics, Banana Oil, Gold Leaf Substitute, on which we would be pleased to quote you for immediate delivery.

THE WINNIPEG PAINT AND GLASS CO., LIMITED

Warehouses—CALGARY, EDMONTON WINNIPEG, CAN.

Everything for the Painter

Wire Glass

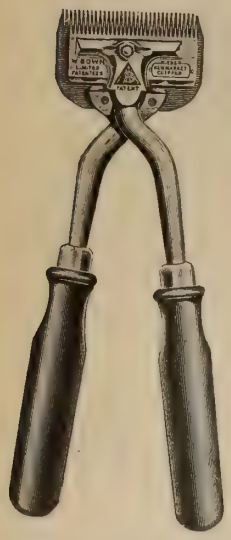
This is the season of the year when buildings are being completed—Wire Glass will be needed for Skylights, Metal Frames, etc.

Wire Glass is now almost universally used instead of Rough Rolled Plate on account of the ultimate economy. It may crack but the wire mesh keeps it intact and just as serviceable as ever.

Wire Glass is practially indestructible.

Special prices in case lots—write for them. Samples furnished on request. You may have an enquiry any day, better be prepared.

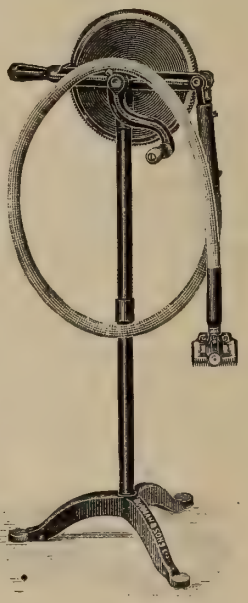
G. F. STEPHENS & CO., Limited



WINNIPEG, CANADA

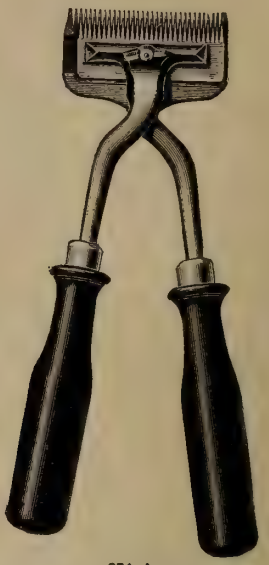
IN HORSE CLIPPERS OF ALL KINDS

THE NAME BURMAN



Stands as a Guarantee of QUALITY

Our reputation is unequalled



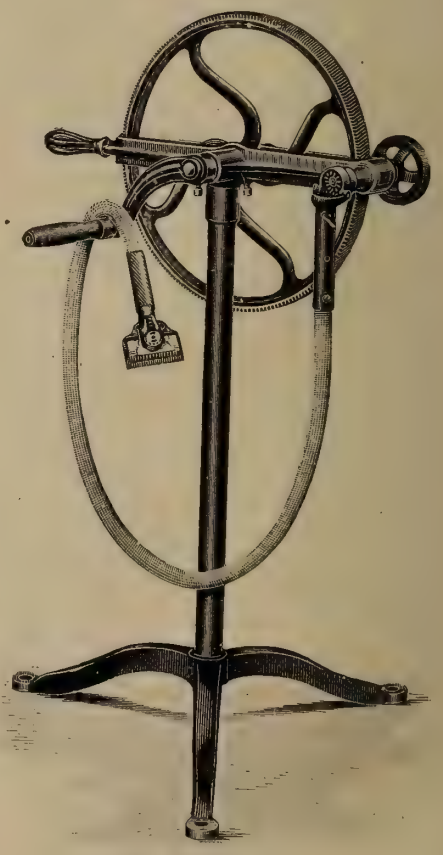
Rown's Newmarket Clipper. Made by Burman & Sons, Ltd.

Our No. 13, packs into a case 17-in. x 11-in. x 7-in., weight, 34 lbs.

No. 13.

All cogs machine cut from solid metal. Just the Clipper for the owner of one horse.

274 A
Handicap Clipper
The most popular selling line in the Dominion.



The Newmarket Power Clipper
Belt Driven Pattern.
An established favorite in the Dominion on account of its superior working qualities.

A light and compactly built Power Clipper suitable for small stables, and specially designed for portability.

The No. 13 is a triumph of reliablity at the lowest possible cost.

NOTE—The Burman Power Clippers work easier, clip faster, take a thicker coat, leave a finer finish, and wear longer than any others.

The Burman No. 12.
Cog Driven. Skew gear.
All Cogs machine cut from solid metal.

Agents (holding stock) B. & S. H. THOMPSON & CO. Ltd., MONTREAL

TRADE INQUIRIES.

Correspondents desiring to get in touch with any of the firms referred to should quote the reference number when requesting addresses. For information write to Superintendent of Commercial Agencies, Department of Trade and Commerce, Ottawa.

1250. Steel—A Yorkshire engineering firm manufacturing steel and iron wire ropes, also high-class mining steel, desire to hear from Canadian contractors and others interested in these goods.

1257. Machines—A Yorkshire engineering firm manufacturing lathes, planers, slotters, drilling, flanging, punching and bending machines, also wire-straightening machines, invites correspondence with Canadian buyers.

1261. Slate mantels and roofing slate—A British firm wish to enlarge its trade with Canada, and will welcome correspondence from Canadian importers of white mantels and roofing slates.

1262. Asbestos—A Manchester firm asks for prices of crude and ground asbestos, c.i.f. Manchester, from Canadian exporters.

1265. Washboards — A Manchester firm asks for prices of washboards from Canadian manufacturers.

1276. Mica—A Manchester firm wish to obtain samples and prices of clear soft green mica (only) from Canadian shippers of same.

1280. Roofing slate—A Welsh firm of slate merchants have made inquiry respecting the openings in Canada for the sale of roofing slate of good quality.

1281. Ropes—A North of England firm manufacturing wire ropes, hemp, Manilla, Italian, coir and cotton ropes is seeking to extend business with Canada.

1282. Electric supplies—A London firm manufacturing electric supplies for street, window and theatre lighting, improved glow lamps, time switches, etc., desires to extend its business with Canada, and is seeking information respecting the type of goods most in demand.

1284. Hooks, scythes, sickles, etc.—A Sheffield firm manufacturing hooks, scythes, sickles, etc., desire to get in touch with Canadian buyers, and invites correspondence.

1285. Files, saws, springs, etc.—A Sheffield firm manufacturing files, saws, springs, buffers, nuts and bolts, asks to be put in communication with Canadian buyers, and invites correspondence.

1286. Steel goods— A large Sheffield firm manufacturing steel goods of every description (except railroad rails) invites correspondence with Canadian buyers interested in these goods.

1287. Boilers—A Sheffield firm manufacturing all descriptions of boilers, both marine and stationary, invites correspondence with Canadian firms interested.

1288. Steel, saws, files, etc.—A large Sheffield firm manufacturing steel, saws, files, reaper sections, knives, sheep shears, picks and hammers; also all descriptions of mining and fine tool steel, desire to place their goods on the Canadian market, and invites correspondence.

1289. Bar iron, wire ropes, etc.—A large Sheffield firm asks to be referred to Canadian buyers and users of bar iron, wire ropes, horse shoes and wire rods, and invite correspondence with parties interested.

Western Canada Factory, 797 Notre Dame Ave., Winnipeg, Man.

REVOLVER MANUFACTURER'S WILL.

Frederick H. Wesson, of Worcester, Mass., who was cut off with a bequest of $50 by his millionaire uncle, the late D. B. Wesson, of Smith & Wesson, revolver manufacturers, Springfield, Mass., is fighting to have the will broken. Mr. Wesson left an estate estimated at $30,000,000. His grandchildren received $200,000 each, and his nephews and nieces $5,000 each. Frederick was mentioned in the will to receive $5,000, but a codicil added shortly before Mr. Wesson's death cut this down to $50.

SHE GOT THERE FIRST.

"I say, Gaddersby," said Mr. Smith, as he came into the fishmonger's with a lot of tackle in his hand, "I want you to give me some fish to take home with me. Put them up to look as if they've been caught to-day, will you?"

"Certainly, sir," said the fishmonger. "How many?"

"Oh, you'd better give me three or four barbel. Make it look decent in quantity without appearing to exaggerate, you know."

"Yes, sir. But you'd better take salmon, hadn't you?"

"Why? What makes you think so?"

"Oh, nothing, except that your wife was down here early this afternoon and said if you dropped in with your fishing tackle and a generally woe-begone look, to get you to take salmon if possible, as she liked that kind better than any other."

Mr. Smith took salmon.—Punch.

FOUNDRY AND METAL INDUSTRIES

The assets of the Imperial Foundry Co., Ottawa, were sold on Oct. 16.

The Dominion Iron & Steel Co. turned out 1,020 tons of steel rails last Saturday, breaking all records for a 24-hour production.

H. W. Sanders, of Sydney, N.S., representing eastern capital interested in iron and steel, is in the west looking for a location for crucible steel and stove works.

Cobalt, the New York Commercial says, is a unique mining camp by its remarkable surface showings and in the high grade character of its ores. No where else in this country can one walk on almost solid silver for hundreds of feet, and few, if any, of the world's mines boast the possession of vein matter running away up in the thousands of dollars to the ton. It is to these sensational features that the camp owes its notoriety, and to the same source that one can trace the present boom in Cobalt shares. Few are the mines that have paid from the grass roots, but this is what Cobalt mines have done. From few of the world's mining properties have the owners been able to quarry outright from the surface carloads of such rich ore. Along with these striking developments there has recently occurred an unprecedented rise in the value of the white metal, due to the large demand for coinage purposes in the Orient. Like all boom camps, it says, a large amount of wild-catting may be looked for.

THE USE OF CLAY CONES IN STEEL HEATING.

The days of estimating the heat of a work-piece by the color have gone by—at least in establishments where any weight is laid on uniformity of product. In the first place, no two men will agree as to the color of a piece in any one fire or bath; and in the second, the same temperature will be differently estimated in different parts of the shop or at different times of the year—or even day; and in the third place (what is of equal importance), no two steels will show the same color for the same temperature. Something more exact must take the place of the eye. There are some good pyrometers, but they are generally expensive and delicate, and inconvenient to apply. But there is a means of measuring—not estimating—temperature, which manufacturers of fine porcelain use, which should be of great value to steel workers in enabling them to ascertain with certainty just what the temperature in a furnace really is, instead of guessing at it. And here we may add what we should have given as fourthly above—that the eye grows tired and less sensitive to color; so that the same temperature will be estimated lower, after ten minutes' watching red or white hot metal or combustible.

The method to which we refer consists in the use of porcelain—or rather clay—cones of various melting or softening points; there are about sixty different grades, each stamped with a number corresponding to a definite temperature at which slumping down takes place. The range of temperature is between 590 degrees and 1,940 degrees C., or say 1,094 to 3,524 degrees F.

In order to find out which cones to use, where the right temperature is not known in degrees, the first test is made with several cones, and that one is chosen as the standard which at the desired temperature curls over and nearly or quite touches the floor of the furnace. It is best to use two cones of the proper number, one for the hottest and the other for the coolest part of the furnace; their curling over is to be watched through the usual peep-holes, preferably covered with mica. The cones should be protected from direct flame, just as much as the work-pieces are. A good way is to fence them around with two bricks on the side and one on top, the cone also standing on a brick. Another way is to use open-sided clayware hoods provided for the purpose, and which melt at a higher point than any of the cones. There are also small muffles which serve the same purpose, as well as capsules with lids; these latter, of course, must be drawn from the furnace in order to observe the cones.

Just why the cones now used are not marked with the melting temperatures instead of numbers ("022," "09," "29," etc.), "deponent saith not, not knowing"; perhaps some wire-gauge manufacturer can give the reason.—Scientific American.

Has your paint business been good the past year?
Would you be interested in a proposition that would bring you more trade and hold it for you?

Sherwin-Williams Paints and *Sherwin-Williams Methods of Selling* will do this for any merchant, anywhere. *Sherwin-Williams Products* bring success through their uniformly high quality and their world-wide reputation as the standard of excellence. *Sherwin-Williams Methods* bring success through the paint business they build up; through their splendid salesmanship; through their advertising force and their strong effect on present and future sales. With these, and the hearty co-operation of the dealer, *results* are assured. Better write us about our proposition *now*.

PAINT, OIL AND BRUSH TRADES

PAINT TO PROTECT IRON.

There are many causes of the rusting of iron. It may be produced by atmospheric action alone, but in a majority of cases galvanism plays a large part in the destruction of the metal. Long experience has shown how rapidly iron nails employed in fastening sheets of lead and copper upon roofs are destroyed, the other, the electro-negative metal, remaining comparatively unaffected. The electrolyte, or exciting fluid, which by acting on the iron and not on the other metal or by acting more upon the former than upon the latter, causes the electric current, is either actual water from rain or snow or the water vapor always present in the atmosphere. The decomposition of the water causes the liberation of oxygen at the positive pole, which is the iron, and this nascent oxygen rapidly combines with the iron. Now, it is claimed that red lead is an excellent material for protecting iron from rust and electrical action. Unfortunately, however, red lead is more electro-negative to iron than either copper or lead. Hence, should moisture by any chance get between the red lead and the iron, the destruction by rust is more rapid than when iron is in contact with copper or lead. This electro chemical action is at the same time strengthened by the purely chemical action between the red lead and the carbonic acid always present in the air, an action which converts the red lead into ceruse, whereby an additional quantity of nascent oxygen is set free to rust the iron. It is also highly probable that the carbonic acid has an independent action upon the iron, thereby much facilitating its oxidation. It must not be forgotten that every porous place and still more every crack in the paint becomes sooner or later an entrance for water and carbonic acid. A good oil varnish is by far the best protection for iron, but it must, of course, be properly used. Not only must the iron be scrupulously, practically and chemically, clean and dry when the varnish is applied, but the covering must be without a flaw. Varnish will not adhere to greasy, rusty or wet iron, and the contraction of the varnish on drying will cause minute cracks at such places, and the iron-destroying gases will find their way through these cracks, and get between the iron and the non-adherent varnish. Again, the varnish must be thoroughly dry before the iron is exposed to the weather. —Plumbers' Review.

BRITISH OIL AND SHELLAC.

In reviewing the linseed oil markets the Ironmonger, London, Eng., in a recent issue said:

The price movement in linseed oil was persistently downward from the end of August until the middle of September, and the total decline amounted to 27s. 6d. per ton. A good part of this has been recovered during the last few days, and the market is only about 10s. down on the month. So far as can be seen, the actual position of linseed oil is sound, if not strong. The imports for the eight expired months of 1906 compare with former years as follows:

	qrs.
1902	1,491,166
1903	1,486,057
1904	2,070,617
1905	1,389,134
1906	1,092,800

It will be noted that the normal receipts for the eight months are from 1,400,000 to 1,500,000 qrs., 1904 being well known as an exceptional year. This year we are from 300,000 to 350,000 qrs. short of the normal, and the rate at which linseed is now arriving indicates that by December the arrivals will be about half a million quarters below the average, or, say, a shortage of 25 per cent.; the annual quantity considered requisite for the trade being about two million quarters. The failure is largely in Argentine seed. Since the beginning of the present century the market has been accustomed to look for from 750,000 to 900,000 qrs. each year from this source of supply. At present there are only 450,832 qrs. in hand, with possibly a further 100,000 to come in before the end of December. Indian supplies are also small this year. The statistical position as thus briefly reviewed would seem to justify dearer prices for linseed oil, which at the present moment stands at £2 per ton below cotton oil, and £11 per ton below rape oil.

The market for shellac has been steadier than usual. Like turpentine, this article seems disposed to settle down at a very high level of value. Throughout the month the spot price of standard T. N. has been quoted at 220s. It is not the highest price known during times of famine, but it is sufficiently near that limit to make consumers rather uncomfortable. The supplies coming forward are small, the figures for the first eight months of the year being as below:

	cwt.
1904	86,520
1905	60,183
1906	55,395

NO WONDER

there has been such an increase in ELASTILITE VARNISH sales. Nothing remarkable about it though when you consider the quality of the varnish at such a reasonable price.

In tins only from ½ pints to 1 gallons. For outside or inside. "Wears on the job, not off it."

THE WAY A PAINT STANDS

"the ravages of time" is the point on which consumers want to be satisfied. You only need to tell them that the only white lead used in

"ANCHOR" LIQUID HOUSE PAINTS

TRADE MARK

is "Brandram's"

B. B. GENUINE

to settle this point.

What paint would be likely to stand more wear than the paint made with the white lead that has been the world's standard for nearly two centuries.

PAINT AND OIL MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, Oct. 19, 1906.

In all lines a brisk demand is evidenced, and prices on the whole are firmer than at our last report. The only exception is window glass, which is a little lower than our last week's quotations.

It will be noticed that dry white zinc is ½c. higher than former prices. This line is very firm just now, and white lead is also strong in tone, though the quotations of the local jobbers and grinders have not actually advanced very recently.

Linseed oil remains fairly steady. No generally accepted price can really be given, but our quotations are a good average under present conditions.

Turpentine has scored another advance, a sharp jump of 5c. per gallon having been recorded this week. This price, however, is really not abnormal for the time of year, as the price at this time last year was 98c. in single barrels.

LINSEED OIL—The market remains firm and steady. We quote as follows: Raw, 1 to 4 barrels, 52c.; 5 to 9 barrels, 51c.; boiled, 1 to 4 barrels, 55c.; 5 to 9 barrels, 54c.

TURPENTINE — Another jump has brought prices very close to last year's level. We quote: Single barrel, 95c. per gal.; two barrels or over, 94c. per gal.; for smaller quantities than barrels, 5c. extra per gal. is charged. Standard gallon is 8.40 lbs., f.o.b. point of shipment, net 30 days.

GROUND WHITE LEAD—We quote: Best brand Government standards, $6.50 to $6.75; No. 1, $6.15 to $6.40; No. 2, $5.80 to $6.15; No. 3, $5.55 to $5.80, all f.o.b. Montreal.

DRY WHITE ZINC—An advance has taken place and we are quoting as follows: V.M. Red seal, 7½c. to 8c. Red seal, 7c. to 8c.; French V.M., 6c. to 7c.; Lehigh, 5c. to 6c.

WHITE ZINC (ground in oil) — We quote: Pure, 8c. to 9c.; No. 1, 6½c. to 7½c.; No. 2, 5¼c. to 6¼c.

PUTTY—A great demand exists for this product. We quote prices: Pure linseed oil, $1.75 to $1.85; bulk in barrels, $1.50; in 25-lb. irons, $1.80; in tins, $1.90; bladder putty in barrels, $1.75.

ORANGE MINERAL—We quote as follows: Casks, 8c.; 100-lb. kegs, 8½c.

RED LEAD—Conditions are unchanged and we still quote: Genuine red lead in casks, $6; in 100-lb. kegs, $6.25; in less quantities at the rate of $7 per 100 lbs.; No. 1 red lead, casks, $5.75; kegs $6, and smaller quantities, $6.75.

GUM SHELLAC — Primary markets are constantly advancing, but Canadian jobbers quote the following prices: Fine orange, 60c. per lb.; med. orange, 55c. per lb.; bleached shellac (white) 65c. per lb.

SHELLAC VARNISH—Firm conditions continue, and there will no doubt be an advance before long. Meanwhile we quote: Pure white, $2.90 to $2.95; pure orange, $2.70 to $2.75; No. 1 orange, $2.50 to $2.55.

MIXED PAINTS—Prices range from $1.20 to $1.40 per gallon.

CASTOR OIL—We still quote as follows: Firsts in cases, 8½c.; in barrels, 8c.; seconds in cases, 8c.; in barrels, 7½c.

REFINED PETROLEUM — We quote as follows: American water white, 17c.; Canadian prime white, 15½c.; astral, 20c., ex warehouse.

GASOLINE—The ruling quotation at present is 24c. in bbls.

BENZINE—There is nothing new this week and we are still quoting 20¼c. in barrels.

WINDOW GLASS—Prices have declined somewhat, and we are now quoting: First break, 50 feet, $1.85; second break, 50 feet, $1.95; first break, 100 feet, $3.20; second break, 100 feet, $3.40; third break, 100 feet, $3.95; fourth break, 100 feet, $4.15; fifth break, 100 feet, $4.40; sixth break, 100 feet, $4.95. Diamond Star: First break, 50 feet, $2.30; second break, 50 feet, $2.50; first break, 100 feet, $4.40; second break, $4.80; third break, 100 feet, $5.75; fourth break, 100 feet, $6.50; fifth break, 100 feet, $7.50; sixth break, 100 feet, $7.50; seventh break, 100 feet, $8; eighth break, 100 feet, $9. Double Diamond: First break, 50 feet, $3.45; second break, 50 feet, $3.75; first break, 100 feet, $6.75; second break, 100 feet, $7.25; third break, 100 feet, $8.75; fourth break, 100 feet, $10; fifth break, 100 feet, $11.50; sixth break, 100 feet, $12.50; seventh break, 100 feet, $14; eighth break, 100 feet, $16.50; ninth break, 100 feet, $18; tenth break, 100 feet, $20; eleventh break, 100 feet, $24; twelfth break, 100 feet, $28.50. Discount on Diamond Star, 20 per cent.; on Double Diamond, 40 per cent.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, Oct. 19 1906.

Turpentine has been moved up another cent and is now firm at 95 cents, the highest price since the beginning of the year. Reports from the south also indicate increased firmness and if prices do not advance further they are likely to remain firm at present figures owing to the heavy call on Southern stocks for export to Europe. Linseed oil re-

THE CANADA PAINT COMPANY
LIMITED

mains at about the same position as it occupied a week ago.

White lead has not advanced any but it seems only a question of time before further increases are made. The shortage of stocks in Great Britain and Germany are being relieved by shipments from British Columbia. Last Fall there was very heavy buying owing to the announced imposition of an import duty and it is probable that this year will see a similar movement on account of the probable advances following the high prices for lead in the metal markets.

Heavy buying of paints, putty and glass is reported this week, the clear weather encouraging trade considerably. Fair orders for white lead are also being booked.

WHITE LEAD — Ex Toronto, pure white, $6.55 ; No. 1, $6.17½ ; No. 2, $5.80; No. 3, $5.55; No. 4, $5.30 in packages of 25 pounds and upwards; 1-2c. per pound extra will be charged for 12 1-2 pound packages; genuine dry white lead in casks, $5.40.

RED LEAD—Genuine in casks of 500 lbs., $6.00; ditto, in kegs of 100 lbs., $6 25; No. 1 in casks of 500 lbs., $5.75; ditto, in kegs of 100 lbs., $6.

DRY WHITE ZINC— In casks, 7 1-2c.; in 100 lbs., 8c., No. 1, in casks 6 1-2c., in 100 lbs., 7c.

WHITE ZINC (ground in oil)—In 25-lb. irons, 8c.; in 12 1-2 lbs., 8 1-2c.

SHINGLE STAIN—In 5-gallon lots, 75c. to 80c. per gallon.

PARIS WHITE—90c. in barrels to $1.25 per 100 lbs.

WHITING—60c. per 100 lbs. in barrels; Gilders' bolted whiting, 90c. in barrels, $1.15 in smaller quantities.

SHELLAC VARNISH—Pure orange in barrels, $2.70; white, $2.82 1-2 per barrel; No. 1 (orange) $2.50.

LINSEED OIL—Our quotations are: Raw, 1 to 4 barrels, 54c. ; 5 to 9 barrels, 53c.; boiled, 1 to 4 barrels, 57c.; 5 to 9 barrels, 56c. Toronto, Hamilton, London and Guelph ; net 30 days. Advance of 2c. for delivery to outside points.

TURPENTINE—Single barrels, 95c.; 2 to 4 barrels, 94c.; f.o.b. point of shipment, net 30 days. Less than barrels, $1.00 per gallon.

GLUES—French Medal, 12 1-2c. per pound; domestic shee', 10 1-2c. per lb.

PUTTY—Ordinary, 800 casks, $1.50; 100 drums, $1.75; barrels of bladdera $1.75; 100-lb. cases, $1.90;; 25-lb. irons, $1.85; 25-lb. tins (4 to case) $1.90; 12 ½ lb. tins (8 to case) $2.10.

LIQUID PAINTS—Pure, $1.20 to $1.35 per gallon; No. 1, $1.10 per gallon.

BARN PAINTS—70c. to 80c. per gallon.

BRIDGE PAINTS—75c. to $1 per gallon.

CASTOR OIL—English, in cases, 9 1-2c. to 10c. per lb., and 11c. for single tins.

REFINED PETROLEUM — Dealers are stocking up heavily for the Winter. We still quote : Canadian prime white, 14c. ; water white, 16c. ; American water white, 16c. to 18c. ex warehouse.

CRUDE PETROLEUM — We quote : Canadian, $1.32 ; Pennsylvania, $1.58 ; Ohio, 96c.

HIGHER PRICES FOR LEAD.

The importance of a fairly moderate value in lead pigments of all kinds but especially in white lead, is well recognized in the oil and color trades. Dear white lead means in too many instances bad paint, and bad paint means bad work, and bad work soon destroys the reputation of the best decorator, says the English Decorator's Review. The present upward movement in lead is thus of paramount interest to a large section of our readers. The general rise in the values of metals which, with some fluctuations, has really been in operation for about seven years, did not at first affect lead. During 1903, 1904, and a great part of 1905, lead ranged between £11 10s. and £13 per ton, while tin was at almost prohibitive prices. Spelter was dear, and copper was constantly advancing. The lead market began to feel the effect of dearer metals in the Autumn of 1905, and since then there has been a steady increase in the quotations until we have reached the comparatively high figure of £18 10s. per ton for Englis pig lead. Even this does not appear to be the end of the movement, the conditions being undoubtedly in favor of yet higher values, and the paint trade will do well to consider in time what is likely to happen when metallic lead is well over £20 per ton. The causes of the rise seem to be very similar in kind to those which have carried tin to such an inconvenient height, viz., a tendency to stoppage in the growth of supply; a natural increase in the world-demand caused by increase of population, and the abnormal activity of all industries in the United States. The drain of lead for America is acting on the lead market in Europe much as, during the past ten years, the drain of tin for the same place acted on the tin market. At present there seems no probability of a cessation of this drain and the new rule in commerce is that whenever America wants an article Europe is likely to go short of it.

The remedy, so far as the paint trade is concerned, would appear to be a concerted movement to put up the prices of all paints having a lead base, so that it may not be necessary to put down the quality. There is always a disposition to postpone this advance until considerable damage has been done to the reputation of paints, in the hope that the price of the lead base will soon go back. Just now there are good reasons for believing that the price will not soon recede, and if this be so, the earlier the conditions of the trade are realized the better for all concerned. The only true remedy for an advance in the cost of raw material is a corresponding advance in the price obtained for the manufactured article. Adulteration is no remedy.

BUILDING AND INDUSTRIAL NEWS

HARDWARE AND METAL would be pleased to receive from any authoritative source building and industrial news of any sort, the formation or incorporation of companies, establishment or enlargement of mills, factories, foundries or other works, railway or mining news. All correspondence will be treated as confidential when desired.

Improvements amounting to $6,000 have been made to the Ham & Nott factory in Brantford.

It is rumored in Brantford that the Grand Trunk will remove its Stratford shops to that city.

Fire on Oct. 11 caused $40,000 damages to the Brantford Starch Co's factory. It will be rebuilt.

The Standard Gas Holder & Boiler Construction Co., of Belleville, Ont., have obtained a charter.

A new mica factory affording employment to 400 girls, will be established at the Chaudiere Falls, Ottawa.

The Tudhope Carriage Mfg. Co., of Orillia, have bought land in Edmonton on which to erect a branch factory.

H. F. Anderson & Co. wholesale implement dealers, of Winnipeg, are making arrangements to open a branch warehouse in Regina.

A wealthy syndicate is being formed in Victoria and Vancouver to build a brick factory and exploit marble and sandstone deposits in British Columbia.

Symmes & Co., Niagara Falls, have been awarded the contract for supplying natural gas to Chatham. The gas will be brought from the Tilbury fields.

The Russel Gas Co. have been incorporated with $5,000 capital, to manufacture gas for light, heat and power purpurposes in the village of Russel, Man.

The Central Heating Co., Hamilton, have amalgamated with the Dominion Heating Co. of the same city. The company will not be ready to do business this winter.

The main building of the Dorchester Stone & Brick Works, Beaumont, N.B., owned by F. C. Palmer and C. L. Hannington, was burned entailing a loss of $1,000.

The Ideal Fence Co. with a capital of $100,000 have been incorporated to manufacture woven wire fencing, wire goods, metal gates, etc. The head office will be in Winipeg.

Fire at Summerside, P.E.I., on Oct. 10 caused loss to the amount of $200,000, with insurance of $50,000. The electric light station and the railway sheds were among the buildings burned.

The Lac Du Bonnet power plant of the Winnipeg Electric Co. has been shut down for want of water and it is feared the plant will be a total failure. It was installed this Summer at a cost of $4,250,000.

The Manitoba Government has granted a charter to the Provincial Contracting Co. to carry on business as builders and contractors. The capital is $150,000, and Winnipeg is the chief place of business.

The Winnipeg & Northern Automobile Co. is incorporated under provincial charter, to carry on a general automobile business. The capital stock is placed at $20,000. Winnipeg will be the chief place of business.

The Saguenay Construction Co. have been incorporated by the Dominion Government to carry on a general contracting business, the head office to be in Montreal, and the capital of the company to be $20,000.

The first cargo of lumber to leave British Columbia ports for Valparaiso, owing to the recent earthquake in the South American port, is now being loaded in the British ship Curzon, at the Fraser River Saw Mills.

A meeting of shareholders has been called for Oct. 23 to consider the proposed amalgamation of the Robb Engineering Co., of Amherst, N.S., and the Robb, Mumford Boiler Co., of South Framingham, Mass. D. W. Robb is managing director of both concerns.

The Modern Bedstead Co. have been incorporated by the Ontario Government. The capital stock is $150,000, and the head office will be in Cornwall, Ont. The provisional directors are: C. H. Fletcher, C. H. Nutter, of Sherbrooke, Que.; R. J. Pitts; W. J. Wallace, P. E. Campbell and J. C. Milligan, of Sherbrooke.

Messrs. R. Arbuthnot and John C. Marvin, of Winnipeg, are now owners of the Nanaimo Lumber Co.'s plant at the coal city. The deal was put through this week, the purchase price being $125,000 and over. Mr. Arbuthnot, one of the purchasers, has large lumber interests in Manitoba, where he has a retail yard in Winnipeg.

The Canadian Primelectro Co. have been incorporated to purchase and operate the patent rights of Allan E. Reid, and to deal in general mechanical and electrical equipment, the capital of the company being $1,000,000, and the head office in Montreal. The directors are: Dr. A. Quackenbush, Ottawa; G. G. Roe, Ottawa; Wm. Robertson, Montreal; S. L. Tingley, Providence, R.I.; and B. L. Nowell, Montreal.

A soap works, a pipe works, and a glass works are the industries to be established in New Westminster very soon, according to report. The soap works is to be built by a capitalist from the east who visited the Coast during the recent exhibition. The pipe works is being founded by local men backed by foreign enterprise. The glass concern may be a reality very soon, as the deal for the property, including buildings already erected, may be completed at any moment.

The Ontario Wind Engine & Pump Co., Toronto are about to ship to Cairo,

Egypt, two 16ft. airmotor outfits complete with irrigation pumps. This order follows a large one shipped a few weeks ago. It is interesting to note that Canadians are pushing their wares even to the land of the Pharaoh. This company are also making a good exhibit in New Zealand, which will still tend to spread the virtue of Canadian goods. They also received lately an order for a 40ft. "Halladay" windmill (largest size made in wooden wheels) for shipment to Chili, South America, via England.

The Polson Iron Works, Toronto, are planning a large addition to their works. The proposed site is 132x660 feet. The new building is for casting purposes, and would mean the employment of 100 more men by the company.

The manufacture of tantalum, one of the hardest metals known, into sheets and bars is now, it is said, being practised in Germany by the squirting process, the material in its original powdered form being mixed with water and gum tragacanth, and then successfully forced into rods and shapes as desired.

The Canadian Pacific Railway Co. have placed an order for 2,000 additional freight cars, bringing the total number now under contract at the Angus shops up to 4,000. An order was issued at the same time for thirty-five additional locomotives, which goes to the Montreal Locomotive Works. The decision was also arrived at by the executive to increase the present locomotive output at the Angus shops from 100 to 150 engines per annum. This means that the company will turn out three finished locomotives per week instead of two as they have hitherto done. The total outlay on the new rolling stock equipment that will be delivered to the company and distributed over the system by July next year will be between $7,000,000 and $8,000,000.

BUILDING NOTES.

O. S. Pelitel will build a $40,000 hotel at Milestone, Sask.

The Monarch Lumber Co. are erecting a large saw mill at Savona, B.C.

The Miller Cartage Co., of Toronto, will erect two storage warehouses to cost about $4.000.

Wm. Neilson, will erect a factory and stable on Gladstone avenue, Toronto, to cost about $15,000.

J. D. Membery has taken out a permit for a brick addition to his factory at Hamilton, to cost $500.

The C.P.R. will erect a new building at Moose Jaw, Sask., to supply acetelyne gas for passenger coaches.

The contract for a four-room addition to Chesley avenue school, London, to cost $7,475, has been let.

Baldwin & Haining, Sault Ste. Marie, have been awarded the contract for the building of Steelton town hall, at $5,990.

Property has been secured, supposed-

Paroid Roofing Will Make Money for You

READ THIS:

Thousands of dealers all over Canada and the United States are making with Paroid one of their most profitable lines. If you are not selling Paroid it will pay you to get our proposition.

Why Paroid is the Best Ready Roofing Made

Paroid is the best quality of ready roofing made. Railroads, manufacturers and farmers all over Canada and the United States are using it in place of shingles, tin, iron and other kinds of roofings, because it lasts longer and costs less.

We make Paroid from start to finish —we make our felt—the most important part of the roofing, while other manufacturers buy their felt where they can get it cheapest. That's the principle reason why Paroid lasts longest. We could not stand back of Paroid if we did not make the felt.

Paroid is **soaked** and coated with a thicker, smoother, more pliable and durable coating than is on other ready roofings. Send for samples of Paroid and compare it with other kinds. You can see and feel the difference.

Paroid is applied with the **only** anti rust-proof cap made. It insures a tight roof. Other roofs often fail because the cap rusts out. Paroid will not crack and break in cold weather. It is adapted for all kinds of buildings and will outlast other ready roofings.

How We Help You

Our advertising plan has doubled the sales of our dealers this year. It helps to sell their other lines, too.

Send for our proposition and we will mail advertising matter and samples to every likely user of roofing in your town. It will not cost you a cent and can't help bringing you orders. We'll send you all the electrotypes and special things you can use. We'll write letters to prospective customers and send our salesman to help you land orders. Write, telegraph or telephone at our expense at any time.

The Fall is the best season of the year to sell roofing. Can you afford not to sell Paroid?

It won't cost you a cent to try out our proposition and we stand back of every roll of Paroid you sell.

Sign your name to a postal to-day and we'll send you full particulars and samples.

Accidental Discharge Impossible—

True only if it is an

IVER JOHNSON

This is why

The positive safety device is the exclusive patent of the Iver Johnson Revolver. See the lever between the hammer and the firing pin? This lever is raised only when the trigger is pulled, receives the blow of the hammer and transmits it to the firing pin. **That's why** you can throw a loaded Iver Johnson against a stone wall without fear—no discharge can possibly follow, as the hammer **never** touches the firing pin. An Iver Johnson never fails when you **pull the trigger** and never "goes off" when you don't.

Iver Johnson Safety Automatic

Prices—Hammer $6.50, Hammerless $7.50.

Iver Johnsons are sold by dealers the world over, or direct from us if your dealer won't supply

Please send for descriptive catalogue, free upon request. It tells all about it.

IVER JOHNSON'S ARMS AND CYCLE WORKS, FITCHBURG, MASS.

ly for the Delaware & Hudson Railway, for the erection of a large hotel in Montreal.

The American Locomotive & Machine Co. at Longue Pointe, Que., are adding extensions to their works to cost about $175,000.

Work has commenced on the erection of a 3-storey private apartment house on St. Mark street, near Sherbrooke, Montreal, for Mrs. H. S. Phillips. The estimated cost is $40,000.

H. J. Gaine and Arthur Wheeler, jr., of the Canadian Mine & Smelter Supply Co., of Victoria, B.C., will erect a new factory for the manufacture of mining machinery at Victoria, B.C.

T. Berridge's tender of $17,575 for the enlargement of Rosedale Public School, Toronto, has been accepted. The first part of Riverdale High School will also be built, at a cost of $57,473.

The contract price for the new Methodist church at Souris, Man., is $16,000. The Souris Construction Co. will be the builders. Heating, lighting and seating, which are not included in their contract will amount to an additional $4,000.

Ald. J. L. Latimer, Winnipeg, will re-receive tenders up to Oct. 16 for the erection of concrete piers and abutments for a steel bridge over the Red River at Winnipeg. Also tenders for steel superstructure, to be in by November 20.

NEW LEAD WORKS UNDER WAY.

Work was begun last week on the excavation for the new lead corroding plant of Brandram-Henderson, at St. Louis, Montreal. The work will be pushed on as rapidly as possible, and it is hoped by the firm that building operations will be continued throughout the Winter.

The site on which the new structures will be erected is on St. Urbain street, near the Mile End station of the C.P.R., and extends for 1,000 feet along that company's right of way. In all, the property contains an area of 153,000 square feet. Arrangements have been completed for building, besides the lead factory, a dry color house, which will probably be under way this Fall, a paint factory, which will be constructed next Spring, and a power house, where electric energy will be generated to run the entire plant.

The lead factory, which will be the first building to be constructed, will be a one-storey structure 340 feet long by 145 feet wide. At one end of the building, where the lead stacks are to be placed, the building will be two storeys in height. The dry color factory and paint factory, when erected, will replace the present crowded Wellington street factory of Brandram-Henderson (formerly Henderson & Potts Co.) With the increased manufacturing and shipping facilities which will then be afforded, Brandram-Henderson expect to still further boost the sales of "English" and "Anchor" paints.

CONDENSED OR "WANT" ADVERTISEMENTS.

Advertisements under this heading 2c. a word first insertion; 1c. a word each subsequent insertion.

Contractions count as one word, but five figures (as $1,000) are allowed as one word.

Cash remittances to cover cost **must** accompany all advertisements. **In no case** can this rule be overlooked. Advertisements received without remittance cannot be acknowledged.

Where replies come to our care to be forwarded, five cents must be added to cost to cover postage, etc.

ARTICLES FOR SALE.

CORNICE brake and a number of other tinsmith's tools in first-class condition for sale cheap Chesney & Smiley, Seaforth, Ont.

ARTICLES WANTED.

WANTED—Tinsmith's outfit, second-hand, must be in good condition. The Sussex Mfg. Co., Sussex, N.B.

SITUATIONS VACANT

WANTED hardware traveler for Montreal hardware importing house, dealing chiefly in German hardware and cutlery. Good advancement for a capable and energetic man. All communications treated confidentially. Box 562, HARDWARE AND METAL. (42)

FURNACE MEN WANTED—Highest wages are offered to competent furnace men in the largest cities in the west; also splendid openings for mechanics with a general knowledge of steam fitting and furnace work. Apply to The Pease-Waldon Co., Limited, Winnipeg, Man.

TINSMITH WANTED—To go west; must be first class; good on furnaces. Steady man. Highest wages and steady job to right man. Box 555, HARDWARE AND METAL, Toronto. [41]

SITUATIONS WANTED

SPECIALTY traveller, good salesman. 385 Markham St., Toronto.

EXPERIENCED plumber wishes situation in Alberta or British Columbia, knowledge of hot air heating. Box 559 HARDWARE AND METAL.

PRACTICAL all round stove man wishes position as superintendent or foreman of mounting or pattern shops. New industry preferred. Thoroughly competent and up-to-date. Box 561, HARDWARE AND METAL, Toronto. (41)

FOR SALE IN SASKATCHEWAN.

THE only retail hardware in hustling new town, main line C.P.R., rich district just developing; ideal location for home and enlarging business. Big turnover; $5,000 will handle; good reasons for selling. Box 8, Morilach, Saskatchewan.

TO MANUFACTURERS

desirous of selling direct to retail trade in Manitoba, Saskatchewan and Alberta an opportunity is afforded by the advertiser who is a practical hardware man and will personally call on the trade. Correspondence solicited. Address W. J. B. care P.O. Box 1233, Winnipeg, Manitoba. [43]

W. J. Mackay, hardware merchant, of Midale, Ont., will erect a two-storey store building.

EDUCATION AND BUSINESS.

Education is the foundation of civilized society. It has well been called "the cornerstone of our republic." Education, which was in the beginning confined to a favored class, is now open to all, and the man who neglects the educational opportunities of his age puts himself out of the running in life's race. The need of education is not confined to the so-called "learned professions," it is equally important in trade, in commerce, in business, in manual labor. The man who day after day works with his hands, runs a machine, keeps books, sells over a counter, works in the bank, or manages a great business corporation becomes a mere drudge, a mere slave to work alone, unless he has by education had his mind opened wide to the thoughts and work of other men.

We must not forget the misery that the greed for gold has brought upon men and nations. The stupendous growth of our country during the last 25 years, the enormous increase of great fortunes in the hands of a few, started the fever of speculation among our people. Men have been crazy to grow rich over night. They have tried, like the seekers for the philosopher's stone of old, to make something from nothing. The result of all this has been the development of what may be termed a "commercial conscience"—a conscience that has chosen a different standard for business than for any other work of life; a conscience that has thrown aside all ideals other than the single one of money; a conscience that has sneered at old-fashioned, common honesty in trade; a conscience that has called trickery ability; a conscience teaching that all things—that all men—have their price, can be bought.

It is under the corporate form that most of the industrial evil of to-day has been done. The individual has hidden behind the corporation. The old-fashioned individual responsibility has been shifted to the responsibility of the corporation, which knows no individual. This law of personal responsibility is in great measure responsible for the growth of what I have referred to as "commercial conscience." Under the form of a corporation men have been willing to do, or cause to be done, that which they would not do as individuals. Behind the corporate form they have been able to conceal the evidence and record of acts for which, as individuals, they would have been, and should now be condemned. Through the corporation the control of great interests by the ownership of 51 per cent. of the stock has made men forget the minority stockholder and fail to realize that the directors of corporations are trustees for every stockholder, not merely for 51 per cent. of the stockholders.

Publicity in the affairs of corporations is resulting in accurate knowledge of conditions and has opened the way to great improvements. If men know that their business acts cannot be hidden from their associates they will see to it that nothing unfair, nothing dishonest be done. The leaders of business are not insensible to public opinion. A director of a bank would not use bank funds for personal gain if his act would be immediately known to the depositor. The railroad manager would not give rebates if he were unable to conceal them The manufacturer would not use unfair methods to destroy a competitor's trade, nor deceive the public as to the quantity and quality of his product if his actions would be known to the public.

One of the newer questions in business is the difference between fair and unfair competition. None more need the guide of high ideals. We demand free competition, but competition inevitably means greater success to some than to others. The man without ideals, he who says business is business, adopts as his rule of conduct, "anything to win," uses every means not legally prohibited to destroy his competitors, and, little by little, as the pinch comes, tries by trickery to evade the law, and finally, if he thinks himself big enough and strong enough, ignores the law. Such men deny that fair competition is possible. They represent the idea that "might makes right."

The game of football is a good example of the rough and tumble of business life. The man who plays for the ball, and in so doing outruns, knocks down, and perhaps injures an opponent, with the hope of thereby getting the ball, he plays an unfair game, and ought to be put off the field. So in business, a man should give the best that's in him to honestly and lawfully make his business succeed, but he should not make the injury or destruction of a competitor the object of his endeavor.

The demand for steel wire rods is quite active just now and the rod mill of the Dominion Iron & Steel Co. is kept busy supplying orders. It is probable that in order to meet the demands of the trade the mill will have to be placed on double shift.

The quantity of rods consumed in Canada this year is practically the same as last year. The Dominion Iron & Steel Co. last year supplied 54 per cent. of the Canadian market while this year it has supplied about 72 per cent.

HOT AIR HEATING FADS AND FALLACIES

Address delivered by R. S. Thompson, before the American Society of Heating and Ventilating Engineers, Chicago, Ill.

That I may not seem to claim all wisdom in this matter, I ask you to interpolate the words "it is my opinion" before each of my statements. These are my "opinions" based on study, observation and experience. Some of them will probably commend themselves to your judgment. Some may be fads of my own. Some may themselves be fallacies. I believe they are all worthy of your consideration and discussion.

It is a fallacy to suppose that a set of rules can be formulated by the observance of which any man can heat any building. In no two buildings will exactly the same conditions be found. Each building is a proposition to itself. Without an intelligent comprehension of the principles involved, an ability to closely examine conditions, ascertain causes, reason from effect to cause and from cause to remedy, a set of rules may be more of a hindrance than a help. There is no profession in which "a little learning" is more often "a dangerous thing."

Cold Feet Cured in Church.

Something over a year ago I was called to examine a large church, the heating of which had been a perplexing problem for more than a generation. The auditorium was always cold for at least two or three feet above the floor. I noticed that even when the church had been long heated there seemed to be downward currents of cold air.

There was unanimity of opinion that something must be done to draw the cold air off the floor. One party had suggested putting in an electric fan and pumping it out. At one time the plan had been tried of cutting off the bottoms of the doors into the vestibule and leaving open the door from the vestibule into the tower. The draft of the tower had caused a strong outward flow of cold air under the doors, but the congregation complained so bitterly of cold feet that the plan was abandoned.

After learning all I could about the plans which had failed, I proceeded to diagnose the case. I had all three furnaces fired to the limit for three hours, and then sought carefully for evidences of "back pressure." I found none. Instead I found at the bottom of every door and window a strong inward current of air. That explained the situation. The building was leaking at the top—leaking so badly that all the air the furnaces could supply was best lost by leakage, and more was being drawn in from outside, which, being cold, of course, settled on the floor. Had I followed the rule "draw the cold air off the floor" (which is the correct rule when a room is "air-bound" and there is "back pressure" on the furnaces), I would simply have drawn in more cold air to settle on the floor. This explained the failure of the plan to use the tower as a pump. This explained the downward currents of cold air.

As the leaks could not be stopped, the only remedy was to pour in hot air faster than it could leak out at the top, and so "push" the cold air off the floor.

I examined the furnaces and found that when working up to the limit the three could deliver about 1,400 cubic feet of air per minute. I took out two of them and put in two others with a combined capacity of 4,000 cubic feet per minute, putting in larger pipes to allow this larger flow. With these two going I again examined the building and found air flowing out gently under all the outer doors, but not enough "back pressure" to interfere with the operation of the furnaces. The congregation have not had cold feet since.

It is a fallacy to suppose that you can determine the amount of heat needed for a room or building by ascertaining its cubical contents.

Wall Surface Most Important.

Heat once put into a building would remain there forever, and a building once heated would require no further heat to maintain the temperature were it not for leakage of hot air out and leakage of cold air in and conduction of heat through the walls. But leakage and conduction both depend entirely on wall surface and not at all on cubic contents, so that wall surface is the only thing to be considered.

I have adopted a rough and ready rule which works well in most cases with the average house but which, like all other rules, must be used with common sense.

"Divide the number of square feet exposed wall surface by two. The product is the number of cubic feet of air at 140 degrees that will be required per minute to maintain a temperature of 70 degrees with the outside temperature at zero."

Of course, it is up to the engineer to determine how many cubic feet of air at 140 degrees any given furnace can supply, and how many cubic feet per minute each pipe can deliver. Rough and ready rules will not do in this estimate; an 8-inch pipe will deliver more air under some conditions than a 12-inch pipe will deliver under other conditions.

It is a fad to cover hot-air pipes with a thin sheet of asbestos paper, in order to "keep in the heat." The rough surface of the paper is a better radiator than the bright surface of tin or galvanized iron, and this more than balances the slight gain from the non-conducting power of the sheet of paper. Being spongy, it retains moisture and rots the pipes. The only good purpose I have ever known it to serve is to hide bad joints and botch work. If you must use asbestos, put on half an inch.

Fads and Fallacies Exposed.

It is a fad to set the furnace under the northwest corner of the house with the idea that the air will travel through the pipes more readily in the direction the wind is blowing. Set the furnace where you can reach all the rooms with the shortest pipes and the fewest angles.

It is a fallacy to suppose that you must put a register in the coldest part of the room in order to heat it. It is no warmer six inches away from the current of air that flows from a register than in any other part of a room. The air issuing from a register goes directly to the top of the room, and all heating with hot air is from above downward, no matter where the registers are placed. I should like to try the experiment of heating a house with all the registers in the ceilings. It would at least be a novelty, and I believe would have many advantages.

It is a fallacy to put a register near an outside door or window in order that the wind which blows in through the cracks may drive the hot air over to the back of the room. If the furnace is working properly there will be an outflow instead of an inflow of air around doors and windows. If the hot air enters near these leaks it will flow out through them and the cold air will be pocketed in the back part of the room. Put your register as far away from the outlet as you can and the hot air in making its way to the outlet will force the cold air out first.

Furnace Contracts.

It is a fallacy for a man to suppose that he can wait till his house is nearly finished before he places his furnace contract and then get good results.

The furnace contract should be let before the excavation for the foundation is begun. As soon as the contract is let the engineer should take the blue prints or tracings of them and lay off on them the entire plan. The location of the furnace, the smoke pipe, the leader pipes from furnace to first-floor register boxes and stack and register should be given. Then these plans should be gone over with the owner to see that the location of the registers does not interfere with his plans for arrangement

of furniture. This settled, copies of these plans should be given to the building contractor with instructions that as the building progresses openings for pipes are to be left as shown on plans, and that plumbers, electricians and other contractors are not to use these openings nor obstruct the access thereto.

The first clause in the furnace contract should provide that the building contractor is to observe the specifications and plans of the heating engineer the same as he does the specifications and plans of the architect.

It is a fallacy for a man to suppose he can give the building contractor the contract for putting in the wall stacks and registers, and then at any time have a "furnaceman" put in a furnace that will heat the house. When I am called on to put a furnace in a house where the pipes were put in by the building contractor I always agree to guarantee those rooms with which I make connections, but tell the party he must go to his building contractor for a guarantee on the rooms for which he put in the pipes.

Architect's Plans.

It is a fallacy to suppose that you can put in a furnace on plans provided by the average architect and afford to guarantee the job. The shoemaker should stick to his last and the architect should stick to his architecture. Not one architect in a hundred has a thorough theoretical knowledge of heating and ventilation, and probably less than one in a thousand has any practical knowledge on the subject. Both theoretical and practical knowledge are needed to secure a successful job. When I am brought a plan on which the architect has laid out the heating work, and asked to follow his plans and specifications, I tell the party that he must go to the architect for a guarantee on the results of the architect's work.

It is a fallacy for a man to suppose that he can have his architect advertise for bids on a heating plant and let the contract to the lowest bidder and have a properly heated house.

Where this is done the man who gets the contract is the one who has based his estimate on the smallest furnace, the smallest pipes, the cheapest material and the poorest job.

When a test is made he sends an expert fireman, who stands over the furnace with a poker and makes it come near enough to fulfilling the guarantee that the purchaser thinks it better to pay than have a lawsuit.

And from that time on the purchaser has troubles of his own. And he tells all his friends and neighbors that if they ever build they should put in steam or hot water. Hot air is a failure; he knows, for he has a hot air furnace in his own house.

It is a fallacy to suppose that any old pipe of any old size put together in any old way will carry hot air. The force that carries hot air through a pipe is not sufficient to overcome any considerable resistance. Every care should be taken to reduce friction to the lowest point, to avoid eddies and prevent rebound from having the air strike a surface at right angles to its course. When the pipe is long greater size must be given to make up for the lower velocity. Two 45-degree angles are better than one 90-degree elbow, especially if at a considerable distance apart. In the language of Gladstone, modified to fit the case, it is the province of the heating engineer to make it as easy as possible for the air to pass through the pipes and as difficult as possible for it to refuse to do so.

Open Windows Not Necessary.

It is a fad for people in furnace-heated houses to open windows in order to get fresh air. People have an idea that air is not pure unless it is cold, and that unless they can feel a cold draft on the back of their necks they are not getting ventilation. I once overheard a lady remark in church:

"No, I don't think the church is too warm, but there is not a window open, and we shall die for want of air."

And I knew that at that very minute the furnaces were pumping in over three thousand cubic feet a minute of fresh air from out of doors.

These people remind me of the traveler who when stopping at a hotel woke up nearly suffocated, but slept sweetly till morning after he had broken a window—into a bookcase—in order to get fresh air.

A house heated by hot air needs no ventilation but what the furnace gives it. If the house is too warm cut down the fire.

It is a fad to talk about furnace heat as a "dry heat." Heat not being a substance is never either wet or dry. Air when heated becomes "drier," that is, its capacity to absorb moisture is increased. But it is the heating of the air that makes it drier and not the method by which it is heated. It makes no difference in this respect whether the air is heated by contact with the iron in a furnace, or the iron in a radiator, or the iron of a stove.

If people want moist air make provision for moistening it, but I always wonder why the wise physicians who talk about the injury to the lungs from the "dry air of furnace-heated houses" send their patients with lung trouble to recover in "the pure dry air of Colorado and Arizona."

Differences of Furnaces.

It is a fallacy to suppose that if a furnace heats a house it is necessarily a good furnace, and if it does not it is necessarily a bad furnace. Given two furnaces which can each deliver at the casing top the same number of cubic feet of air per minute, at the same temperature, one may be a good furnace and the other a bad one, but one will heat a house as well as the other. They may differ in fuel consumption, in cleanliness, in ease of management, in durability and in many other points, but in the ability to heat the house there will be no difference.

A furnace is a machine for the manufacture of hot air. That is all it is made to do. The problem of manufacturing this hot air with the least expenditure of fuel, the problem of producing a machine for the manufacture of hot air which shall be cleanly, easy of management and durable are problems for the furnace manufacturer. But the problem of getting this hot air equally distributed through the various rooms of a house, and so properly heating the house, is a problem that rests solely with the heating and ventilating engineer. Given a furnace, good or bad, which can produce the requisite quantity of hot air at the requisite temperature and the proper heating of the house depends wholly on the hot air pipes and ventilating arrangements.

The poorest furnace ever built, if large enough to furnish the requisite quantity of hot air, will heat any house if the engineering work is properly done.

The best furnace ever built will not heat two rooms if the engineering work has not been properly done. It is the proposition of the man behind the gun.

(To be continued).

ADVERTISING ARGUMENTS.

A great many people, when reading a book, will skip the introduction and the first few chapters, in order to start in where the book "tells something."

They may not start with a very clear idea of all the characters and scenes, but they can readily catch the thread of the story, and read it for its incidents and excitement, rather than because of methodical educational inclinations.

People are much the same, perhaps more so, when reading ads. They read them to learn what you have, and what it is for, and what it costs. They don't want too much apology for the quotation of low prices. They want to know the prices. They won't read long-winded introductions that tell nothing.

"Horn blowing" that is neither instructive nor interesting, fills a great deal of valuable space in our newspapers and seldom, if ever, does any good. The best ads are those that tell the most in the fewest words. I do not mean that you should not tell a good deal, if you have a good deal to tell.

While short, concise ads are always preferable, there are instances where ads would be worth five times as much for being five times as long. People will read a novel that makes a thick volume, if they are interested and entertained, while they will throw aside a short story, when half read, if it is not to their liking.

Some of the patent medicine concerns have prospered wonderfully by the use of "readers" that are a half column or two or three columns long. But they make interesting stories out of their patent medicine talk. They use lots of space because they have lots to say.

One should say enough to bring out a point—an argument. One should not buy a certain space in a paper and then set about to write an ad that will fill it. You should write a clear, logical ad that you think will sell your goods, and then you should buy enough space to put the ad in attractive shape.

Advertising is a complex proposition all the way through, and must be considered accordingly. The moment you begin to establish set rules as to space, and matter, and style, and various other things, you are in danger of getting into an unprofitable and degenerating rut.

Rules are, often, all right, but they must be watched. They need frequent alterations. Alter them, if they do.

The things to say in an ad are the things you say to a customer in your store. Write just about as you would talk. Every now and then a customer comes into a hardware store and asks some questions about certain goods. You answer. He asks another question. You answer. He asks a third question. You answer. Quite a dialogue ensues. You convince him of something. This happens in every store, every little while. Just sit down after an incident of this kind and put the conversation on paper as it was spoken. Use it for your next ad. If it convinces one man, it would convince many more, if published.

On an occasion of this kind you use the very best arguments you know how to use, and you express yourself in plain words that any ordinary person can understand.

That is exactly what you should do in every ad. High-sounding words won't sell goods. It is the argument — the plain, simple, straightforward statement of facts that induces people to buy.

And don't imagine that because your ad is simple that people will take you to be simple and not very literary. They don't care what you are. They don't think about your literary tastes or ability when they read your ad. They are interested only in the thing you are advertising, its description, its price. — Trade.

PLUMBING MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, October 19, 1906.

As we predicted in our market report last week, and as all followers of the metal markets of late could not fail to see, lead pipe has been advanced, the present discount being 5 per cent.

Furthermore, the local rolling mills have issued new discounts on iron pipe, and a new list is also expected to be published shortly. These advances are caused by the abnormal conditions prevailing in primary markets. Pig lead has gone up to a price hitherto unheard of in the history of the metal, and stocks are very light on the local market. The pig iron situation is even worse, as it is now practically impossible to secure deliveries before the close of navigation. From this it will be seen that the pipe situation is not likely to be relieved for some time to come.

General business is excellent and all the local supply houses expect to be working full blast from now until the close of navigation.

RANGE BOILERS—A good trade is being done. We quote: Iron clad, 30 gallon, $5; 40 gallon, $6.50 net list. Copper, 30 gallon, $25; 35 gallon, $29.50; 40 gallon, $32 net.

LEAD PIPE—Owing to tremendous advances in the primary markets, the discount has again been revised to show an advance in price. We quote as follows: 5 p.c. f.o.b. Montreal, Toronto, St. John, N.B., Halifax; f.o.b., London, 15c. per hundred lbs. extra; f.o.b. Hamilton, 10c. per hundred lbs. extra.

IRON PIPE FITTINGS — A big demand is shown and we are quoting: Discounts on nipples, ¼ in. to 3 in., 75 per cent.; 3½ in. to 6 in., 72½ per cent.; couplings, ½ in. to 2 in., 55 per cent.

IRON PIPE—We are this week giving slightly revised discounts in certain sizes, and generally advanced prices are looked for. At present we quote: Standard pipe in lots of 100 feet, regular lengths, 1-4 inch, $5.50; 3-8 inch, $5.50; 1-2 inch, $8.50; 3-4 inch, $11.50; 1 inch, $16.50; 1 1-4 inches, $22.50; 1 1-2 inches, $27; 2 inches, $36.50; discounts on black pipe, 1-4 inch, 62 per cent.; 3-8 looked for. At present we quote: inch, 62 per cent.; 1-2 inch, 71 per cent.; 3-4 inch and upwards, 73 per cent. Discounts on galvanized pipe: 1-4 inch, 47 per cent.; 3-8 inch, 47 per cent.; 1-2 inch, 61 per cent.; 3-4 inch, and upwards, 63 per cent. Extra heavy pipe of 100 feet lots are quoted as follows: 1-2 inch, $12; 3-4 inch, $15; 1 $36; 2 inches, $50. The discount for inch, $22; 1 1-4 inches, $30; 1 1-2 inches, black pipe is 71 per cent., and for galvanized, 61 per cent.

SOIL PIPE AND FITTINGS — We are quoting as follows: Standard soil pipe, 50 per cent. off list. Standard fittings, 50 and 10 per cent. off list; medium and extra heavy soil pipe, 60 per cent. off. Fittings, 60 per cent. off.

SOLDER—There has been no change in the quotations of either tin or lead this week, so that solder prices remain stationary. We continue to quote: Bar solder, half-and-half, guaranteed, 25c.; No. 2, wiping solder, 22c.

ENAMELWARE — Prices remain as last week: Canadian bath tubs, plate E1, 5 ft., 1st quality, $20.65, special $18.65; plate E11 and E21, 5 ft., 1st quality, $19.50, special $17.15; plate E35, 5 ft., 1st quality, $24.65, special $22.40. American baths, rolled rim, 5 feet 2 1-2 inch rim, $22.25; 3 inch rim, $29.25. Lavatories, discounts, 1st quality, 30 to 30 and 5 per cent.; special, 30 and 10 to 40 per cent. Sinks, 18 x 30 inch, flat rim, 1st quality, $2.60, special, $2.45.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East.
Toronto, October 19, 1906

New lists on iron pipe, cast and malleable fittings are given below, advances being made in a majority of the lines. Soil pipe remains unchanged, but lead waste has been moved up to 5 off and traps and bends are being quoted at 50 per cent., an advance from 50 and 10 off.

Brass goods are to advance as reported a week ago, but the new list is not ready for publication as yet. In the meantime all prices are withdrawn and some supply houses are working on old lists.

Solder is also very firm and some houses are quoting as high as 25 and 27c.

Demand for plumbing supplies is very lively, much roughing in being done on new buildings, while the call for fixtures for finishing contracts keeps the supply houses busy and prevents manufacturers catching up with back orders. In heating goods, also, everything is on the rush, the scarcity of iron pipe making it difficult to complete jobs in contract time.

LEAD PIPE — The discount on lead pipe is now five per cent. off the list price of 7c. per pound. Lead waste, 8c. per pound with 5 off. Caulking lead 5½c. per pound. Traps and bends, 50 per cent. discount.

SOIL PIPE AND FITTINGS — We continue to quote: Medium and extra heavy pipe and fittings, 65 per cent. off; light pipe and fittings, 60 per cent. off; 7 and 8 inch pipe, 40 and 5 per cent.

IRON PIPE—The new list shows a slight advance, one-inch black pipe being quoted at $4.45, and one-inch galvanized at $6.10. Full list in current market quotations.

IRON PIPE FITTINGS — New lists show advances of about 5 per cent. on both malleable and cast. The new figures are as follows: Cast iron elbows, tees, crosses, etc., 62½ per cent.; cast iron plugs and bushings, 62½ per cent.; flange unions, 62½ per cent.; nipples, 70 and 10 per cent.; iron cocks, 60 per cent.; Canadian malleable, 30 per cent.; malleable unions, 65 per cent.; malleable bushings, 55 per cent.; cast iron ceiling plates, plain or nickel-plated, 65 per cent.; cast iron floor, 75 per cent.; hook-plates, 62½ per cent.; expansion plates, 67½ per cent.; headers of branch tees, 62½ per cent.; ring hangers, black, 75 per cent.; galvanized, 65 per cent., standard list.

GALVANIZED IRON RANGE BOILERS—We quote: 12 gallon capacity, standard, $4.50; extra heavy, $6.50; 18 gallon standard, $4.75; extra heavy, $6.75; 24 gallon, standard, $4.75; extra heavy, $6.75; 30 gallon, standard, $4.75; extra heavy, $7.50; 35 gallon, standard, $5.75; extra heavy, $8.50; 40 gallon, standard, $6.75; 40 gallon, extra heavy, $9.50; 52 gallon, $11; extra heavy, $14; 66 gallon, standard, $18; extra heavy, $20; 82 gallon, standard, $21; extra heavy, $24; 100 gallon, standard, $29; extra heavy, $34; 120 gallon, standard, $34; extra heavy, $40; 144 gallon, standard, $47; extra heavy, $55. The discount on copper and range boilers continues at 15 per cent.

RADIATORS — Prices are the same. We quote: Hot water, 50 and 2½ per cent.; steam, 50 and 5 per cent.; wall radiators, 50 per cent.

SOLDER — Quotations remain very firm as follows: Bar solder, half-and-half, guaranteed, 26c.; wiping, 24c.

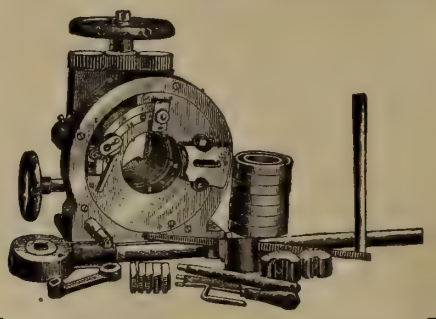
ENAMELWARE—We quote as follows: Standard Ideal, Plate E1, 5 ft., first quality, $21.65; special, $19.65; plate E11, 5 ft., first quality, $20.15, special, $19.15. Lavatories, first quality, 30 to 30 and 5 off; special, 30 and 10 to 40 per cent. discount. Kitchen sinks, plate 300, firsts, 65 and 5 off, specials, 70 per cent. Urinals and range closets, 20 off. Fittings extra. Lower prices in quantities.

FIVE DOLLARS EASY MONEY

Can be earned by sending us a practical answer to the following question:

In your judgement is it essential that every closet connection to soil pipe stack should be provided with a Breaksyphon?

If not, illustrate by a rough sketch the conditions which would render unnecessary the use of a Breaksyphon, and give the reasons why it would not be required.



For the best answer received we will send a cheque for $5.00 and to every one sending a satisfactory reply for publication we will give a year's subscription to Hardware and Metal. Send in a reply next week and answer the question as fully as possible.

—and even your pay roll will know you sell an Oxford

Five sizes of the Oxford Boiler come to you, with all the sections assembled, ready to instal. On the other five sizes, you need have only one joint to make,—and that takes about a quarter the time you spend assembling another boiler.

You save, too, when you push the Oxford—because you can get any of the ten sizes (guaranteed ratings from 280 to 3,500 feet (from the nearest Gurney warehouse, quickly. That saves you freight money, saves you bother, and saves you time,—which often means a profitable job or the loss of one.

Incidentally, when you push the Oxford you push the boiler that has twelve full-saving and trade-getting improvements,—and most profit in it for the dealer.

It really seems worth asking questions about, doesn't it? To-day is the best day to do the asking.

EVAPORATION REDUCED TO A MINIMUM

is one of the reasons why PATERSON'S WIRE EDGED READY ROOFING will last longer than any other kind made.

Mr. C. R. Decker, Chesterfield, Ont., used our 3 Ply Wire Edged Ready Roofing fourteen years ago, and he says it is apparently just as good as when first put on.

We have hundreds of other customers whose experience has been similar to Mr. Decker's.

RELIABLE REVOLVERS

A MAN'S life may often depend on the revolver you sell him. See that you sell nothing but dependable goods.

Some of the "trash" sold for revolvers, does more harm to the users than the objects aimed at.

If you're going to stock revolvers at all, stock nothing but reliable makes, you'll find it pays better in the end.

Such lines as Smith & Wesson, Iver Johnson, Colts' and H. & R. Revolvers, and Colts' Mauser and Browning Automatic Pistols are leaders.

We carry Revolvers in all popular styles, hammer or hammerless, in all calibres and finishes, supplied by the manufacturers.

Of course you can't confine your stock to these alone, but there are plenty other reliable lines to suit the man with the slim pocket-book, that you can safely rely on to do no damage to your store's good reputation, such as :

Liberty,	22 and 32 Calibre,	Rim	Fire
British Bull Dog,	32 and 38 "	Centre	"
American "	22 and 32 "	Rim	"
" "	32 and 38 "	Centre	"
Baby Hammerless, 22		Rim	"

We can name you prices on any of the above mentioned lines, that will leave no argument in favor of cheap unknown goods.

Ask for these prices, together with our Sporting Goods Catalogue, No. 35, showing the largest stock of Firearms carried by any one house in Canada.

32 Calibre
5 Shot
Double Action
3-in. Barrel

LEWIS BROS., LTD.

MONTREAL

WINNIPEG

OTTAWA **VANCOUVER**
TORONTO **CALGARY**

To Our Present and Prospective Friends:

It is well known that the weak place in a Scoop is invariably in the shoulders, which are apt to spring and sometimes double up, especially in the case of a light Scoop.

To produce a light Scoop and at the same time overcome the weakness of shoulder, we have devised a method (Patented) of making the shoulders with a converse curve, which strengthens them and at the same time improves the appearance of the Scoop. No extra charge is made when applied to our regular lines.

As no Hardware stock is complete without our "Moose" 1st Grade Coal or "Black Cat" 4th Grade Grain Scoops, lose no time in ordering.

If your jobber does not stock them, write us direct.

Yours faithfully,

THE CANADIAN SHOVEL & TOOL CO.

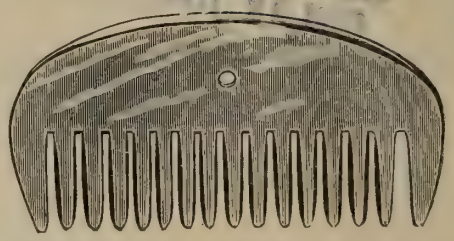
The "Stay-on" Shaped Horse Blanket

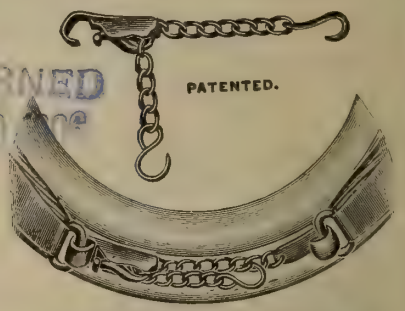
It is Easy to Sell Goods

when you have what people want. Why not recognize and act on that principle fully, and keep the goods the various classes of people in your community require?



Do you cultivate the trade of people who keep horses?

There is an enormous trade to do in the many things a horse needs. There are horse blankets, whips, curry combs, dandy brushes, halters, hames, snaps and many other items.



We have large stocks of well-selected lines of these goods. They were selected to sell, and we know they will sell and that the prices are right.

Ask our travellers to show you illustrations of these lines and to quote you prices.

Model '93 Large Caliber Rifle. When the crash of the fleeing buck and doe makes your heart jump and brings your gun with a jerk to your shoulder,

and your eye follows those good *Marlin* sights as you lead the white flag for a shot, it's a comfort to know the gun is going to do its part.

Marlin Model '93s are sure-fire and accurate. All *Marlin* rifles are simple, strong, easy to carry and have that balance which makes you shoot well. *Marlin* '93 rifles are made in calibers .25-36 to .38-55. They are getting the best results everywhere at big game, from Virginia deer to Kadiak bear.

The barrels are of "Special Smokeless Steel," the best obtainable, and are rifled deep and severely tested.

The working parts are all of drop-forged steel blocks cut to simple patterns. All *Marlin* parts are interchangeable.

The *Marlin* solid top is accident insurance of the best kind. The *Marlin* side ejection throws the shell aside, not into the line of sight or into the eyes.

These and many other valuable Marlin features are fully explained in our handsome Catalog. Sent FREE upon receipt of six cents in stamps.

Remember all *Marlin* Rifles are proved and tested for safety. Safe, sure and strong! What more can we say to the hunter of big and dangerous game?

TO ALL DEALERS HANDLING FIREARMS:

The above is one of seven advertisements be used by the Marlin Company in their 1906 advertising campaign. These advertisements will be inserted in a list of magazines selected for their QUALITY, known to be bought and read by a class of people financially able to buy Marlin repeaters and having a total guaranteed circulation per month of 5,000,000. Estimating five readers to a magazine, this will give a total, for seven months, of 25,000,000.

In addition, Marlin goods are advertised in farm papers, hardware papers, sporting goods papers and in many miscellaneous publications.

In our advertisements we ask for six cents in postage stamps. This means that a person must furnish paper and envelope, a two-cent stamp for mailing, include six cents and take the time and trouble necessary to write us a letter. Our object is to cut out catalog collectors, young boys and girls and people who are not interested enough to invest ten cents and the time and trouble necessary.

We reason that if a person is interested enough to do this, it is worth our while to go after him seriously and earnestly, and on all inquirers answering these advertisements and spending ten cents on us, we spend more than twenty cents.

We send each and every one a 136-page catalog illustrated with hundreds of engravings, having a beautiful cover in colors and containing a large amount of general information interesting and instructive to all shooters whether they use Marlin repeaters or not.

We send also a copy of our 96-page illustrated testimonial book and a personal letter in which we refer them to the nearest dealer that we know of who carries a good stock of Marlin goods and is enterprising enough to follow up an inquirer and try to sell the man a Marlin repeater.

We also send to the dealer the name and address of the party inquiring, thereby putting the dealer and the consumer in direct communication one with the other. We also follow up the customer and urge him to buy through the dealer.

Our advertising campaign each year brings us thousands of inquiries and makes us a great deal of expense and trouble, as you can readily see, but we believe that it pays us and it will pay you if you will take part in it.

If you are interested please write us and give us full particulars as to exactly where you stand on Marlin goods. If you are with us we want to know it and send you some of this business. Write us to-day and tell us whether you want to be on our dealers' list or not.

THE COPELAND-CHATTERSON

NEW RETAIL SYSTEM

IT TAKES experience to successfully design a bang-up system for business. We have the experience because we introduced the first successful perpetual labor-saving system. It's some years back now, and we've been improving every minute of the time since.

We have evolved a special system for taking care of bookkeeping in a retail store. One book doing the work of three; one writing charging up the goods and at the same time preparing your customer's Statement, to be despatched at any time desired. The Ledger leaf opposite the Journal entry. The book indexed by tabs, and containing only active accounts. Another book, the Transfer Binder, containing all dead matter indexed in the same manner as the Current Binder. Then there are Recapitulation Sheets, etc.

This system saves fifty per cent. in clerical work, and enables you to send, on the first of the month, and without effort, your customer's accounts. Rendering bills promptly means quick returns. This alone would pay for the outfit.

Write us for particulars.

Too Expensive For My Business!

BUSINESS SYSTEMS LIMITED
SYSTEM THE SECRET OF SUCCESS
TORONTO.

Any retailer who says that about Business Systems, is laboring under a delusion.

The size of a business is the factor that determines the cost of installing Business Systems.

Business Systems are, proportionately, just as much an economy for the smallest retail store as for the largest factory.

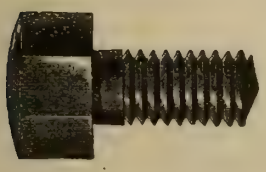
■ ■ ■ ■ ■ ■

In different businesses, Business Systems are designed to fit different ends.

In your business, Mr. Retailer, Business Systems, instead of being "too expensive," are time savers and an actual economy.

You can understand why a system that posts your books and writes out your bills at the same time, is economical, can't you?

That's only one of the things Business Systems will do for you.



■ ■ ■ ■ ■ ■

Let us tell you more.

Drop us a post card and we will send you all the details.

It will only cost you a cent to know more.

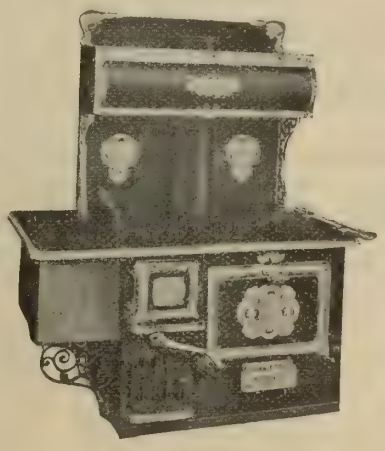
—Your two classes of customers—



Your store can sell the Oxford Chancellor Range to both kinds of customers—

The people who have to make every cent count, and

The people who care more about quality than about price.

Close buyers take the Oxford Chancellor because they can't find so much range value for the price as you can give them in the Oxford Chancellor, with its asbestos lined extra-heavy sheet steel double riveted body, its roomy oven, its patent handy grate, its many practical labor and fuel saving ideas, and its very moderate selling price.

And other buyers,—people to whom price doesn't matter so much,—

They buy the Oxford Chancellor by choice for its handsome design, its substantial construction and its up-to-the-minute improvements.

You can afford to sell the Oxford Chancellor to any class of trade and you can't afford to sell a cheaper steel plate range—

You can't afford to for three good personal reasons.

You'll hear the three if you'll write us a letter.

Chances for Business

In these days of prosperity large public buildings are constantly being planned in all parts of the country.

These are your chances for getting business.

Good air is a necessity in all buildings, but more especially in those built for public use.

The best way to get good air is by the use of our

AEOLIAN VENTILATORS

They have been tried all over Canada, and have never failed to give complete satisfaction.

THE AEOLIAN VENTILATOR

(Can be supplied in copper, if so desired.)

The Universal Steel Range is constructed to suit the requirements of the Canadian Trade. **BUILT LIKE A STEAM BOILER AND WILL LAST A LIFE TIME.** It has all the requisites suitable for a Farmer's Range. Will burn a 29-inch stick, and both the fire box and fire box door are unusually large to admit of rough and coarse wood. Lots of room on the top and in the oven to do the busy morning's work.

Made with
18 and 20-inch Ovens

Both sizes
Burn 29-inch Wood

This Range with coal will cook and bake perfectly and no trouble to retain a fire day and night. When this Range is connected to Hot Water attachments the grates and all other linings can be removed without disturbing the water front.

The linings can be changed from Coal to Wood or vice versa in five minutes without the removal of a bolt.

Now Mr. Dealer is not this a grand feature, for in most of Ranges to change the linings from Coal to Wood is an awful job, particularly after it has been in use for some time. In the Universal Favorite the woman of the house can change the linings herself so simple and perfect is the arrangement.

The Universal Favorite has more REAL features of Merit and more good talking points than any other Range on the market.

THE ATLANTIC CITY CONVENTIONS

American Hardware Manufacturers and Jobbers Hold Interesting Conventions at Atlantic City, N.J.

The tenth annual convention of the National Hardware Manufacturers' Association, and the twelfth convention of the National Hardware Association, were held at Atlantic City, Oct. 17, 18, 19.

The opening meeting of the association was held Wednesday morning, Oct. 17. In his opening address President Wright referred to the unprecedented prosperity of the country from the Atlantic to the Pacific. He drew attention to the new law governing transportation, giving equal rights and privileges to all shippers. The delays in transportation were a serious inconvenience and loss, and were as expensive as they were unnecessary, and he recommended the matter of a reciprocal demurrage proposition that will penalize the transportation companies for undue delay in deliveries on the same basis that jobbers are held responsible for delays in releasing their cars.

Retail Association Commended.

He spoke of the great work the National Retail Hardware Association were doing, and of the very cordial relations existing between the wholesale and retail associations.

The catalogue houses were given full consideration, and the statement was made that the work they as an association had been doing was beginning to tell, as was shown by the two large failures during the last year, and also by the fact there were no new companies being formed.

At the close of the president's address Mr. T. H. Newman, manager of Caverhill, Learmont & Co., and president of the Canadian Wholesale Hardware Association, and Mr. Jas. Hardy, secretary of the association, were introduced and spoke as follows :

President Newman's Address.

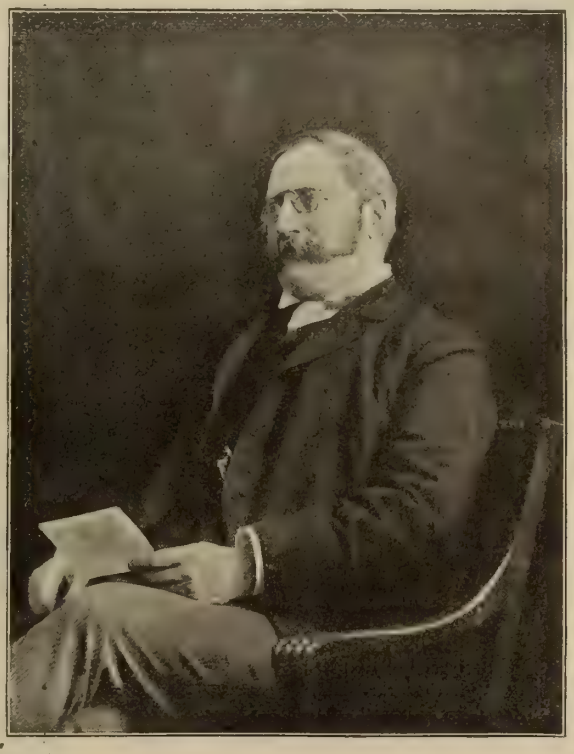
Mr. President, Ladies and Gentlemen, —On behalf of the Canadian Wholesale Hardware Association, I desire to extend my sincere thanks for your very kind invitation to attend this, your twelfth annual convention. I had the pleasure of addressing a few remarks to you at the last convention in Washington, and also of an introduction to President Roosevelt, of whom I shall always retain the most pleasant recollections. He impressed me at the time as a man of high culture and great ability, well fitted to fill the position to which your great nation has called him.

Our association in Canada has continued its work during the last year with considerable success. At the present moment Canada is enjoying a period of prosperity which is likely to continue for some time at least. The rapid settlement of our great Northwest and development of our railway systems are in a large measure accountable for our present prosperity.

Might I presume to take up a few moments of your time, giving you some figures which will illustrate the growth of Canada's foreign trade ? Total imports, $294,000,000; total exports, $256,000,000—or a grand total of foreign trade, $550,000,000. Imports from the United States into Canada, $180,000,000; exports to the United States, $83,000,000. Imports from Great Britain, $70,000,000; exports to Great Britain, $127,000,000.

It is generally believed that Canada is the third largest customer which the United States has. This is very easily accounted for. Our close proximity to your great country is one reason why we purchase so much, and another reason, perhaps more important one, is that the manufactures of the United States are suited to Canada's requirements.

I doubt very much if any nation in this world possessing a population of six and a half million can show a larger foreign trade than Canada; our internal trade is growing with leaps and bounds. Canada is becoming rapidly a manufacturing country, and goods formerly imported from other countries are being made at home.



One more illustration of the growth of trade, namely, bank clearings. A few years ago the City of Montreal occupied thirteenth place of all the cities of this continent. To-day she ranks eighth, being exceeded only by the following cities : New York, Chicago, Boston, Philadelphia, St. Louis, Pittsburg, San Francisco.

I cannot close these few scattered remarks without referring to the very cordial relations existing between the United States and the British Empire. Long may it continue, is the wish of we Canadians. I am one of those who believe earnestly that Providence has destined the United States and Great Britain, the great Anglo-Saxon nations, to christianize by trade and commerce the outlying portions of the world, insuring the peace of the world. Under the protection of the Stars and Stripes and Union Jack, these flags entwined together, the symbol of peace and liberty all over the world.

Secretary Hardy's Address.

Mr. President, ladies and gentlemen : It is a pleasure, I am sure, to again attend your convention and convey as I have to do officially for the Canadian Hardware Association their thanks for the cordial reception and the kindness the members have always exhibited on every occasion to visitors from our association.

President Newman has dealt very fully with the figures as to what Canada is doing. I would like to get down just for a moment to what you may consider dollars and cents. You are all interested in dollars and cents, and I would like to point out that a great deal has been said about the United States being the natural market for Canadian farm pro-

MR. T. H. NEWMAN, of Caverhill, Learmont & Co., Montreal, President Canadian Wholesale Hardware Association.

ducts, yet per head of population Americans bought only a little over 9 cents' worth of Canadian farm products during the year 1904, while Canadians per head of population bought from the United States over three dollars and fifteen

MR. JAMES HARDY, of Jenkins & Hardy, Toronto, Secretary Canadian Wholesale Hardware Association.

cents' worth of the same kind of farm products. One Canadian consumed more United States farm products than thirty-four Americans did Canadian. Most every one interested in this matter will admit that the reason for this is that the United States has a high protective tariff, while Canada has a low one. Canadians bought from the United States in the fiscal year 1904 540 times as much bacon, thirteen times as much butter, five times as much cheese and over thirty times as many eggs as we sold to them, this notwithstanding the fact that they have a consuming market fifteen times as large as ours.

Gentlemen, I think that applies with equal force to hardware. Whilst we buy 540 times as much bacon, I think the proportion of hardware would be considerably higher than that. I think if you want to do more business with us you better come over and put a plant up there and become one of us. There is no doubt you will reap an ample reward. We are progressing, as you are all aware, very fast. We hope to progress a little further and better in the future.

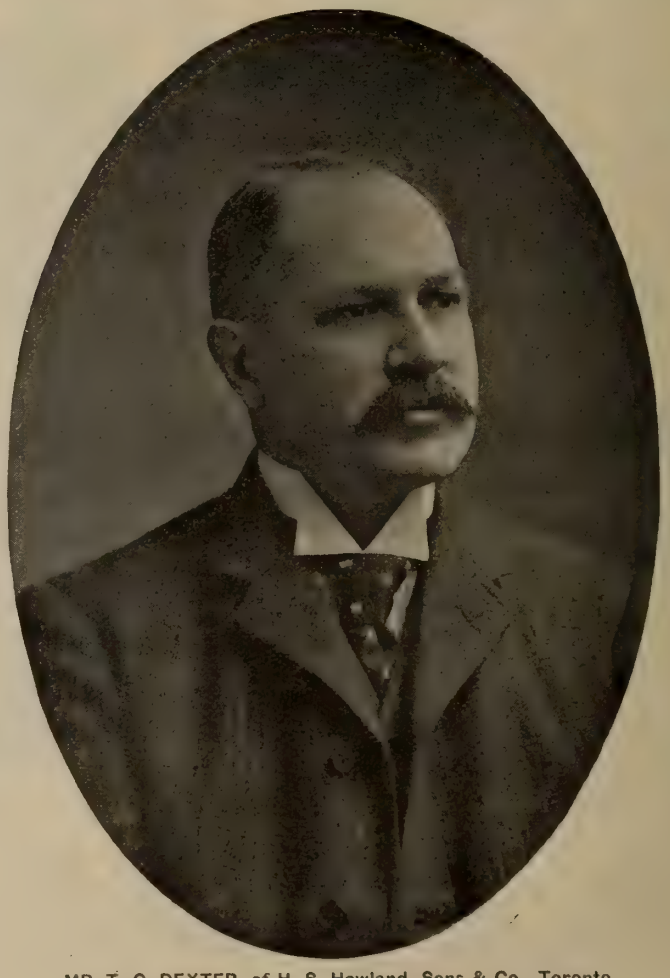
With respect to the future meetings of this association, we would like to see you come to Canada. We think we can take care of you in Toronto, the finest city in the world. Most of you—a great number, at all events—have been there. We have been coming here for a number of years and receiving the greatest hospitality and kindness and we would like to have a chance to return the favor. Ladies and gentlemen, we would be glad to see you all in Canada and we know when we get you you will want to stay with us.

Cash Discount.

This question was discussed at some length. Recently certain manufacturers have attempted to reduce the profits of both jobber and retailer by changing their terms from 60 days with a discount of 2 per cent. off for cash in ten days, to 60 days and in some cases 30 days with 1 per cent. for cash ten days. Investigations proved that it would be a great hardship to deprive the retail trade of the cash discount as it in turn allowed it to its customers who paid within a specified time. Manufacturers are not asked to reduce their selling price but simply to figure the cash discount in the cost of the goods just as they do what they expend for raw material, labor, possible losses, freight, administration expenses, salaries, and other items too numerous to mention.

No fault is found with them for pursuing this course but that it is unjust, unkind and ungenerous to attempt to force the trade of the country to buy goods without a discount or with 1 per cent. discount for cash 10 days when both jobber and retailer are compelled to give the cash discount on their sales of 2 per cent.

The majority of manufacturers seemed to agree with this reasoning and it is not at all probable any change will be made in cash discounts.



An interesting address was also delivered by President Bush, of the National Retail Hardware Association of America, which will be reproduced in a future issue.

In conversation with a representative of Hardware and Metal, Mr. T. G. Dexter, manager of H. S. Howland, Sons & Co., and vice-president Canadian Wholesale Hardware Association, who was present at the convention, stated that he thought it would be in the best interests of the hardware trade in Canada if hardware manufacturers and jobbers could get together once a year and discuss matters which are either too trivial to mention in correspondence or too large to be broached unless they could be thrashed out thoroughly. A better understanding, he thought, would be reached with regard to the best method of putting new goods on the market, and the manufacturer would realize that he will get the largest profit and at the same time put his business on the firmest foundation by protecting both wholesaler and retailer.

Mr. Dexter's idea is that a hardware branch of the Canadian Manufacturers' Association should be formed and meet annually with the Canadian Wholesale Hardware Association.

Mr. Dexter expressed himself as heartily in favor of the suggestion made by Mr. Bush, president National Retail Hardware Association of America, that manufacturers should pay more attention to the giving of information to clerks which would enable them to explain the quality of the goods they were selling. This information could be given by regular advertisements in the trade press and by folders which could be enclosed in each package of goods.

Altogether Mr. Dexter said the convention was a great success. The Canadian delegates were royally entertained and it was a great pleasure to meet personally the heads of a large number of firms with whom we have been doing business for years.

MR. T. G. DEXTER, of H. S. Howland, Sons & Co., Toronto, Vice-President Canadian Wholesale Hardware Association.

ADVERTISING HOLIDAY GOODS EFFECTIVELY

With the approach of Christmas season the hardwareman and sporting goods dealer begin to put on extra steam so that the store will look extra nice and sales will be extra large.

The first attention will be given to the buying, next to the arranging, and then to the advertising.

Ready for Advertising.

It will be assumed that the merchant has his stock of Christmas goods in, has them attractively arranged in his store window and is ready for "outside" publicity.

Ostensibly the advertising goal to reach will be to place the goods as attractively in the newspapers as they are in the store. This looks like an impossible task—but it isn't.

In the store the customer is influenced more or less by demonstration that appeals to the eye. In the newspaper the customer is influenced altogether by argument that appeals to the Buying Department of the Brain.

How to Do It.

How then can you get this appealing argument before the people who may not of their own accord call at the store? By simply putting art and argument persuasion and plausibility prices and particulars on paper.

Take a sheet of foolscap paper, rule a space off in the centre and begin to write for your weekly. Take a look round your store and be impressed with what fact stands out the most prominent—"I am ready for Christmas business."

There you have the heading for your advertisement which, considering the season, ought to be very generous in size.

Having secured the heading you pass on to the opening sentences in the solid matter, which, of course begin to deal with the persons addressed. You presuppose all your readers are buyers, but you have no ground for presupposing they are your buyers. If that was the case there would be no necessity of your advertising.

Some Facts.

You also are aware of the fact that at Christmas time people like to see as well as buy, or, in other words, the telephcne business will be small. Then the point you will strive for in your ad will not be to sell the goods as the result of the advertising, but to bring the people out tc see your goods, and then to sell as a result of your display and range of goods.

It will be a good move to quote a representative list of articles for the reason that a great number of people don't know the variety of ware a town hardware dealer keeps. They might be apt to go to the jeweler for their cutlery and silverware, or write away to a big house for a carving set. These consumer-illusions must be dispelled.

So after the heading the ad might go on to say: "You will be wanting a pocket knife for Willie, a pair of skates for Annie, a hockey stick for Charlie."

"Then you may consider the advisability of carving the turkey up with a new carving set."

"Of presenting a fishing tackle to Dr. ———."

"Of securing a rifle for Arthur, who is coming home Christmas Eve."

"Of giving Auntie May a set of asbestos sad irons, or a new carpet sweeper."

"Of purchasing for the home an oil heater."

"I have pocket knives, skates, hockey sticks, carving sets. fishing tackle, rifles, carpet sweepers, asbestos sad irons, oil heaters, etc., in great variety of quality and prices."

Inducements to Buy.

As other dealers can also say what is said above, the next point to consider is that of a "drawing card." What will make the people come to your store in preference to other stores with almost identically the same goods? Talk won't do it; sentiment won't do it; money will do it. Offer a premium!

Then the next part of your ad might read:

"All those who make purchases of ten dollars or more at my store Christmas weeks will be allowed a discount for cash."

Next comes your name, address, and name of town, which should be in bold type but not too large to overbalance the remainder of the advertisement.

AN IDEA THAT PAID.

During the closing days of 1905 a hardware dealer in the south had five hundred monthly statements printed with the following announcement at the head:

1905. 1906.

A Merry Christmas
A Happy New Year
Please return the compliments
of the season.
James R. Colville & Son.

Direct results were traced to this little bit of inexpensive advertising. Why not try it for 1906-1907!

I am Ready for Christmas Business

YOU will be wanting a Pocket Knife for Willie, a Pair of Skates for Annie, a Hockey Stick for Charlie. Then you may consider the advisability of carving the turkey up with a new Carving Set. Of presenting a Fishing Tackle to Dr. Wingate. Of securing a Rifle for Arthur, who is coming home Xmas Eve. Of giving Auntie May a Set of Asbesto Sad Irons. Of purchasing for the home an Oil Heater. I have Pocket Knives, Skates, Hockey Sticks, Carving Sets, Fishing Tackle, Rifles, Asbestos Sad Irons, Oil Heaters, Etc., in great variety of quality and prices.

ALL THOSE WHO MAKE PURCHASES OF TEN DOLLARS OR MORE AT MY STORE XMAS WEEKS WILL BE ALLOWED A DISCOUNT OF 3 PER CENT. CASH.

W. FELLOWES

Handow Ave., KARN, ONT.

BUSINESS BRINGING HINTS.

A sporting goods dealer out west writes to this department and says, among other things, that he finds the package slip and window bulletin very useful in the store, and that printing the weather forecast in his ads draws a great deal of attention to the wares he has for sale.

He also uses the want card, i.e., keeps cards in his store for dotting down the names of goods asked for which he didn't have in stock.

LAMPS FOR HOLIDAY TRADE

With the coming of electricity into common use for lighting purposes there have also come new styles and designs for fixtures, so that each succeeding year has eclipsed the previous one in the creation of striking and novel designs. But the old coal oil lamp has not been forgotten by those who have lavished their art and taxed their ingenuity in the endeavor to bring out new designs in lamps and their accessories. In coal oil lamps, one of the newest lines to be brought on the Canadian market is the beaded fringe, reception lamp. They are made in different styles, but each one is a handsome and useful ornament. A particular feature of these lamps is the glass beaded fringe which is suspended from the shade. These fringes are made in clear and tinted glass, and have a softening effect upon the light without materially lessening its power. These fringes are about four inches in length, and do not add any emcumbrance either in appearance or weight.

A Recent Design of an Inverted Gas Light.

These lamps are made in styles adaptable to the furnishings of any room. The Dutch style is quaint and artistic, with its delicate tints, and its painting typifying the peasant life of Holland. For an odd piece, or for a room furnished in the Dutch style which is now so popular, this lamp gives a grace and finish that few pieces of furniture give. Then there are the Art Noveau and the Rookwood, which are adaptable to any drawing or reception room, giving out a soft, mellow light from their colored shades and fringes. The Cathedral or Mission design stands alone in uniqueness of color and style. It is a deep, rich red, plain and simple in ornamentation. Its color scheme can best be described by calling it tesselated. Irregular black lines divide the red squares. For a den, or a room furnished in the Mission style, this lamp would have a beautiful effect when lighted.

Considering the value of these lamps the price is not excessive, and some of the cheaper styles could well be stocked by the country store, particularly in the Christmas season. From four to twelve dollars is the range, and for the smaller price some nice lamps can be had.

But not only are new designs in lamps being brought out largely this year; new methods of lighting have also been evolved. Experiments with a new lighting system have been carried out in Scotland in which kerosene oil is used. The oil is stored in a tank, which is attached to the base of the standard carrying the lamp. In the top of this reservoir is a cylinder filled with compressed carbonic acid gas, with a small oil container at the bottom holding from one-half to two gallons of oil, which automatically flows thereto from the larger receptacle. A reducing valve connects the oil container with the carbonic acid cylinder, and a small tube leads to the burner, which has a vaporizer consisting of a jet and an air-mixing chamber, while the burner is fitted with an incandescent gas mantle. The oil is forced from the oil container to the vaporizer through the small tube by the pressure of the carbonic acid gas. On reaching the vaporizer the oil is converted into gas and passes through the flame spreader where it combines with the air, and thence to the incandescent mantle. The lamp is economical in consumption, a light of 200 candle power being obtained for 45 hours with a consumption of one gallon of oil. The light is said to be clear, bright, and of great penetrative power.

Care of Lamps.

The care of lamps is a simple thing, yet many serious conflagrations have been caused by the explosion or upsetting of a lamp. Cleanliness is the surest safeguard in the care of lamps, as it is only a dirty, congested lamp that is ever known to explode. A burner that is kept clean radiates heat, while a dirty burner conducts the heat to the lamp. If the wick is too small the flame will travel down the tube; if there is a leak at the collar, escaping gas ignites, and if the burner has been removed for the purpose of filling the lamp after it has been burning the gas within the globe expands and may reach a nearby light.

New Cylinder Lamp.

In gas lighting one of the newest lamps out is the Humphrey nickel cylinder lamp. The cylinder ventilator gives added draft and promotes combustion efficiency, as well as keeping out moths and dust or anything that tends to injure the mantles. This lamp requires no match or taper to light it. There is a minute gas jet burning continually which ignites the main jet upon pulling one of the small chains. This small jet becomes extinct when the large light starts up, but ignites again by the action of putting out the large light. For stairs, hotels and public buildings this is an admirable lamp.

Inverted Lights.

The inverted gas light is constantly growing in public favor and the wonder is that it was not brought into more general use before. One of the chief advantages of the inverted gas mantle is that there is no shadow thrown from it, and hence no necessity of adjusting in order to get the direct rays of the light. Then there are decorative results possible with the inverted light that cannot be had with the regular light. This point can be appreciated more in the cluster lights, and grouped lights for large rooms. The accompanying cut shows one of the pretty effects of the inverted lights in a very popular style of hall or reception lanterns suspended from the ceiling with a chain.

WINDOW DISPLAYS OF CHRISTMAS GOODS

That the window display is one of the best and least expensive advertising mediums at the disposal of storekeepers is forcibly borne out by the wonderful improvement in the art of window trimming noticeable during the last few years, and to-day no storekeeper can afford to overlook this avenue of income.

Some hardware merchants contend that goods deteriorate when exposed in window displays, or that they have no knack of window trimming, and no one in the store possesses that ability. It is true that goods are damaged in window displays, but not to any great extent if they are properly cared for, and the displays are changed frequently. Personal inability to trim windows on the part of the merchant is a lame excuse, and the fact that there is no one else in the store with a knack of window trimming is the worst subterfuge of all. These excuses are deceiving the merchant himself, for they are causing him to lose hundreds of dollars' worth of trade which he might obtain by means of good, attractive displays.

The dealer who is getting along without good displays, both in his window and inside the store, is like a one-legged man hopping along without a crutch. If he is prosperous he can become more so by using this splendid medium of advertising. If his business is not in a thoroughly good condition the chances are that his failure to take advantage of such opportunities is to a great extent responsible for it. If the business is not large enough to employ a man especially for this work, it is usually not difficult to find some one with ability in this direction who is willing to act as a clerk as well.

Poor Displays are Harmful.

Careless displays and slovenly windows do incalculable harm to a business, and are worse than no displays at all. They keep people out of the store who would be brought into it by the right kind of an effort. Besides that, they give the impression of careless management, which creates a feeling of distrust in the public mind. If there is any one thing a merchant needs more than anything else to attain success it is the confidence of the public.

No matter how good a display may be it should not be allowed to stand for more than a few days. Frequent changes prevent the damaging of goods by exposure and they make the effort far more profitable. Timeliness is another important feature. The display should have direct bearing upon the needs of the public at the time it is shown. The judgment of the merchant himself and the trade conditions prevailing in his locality make the best criterion for determining the nature of the showing.

Though most hardwaremen dislike to do it, they could learn very much from the methods of the modern department store in this direction. These establishments pay large salaries to men who do nothing else but trim windows and do interior decorating. After all, the modern department store is nothing but a big, old-fashioned country store in which everything under the sun is sold. The difference lies in the system and methods which characterized the management.

Inexpensive Advertising.

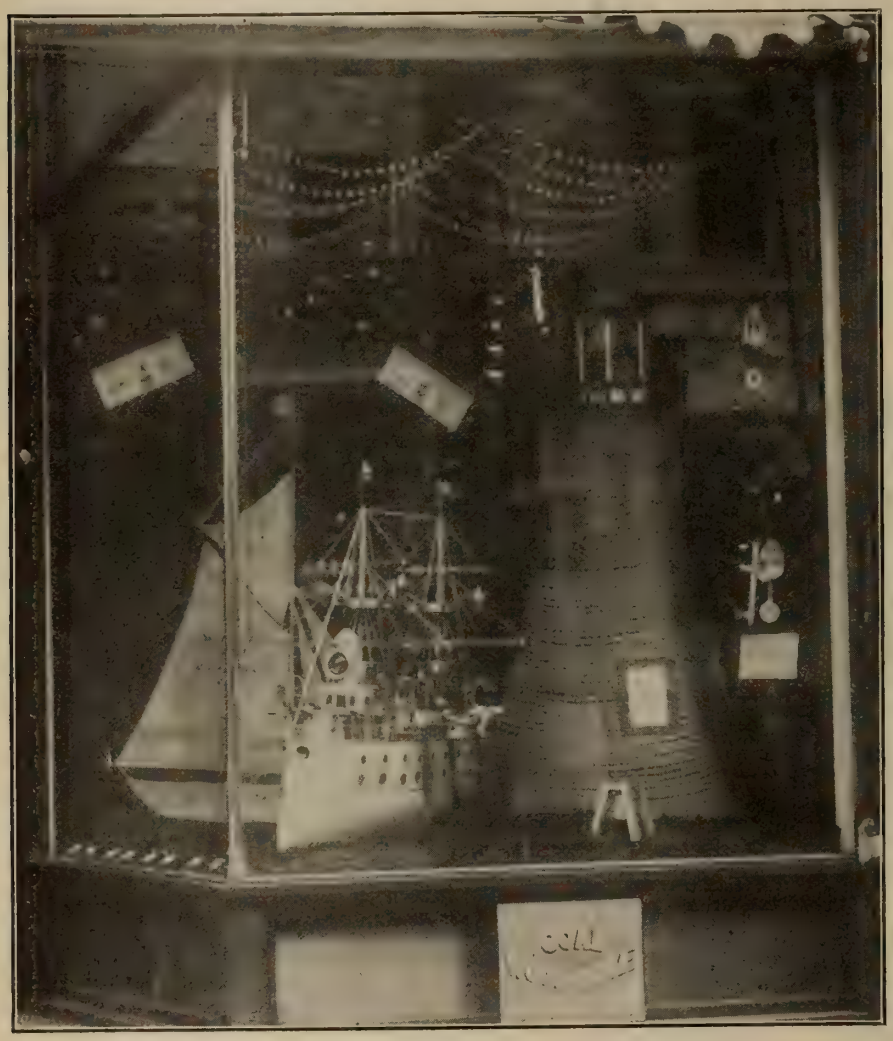
Many merchants regard advertising and window dressing as items of expense rather than as an investment of a few dollars or a few hours' work in the hope of a reward in increased business. If advertising or window dressing does not bring these results there is something wrong and it will pay to adopt a new system, putting more life into the work and making a closer study of the wants of those whose custom you are endeavoring to secure. In the average small town there is ample room for an enterprising hardware dealer to win a reputation for having the most attractive window displays in town. Encourage clerks to develop their ability as window trimmers and the window will soon become one of the most profitable sections in the store building.

Plan Holiday Displays Now.

There is no season of the year when the windows can be made to produce better returns than during the Fall and Christmas season. These are the times when money flows most freely, and instead of waiting for customers to decide that they require a certain article it is good business policy to bring the goods before the people in a suggestive manner and make them wonder how they can get along without the latest and most modern articles in the hardware line.

To be effective a window display must be well planned in many cases weeks ahead of the season when it is desired. A rough sketch should be drafted showing some novel arrangement of seasonable goods, the idea being to catch the eyes of passers-by, to arrest their attention and cause them to stop and examine the display, and then by the judicious use of show cards to invite the possible customers inside the store where a fuller line of the goods displayed can be seen.

Good displays require many hours of careful work to prepare, and it is safe to assume that Messrs. Karges and Wetmore gave the better part of their spare time during the evenings for a month in working out the detail and gathering the material with which to construct the novel displays shown in the accompanying engravings. Mr. Karges, for instance, says he was working on the model of the battleship



"The Home of Santa Claus" Window, Dressed by S. S. Wetmore, Halifax, N.S.
Awarded Second Prize in Hardware and Metal's Window Dressing Contest a Year Ago.

for about a month, making it entirely from articles stocked in the store.

Last Year's Prize Windows.

A year ago we offered prizes for the best displays, and made awards to the three reproduced this week. While all have exceptional merit in certain respects, none came up to the real standard of a good Christmas display, the subjects being too general and their connection with the Christmas trade too far fetched to be really effective as holiday trade winners.

Mr. Karges' display, while being composed of purely hardware goods, had the holiday and Winter lines

Holiday Window, Dressed by Albert Karges, Woodstock.
Awarded First Prize in Hardware and Metal's Window Dressing Contest a Year ago.

(skates and sleigh bells) as fillers in for the background rather than making such seasonable lines as the central features of the exhibit. He states, however, that the display attracted large crowds each evening for the week that it was shown, and sales were easily traced as direct results of the display. The display was made in the right hand window of Gardiner Bros. hardware store at Woodstock, Ont., the arrangement being described as follows :

Novel Lighthouse Display.

"The background was tarred felt neatly tacked on a wooden frame, with a sailboat painted on it with aluminium paint, with the words on the sail, 'We Make a Sale Where Others Fail.' The ceiling was draped with sleigh and hand bells, and on the side is arranged dog collars, dog chains and skates. The body of the lighthouse was made of rope wound around a wooden frame, with a suitable shaped top. It had three red glass windows, and a flash light inside, which shined every five seconds and lighted the window thoroughly. The boat was built entirely of hardware, the body being a wooden frame work covered with aluminum paint. Inside the holes on the sides was red glass and one electric light lighted the whole body. The rail was made of long round headed brass screws with a chain fastened from one to the other. The cabin and searchlight was lighted by electricity. The masts were jointed gun cleaners with mouse traps and funnels as turrets. The cross pieces were one and two-foot rules with guy ropes of seine twine. The life-boats were attached to the hangers by pulleys and ropes. On the turrets and deck were mounted all kinds of revolvers. Bull rings took the place of life preservers, while two large boring machine augers were used as propellers.

"The left-hand window contained a display of cutlery and silverware, the two sides and bottom being covered with green felt, making an excellent background. The word 'Variety' was spelt out in tea spoons. One hundred styles of can knives was stacked up by means of corks in the front of the window, and the bottom of the window was covered with carving sets, ladies' companions and case goods of all kinds."

The Home of Santa Claus.

Mr. Wetmore's Arctic scene was certainly seasonable and must have attracted a great deal of attention in the metropolis of the Atlantic seaboard, where the picture would be realistic to many who know the terrors of the North Atlantic in mid-winter. The display is undoubtedly a work of art, but it does not reach our conception of what a holiday window display should be as it did not show any hardware goods, and but for the signs might have passed for a dry goods or bookseller's display. It was well calculated to catch the eyes of passers-by, but would not so easily reach their pocketbooks.

In the northeast corner was represented the North Pole, backed by an illuminated aurora behind a pole flying the English ensign, protected at the base by a British lion, surrounded by icebergs tipped with gold and viewed through ice cliffs, on which are seen the advertisements of A. M. Bell & Co., Halifax, in whose windows the display was made. Immediately in front were Esquimaux huts, partially buried in snow, while at a short distance to the right stood Santa Claus' factory of crystal illuminated by electricity and bearing the sign, "Santa Claus' Toy Factory," and surrounded by numerous cases of toys, etc., to be forwarded to the station on North Pole Railroad in foreground called Halifax Junction.

The electric locomotive hauling freight cars of North Pole Railroad marked "Toys," "Dolls," left the factory, traveling south on brink of Ice Cliff and through Ice Tunnel to Zeigler Station, 360 miles from North Pole, thence down the incline to the sea level, passing the log cabin on the left covered with snow and numerous skins stretched on sides, brown bears being in the neighborhood.

In the centre of the foreground the train crossed the water channel on a steel bridge, with ice floes passing beneath. Attached to the bridge was the sign, "Bathing from off this bridge strictly prohibited." On the left of the foreground stood a modern brick station house of the North Pole Railroad. On the side track stood some freight cars waiting to be hauled through Ice Tunnel to Halifax. A locomotive was tracked at the water tank on left of station. After reaching the junction the electric train climbed an incline toward the North Pole and factory, passing another hunter's cabin on the right.

In the centre, between the bridge and ice cliff, were many icebergs, at the base of which were herds of seals, pelts, blood, etc., showing signs of slaughter. On the outskirts was to be seen a Polar bear studying the sign, viz., "Polar bears are warned not to obstruct train on N.P.R.R. bridge," and sea lions reading the sign, "Sea lions are cautioned not to walk on track."

The roof of the scene consisted of lattice work in silver tinsel, diamond and square, from which hung brilliants and letters in gold and snow—"The Home of Santa Claus."

The Hunter's Cabin.

Not exactly a Christmas window, but closely approaching to it, was the display made by A. R. Auger, Okotoks, Alberta, a thriving town in the foothills of the Rocky Mountains. The difficulties under which Mr. Auger worked can be judged by the old-style window frame and absence of plate glass, and his effort, therefore, is worthy of special mention. It represented a typical western bachelor's shack, the inside being lined with white building paper. For the fireplace he made a wooden frame and covered it with heavy paper, this being painted to resemble bricks. For the fire he had a small open box covered with screen wire and red tissue paper. In the box was placed a 16-candle power electric light, and over the paper a layer of borax and coal. At night, the light shining through the borax made it look like red coals, and the effect was perfect. The only other light in the window was a wax candle on the table.

The stocking hanging over the fireplace is a reminder of Christmas Eve, while the other contents of the shack, scattered over the floor and hung on the wall, were all typical of what could ordinarily be found in a hunter's shack in the mountains, the rifle, fishing rod, boots, cayuse pack straps and belly band, hatchet, etc., also being lines which could ordinarily be found in a hardware supply house in such a district.

This Year's Offer.

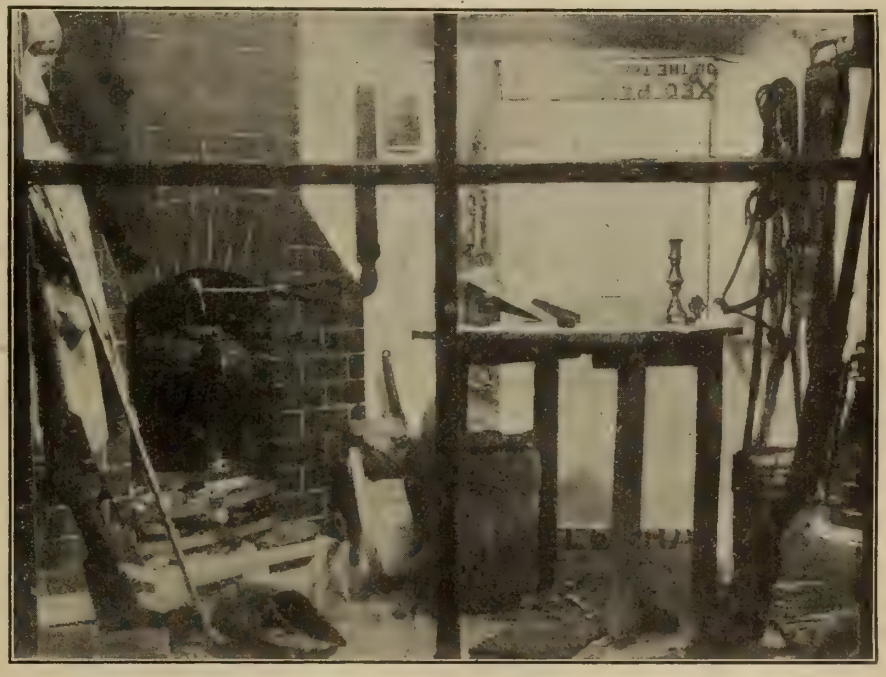
Our offer this season comprises five prizes, but the conditions are more restricted, as in making the awards preference will be given to displays of goods suitable for holiday presents, such as silverware, razors, cutlery, sporting goods, house furnishings and hardware specialties. Care should be taken to avoid reflection in the photographs and a brief description of how the display was constructed should be forwarded along with the photograph. Where possible, also, we desire samples of Christmas advertisements in local papers, referring to the goods shown in the window displays, and a splendid fountain pen will be awarded to the competitor sending the best advertisement.

Six Prizes in All.

Hardware merchants and clerks cannot do better than make a study of window dressing. The man whose store has display windows has to pay higher rent and taxes than the man whose place of business is in an upstairs or back alley location. The window should pay for itself and it will if given a proper chance. The prizes we offer below are merely a flee bite in comparison to the possible results of every merchant's show window. The prizes include:

First prize—$6.00.

Second prize—$4.00.



Third, fourth and fifth prizes, a year's subscription to Hardware and Metal.

Special prize for best Christmas advertisement—Fountain pen.

WINDOW DRESSING AS AN ART.

Window displays have reached an importance in the economy of advertising and store management which makes it a necessity to observe the principles which make a trim the means to an end. Time was when anything that could be done by way of a window trim to bring a crowd of curious people about the window was done. It was thought that great, dazzling, showy windows made the merchant's name known far and wide, but it was gradually found out that the majority of people were attracted to these windows out of curiosity, and went away without ever giving a moment's consideration to the merchant's name who so generously catered to idle curiosity. The same law of idle curiosity brings a crowd about the gaudy and elaborate window display, and as soon as that curiosity is satisfied they march away with no further concern about the window of the merchant. If to gather a crowd about a store window is the sole object of the display, that can be done at much less time and by placing some grotesque figure of a man or an animal in the window, and the effect as a seller of goods would prove as profitable.

The old theory of showy displays has given way to a most modest and useful system of window trims, and the trim that fails to make an impression upon the people of the class of goods presented fails in its purpose. The merchant no longer caters to idle curiosity, but prepares his window trims to bring him customers. It is trade he wants, and his trims must appeal to that class capable of giving him trade. One soon tires of display and beauty that brings no profit. The window display, therefore, must be made a strong advertisement, and that can be done by selecting from a few lines the best and by giving them a strong position in the display. Composite trims offer good advantages, as it frequently happens that allied pieces, though of different lines, greatly help to bring the whole into a strong light with striking effect. It is not the quantity of goods in a window, but the quality that commands most attention. In composite trims, therefore, keep in view the utility, and use such articles only as will accomplish that purpose.

Hunter's Shack Window, Dressed by A. R. Auger, Okotoks, Alberta.
Awarded Third Prize in Hardware and Metal's Window Dressing Contest a Year Ago.

WRITE YOUR OWN SIGNS.

There isn't any reason why merchants generally should not write their own signs. An entire outfit, including large and small letters, ink, rollers and everything needful for writing price cards or for writing show window cards, can be obtained at very low prices. With one of these combinations you can put price cards on everything in your stock, write show cards and call attention to many different articles. Price tickets are a great addition to window decoration. These combination sets are easily handled with good results, the only skill required on the part of the operator being the ability to draw a reasonably straight line and to stamp the figures or letters evenly.

EXPLANATIONS IN ORDER.

In a recent issue of the United States Consular Report, issued by the Bureau of Manufacturers, complaint was made by a Boston concern regarding delays in the delivery of goods shipped to Canada.

"The trouble is on the Canadian side," says the Consular Report. "A package shipped from Washington not long ago, with the charges prepaid to a point in Canada that could be reached in 16 hours, and where there is a custom house, was delayed one month in delivery without any explanation. In the same way American newspapers and magazines were two and three days behindhand in delivery at the same point. It looks as though it may be intentional to discourage purchases on this side."

Kynoch, Limited, ammunition manufacturers, of Birmingham, England, have decided to adopt the metric system both in weight and measure and monetary dealings. Keen interest is shown throughout the country as to the result of the experiment.

NOVELTIES FOR THE HOLIDAY TRADE

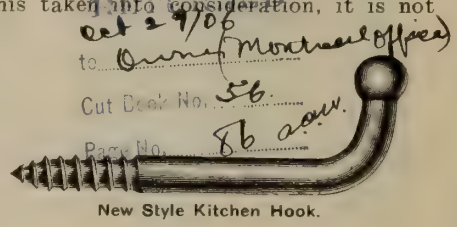
Christmas brings out novelties in every line of trade, and this year the hardwareman is provided with a few, at least, of the little articles which, while not being absolutely essential to the hardware trade, help to make his windows interesting and increase his sales.

Most hardwaremen around this time of year add to their stock a line of children's sleighs. As far as actual novelty goes, it is next to impossible to create anything absolutely new in sleighs. There is a certain recognized form for a sleigh, which in the main is inalterable. But improvements or alterations in the mode of construction or decoration of this form are always being made. As a consequence, this year sees a greater range than ever of handsleighs. The great call seems to be for something cheap, and it is this trade to which the Canadian manufacturer has hitherto confined himself almost exclusively. This year, however, Canadian makers have produced sleighs which are equal to, if not better than, those imported.

Along with sleighs for the children when outdoors, it seems natural to mention something for their indoor amusement. A new variety of the old-time swing has made its appearance this season. It is lightly constructed, but very strong, and is so made that the stand can be folded up and the car removed, if desired. Children up to ten or twelve can use this swing, which ought to sell well. It retails at about $3.

Self-Opening Knife.

In the smaller line of novelties one of the very newest things is the "self-opening knife." This is something distinctly novel, and it is now possible to open your penknife without removing your glove—which may have been possible before, but which was at least not pleasant. With the new knife, all you have to do is press the button and it does the rest. In quality and style there is lots of choice—from bone to pearl, at prices ranging from $4.25 to $9.60 per dozen. On the same plan as the knife, but with the necessary differences in construction, is the "self-opening cigar cutter," to which the same remarks apply—with the exception of the prices. These range from $3 to $5.75 per dozen. There is a considerable proportion of the population that objects to breaking its finger-nails when it wants to use a knife, and the instrument which obviates this ought to have a good sale.



Connected with knives there is something else which, although not entirely new, deserves mention. This is the Boker display cabinet, which helps along sales in great style. The cabinet contains different numbers and styles of knives, which rest on a plush-covered background and are covered by a removable glass front. The case may be laid flat or placed at the angle which will best draw attention, having a support at the back for this purpose. A slightly different case is also made for razors. The main beauty of these "silent salesmen" is that they cost nothing, being provided free by the jobbers with each half-dozen knives or razors, as the case may be.

Cheap Watches Sell Well.

That hardware dealers throughout the country have at last realized the value of low-priced watches as a side line is evinced by the large sales that timepieces of this kind now enjoy among the trade.

Robt. H. Ingersoll & Bro., of New York, announce that they have sold more Ingersoll watches this year than ever before, and that a large and ever-increasing proportion of their sales are among hardware merchants.

The great demand created for these watches by persistent advertising has awakened dealers to their possibilities, and they have found that with the assistance of the selling helps supplied by the manufacturers, that very little salesmanship is required to dispose of the watches. They sell themselves, as it were, and their low cost and uniform selling price assure the dealer of a fair and certain margin of profit. With all this taken into consideration, it is not

New Style Kitchen Hook.

surprising that these watches are received with such good favor by the enterprising hardwaremen.

The dealer who, at the end of the year, can show an increased business and a large profit is considered "lucky," but it is not luck at all—there is no such thing—it is just plain, common horse sense, and ability to see your opportunity and to take advantage of it.

Silverware Sells Well.

While there are few striking new things on the market in silverware, the demand for case goods, flat and hollow ware is steadily on the increase amongst hardwaremen and it looks as though the housewife is looking more and more upon the hardware store as her supply depot for housefurnishings. When she wants table cutlery she goes to the hardware store which carries pocket cutlery rather than to the jewelry store, which is more of a palace of luxuries in the form of watches and jewelry. This year the sales to hardware dealers are far ahead of any previous season and jobbers say the west, particularly, is absorbing a tremendous volume of silver goods.

Such case goods as carving sets, manicure sets, pearl knives, etc., can be displayed to good advantage in hardware store windows and it is his own fault if the dealer does not make a large turnover on this class of goods during the holiday season. A large cabinet, such as is made a specialty of by some silver goods manufacturers, can be made a feature of the exhibit and during the present prosperous condition of the country little difficulty should be experienced in making good sales if the window display and newspaper advertising is properly conducted. Flat and hollow ware sell equally well and should be stocked liberally by dealers who intend making a specialty of this line.

Winter Sporting Goods.

The Canadian manufacturers of skates and hockey sticks have had greater demands made upon them than last year, and, as in previous years, these lines, along with guns and air rifles will figure largely in the Christmas trade. Racing skates of the tube pattern are winning their way into greater favor also and the prevailing fad for roller skating in the large cities will probably help to develop the speed end of the skating game. Some of the roller rinks will remain open during the Winter as competitors of the ice rinks, the profits on the rollers being greater to the rink managers.

The Handy Things Company, Ludington, Mich., are introducing two novel side lines in sidewalk and coasting skates. The runners are wide and as they do not cut deep into the snow, they are suitable for use on sidewalks when rinks are not available for the young folks. The O. K. ice creeper made by Norlund & Co., Williamsport, Pa., is another line which will sell well during the Winter. Other novelties gotten out by American manufacturers include the folding skate made by the Martin Skate Manufacturing Company, Boston, Mass., and a Christmas tree holder, made by the Rhinelander Manufacturing Company, Rhinelander, Wisconsin.

With so many novelties and holiday lines to choose from the average dealer will do well to stock up with a variety of lines even in small quantities, if the expected trade does not permit placing orders for a fair stock of each line. During the holiday season the dealer who is able to suggest a variety of articles for the choice of present givers is the one who is most likely to carry over the smallest stock and bank the largest amount of gift money.

NOVEL KITCHEN HOOK.

The Dominion Wire Mfg. Co., of Montreal, have recently added to their line of bright wire goods the kitchen hook shown in the accompanying illustration. They are made in one size only in galvanized, coppered and japanned finish. For good serviceable wear the galvanized hook will no doubt become most popular finish. The usefulness of an article of this kind in any kitchen is apparent, and the advantage it possesses over the ordinary square or cornice hook will no doubt insure for it a place in every well-appointed hardware stock in the country.

HARDWARE TRADE GOSSIP

Ontario.

Samuel Larue's saw mill at Mountain, Ont., has been burnt out.

John Vance, plumber, Hamilton, visited Toronto on Tuesday.

T. J. Speight, Georgetown, called on Toronto plumbing supply houses this week.

J. C. Northcote, of Rice, Lewis & Son, has returned from a business trip to Winnipeg.

J. Goldbery has bought back his tinware business in Ridgetown, from Solway & Bery.

C. C. Ballantyne, of the Sherwin-Williams Co., Montreal, was in Toronto on Thursday.

The Wilcox Mfg. Co., makers of building hardware, London, Ont., will erect a large addition this Fall.

The blacksmith and wagon shop of Andrew Shaw, Kent Bridge, Ont., was damaged by fire recently.

Morgan White has left Paris, Ont., to accept a responsible position in Bond & Co.'s hardware store, Guelph.

Robert Munro, president of the Canada Paint Co., Montreal, made a business trip to Toronto on Wednesday.

D. A. MacNab, of MacNab Bros., Orillia, spent a few days in Toronto amongst the hardware jobbers this week.

Wallace Flanagan, of Fraser's hardware firm, Galt, will return to his home in Paris, to fill a vacancy in Sinclair's store there.

Maxwell Purdy, of Murvale, left on Oct. 11th for Longhead, Alta., where he intends going into the hardware business with his brother.

James Jackson, of the claims departmen of Lewis Bros., Montreal, passed through Toronto on Thursday on his return from a trip to Brantford on sick leave.

Wilbur K. Darch, junior partner in the firm of J. Darch & Sons, London, was married at Strathroy on Oct. 17, to Miss Pearl A. Hooker, formerly of London.

Bernhardt & Gies have purchased the hardware business of McMurtry & Bernhart, at Preston. Mr. Gies is a plumber and that branch will be added to the business.

It is expected that Murray Hendrie, who has been secretary-treasurer of the Dominion Canister Co., Dundas, will be elected president of the concern, as W. E. Woodruff is said to be about to retire.

Frank Soule, of Soule & Christie, Cowansville, has purchased a block of land adjoining their present quarters, and next Spring the firm will have additional showrooms and warehouse space.

The case of Adam Sielings, Walkerton, v. R. I. Henderson, Toronto, charging the latter with having obtained $1,400 by false pretences in connection with the Henderson Roller Bearing Co., was dismissed.

Albert Karges, of the James Stewart Mfg. Co., Woodstock, was a visitor in Toronto during the week. He had just returned from a trip to Cobalt and reports a very active demand for stoves in the Temiskaming district.

R. O. McDonald, of W. G. Whyte & Co., hardware dealers, Arnprior, is retiring from the firm, and will shortly return to Ottawa. Thos. Griffin, who has been conducting a store at Sand Point, will replace him in Arnprior.

The Canada Steel Goods Co., Hamilton, have built a large plating addition to their mill, and will manufacture fancy butt hinges in high-grade finishes such as old copper, bronze brass, antique brass, dull brass, bower-barff, etc., a class of goods formerly imported for the Canadian trade.

Quebec.

H. A. Drury, manufacturers' agent, Montreal, spent a day in New York during the week.

Mr. Wegman, of Yale & Towne Manufacturing Co., New York, was in Montreal recently.

W. E. Ramsay, manager of the Pedlar People's Montreal branch, spent a day in Quebec this week.

H. B. Brainerd, president of the Dominion Cartridge Co., Montreal, has returned from a western trip.

H. J. Fuller, president of the Canadian Fairbanks Co., has returned to Montreal from Hot Springs.

Mr. Noble, of the New Canadian Co., contractors, Paspebiac, was purchasing supplies in Montreal this week.

S. B. Graham, of W. R. Humphreys & Co., cutlery manufacturers, Sheffield, Eng., was in Montreal this week.

Mr. Owen, of Owen Bros., general merchants, Montebello, Que., paid a short business visit to Montreal recently.

N. P. Lalonde, general merchant, of St. Placide, was among the hardware buyers to visit Montreal this week.

M. S. Springer, representing the Belleville Lock Co., Belleville, visited the Montreal wholesale trade this week.

James Davidson, president of the Thos. Davidson Manufacturing Co., Montreal, spent Thursday in Toronto.

Mr. Hollis, representing the Lufkin Rule Co., Saginaw, Mich., was a caller on Montreal hardwaremen a few days ago.

C. C. Ballantyne, general manager of the Sherwin-Williams Company, Montreal, spent Wednesday of this week in Cleveland.

As the result of an explosion in the works, the varnish factory of A. Ramsay & Son, Montreal, was damaged by fire on Monday.

D. Ransom, of D. Ransom & Son, general merchants, Dickinson's Landing, Ont., visited Montreal this week in the interests of his business.

N. C. McKim, purchaser for C. A. Jones & Son, hardware dealers, Tamworth, Ont., was noticed at the wholesale warehouses this week.

W. C. Rankin, representing the Carborundum Co., of Niagara Falls, N.Y., called at the Montreal office of Hardware and Metal on Wednesday.

T. H. Newman, of Caverhill, Learmont & Co., has returned from the annual convention of the National Hardware Association, held in Atlantic City.

Clifford B. Dixon, manager of Geo. Phillips & Co., manufacturers of silverware, Montreal, was married on Monday to Miss Hazel Goudreau. Mr. and Mrs. Dixon left by boat on the same evening for Quebec.

W. H. Wiggs, of the Mechanics' Supply Co., Quebec, called on Hardware and Metal in Montreal this week. Mr. Wiggs, who, by the way, is making extensive additions to his place of business, reports trade in the Ancient Capital remarkably good. The chief difficulty is to secure goods at any price.

Western Canada.

Agar Bros., Edmonton, are erecting a hardware store at a cost of $5,000.

John Engelland has built and opened a new hardware store at Aberdeen, Sask.

George H. Hurlburt is erecting a hardware store adjoining his block at Wolseley, Sask.

John A. Thomson, hardware merchant, Elm Creek, Man., spent Thanksgiving in Winnipeg.

The Hartney Hardware Co. has sold its hardware business at Hartney, Man., to W. A. Sturdy, of Revelstoke, B.C.

G. L. Vrooman, of Lethbridge, is going into the jobbing business in that town, with L. C. Burnap as his partner.

J. G. Hooper, hardware dealer, Arcola, Sask., has opened a new shop, which is neat and complete in every detail.

The new townsite at Pincher Station is being boomed. L. Kribs, of Frank, has erected a building and will put in a complete stock of shelf and heavy hardware.

NEW RADIATOR PLANT.

Plans have been prepared and ground will soon be broken for the new radiator plant to be established in Toronto by the Warden King and Cluff Bros.' interests. A splendid site has been secured in the northwestern part of the city with good railway shipping facilities, and by next Fall the plant will be in running order.

The establishment of radiator works, to be operated in connection with the Montreal plant, where Daisy boilers, soil pipe and other heating goods are made, will place the Warden King Co. in a splendid position to save their customers' wants. Some interesting features will be incorporated in the new radiators about which the trade will be advised later.

NEW ENAMELWARE FACTORY.

Thomas S. Baker, general manager of the Ontario Steel Ware, Limited, Toronto, has returned from a trip through the Eastern States. While away he visited the largest enamelware plants in order to secure the latest ideas in kitchen ware. Work on the enlargement of their plant on Brock avenue, Toronto, is rapidly proceeding and the company will in another month be able to fill large orders for their new wares.

A RISING MARKET.

The hardware dealer who has not been a subscriber to Hardware and Metal or who, if a subscriber, has not been paying strict attention to our market reports during the past few weeks has not been alive to his business interests. Careful reading of the market reports would repay many times over the small annual expenditure of two dollars to cover a year's subscription to the paper.

Some dealers imagine they can rely upon the traveling salesmen for their market tips—and it cannot be denied that many salesmen do give valuable information regarding market tendencies and by so doing strengthen their own and their house's position by conserving their customer's interests. But that this is a source of information which cannot be relied upon at all times is evident from the fact that the traveler must consider his employer's interests first and when stocks are low and the market rising the salesman cannot be expected to urge customers to buy.

Hardware and Metal predicted a rise in stoves and furnaces in the issue of October 6. Some of the stove foundries are at their wits' ends to get enough pig iron to keep their plants working, while those fortunate enough to have stocks of pig are careful in husbanding it while the market is climbing and the metal already costing $6 per ton more than it did a year ago. Could the stove salesmen under these conditions be expected to encourage a buying movement by advising the trade of a probable advance? Most assuredly not. The trade paper must be relied upon for such information.

Our prediction of October 6 in regard to stoves and furnaces has been followed by the advance of five per cent. announced this week, registers and radiators being also included. Hot water boilers have not yet been advanced but the high price of iron and the difficulty experienced in getting molders even at the high wages now paid makes it certain that boilers will follow iron pipe and the other heating goods advances. The light buying last Winter has been followed by heavy purchases this Fall and one large foundry reports that their stocks are now lower than they were a month later a year ago. Under these circumstances a marked shortage is probable if the warm Summer is followed by a heavy Winter. And as keen observers of market conditions express the opinion that high prices will continue until December, 1907, dealers will be making no mistake in at once placing orders to cover all their requirements for the Winter season at least.

Another article which we have predicted higher quotations on is white lead, and although the past month has seen stationary prices we repeat that white lead and mixed paints must advance very shortly. Pig lead is a scarce article on both European and American markets and the closing down of the British Columbia smelters because of the shutting off of coal supplies owing to the Fernie strike is not calculated to ease matters off to any extent. The increased cost of lead, zinc and turpentine makes the situation a critical one for manufacturers and they can only cover themselves by further advances.

With tin plate slated to advance 25 cents per box on November 1 and all copper prices withdrawn, higher prices on kitchen utensils and similar products are in sight. Canada plates also are now selling at much less than jobbers can lay in new stocks at.

Attention has already been drawn to the advances on wire goods, hinges, butts, nails, spikes, wringers, etc. With iron and copper developing even greater firmness these will be followed by increases on other hardware lines and tools manufactured from these metals.

From the foregoing it will be seen that the hardware dealer will do well to watch closely the market quotations we give every week. Not only must he buy well in advance of his requirements under the new conditions arising out of the scarcity of metals following the general prosperity, but he should lose no time in marking up advances on such lines as cost more to procure from manufacturers.

LANTERN WAR ENDED.

It will be good news for the trade to learn that the unprofitable war engaged in by the Canadian lantern manufacturers is now over and prices will go back to a point where a living profit can be looked for on this line.

The war taught one good lesson—that the interests of manufacturer, jobber and retailer are identical and that a disagreement between manufacturers will have its demoralizing effect upon both the jobbing and retail branches of the trade. The price cutting war indulged in by the manufacturers during the past year or more brought down prices to almost one-half their former position, this naturally resulting in poorer goods being manufactured.

Another effect of the open market was the sale of stocks of lanterns at cut prices to grocers and other tradesman who made their profits on their staple lines and could afford to use lanterns as a bait and sell them at very close margins. Naturally this had a bad effect on the retail hardware dealer, particularly as the public were given the impression that there were enormous profits in lanterns, when retail prices could be cut in half in some cases.

Although the manufacturers, by getting together and arranging to sell their entire product through a central agency, and by having the smaller factories devote their attention to subsidiary lines of manufacture, will be able to overcome the ill effects of the late war, during which they must have lost considerable money, the retailer will not be able to forget the incident so quickly. Until present stocks are exhausted, and, in fact, for a long time after, the retail trade will find it difficult to bring prices back to a point where they can secure the margin necessary to cover the cost of doing business.

Price-cutting wars hit the retailer hardest of all, but the local dealers can, through their retail associations, largely offset the resultant evils if they use their organized power in a fair and equitable manner.

WINNIPEG LEADS.

Winnipeg business men showed last week that they are thoroughly alive to their civic responsibilities and that they realize the absolute necessity of inducing capable business men to stand as candidates at the approaching municipal elections. The Board of Trade took the initiative and called a meeting to which were invited representatives from various business and professional organizations in the city. An enumeration of the bodies represented shows the importance of the gathering. In addition to the

Board of Trade representatives there were present at the meeting delegates from the Grain Exchange, the Medical Association, the Real Estate Exchange, Winnipeg Builders' Exchange, Printers' Board of Trade, Manufacturers' Association, Bankers' Association, Western Wholesale Brokers' Association, Northwest Commercial Travelers' Association, Licensed Victuallers' Association, and the Trades and Labor Council.

This gathering comprised many of the leading business and professional men of the city and they met with a common purpose. It was admitted on all sides that a crisis has been reached in Winnipeg's civic administration and that the business of the city has grown so large that it is absolutely necessary for capable business men to stand as candidates for the mayoralty and the Board of Control.

As mentioned in this paper in a previous article, there is a strong movement in favor of the candidacy of Mr. Jas. H. Ashdown for mayor. This meeting of business men passed a resolution promising Mr. Ashdown their support and appointed a committee to wait upon him and endeavor to secure his consent to stand as a candidate. Mr. Ashdown has consented to stand if his nomination is supported by a sufficient number of business men and ratepayers, and there is every reason to hope that he will be the next mayor of Winnipeg. If so, the city is assured of a capable, progressive administration of its affairs.

Winnipeg business men are setting an example to the business men in all the cities and towns of Canada. In too many places the business men shirk their civic responsibility, with the result that municipal business is badly managed. Winnipeg business men have been as neglectful as the business men in other cities, but they have learned by experience and they are now setting an example to the business men in all parts of Canada.

CREDIT BETTER THAN CASH.

James J. Hill, president of the Great Northern Railway, has sold the iron properties of the railway to the New York Steel Corporation for $400,000,000. Being the principal stockholder of the Great Northern, the deal places him well forward as one of the richest men of the world. Mr. Hill had a talk with a newspaperman afterwards.

"This was a tremendously big transaction," the interviewer commented. "You are quoted as saying there were at least 700,000,000 tons. How much is there?"

"How can I tell? There's a great deal of ore. It has been estimated at between 400,000,000 and 600,000,000 tons."

"Enough to last the world a long time?"

"Yes, enough to last the world a long time."

"How does it feel, Mr. Hill, to be one of the richest men in the world? What are you going to do with all that money? A yearly income, after ten years, of $14,230,000. Or don't you care for money? I have been told that your only realization is developing the Northwest."

"No, I don't care for money. I have had all I want for a great many years. There is something a great deal better than money."

"And that?"

"Credit. Plenty of credit. It is a great thing to have. I am glad to have plenty of credit."

Mr. Hill just hinted that this would be his last financial transaction, the heaviest, he admitted, that he had ever been engaged in, and that he had it in mind to retire from a strenuous business career.

"I'm getting perilously near three score and ten," he remarked, "and I don't want to die, like the trooper's horse, with my shoes on."

THE METAL SITUATION.

The action of the Bank of England in advancing discounts slightly weakened the market in some of the more speculative metals recently, but a complete recovery has now been effected, and in the case of copper, prices have again gone up. The fact is that the demand for this metal is so keen, and stocks so light, that it requires no artificial assistance to maintain the high level of prices. Indeed, as has been mentioned in our columns, the efforts of producers to evenly distribute shipments and thus prevent anything like a corner, though successful for a time, could not last, and the market broke away from this restraint.

On the English market pig lead is easing a little, but conditions are still firm in Canada, and no change has been made in last week's quotations. The other ingot metals do not show any change in conditions, but continue firm.

Consumers of pig iron can see little hope of bettered conditions during the Winter. The United States are taking more foreign iron every day and stocks in Great Britain which have been very light for a considerable time are still further depleted in consequence. As a result of this situation, English prices have advanced three or four shillings during the week just past, and it must be expected that stocks which were purchased for Winter sale on the Canadian market will command higher figures.

As previously stated by us, the Canadian furnaces are all booked ahead for long periods, and offers are coming to hand for deliveries covering the first 6 or 9 months in 1907.

It is hard to see where these price advances on so many metals in daily use are going to end. In the case of pig iron, copper and others, which are used as a large proportion in numerous articles, the scarcity of material and consequent high price will no doubt continue until there is a curtailment of consumption. This will probably occur when consumers find that they cannot pay the prices demanded, and decide to do without the goods.

Tin plates have been going up steadily in the Old Country, but prices on this side have not been revised for some time. Jobbers, however, will soon have to meet the changed conditions, and it is said that advanced prices equivalent to 25c. per box will be declared at the beginning of November.

We have for a couple of weeks foreseen a general advance in galvanized iron. Some jobbers had raised the prices of their special brands, and makers were constantly advancing quotations on import orders. The effect of this was seen this week, when a general advance of 15c. was made by jobbers.

The market on the whole has lost none of its strength, and there are many who are looking for further advances in many lines.

BUSINESS ETIQUETTE.

The manager of our London office recently received an inquiry from an English advertiser as to the status of a Canadian firm who answered one of his advertisements and placed an order amounting to some $50 or more. Although this was the first transaction, no remittance was enclosed nor references given, and the letter was mailed without the necessary stamp, so that excess postage was demanded on delivery.

We have reason to think that the firm who sent this order is a desirable customer, but we question if the order referred to will ever be filled. British houses look askance at such breaches of business etiquette and courtesy, and we have known cases where such letters have been exhibited to other houses as examples of unbusinesslike Canadian methods.

Surely in asking credit a buyer should endeavor to make the best impression possible on the manufacturer from whom goods are required.

Markets and Market Notes

(For detailed prices see Current Market Quotations, page 66.)

THE WEEK'S MARKETS IN BRIEF.

MONTREAL.

Barb Wire—Advanced 10c.
Plain Twist Wire—Advanced 10c.
Old Material—Several advances.
Pig Iron — Londonderry, $23.00; Carron No. 1, $24.50; Carron special, $23.50; Summerlee No. 2 selected, $23.50; Summerlee No. 3 soft, $22.50.
Copper—Ingot, 24c.; sheets, 31c.
Merchant Steel—Several advances.
Copper Boilers—Advanced.

TORONTO.

Enamelware—Advances on "specials."
Brass Goods—General advance on valves.
Radiators — Quotations about 10 per cent. higher.
Stoves and Furnaces—Advanced 5 per cent.
Turpentine—Quoted 2 cents higher.
Mixed Paints—Advance predicted.
Wire Fencing—Advances on barb and plain twist.
Tin Plates—Advance 25c. per box, Nov. 1.
Canada Plates—Present prices to advance.
Galvanized Sheets — Queen's Head quoted higher.
Copper Kettles, etc.—Advance probable.
Copper Range Boilers—Now net list.
Sheet Copper—Scarce and very firm.
Shelf Hardware—Advances on some lines of tools, locks, etc., to be made.
German Cutlery—An advance predicted.
Pig Iron—Advances on some brands.
Old Material—Copper and brass higher.

Montreal Hardware Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, Oct. 26, 1906.

In spite of mild weather, the shipments of Fall goods have continued very large this week. Dealers are apparently anxious to avoid the close of navigation rush as much as possible, but the difficulty of securing goods from manufacturers is, in many cases, keeping the jobbers from shipping booked orders.

Barb wire and plain twist wire have advanced ten cents this week, and band steel is now being quoted at $2.45 base. These are the only price changes of any moment, though the market all through is very strong, and values are likely to be still further enhanced, especially in copper products.

AXES—Sales are large, and trade conditions extremely satisfactory. We quote as follows: $7.60 to $9.50 per dozen; double bitt axes, $9.50 to $12 a dozen; handled axes, $7.50 to $9.50; Canadian pattern axes, $7.50 a dozen.

HANDLES — Our prices remain as follows: No. 3, $1.25; No. 2, $1.50; No. 1, $1.90 a dozen; adze handles, 34-inch, $2.20 a dozen; pick handles, No. 2, $1.70; No. 3, $1.50 a dozen.

LANTERNS—Although in some parts of the country prices have gone up, Montreal jobbers are still quoting: "Prism," $7; "Prism" globes, $1.20; Cold Blast, $4; No. 0 Safety, $3.50 to $3.75.

COW TIES AND STALL FIXTURES—Good shipments of these lines are still being made. Quotations remain: Cow ties, discount 40 per cent. off list; stall fixtures, discount 35 per cent. off list.

SLEIGH BELLS—Business continues good. We are still giving prices as follows: Back straps, 30c. to $2.50; body straps, 70c. to $3.50; York Eye bells, common, 70c. to $1.50; pear shape, $1.15 to $2; shaft gongs, 20c. to $2.50; Grelots, 35c. to $2; team bells, $1.80 to $5.50; saddle gongs, $1.10 to $2.60.

RIVETS AND BURRS—The expected advance in copper rivets and burrs has not yet materialized, though that metal continues to go higher. We still quote: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., copper rivets and tin swede rivets, 60, 10 and 10 per cent.; swede iron burrs are quoted at 60 and 10 and 10 per cent. off new lists; copper rivets with the usual proportion of burrs, 35 per cent. off, and coppered iron rivets and burrs in 5-lb. carton boxes at 60 and 10 and 10 per cent.; copper burrs alone, 30 per cent., subject to usual charge for half-pound boxes.

HAY WIRE—Trade is normal. We still quote as follows: No. 13, $2.45; No. 14, $2.55; No. 15, $2.70; net cash, f.o.b. Montreal.

MACHINE SCREWS— Discounts as follows: Flat head, iron, 35 per cent.; flat head, brass, 35 per cent.; Felisterhead, iron, 30 per cent.; Felisterhead, brass, 25 per cent.

BOLTS AND NUTS—No relief of any account has been experienced from the shortage reported some time ago. We quote: Carriage bolts, ⅜ and under, 60 and 10; 7-16 and larger, 55 p.c.; fancy carriage bolts, 50 p.c.; sleigh shoe bolts, ⅜ and under, 60 per cent.; 7-16 and over, 50 per cent.; machine bolts, ⅜ and under, 60 per cent.; 7-16 and larger, 55 per cent.

HORSE NAILS—We quote discounts: C brand, 40, 10 and 7 per cent.; M.R.M. Co., 55 per cent.; P.B. brand, 55 per cent.

WIRE NAILS—There is less price cutting than usual, and the market is steady. We now quote $2.15 per keg base, f.o.b. Montreal.

CUT NAILS—Business remains on about the same plane as at our last report, and we continue to quote: $2.20 base, f.o.b. Montreal.

HORSESHOES — Shipments are going out briskly. Prices remain as follows: P.B. new pattern, base price $3.50 per 100 lbs.; M.R.M. Co., latest improved pattern iron shoes, light and medium pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; snow pattern, No. 2 and larger, $3.90; No. 1 and smaller, $4.15. Light steel shoes, No. 2 and larger, $4; No. 1 and smaller, $4.25; featherweight, all sizes, No. 0 to 4, $5.60. Toeweight, all sizes, No. 1 to 4, $6.85. Packing, up to three sizes in a keg, 10c. per 100 lbs. More than three sizes, 25c. per 100 lbs extra.

BUILDING PAPER—As the close of navigation approaches, business is picking up. Prices are unchanged.

CEMENT AND FIREBRICK—A big business is being done by the local dealers. Our quotations are as follows: "Lehigh" Portland in wood $2.54; in cotton sacks, $2.39; in paper sacks, $2.31. Lefarge (non-staining) in wood, $3.40; Belgium, $1.60 to $1.90 per barrel; ex-store, American, $2 to $2.10 ex-cars; Canadian Portland, $2 to $2.05. Firebrick, English and Scotch, $17 to $21, American $30 to $35; White Bros.' English cement, $1.80 in bags, $2.05 in barrels in round lots.

COIL CHAIN—Jobbers are shipping large quantities. The lumbering season will soon be on, and consumption in large lots will then begin. We quote as follows: 5-16 in., $4.30; 3-8 inch, $3.80; 7-16 inch, $3.60; 1-2 inch, $3.40; 9-16 inch, $3.35; 5-8 inch, $3.25; 3-4 inch, $3.10; 7-8 inch, $3.05; 1 inch, $3.

SHOT— We still quote: **Shot,** packed in 25-lb. bags, ordinary drop AAA to dust, $7 per 100 lbs.; chilled, No. 1—10, $7.50 per 100 lbs.; brick and seal, $8 per 100 lbs.; ball, $8.50 per 100 lbs. Net list. Bags less than 25 lbs., ½c. per lb. extra, net; f.o.b. Montreal, Toronto, Hamilton, London, St. John, Halifax.

AMMUNITION—This season's trade has been phenomenally brisk. We quote: Loaded with black powder, 12 and 16 gauge, per 1,000, $15; 10 gauge, per 1,000, $18; loaded with smokeless powder, 12 and 16 gauge, per 1,000, $20.50; 10 gauge, $23.50.

Toronto Hardware Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto Oct 26, 1906.

Advancing prices have stimulated trade greatly and orders for all lines for prompt delivery are very large. Consequently jobbers are working nights to get out shipments and are keeping well up except on lines where manufacturers are behind.

Wire fencing, both barb and plain twist, has advanced ten cents and wire nails are much firmer. We now quote $2 with a rebate of ten cents but as orders for the western trade are large and buying is more active since prices began to strengthen, it would not be surprising to see the manufacturers arrange upon a scale of prices which would allow a fair margin of profit. In the States another

advance of $1 per ton has been made on wire nails, etc. Advances on shovels and blacksmith's vises have also been made across the line.

Bolts and nuts keep very scarce but it is announced that the Canadian Drawn Steel Company, Hamilton, whose plant has been working on cold rolled shafting, will also produce bolts, rivets, upsets, forgings and structural iron after November 15. The Brantford Screw Company will also be making bolts and larger sizes of screws very shortly.

Cheap German cutlery is to advance from 3 to 7 per cent., according to a well advised buyer, and with copper prices flying skyward higher prices on brass lamps and lighting fixtures can be looked for. Advances on all small shelf goods, such as locks and tools, varying from 5 to 25 per cent., are also understood to be under way. Practically every line produced from iron, copper, lead or tin can be figured on as likely to advance during the next month or so.

AXES AND HANDLES—A good season is looked for and sorting is being largely done.

CUTLERY AND SILVERWARE — The shipments of both cutlery and silverware are very large, and dealers are stocking heavily for holiday business. Advances on cheap German cutlery are expected.

SPORTING GOODS — All shooting goods and football supplies are selling well. Skate shipments are being made in fair quantities.

CHAIN—We continue to quote : 1 inch, $6.60 ; 5-6 inch, $4.55 ; 3-8 inch, $3.95 ; 7-16 inch, $3.80 ; 1-2 inch, $3.65 ; 9-16 inch, $3.55 ; 5-8 inch, $3.45 ; 3-4 inch, $3.35.

RIVETS AND BURRS—Prices hold firm and demand is keen.

SCREWS—The expected advance in set and cap screws has not yet been made.

BOLTS AND NUTS—Stocks are light and prices firm. Relief is looked for by the establishment of new plants at Brantford and Hamilton.

TOOLS—A heavy trade has been done in mechanics' tools and the demand is still brisk. Advances are being made on some lines.

SHOVELS—Demand is brisk and dealers are sorting in snow shovels. Advances have been made in the States.

LANTERNS — Cold Blast lanterns are now quoted at $6.50 per dozen. Shipments of lanterns, lamps and all lighting goods are extraordinarily large. Higher prices can be looked for on brass fixtures.

EXTENSION AND STEP LADDERS —Prices continue as follows : Step ladders at 10c. per foot for 3 to 6 feet, and 11c. per foot for 7 to 10 feet ladders. Waggoner extension ladders, 40 per cent.

POULTRY NETTING—We quote : 2-inch mesh, 19 w.g., discount 50 and 10 per cent. All others 50 per cent.

WIRE FENCING — Barb and plain twist fencing have advanced ten cents. Galvanized and coiled spring wire holds firm at the advanced prices.

OILED AND ANNEALED WIRE — (Canadian)—Gauge 10, $2.31 ; gauge 11, $2.37 ; gauge 12, $2.45 per 100 lbs.

WIRE NAILS—We quote $2.10 base, with a ten cent rebate. The market is firmer and further advances are probable.

CUT NAILS—We quote : $2.20 base, f.o.b. Montreal. Toronto, 20c. higher.

HORSENAILS—"C" brand, 40, 10 and 7½ off list. "M.R.M." brand, 55 per cent. off. "Monarch" brand, 50 and 7½ off. "Peerless," 50 per cent. off.

HORSESHOES—Our quotations continue as follows : P.B. base, $3.65 ; "M.R.M. Co., latest improved pattern" iron shoes, light and medium pattern, No. 2 and larger, $3.80 ; No. 1 and smaller, $4.05 ; snow, No. 2 and larger, $4.05 ; No. 1 and smaller, $4.30 ; light steel shoes, No. 2 and larger, $4.15 ; No. 1 and smaller, $4.40 ; featherweight, all sizes, 0 to 4, $5.75 ; toeweight, all sizes 1 to 4, $7. Packing, up to three sizes in a keg, 10c. per 100 lbs. extra ; more than three sizes in a keg, 25c. per 100 lbs. extra.

HORSE BLANKETS AND SLEIGH BELLS—Call for horse blankets is becoming general and shipments are fairly large. Bells are not so active.

STABLE FITTINGS—This line is being included in most sorting orders and cow ties are in good demand.

BUILDING PAPER—Trade has livened up as a result of the cool weather.

CEMENT—We quote : For carload orders, f.o.b. Toronto, Canadian Portland, $1.95. For smaller orders ex warehouse, Canadian Portland, $2.05 upwards.

FIREBRICK—English and Scotch fire brick $27 to $30 ; American low-grade, $23 to $25 ; high-grade, $27.50 to $35.

HIDES AND WOOL—Chicago is weaker, but locally there is little change in the situation.

Hides, inspected, steers, No. 1		0 12½
" " " No. 2		0 11½

Montreal Metal Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, October 26. 1906.

New developments this week are few, but on all sides is heard the complaint of slow deliveries and the difficulty of meeting the requirements of the trade. The demand continues very keen in all the commercial metals, production generally being away behind the present consumption.

Copper has moved up again since our last report, the current quotations being 24c. for ingot and 31c. for sheets. The feeling in the trade is still bullish, and it would seem as if this metal would climb to a still higher price in the immediate future. Many of the oldest metal men state that they have not known so strained a situation in the copper market.

The pig iron situation is becoming more acute every day. In the United States the consumption exceeds domestic production, and orders for British iron are becoming more numerous and pressing. The fact that three or four leading American furnaces have been compelled to close down for repairs will still further boost the demand for foreign pig. Under these circumstances English producers are naturally asking higher figures, the advance during the past week being from 4 to 6 shillings. Consequently, it must be expected that stocks which have been purchased for Winter sale and delivery will command a higher price on the Montreal market.

COPPER.—Once more the market is higher and the price is stiffly held at our figures: Ingot copper, 24c. to 24½c.; sheet copper, base sizes, 31c.

INGOT TIN—There is no change to report this week, and we still quote : 46c. to 46½c. per lb.

ZINC SPELTER—Market conditions are the same as at our last report. We quote $7 to $7.25 per 100 lbs.

ANTIMONY—We are still quoting 27½c. to 28c. per lb.

PIG LEAD—This metal has recovered from a temporary break and the ruling price again is $5.15 to $5.25 per 100 lbs.

PIG IRON—Montreal prices are following those in the Old Country, and we are advancing quotations this week. Leading brands are now quoted as follows: Londonderry, $23; Carron, No. 1, $24.50; Carron, special, $23.50; Summerlee, No. 2, selected, $23.50; Summerlee No. 3, soft, $22.50.

BOILER TUBES—We still quote : British and American tubes, 1½ inch, 8½c.; 2 inch, 8½c.; 2½ inch, 10c.; 3 inch, 12c.; 3½ inch, 15¾c.; 4 inch, 20c.; 5 inch, 45c. Price per foot net.

TOOL STEEL—We quote : Colonial Black Diamond, 8c. to 9c.; Sanderson's, 8c. to 45c., according to grade; Jessop's, 13c.; Jonas & Colver's, 10c. to 20c.; "Air Hardening," 65c. per pound; Conqueror, 7½c.; Conqueror high speed steel, 60c.; Jowitt's Diamond J., 6½c. to 7c.; Jowitt's best, 11c. to 11½c.

GALVANIZED IRON — We are still quoting the following prices : Queen's Head, 28 gauge, $4.50 to $4.75; 26 gauge, $4.35; 22 to 24 gauge, $3.80; 16 to 20 gauge, $3.65; Apollo, 28 gauge, $4.25 to $4.50; 26 gauge, $4.10; 22 and 24 gauge, $3.55; 16 to 20 gauge, $3.40; Comet, 28 gauge, $4.25 to $4.50; 26 gauge, $4.10; 22 and 24 gauge, $3.55; 16 to 20 gauge, $3.40; Bell brand, 28 gauge, $4.40 to $4.45; Fleur-de-Lis, 28 gauge, $4.35 to $4.60; 26 gauge, $4.20; 22 and 24 gauge, $3.65; 16 to 20 gauge, $3.50; Gorbal's "Best Best," 28 gauge, $4.25 to $4.50 ; "Windmill Best," 28 gauge, $4.15; Sword and Torch, 28 gauge, $4.15; Colborne Crown, 28 gauge, $4.40 to $4.65. In less than case lots 25c. extra.

BLACK SHEETS—No change has yet taken place. We continue to quote as follows: 28 gauge, $2.50; 26 gauge, $2.45; 22 and 24 gauge, $2.30; 20 gauge, $2.25; 17 and 18 gauge, $2.25; 8, 10, 12 and 14 gauge, $2.55.

CANADA PLATES—Our prices remain: 52's, $2.60; 60's, $2.65; 75's, $2.75; full polished, $3.75 to $4; galvanized, 52's, $4.25; 60's, $4.50.

TIN PLATES—The expected advance has not yet materialized. Our quotations are: Cokes, base size, 1C 14 x 20, $4; charcoal, base size, 1C, 14x20, $4.25.

TERNE PLATES—Our prices are: $6.85.

SHEET ZINC—Conditions are unchanged and we continue to quote: $8 in casks, $8.25 in less than casks.

SHEET LEAD—Last week's advance is firmly held. Prices: 2½ lbs., 6¼c. by the roll; 3 lbs. and heavier, 6c., by the roll; small quantities, 25c. per 100 lbs. extra.

MERCHANT STEEL—As a result of continued advances in primary markets, local producers have raised their prices on some lines, and we now quote the following: Sleigh shoe, $2.25; tire, $2.40, spring, $2.75; toecalk, $3.05; machinery iron finish, $2.27½; ruled machinery steel, $2.75; mild, $2.25 base and upwards; square harrow teeth $2.40; band steel, $2.45 base. Net cash 30 days. Rivet steel quoted on application.

COLD ROLLED SHAFTING — Our prices are: 3-16 inch to 1-4 inch, $6.80; 5-16 inch to 11-32 inch, $5.78; 3-8 inch to 17-32 inch, $4.76; 9-16 inch to 47-64 inch, $4.08; 3 1-8 inch to 3 7-16 inch, $3.60; 3-4 inch to 1 7-16 inch, $3.75; 1 1-2 inch to 3 inch, $3.50; 3 1-2 inch to 3 15-16 inch, $3.75; 4 inch to 4 7-16 inch, $4.08; 4 1-2 inch to 4 11-16 inch, $4.42.

BAR IRON—We are still quoting $2.10 base, f.o.b. Montreal.

OLD MATERIAL — Copper is very scarce and prices have advanced in sympathy with the new metal. Rubbers are also up, and are likely to go higher. Dealers' prices are: Light copper, 16c.; heavy red brass, 15½ to 16c., yellow brass, 12c.; light brass, 8½c.; lead, 3¾c.; zinc, 4c.; machinery cast scrap, $15.50; wrought scrap, $14 to $15; stove plate scrap, $12; mixed rags, $1 to $1.20 per 100 lbs.; old rubber, 8c. to 8¼c.

Toronto Metal Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, Oct. 26, 1906.

Business has eased off in the metal markets owing to the high prices asked for the leading metals. Copper ingots at 24 cents per pound are practically unsalable except to buyers who must have the stock for present use. The greatest scarcity this week is in sheet copper, which commands almost any price for prompt delivery.

Lead is very firm at $5.25 and stocks are very light. Tin keeps firm at unchanged prices, but an advance in tin plate is looked for on November 1, single boxes to be 25 cents higher. On Canada plates the retail trade is getting the advantage of low prices, as while we still quote $2.65 there has been about 10 cents of an advance in foreign markets and jobbers cannot buy for what they are now selling at.

Pig iron is getting firmer each week and there is a marked scarcity both in Europe and America. In Canada the advances of the past few months have caused advances of 5 per cent. on stoves, furnaces, radiators, etc., as well as on enamel ware. Bar iron continues firm and scarce while advances are being made on forged and refined iron and merchant, tire, sleigh shoe and spring steel.

In old materials copper and brass lines have advanced.

PIG IRON—The market continues very firm with material more scarce than ever. Our prices are: Radnor at furnace $33; Hamilton at furnaces, No. 1, $23; Londonderry, f.o.b. Toronto, No. 1, $24; Middleborough, $23.50; Summerlee, $25.

BAR IRON—The market is firm at $2.20 base, f.o.b. Toronto, with discount of 2 per cent. net cash.

INGOT TIN—Business being done is as good as could be expected. We quote: 45c. to 46c. per lb.

TIN PLATES—Advance of 25 cents per single box to be made on Nov. 1. Our quotations are as follows: Cokes, base size, 14 x 20, $4 to $4.25; charcoal, base size, 14 x 20, $4.50 to $5.

GALVANIZED SHEETS — Stocks are light and buying good. Canada plates and black sheets are firm.

BRASS—Business is active and it is difficult to obtain deliveries. We quote: 23c. to 24c. per lb.

COPPER—Ingots are quiet owing to nigh prices but sheets are scarce and almost any price asked can be secured. We quote prices as follows: Ingot copper, $24 per 100 lbs., and sheet copper $30 per 100 lbs.

LEAD—Stocks continue scarce and the market firm and active. We quote as follows: $5.25 for imported pig and $5.50 for bar lead.

ZINC SPELTER—The market is quiet and prices unchanged. We quote: 7¼c. per lb. for foreign and 6c. per lb. for domestic. Sheet zinc has been advanced 25 per cent.

BOILER PLATES AND TUBES—We quote: Plates, per 100 lbs., ¼ in. and up, $2.45; heads, per 100 lbs., $2.65; tank plates, 3-16 inch, $2.50; tubes, per 100 feet, 1½ inch, $8.50; 2, $8.80; 2½, $10.75; 3, $12; 3½, $15.80; 4, $21. Terms, 2 per cent. off.

ANTIMONY—Trade is active at 27c. to 28c.

OLD MATERIAL — Dealers' buying prices are: Heavy copper and wire, 16½c. per lb.; light copper, 15c. per lb.; heavy red brass, 14c. per lb.; heavy yellow brass, 12c. per lb.; light brass, 8½c. per lb.; tea lead, $3.40 per 100 lbs.; heavy lead, $3.60 per 100 lbs.; scrap zinc, 4½c. per lb.; iron, No. 1 wrought, $12; No. 2 wrought, $5; machinery cast scrap, $15; stove plate, $11; malleable and steel, $6; old rubbers, 7¾c. per pound; country mixed rags, $1 to $1.25 per 100 lbs., according to quality.

COAL—We quote the following prices: Anthracite in cars at bridge, egg, stove and nut, $5.50; grate, $5.25; pea $3.50 per gross ton.

Standard Hocking, soft coal, in cars, f.o.b. at mines: Lump, $1.50; ¾ inch, $1.40; run of mine, $1.30; nut, $1.25; N. P. and S., $1; slack, 75c.; box cars, 10c. per ton additional.

Youghiogheny soft coal in cars, bonded at bridges: 1¼ inch, $2.55; ¾ inch, $2.45; mine run, $2.35; slack, $2.05.

For Manitoba, British Columbia and Maritime Provinces markets see pages following.

United States Metal Markets

From the Iron Trade Review, Cleveland, Oct. 25, 1906.

The scarcity of both pig and crude steel, combined with a car shortage steadily growing more acute, has developed another critical condition in the industry. Already the closing down of some new plants is reported, and others are operating on such a narrow margin of raw materials that they may be forced to suspend at any time. On the other hand, furnaces are experiencing great difficulty in securing enough cars to meet the needs of their suffering customers, and, in some instances, are actually being forced to store considerable tonnages in their yards. In the Pittsburg district finishing plants, for the same reason, are beginning to exhaust their storage facilities and may be forced to close.

The question of raw materials for next season is now of paramount interest to the iron industry. The past week has made it practically certain that for 1907 Bessemer ore will sell at 75 cents advance over this season's prices, and non-Bessemer ore at 50 cents advance. In fact, some sales have already been made by one interest at this level, and the formal opening of the ore buying movement is expected shortly.

Excited into activity by the continued heavy buying of the H. C. Frick Coke Co., leading independent consumers have again entered the market to complete their 1907 requirements. The Frick Co. which is the largest producer, has now purchased an aggregate tonnage equal to about 50,000 tons per month throughout the coming year. Only five more ovens are now operating in the Connellsville region than there were a year ago.

Some belated relief from present conditions is promised through the announcement that the Inland Steel Co. is to erect two additional 50-ton open-hearth furnaces and a bar mill. Work has been begun on another furnace in the Buffalo district, the Inland Steel Co. is planning an additional stack, and two good-sized furnaces will probably be built in the Ironton, O., district.

U. S. Iron and Metal Trades

From the Iron Age, Oct. 25, 1906.

There is urgency for spot pig iron all over the country, but it is probably most acute in New England, where melters have been forced into the market to secure metal at close to $25 per ton, in spite of the fact that they have unfilled contracts with furnace interests at very much lower prices. There has been an advance all along the line and in all sections of the country.

Exactly what tonnage of foreign iron

has been contracted for is very difficult to estimate. One cargo of close to 5,000 tons of Middlesborough iron has just arrived, and is nearly all sold. Another interest has three cargoes afloat, while the fact that what available freight room there was for some time to come on the regular liners from Glasgow and Middlesborough has been taken indicatee that considerable quantities are to come forward. This foreign pig iron is selling at about $1 per ton below the prices at which domestic iron is selling for prompt delivery, but the foreign markets seem to keep pace with our advance, so that the spread between foreign and domestic prices is not nearly as large as it was during the last import movement.

Steel is scarce all over the country, and some eastern billets have actually been sold in the Pittsburg district for $32, delivered.

There have been some further large sales of steel rails, including 85,000 tons additional for the New York Central, thus nearly doubling the former purchase for 1907. The Texas & Pacific has contracted for 30,000 tons and the Northern Pacific for 10,000 tons additional. An order has been taken for 10,000 tons to go to Manila, and there is pending a lot of 30,000 tons for the Guayaquil & Quito road. The Canadian Pacific is in the market for a large tonnage, while it is expected that the Delaware & Hudson and the New Haven roads will place their orders at an early date.

Lake shipbuilders have ordered 30,000 tons of material with Chicago and Pittsburg mills, the quantity being about equally divided between shapes and plates. The demand for structural material for buildings has been rather light for some time past and the mills are in a position to make prompt deliveries. There has just been placed, however, by the City Investment Co., of New York, an order for 14,000 tons of shapes and a Pittsburg shop has taken 4,000 tons for the new plant of the Standard Steel Car Co., at Hammond, Ind. Bridge work is coming out quite freely. The Northern Pacific road has placed 8,000 tons and has 10,000 tons more to give out. The Rock Island wants from 4,000 to 5,000 tons and the South & Western road about 20,000 tons of bridge material.

The expected announcement of an advance on sheets and tin plate, which is to be made to-day, has not yet come to hand.

London, Eng., Metal Markets

From Metal Market Report, Oct. 24, 1906

PIG IRON — Cleveland warrants are quoted at 58s., and Glasgow standard warrants at 57s. 6d., making prices as compared with last week 1s. higher for Cleveland warrants and 11d higher for standard warrants.

TIN—Spot tin opened easy at £199 15s., futures at £199 5s., and after sales of 300 tons of spot and 520 tons of futures closed weak at £198 for spot, £198 for futures, making price compared with last week 5s. higher on spot, 15s. higher on futures.

COPPER—Spot copper opened weak at £99, futures £98 15s., and after sales of 200 tons of spot and 700 tons of futures, closed weak at £98 2s. 6d. for spot, and £98 2s. 6d for futures, making price as compared with last week £1 15s. lower on spot and £1 10s. lower on futures.

LEAD—The market closed at £19 10s., making price as compared with last week 7s. 6d. lower.

SPELTER—The market closed at £28, making price as compared with last week unchanged.

N.S. Hardware Trade News

Halifax, N.S., October 23.

The hardware trade is still booming, jobbers reporting business unusually brisk. The firms in this city are now filling orders for fishing supplies, and the orders from the Magdalen Islands, Cape Breton and Newfoundland are quite large. This is the season of the year that these fishermen purchase their supplies so that they will be all prepared for the Spring fishing. The principal supplies purchased and the prevailing market prices are as follows: Pure manilla rope 15½c., British manilla 12c., corkwood $2.75 per 100 pounds, bale net cork $3.35 per 100 pounds, cotton nets $4.25, barked and mounted $6; net twine, 14-6 28½c., 12-6 27½c.; cotton seine twine, 22½c. base.

The canning factories throughout the province are now buying their supplies for next season. During the Winter they manufacture the cans. I. C. coke 14x20 is quoted at $3.90 per box, ingot tin at 47c., and English pig lead at $6.50; lobster marline standard 20c. per pound, extra fine 21½c.

Owing to the great scarcity of pig iron in these parts the price has been advanced. Jobbers complain that they cannot get sufficient pipe from the mills in Canada to fill the most pressing orders, and several of them have had to import stock from the United States, paying the extra duty of 30 per cent. The greatest scarcity is in 1¼ and 1½ inch black. One jobber received a rush order for 1,000 feet of the above and he had to refuse it, as he could not deliver the pipe in the specified time. It is claimed that the demand for the smaller sizes in Western Canada is the cause of the shortage on the local market. There is no immediate prospect of any relief in the situation.

A meeting of the shareholders of the Robb Engineering Company, of Amherst, N.B., will be held this week for the purpose of considering a proposition for the amalgamation of the business of the company of that town with that of the Robb-Mumford Boiler Company, of South Framingham, Mass., and the general impression is that the shareholders will vote for the amalgamation. D. W. Robb is managing director of both companies. The Robb Engineering Company occupies a leading place among the manufacturers of the Dominion in the special lines of boilers and engines. The products of its workshops go to every part of Canada and to many foreign countries. A few years ago D. W. Robb and other representative American and Canadian capitalists organized the Robb-Mumford Company, and purchased the plant of Kendall & Son, of Cambridge, Mass. The plant was moved to South Framingham, and splendid workshops with the most modern kinds of machinery were erected, and the industry is now regarded as a model plant. The business of both concerns has grown enormously, and it is now felt that for economic and many other reasons that amalgamation is desirable. The plans for the merger have already been drafted and only await the ratification of the shareholders.

London Hardware Trade News

London, October 24.

The hardware business in London was never better than at present. Building operations continue to advance rapidly and the good weather that has prevailed up to the present week has resulted in more building than has usually been the case at this time. Besides the demand for houses has increased materially and contractors cannot build new dwellings fast enough. This with numerous factory extensions has been felt by the hardware and metal trade. Payments are being better met also and the general prosperity is having a good influence on trade generally.

One of the only two Londoners interested in the 1,000 per cent. dividend paying Temiscaming mine is Mr. Geo. Taylor, the hardwareman of this city, who now spends all his time at New Liskeard, Cobalt and the north, where the Taylors have other hardware stores.

Mr. Stephen Drew, for many years one of the department managers with the Hobbs Hardware Co., of this city, has recently resigned to take a position with the Cowan Hardware Co., also of London.

The Wortman & Ward Co., manufacturers of agricultural implements, churns and washing machines, have been increasing their business and their staff of workmen and they are now asking the City of London for a fixed assessment at $25,000.

The McClary Manufacturing Co. are putting in the foundation for another large storehouse. When about a year ago the company erected a three-storey building, 250 by 100 feet, they expected they would be satisfied for ten years. But business has so increased that they have decided to put up a five-storey building of the same dimensions and convert the present warehouse into a building for manufacturing. Speaking to Hardware and Metal a few days ago Col. Gartshore stated that during the past year the increase in business would amount to 20 per cent. He said that at the present time there were over 1,000 workmen engaged in the stove-making and metal industry as represented by the McClary firm and the prospects were that next Spring the staff would be further increased.

BELLEVILLE ROLLING MILL RUNNING.

In view of the great scarcity of bar iron recently, it is interesting to know that the Belleville Rolling Mill started to roll this week. Extensive repairs and additions have been made to the mill since the Toronto and Ontario Rolling Mills Co. took over the plant, and with their new equipment of machinery and furnaces will be able to supply a superior grade of bar iron. D. Eppelsheimer is the new general manager and T. Moore general sales agent. The company's staff are well known and the trade can look for prompt attention to orders from them.

MANITOBA HARDWARE AND METAL MARKETS

(Market quotations corrected by telegraph up to 12 a.m. Friday, Oct. 26, 1906.)

Office of HARDWARE AND METAL,
Room 511, Union Bank Building,
Winnipeg, Man.

Advances in pressed spikes, copper rivets and wringers, are the only price changes worthy of special note this week. Business continues active in all general lines.

LANTERNS—Prices are firmly maintained at the following quotations: Cold blast, per dozen, $6.50; coppered cold blast, per dozen, $8.50; cold blast dash, per dozen, $8.50.

WIRE—We quote as follows: Barbed wire, 100 lbs., $2.90; plain galvanized, 6 to 8, $3.39; 10, $3.50; 12, $3.10; 13 $3.20; 14, $3.90; 15, $4.45; 16, $4.60; plain twist, $3; staples, $3.50; oiled annealed wire, 10, $2.96; 11, $3.02; 12, $3.10; 13, $3.20; 14, $3.30; 15, $3.45. Annealed wires (unoiled) 10c. less.

HORSESHOES — Quotations are as follows: Iron, No. 0 to No. 1, $4.65; No. 2 and larger, $4.40; snowshoes, No. 0 to No. 1, $4.90; No. 2 and larger, $4.65; steel, No. 0 to No. 1, $5; No. 2 and larger, $4.75.

HORSENAILS — Lists and discounts are quoted as follows: No. 10, 20c.; No. 9, 22c.; No. 8, 24c.; No. 7, 26c.; No. 6, 28c.; No. 5, 32c.; No. 4, 40c., per pound. Discounts are quoted as follows: "C" brand, 40, 10 and 7½ per cent., "M" brand and other brands, 55 and 60 per cent. Add 15c. per box.

WIRE NAILS—Steady at $2.60 per keg.

CUT NAILS—Quoted now at $2.70 per keg.

PRESSED SPIKES—Prices have been advanced and our quotations are now as follows: ¼ x 5 and 6, $4.75; 5-6 x 5, 6 and 7, $4.40; ⅜ x 6, 7 and 8, $4.25; 7-16 x 7 and 9, $4.15; ½ x 8, 9, 10 and 12, $4.05; ⅝ x 10 and 12, $3.90. All other lengths 25c. extra net.

SCREWS—Discounts are as follows: Flat head, iron, bright, 85 and 10 p.c.; round head, iron, 80 p.c.; flat head, brass, 75 and 10 p.c.; round head, brass 70 and 10 p.c.; coach, 70 p.c.

NUTS AND BOLTS — Discounts are unchanged and continue as follows: Bolts, carriage, ⅜ or smaller, 60 and 5; bolts, carriage, 7-16 and up, 55; bolts, machine, ⅜ and under, 55 and 5; bolts, machine, 7-16 and over, 55; bolts, tire, 65; bolt ends, 55; sleigh shoe bolts, 65 and 10; machine screws, 70; plough bolts, 55; square nuts, case lots, 3; square nuts, small lots, 2½; hex nuts, case lots, 3; hex nuts, smaller lots, 2½ p.c.

RIVETS—Copper rivets have been advanced and revised quotations will be noted below: Iron, discounts, 60 and 10 p.c.; copper, No. 8, 37c.; copper, No. 10, 40c.; copper, No. 12, 43c.

COIL CHAIN—Unchanged in price. We quote: 3-16 inch, $9.25; 5-16, $5.20; 7-16, $4.45; ⅜, $4.10; ¼, $7.20; ⅜, $1.60, ½, $4.30; ¾, $4.

SHOVELS—Discounts on spades and shovels continue 40 and 5 p.c.

HARVEST TOOLS — Discounts continue as before, 60 and 5 per cent.

AXE HANDLES—Quoted as follows: Turned, s.g. hickory, doz., $3.15; No. 1, $1.90; No. 2, $1.60; octagon, extra, $2.30; No. 1, $1.60.

AXES—The revised prices are as follows: Bench axes, 40; broad axes, 25 p.c. discount off list; Royal Oak, per dozen, $6.25; Maple Leaf, $8.25; Model, $8.50; Black Prince, $7.25; Black Diamond, $9.25; Standard flint edge, $8.75; Copper King, $8.25; Columbian, $9.50; handled axes, North Star, $7.75; Black Prince, $9.25; Standard flint edge, $10.75; Copper King, $11 per dozen.

BUTTS—The discount on wrought iron butts is 70 p.c.

CHURNS — The discounts from list continue as before: 45 and 5 per cent.; but the list has been advanced and is now as follows: No. 0, $9; No. 1, $9; No. 2, $10; No. 3, $11; No. 4, $13; No. 5, $16.

CHISELS—Quoted at 70 p.c. off list prices.

AUGER BITS—Discount on "Irwin" bits is 47½ per cent., and on other lines 70 per cent.

BLOCKS—Discount on steel blocks is 35 p.c. off list prices; on wood, 55 p.c.

FITTINGS—Discounts continue as follows: Wrought couplings, 60; nipples, 65 and 10; T's and elbows, 10; malleable bushings, 50; malleable unions, 55 p.c.

GRINDSTONES—As noted last week, the price is now 1½c. per lb., a decline of ¼c.

FORK HANDLES—The discount is 40 p.c. from list prices.

HINGES—The discount on light "T" and strap hinges is 65 p.c. off list prices.

HOOKS—Prices are quoted as follows: Brush hooks, heavy, per doz., $8.75; grass hooks, $1.70.

CLEVISES—Price is now 6½c. per lb.

STOVE PIPES—Quotations are as follows: 6-inch, per 100 feet length, $8.50; 7-inch, $9.25.

DRAW KNIVES—The discount is 70 per cent. from list prices.

RULES—Discount is 50 per cent.

WASHERS—On small quantities the discount is 35 p.c.; on full boxes it is 10 p.c.

WRINGERS — Prices have been advanced $2 per dozen, and quotations are now as follows: Royal Canadian, $35.00; B.B., $39.75, per dozen.

FILES—Discounts are quoted as follows: Arcade, 75; Black Diamond, 60; Nicholson's, 62½ p.c.

BUILDING PAPER — Prices are as follows: Plain, Joliette, 40c.; Cyclone, 55c.; Anchor, 55c.; pure fibre, 60c.; tarred, Joliette, 65c.; Cyclone, 80c.; Anchor, 65c.; pure fibre, 80c.

TINWARE, ETC.—Quoted as follows: Pressed, retinned, 70 and 10; pressed, plain, 75 and 2½; pieced, 30; japanned ware, 37½; enamelled ware, Famous, 50; Imperial, 50 and 10; Imperial, one coat, 60; Premier, 50; Colonial, 50 and 10; Royal, 60; Victoria, 45; white 15; Diamond, 50; Granite, 60 p.c.

CORDAGE—Manila rope is steady at the recent advance. We are still quoting as follows: Rope, sisal, 7-16 and larger, basis, $11.25; Manila, 7-16 and larger, basis, $16.25; Lathyarn, $11.25; cotton rope, per lb., 21c.

SOLDER—Quoted at 27c. per pound. Block tin is quoted at 45c. per pound.

VISES — Prices are quoted as follows: "Peter Wright," 30 to 34, 14½c.; 35 to 39, 14c.; 48 and larger, 13½c. per lb.

ANVILS—"Peter Wright" anvils are selling at 11c. per lb.

CROWBARS—Quoted now at 4c. per lb.

POWER HORSE CLIPPERS — The "1902" power horse clipper is selling at $12, and the "Twentieth Century" at $6. The "1904" sheep shearing machines are sold at $13.60.

AMMUNITION — Prices: Cartridges, Dominion R.F., 50 and 5; Dominion, C. F., pistol, 30; military, 20; American R. F., 33⅓; C. F., pistol, 5 p.c.; C. F., military, 10 p.c. advance. Loaded shells: Dominion Eley's and Kynoch's soft, 12 gauge, black, $16.50; chilled, 12 gauge, $17.50; soft, 10 gauge, $19.50; chilled, 10 gauge, $20.50. Shot, ordinary, per 100 lbs., $7.25; chilled, $7.75; powder, F.F., keg, Hamilton, $4.75; F.F.G., Dupont's, $5.

IRON AND STEEL—Prices are Bar iron (basis, $2.50; Swedish iron (basis), $4.75; sleigh shoe steel, $2.75; spring steel, $3.25; machinery steel, $3.50; tool steel, Black Diamond, 100 lbs., $9.50; Jessop, $13.

SHEET ZINC — The price is now $8.50 for cask lots, and $9 for broken lots.

PIG LEAD—The high price of $5.60 per cwt. is still firmly maintained.

AXLE GREASE—"Mica" axle grease is quoted at $2.75 per case, and "Diamond" at $1.60.

BLACK IRON PIPE—Quotations are: ¼ inch, $2.45; ⅜, $2.85; ½, $3.15; ¾, $4; 1, $5.75; 1¼, $7.85; 1½, $9.40; 2, $12.90.

LEAD PIPE—The price has been advanced to $7.80.

GALVANIZED IRON — Quotations are: Apollo, 16 gauge, $3.90; 18 and 20, $4.10; 22 and 24, $4.45; 26, $4.40; 28, $4.65; 30 gauge or 10¾ oz., $4.95; Queen's Head, 24, $4.65; 26, $4.65; 28, $4.90.

TIN PLATES—We now quote as follows: IC charcoal, 20 x 28, box, $9.50; IX charcoal, 20 x 28, $11.50; XXI charcoal, 20 x 28, $13.50.

TERNE PLATES—Quoted at $9.

CANADA PLATES—Prices have been steady since the recent decline. We quote: Canada plate, 18 x 21, 18 x 24, $3.15; 20 x 28, $3.40; full polished, $3.90.

BLACK SHEETS—Prices are: 10 to 16 gauge, 100 lbs., $3.50; 18 to 22, $3.75; 24, $3.90; 26, $4; 28, $4.10.

PETROLEUM AND GASOLINE — Prices are quoted as follows: Silver Star, per gal., 21c.; Sunlight, 22c.; Eocene, 24c.; Pennoline, 25c.; Crystal Spray, 24c.; Silver Light, 22c.; gasoline, 70-72 (engine), 25½c., in barrels, f.o.b. Winnipeg.

PAINTS, OILS AND TURPENTINE —Revised turpentine prices will be noted in quotations that follow. General business in paints and oils continues quite

active. We quote: White lead, pure, $7; bladder putty in bbls., 2½c.; in kegs, 3¾c.; turpentine, barrel lots, Winnipeg, 96c.; Calgary, $1.03; Lethbridge, $1.03; Edmonton, $1.04. Less than barrel lots 5c. per gallon advance. Linseed oil, raw, Winnipeg, 64c.; Calgary, 71c.; Lethbridge, 71c.; Edmonton, 72c.; boiled oil, 3c. per gallon advance on these prices.

WINDOW GLASS—We quote: 16-oz. O.G., single, in 50-ft. boxes—16 to 25 united inches, $2.25; 26 to 40, $2.40; 16-oz. O.G., single, in 100-ft. cases—16 to 25 united inches, $4; 26 to 40, $4.52; 41 to 50, $4.75; 50 to 60, $5.25; 61 to 70, $5.75. 21-oz. C.S., double, in 100-ft. cases—26 to 40 united inches, $7.35; 41 to 50, $8.40; 51 to 60, $9.45; 61 to 70, $10.50; 71 to 80, $11.55; 81 to 85, $12.60; 86 to 90, $14.75; 91 to 95, $17.30.

REPRESENTATIAE WANTED.

WANTED—An experienced man of education and good address, able to contract and promote work properly in architectural bronze-work. He must be able to deal with architects, contractors, and be thoroughly posted in all the business pertaining to obtaining orders and producing of the goods. A good salary will be paid such a man, and any correspondence will be treated confidential. Address, Box 564, HARDWARE AND METAL, Toronto. [43]

SUPERB EMPIRE

The Perfect Cooker

We draw the attention of the **Western Trade** to the Superb Empire Planished Steel Range. The oven door is not only braced but also spring balanced. A lever is attached to the front key-plate to raise it as desired, and contrived also to hold it up if necessary. The Superb throughout is substantial, its nickel dress alone making it a ready seller, besides, it is made by a Western stove factory for Western people only.

BRONZING SEASON

means bronze business, and the question you should ask yourself is: "Am I prepared to take care of this business?"

We have a large stock of Bronzing Materials—Gold, Aluminum and Colored Bronzes, Flitters, Metallics, Banana Oil, Gold Leaf Substitute, on which we would be pleased to quote you for immediate delivery.

THE WINNIPEG PAINT AND GLASS CO., LIMITED
Warehouses—CALGARY, EDMONTON ***WINNIPEG, CAN.***

Everything for the Painter

Wire Glass

This is the season of the year when buildings are being completed—Wire Glass will be needed for Skylights, Metal Frames, etc.

Wire Glass is now almost universally used instead of Rough Rolled Plate on account of the ultimate economy. It may crack but the wire mesh keeps it intact and just as serviceable as ever.

Wire Glass is practially indestructible.

Special prices in case lots—write for them. Samples furnished on request. You may have an enquiry any day, better be prepared.

G. F. STEPHENS & CO., Limited
WINNIPEG, CANADA

VARNISH FACTORY FIRE.

A rather serious fire occurred in the varnish factory of A. Ramsay & Son Co., Montreal, on Wednesday last, doing considerable damage to the melting room and the thinning room. Damage was also done to the pumping and filtering plants, as well as to some of the large oil storage tanks. Some of the employes engaged in the thinning room at the time were slightly hurt. The main large tank building, which stands apart from the factory proper, was entirely saved, as well as the gum storage house, which also stands apart. The fire brigade was well handled and close attention was paid to the tank building. Messrs. Ramsay & Son Co. inform us there will be no stoppage to business, the storage tanks being well supplied from which all varnishes will be drawn for orders as usual. As soon as the insurance is settled the work of rebuilding on a more extended and improved scale will commence.

STOVE ADVERTISING SUGGESTIONS.

Stove advertising is a class of publicity that well repays study. It is a good field for activity because there is a constant demand for stoves; but it is one thing to advertise and another to advertise in the most profitable way, says the Hardware Trade. Sometimes in preparing stove advertisements merchants overlook the salient points.

There are quite a number of illustrations employed that are next to useless. The poor quality of the illustration is itself sufficient reason for its rejection, but the drawback in many cases is the plan of illustrating, not the quality of the illustration. What is the object in illustrating a whole stove? Most people know what stoves look like without giving them pictures on paper reduced in size.

No merchant would now think of illustrating a spade in his advertisement, though there was a time when it was proper to do so. Spades are pretty much similar in design and pretty nearly uniform in dimensions, though there may be variations in quality. You cannot show the quality of wares by illustrations, that was never the intention. While stoves are approximately similar in size and style, there is a vast difference in interior constructions. These differences are what should be illustrated, not the doors and legs and lids, which, for all practical purposes, are the same to the buyer.

Some stoves have special attachments; illustrate these attachments. Other stoves have specially constructed ovens; illustrate these ovens. Other stoves, again, have fuel-saving grates; illustrate these grates, and so on. One thing illustrated, and illustrated well, with explanatory details lucid and complete, will have more selling force than a general illustration, which tells nothing, does nothing, but takes up space that has to be paid for.

Another point which merchants sometimes forget is that women (as a rule) not men, buy stoves. The argument which convinces a man will not necessarily convince a woman. A man, too, may drop into a store by chance and make a purchase. A woman generally plans the thing, figures it out to cents. It is obvious that advertisements to appeal to women must not only have facts, but facts that they can quickly revolve in their minds and quickly weigh. References to the names of the makers, general excellences, etc., are of secondary importance in these cases.

If it is a coal range that is being advertised emphasis should be placed on the two most important things, from a woman's standpoint — the oven, the grate. If it is a small gas stove, the number of burners, the space the stove occupies—everything in connection with these particular parts should be laid bare in clear, simple terms.

When it comes to the kitchen women are just as close buyers, and as cute as horsetraders. No merchant would think of trying to sell a horse on the ground of its being chestnut in color and having a good mane. The merchant would know that the chief points would be those concerning the horse's teeth and feet. What teeth and feet are in a horse deal, when a man who "knows" is buying, ovens and grates are in a stove deal when a woman who "knows" is buying.

ARCH. MACFARLANE,
Manufacturers' Agent, Montreal, who was married on Thursday.

ARCH. MACFARLANE MARRIED.

One of the most popular of Montreal's manufacturers' agents became a benedict on Thursday, when Arch. Macfarlane married Miss Jessie McMurtry, daughter of Mr. and Mrs. S. A. McMurtry, Tower avenue, and grand-daughter of the late Hon. A. W. Ogilvie.

The ceremony was performed by Rev. John McKay at Crescent street church, Montreal, and was largely attended by friends of the bride and groom, both of whom have been very popular in Montreal society.

On returning from their wedding trip Mr. and Mrs. Macfarlane will reside at Hampton Court. Hardware and Metal is only one of many who will wish them a happy and prosperous wedded life.

HON. W. J. STAIRS' WIDOW DIES.

Mrs. Stairs, widow of the late Hon. W. J. Stairs, ex-M.L.C. of Halifax, passed away last Friday in her eighty-fourth year, at Halifax. The daughter of the late John Morrow, she early married, having a large family. Her father was secretary of the Government Commission which first started railroad construction in Nova Scotia, building the Nova Scotian Railroad, which afterwards became the Intercolonial. The sons surviving are Messrs. Edward, managing director; and Gavin L., of Wm. Stairs, Son & Morrow; George, director of the Nova Scotia Steel Co., and manager of the Consumers' Cordage Co.; and James W., all at Halifax; and Herbert, of Hillston, N.S. A daughter, Mrs. (Rev.) A. J. Townend, of Southsea, Eng., also survives.

Mr. E. G. Stairs, of Toronto, is a grandson, another being Master John Stairs, student at Upper Canada College. Other relatives include Mrs. J. MacDonald Oxley; Mrs. R. C. Browne, and Mr. Arthur G. Troop, of Toronto, as well as John W. Stairs, of the Toronto Nut & Bolt Co. of Swansea.

SOURIS BUSINESS CHANGE

The stock and good will of the Souris Hardware Co., Souris, Man., has been bought by McLean & Stirling, and the business will be continued by the new firm at the old stand. Mr. McLean has carried a grip for ten years for the J. H. Ashdown Hardware Co. and consequently he has a wide circle of acquaintances among the western trade, who will be interested to know of his new move. Mr. Stirling is a Souris man and the new firm commences business with every prospect for success.

GILLETTE RAZORS IN CANADA.

An interesting addition to Canada's manufacturing industries, is the recent establishment on St. Antoine street, Montreal, of a plant to make Gillette safety razors for the trade of this country.

This move has been made in order to comply with the Canadian patent laws, as well as to avoid the duty, and the entire Dominion is now being supplied with razors "Made in Canada." These are made from a blue print standard, and are, in every respect, identical with the goods manufactured in the firm's Boston factory, both as to design, workmanship and quality.

At present, the capacity of the Canadian plant is decidedly limited, as compared with the home factory, and larger premises are being sought. Even so, an average daily output of 235 sets and 4,000 blades is being maintained. The demand is rapidly increasing and the contemplated enlargements will be necessary.

The process by which Gillette safety razors are made is a most interesting one. All the work, in order to ensure perfect precision, is mechanical, so that very blade and every handle is treated in exactly the same manner. It will be seen that, especially in tempering the steel blades, the utmost care must be

exercised, and, if this were entrusted to ever so skillful a workman, there would beyond doubt, be a large percentage of them imperfectly tempered. Consequently, this process is carried out by a most ingeniously constructed machine which mechanically times the blades in tempering, and produces a uniform quality. As nearly all the machines are of special design, it has been found necessary to manufacture them in the Boston factory of the firm.

The raw material from which the blades are manufactured comes in the form of thin steel bands, from England, Sweden, or the United States. From these bands the blades are stamped and cut by a special machine. At this stage they are quite soft and can be bent double without breaking. They are next taken to the tempering machine, where they are picked up one by one, sent through the various processes of tempering as described above. When the blades drop from this machine they are very brittle, and their broken edges will scratch glass. They next go to the annealing oven, after which they are polished in revolving cylinders. They are now ready for the sharpening operation which is carried out on two machines. The first of these gives an edge similar to that of the ordinary pocket knife, while the second puts on the razor edge. Both are composed of a number of small rollers to which a composition resembling emery powder is applied, and which revolve alternately to right and left, to sharpen both edges of the blades. These latter are held against the rollers by a special arrangement which shifts when the direction of the rollers is changed. So far as possible, this process gives the same effect as stropping by hand. Both the machines are mechanically timed, so that, throughout the entire process, the blades are all treated exactly alike. They now go to the inspectors who test each individual blade on human hair, examining a considerable percentage through a microscope. Those which pass the inspectors (and in the Canadian factory they amount to 92 per cent. of the whole) are then wrapped and sealed.

The handles are made of brass in three pieces and go through many stages before they are ready to be put on the market. The most interesting process is that by which the teeth are sawed in one of the pieces. The machine which does this work was also manufactured in the Boston works, and is so constructed that both sides of the handle are filed simultaneously, and the brass filings dropped, without touching any oil, into convenient receptacles.

At present, the electro-plating of these handles is let to another firm, but arrangements are now being made for taking up this part of the work as well in the Montreal factory.

The Canadian manager, A. A. Bittues, was also instrumental in establishing a branch factory in London, Eng., last Winter. He reports that both these new plants are doing remarkably well, being hard put to supply the demand.

THE "HAYES" PATENT STEEL LATH

NO CRACKED WALLS

NO FALLING PLASTER

Everybody knows that Metallic Lathing is better than wood

Most people know—do you? That of all Metallic Lathing, "HAYES" PATENT gives best results. It requires less mortar, can be applied more quickly and easily, and has greater rigidity than others.

It holds the mortar firmly, is fire, water and vermin-proof, and gives enduring satisfaction. These are some of the reasons why practical builders everywhere commend it.

Let us give you further information. Actual tests and comparisons have proved all these claims.

FOUNDRY AND METAL INDUSTRIES

Work on the new premises of the Dominion Pipe Co., in New Westminster, B.C., has commenced.

Welland has passed a by-law furnishing sites and sewerage to the Canada Forge Co. and the Supreme Heating Co.

The new shops of the Perth Bolt & Forging Co., Limited, Perth, Ont., are rapidly being completed. And the company hopes to be running in December.

The Smith's Falls Malleable Castings Co., of which W. H. Frost is the head, has purchased the Rideau Malleable & Foundry Co., and the two concerns will be amalgamated.

Commissioner of Industries Thompson has been successful in securing another industry for Toronto. The United Zinc Co., of Boston, will establish works on Adelaide street, near York street, and will employ about twenty men.

Work is now progressing on the establishment of a large plant for the treatment of ores mined at the Bogart pyrite property near Tweed. Sixty men are now at work and the number will be increased to 200 shortly. A C.P.R. siding is being constructed to the mine.

The Canada Foundry Co., of Toronto, has been awarded a large portion of a 20,000-ton contract for structural steel by the C.P.R. The steel is for bridges in Ontario. The Dominion Bridge Co. also secured a part of the contract. The Canada Foundry Co. bested bids of a number of large American companies.

The Canada Forge Co. have begun the construction of their buildings at Welland, the contractors being the Welland Construction Co., who also have the construction for the buildings for the Ontario Iron & Steel Co., having been working on them for some time. The Forge Co. will construct two buildings about 50 x 100 feet each, to be completed by November 15; other buildings will be added. They will begin manufacturing early in January. Electrical power will be installed at once, using about 75 horsepower. The capital of the company is $100,000.

How do your paint sales this year compare with those of last year?

PROFIT is what you are looking for in your paint business. If your business does not grow profits do not grow. It does not pay you to handle paints or any other lines without a comfortable margin of gain.

The growth and the profits of your paint business depend on two things—the line you carry and the way it is pushed. Unless you have the right goods and unless they are brought to the attention of the buying public in the right way, you will have little to put down on the profit side of your ledger.

The Sherwin-Williams Line of Paints and Varnishes is the line for you and the line for any dealer who wants the best trade and the best profits. It is a line that includes the highest standard products for every painting and varnishing purpose. The goods are known the world over for quality, service and satisfaction. The Sherwin-Williams Co., too, puts all the advertising resources of its organization behind its agent and helps him build up a trade that is permanent and profitable. There is no question about the increase of his paint business year by year with such a line and such assistance.

Look over your business for the past year and your prospects for the coming one—then write for our proposition. You will want to know more about it.

Paint, Oil and Brush Trades

THE MODERN PAINT FACTORY.

The twentieth century paint factory is a highly specialized and wondrously diversified institution—in fact, it might be regarded as a dozen or more manufacturing plants, a storage warehouse and half a dozen financial, literary and mercantile institutions under one management, rather than as a single institution, says a contemporary.

At the very heart of the establishment rules the industrial chemist, whose work in analyzing, comparing and testing supplies and trying formulae by chemical and physical tests, like Tennyson's brook, "goes on for ever." Speaking in terms of modern slang, the "whole proposition" is "up to him." It is for him to know, on the one hand, whether this or that oxide, chrome or what not, is stronger and more economical to use than another, and on the other hand to determine what effect exposure to the elements, water, acids, alkalies, gases, etc., will have upon the finished products of his house. He must also know the composition and character of competing products and their behavior under service conditions in comparison with similar products of his own house. Thus the testing department of a large paint factory is far more extensive and more thoroughly equipped for chemical and physical analysis and test than the laboratory of a commercial chemist.

The Manufacturing Department.

The paint-making plant proper is rather a series of factories than a single factory. Each division of the industry has its own department and equipment, and often its special building. One complete outfit of tanks, dry mills, mixers, paint mills and canning devices is devoted to the mixed paint department; another to paste paints; a third to carriage and wagon colors, a fourth to enamels, etc.; while these separate outfits are supplemented by separate special equipments, such as putty chasers, lead mills, etc.

The packing and shipping departments are subject to similar specialization, and in a number of plants this is supplemented by a tin can factory and a box factory. Some large factories have also linseed oil mills and color-making plants in conjunction with them, while others include varnish factories.

The printing and advertising department of the modern paint factory has the equipment and diversification of an up-to-date commercial printing establishment, with the addition of a number of special devices, such as the color-card machines, which paint, cut and attach the little sample squares on the family mixed paint color sheet.

The Selling End.

The sales department, which commonly has supervision of the printing and advertising departments, is as carefully organized as an army, and in a properly regulated establishment it is possible at any moment to ascertain from automatically duplicated records the location of any salesman, his sales for any day, month, or year, their comparison with previous corresponding periods, gross and net profits, expenses, percentage of expenses to profits—in fact, all possible particulars regarding the salesman and his work. Complaints regarding goods are handled in the same systematic manner, those that can be adjusted by correspondence being referred to the proper department; those which can be handled by the salesman being referred to him, while those which require expert investigation on the spot are referred to traveling specialists, who, like the reserves of an army in action, are held in readiness to throw their support to any part of the line. Every member of this flying battalion could, if he wished, tell stories of human mendacity, perversity and stupidity that would cause David to repeat deliberately the remark which he made in his haste. But in case of doubt the paint manufacturer, even if he knows himself to be clear of blame, always "makes good"; it is part of the expense incidental to the maintenance of the value of his "goodwill."

When we realize that paint must be made to suit every variety of climate with the utmost possible diversity of building material and service, and that in all these climates and conditions paint is used for purposes of decoration and preservation, it is not remarkable that the composition of paints should vary greatly, nor that one brand of paint should find preference over another in a given locality. The remarkable aspect of the whole subject is that so many brands of paint should find such general favor. As a matter of fact, manufacturers generally do recognize these conditions and vary their formulae accordingly; whereas the ordinary painter has a traditional routine, derived originally from English and German practice, to which he closely adheres if he is honest, and from which he deviates only to the detriment of his patron.

Quantity of Raw Materials Used.

Paint making in the United States is one of the most highly specialized and organized of modern industries. For its raw materials it draws upon the mine, the chemical laboratory, the field and the forest. Of the 20,000,000 to 30,000,-

(Continued on page 48.)

NO WONDER

there has been such an increase in ELASTILITE VARNISH sales. Nothing remarkable about it though when you consider the quality of the varnish at such a reasonable price.

In tins only from ½ pints to 1 gallons. For outside or inside. "Wears on the job, not off it."

Paint and Oil Markets

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, October 26, 1906.

Conditions in the paint and oil trade are still very buoyant, and manufacturers seem to their utmost capacity to keep pace with specifications.

No single item can be picked out as being more strongly in demand than the rest, as the situation in general is a very favorable one. In fact, so keen is the inquiry for all classes of paints, colors and varnishes, that makers have great difficulty in keeping up their supplies of raw material, especially in view of advancing markets, both at home and elsewhere.

The nominal prices for red lead have, for some time past, been subject to occasional cutting. During this week, however, the market has firmed up to a considerable extent, and some firms announce an advance of 25c. On the whole it will be found that the old nominal quotations are the ones which will now be strictly adhered to. The same remarks apply to dry white lead and litharge.

LINSEED OIL—The market remains firm and steady. We quote as follows: Raw, 1 to 4 barrels, 52c.; 5 to 9 barrels, 51c.; boiled, 1 to 4 barrels, 55c.; 5 to 9 barrels, 54c.

TURPENTINE — Another jump has brought prices very close to last year's level. We quote: Single barrel, 95c. per gal.; two barrels or over, 94c. per gal.; for smaller quantities than barrels, 5c. extra per gal. is charged. Standard gallon is 8.40 lbs., f.o.b. point of shipment, net 30 days.

GROUND WHITE LEAD—We quote: Best brand Government standards, $6.50 to $6.75; No. 1, $6.15 to $6.40; No. 2, $5.80 to $6.15; No. 3, $5.55 to $5.80, all f.o.b. Montreal.

DRY WHITE ZINC—An advance has taken place and we are quoting as follows: V.M. Red seal, 7½c. to 8c. Red seal, 7c. to 8c.; French V.M., 6c. to 7c.; Lehigh, 5c. to 6c.

WHITE ZINC (ground in oil) — We quote: Pure, 8c. to 9c.; No. 1, 6½c. to 7½c.; No. 2, 5¼c. to 6¼c.

PUTTY—A great demand exists for this product. We quote prices: Pure linseed oil, $1.75 to $1.85; bulk in barrels, $1.50; in 25-lb. irons, $1.80; in tins, $1.90; bladder putty in barrels, $1.75.

ORANGE MINERAL—We quote as follows: Casks, 8c.; 100-lb. kegs, 8½c.

RED LEAD—Decidedly firmer conditions now prevail. Some dealers have marked up their prices, but for the most part the following are obtainable: Genuine red lead in casks, $6; in 100-lb. kegs, $6.25; in less quantities at the rate of $7 per 100 lbs.; No. 1 red lead, casks, $5.75; kegs $6, and smaller quantities, $6.75.

GUM SHELLAC — This week's quotations still remain as follows: Fine are constantly advancing, but Canadian jobbers quote the following prices: Fine orange, 60c. per lb.; med. orange, 55c. per lb.; bleached shellac (white) 65c. per lb.

SHELLAC VARNISH—Firm conditions continue, and there will no doubt be an advance before long. Meanwhile we quote: Pure white, $2.90 to $2.95; pure orange, $2.70 to $2.75; No. 1 orange, $2.50 to $2.55.

MIXED PAINTS—Prices range from $1.20 to $1.40 per gallon.

CASTOR OIL—We still quote as follows: Firsts in cases, 8½c.; in barrels, 8c.; seconds in cases, 8c.; in barrels, 7½c.

REFINED PETROLEUM — We quote as follows: American water white, 17c.; Canadian prime white, 15½c.; astral, 20c., ex warehouse.

GASOLINE—The ruling quotation at present is 24c. in bbls.

BENZINE—There is nothing new this week and we are still quoting 20¼c. in barrels.

WINDOW GLASS — The market is somewhat weak, but the following quotations are fairly well maintained: First break, 50 feet, $1.85; second break, 50 feet, $1.95; first break, 100 feet, $3.20; second break, 100 feet, $3.40; third break, 100 feet, $3.95; fourth break, 100 feet, $4.15; fifth break, 100 feet, $4.40; sixth break, 100 feet, $4.95. Diamond Star: First break, 50 feet, $2.30; second break, 50 feet, $2.50; first break, 100 feet, $4.40; second break, $4.80; third break, 100 feet, $5.75; fourth break, 100 feet, $6.50; fifth break, 100 feet, $7.50; sixth break, 100 feet, $7.50; seventh break, 100 feet, $8; eighth break, 100 feet, $9. Double Diamond: First break, 50 feet, $3.45; second break, 50 feet, $3.75; first break, 100 feet, $6.75; second break, 100 feet, $7.25; third break, 100 feet, $8.75; fourth break, 100 feet, $10; fifth break, 100 feet, $11.50; sixth break, 100 feet, $12.50; seventh break, 100 feet, $14; eighth break, 100 feet, $16.50; ninth break, 100 feet, $18; tenth break, 100 feet, $20; eleventh break, 100 feet, $24; twelfth break, 100 feet, $28.50. Discount on Diamond Star, 20 per cent.; on Double Diamond, 40 per cent.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto, October 26, 1906.

Turpentine has scored the only advance of the week, the rise amounting to two cents, and bringing quotations up to 97c. per gallon, with very little more to climb before the dollar mark is reached. This is early in the season for prices to be so high, as new stocks cannot be marketed before May of next

year. Reports from the south say the current crop is being readily absorbed at fair values, consumers having adjusted themselves to natural conditions. It is argued that prices are legitimately much dearer than in former years, the natural outcome of the fact that, while the world is growing and trade always enlarging, the crop of naval stores remains always and of necessity of unchanged dimensions. Weather conditions this season have been unusually adverse, heavy rains having prevailed throughout the pine belt almost continuously during the Spring and early Summer, the period of greatest production.

Linseed oil is held firm and prices are likely to stiffen during the Winter. Seed is selling well in England, and although prices should be at their lowest just now expected shortages are keeping them stiff.

White lead has not advanced again, but as there is a scarcity of pig lead and prices are keeping near record figures there is every indication of another upward move. In fact, one large buyer on Wednesday said: "Lead is going to be $7 per hundred in the very near future."

Paint manufacturers consider the situation to be a critical one at present. With white lead two cents higher than a year ago, zinc a cent higher, turpentine up in the nineties, and linseed oil holding quite stiff, they see heavy increases in manufacturing costs, and are not anxious to book orders for nest season unless market conditions change. Dealers will make no mistake, however, in placing orders early as we can safely predict material advances in prices on white lead and mixed paints before New Year, and possibly considerably sooner.

Manufacturers have had a very busy season following the heavy bookings of white lead on account of the imposition of the 35 per cent. duty a year ago. In the light of past events and present conditions, it appears that the establishment of such a high duty was hardly necessary.

WHITE LEAD — Ex Toronto, pure white, $6.55; No. 1, $6.17½; No. 2, $5.80; No. 3, $5.55; No. 4, $5.30 in packages of 25 pounds and upwards; 1-2c. per pound extra will be charged for 12 1-2 pound packages; genuine dry white lead in casks, $5.40.

RED LEAD—Genuine in casks of 500 lbs., $6.00; ditto, in kegs of 100 lbs., $6.25; No. 1 in casks of 500 lbs., $5.75; ditto, in kegs of 100 lbs., $6.

DRY WHITE ZINC— In casks, 7 1-2c.; in 100 lbs., 8c., No. 1, in casks 6 1-2c., in 100 lbs., 7c.

WHITE ZINC (ground in oil)—In 25-lb. irons, 8c.; in 12 1-2 lbs., 8 1-2c.

SHINGLE STAIN—In 5-gallon lots, 75c. to 80c. per gallon.

PARIS WHITE—90c. in barrels to $1.25 per 100 lbs.

WHITING—60c. per 100 lbs. in barrels; Gilders' bolted whiting, 90c. in barrels, $1.15 in smaller quantities.

SHELLAC VARNISH—Pure orange in barrels, $2.70; white, $2.82 1-2 per barrel; No. 1 (orange) $2.50.

LINSEED OIL—Our quotations are: Raw, 1 to 4 barrels, 54c.; 5 to 9 barrels, 53c.; boiled, 1 to 4 barrels, 57c.; 5 to 9 barrels, 56c. Toronto, Hamilton, London and Guelph; net 30 days. Advance of 2c. for delivery to outside points.

TURPENTINE—Single barrels, 97c.; 2 to 4 barrels, 96c.; f.o.b. point of shipment, net 30 days. Less than barrels, $1.02 per gallon.

GLUES—French Medal, 12 1-2c. per pound; domestic sheet, 10 1-2c. per lb.

PUTTY—Ordinary, 800 casks, $1.50; 100 drums, $ 1.75; barrels or bladders, $1.75; 100-lb. cases, $1.90;; 25-lb. irons, $1.85; 25-lb. tins (4 to case) $1.90; 12 ½ lb. tins (8 to case) $2.10.

LIQUID PAINTS—Pure, $1.20 to $1.35 per gallon; No. 1, $1.10 per gallon.

BARN PAINTS—70c. to 80c. per gallon.

BRIDGE PAINTS—75c. to $1 per gallon.

CASTOR OIL—English, in cases, 9 1-2c. to 10c. per lb., and 11c. for single tins.

REFINED PETROLEUM — Dealers are stocking up heavily for the Winter. We still quote: Canadian prime white, 14c.; water white, 16c.; American water white, 16c. to 18c. ex warehouse.

CRUDE PETROLEUM — We quote: Canadian, $1.32; Pennsylvania, $1.58; Ohio, 96c.

THE MODERN PAINT FACTORY.

(Continued from page 44.)

000 bushels of flaxseed grown annually by Northwestern farmers, it accounts for a very liberal half; of the 300,000 to 500,000 barrels of turpentine drawn annually from the southern pine forests, it consumes at least a quarter; it accounts for at least a quarter of the 320,000 to 325,000 tons of pig lead annually turned out by the large production of zinc ore, besides vast quantities of iron ores and special products of factory and furnace.

No other country in the world approaches the United States in the magnitude either of its paint consumption or of its paint factories. Our people have learned, in the practical American way, that the best way to preserve and beautify a structure is to paint it, and that the paint factory is a cheaper source of supply than the lumber yard or the planing mill; consequently those who have learned this lesson paint early and often, and where the painter does not interfere they go to the paint factory for their supplies. Everything considered, they are well and economically served, and cannot go far wrong if they look to the reputation of the manufacturer rather than to half-digested theories of the subject for their guidance.

MR. JOBBER:
BUY DOMINION AMMUNITION

1907 will witness the greatest demand for DOMINION SHOT, SHELLS and CARTRIDGES that you have ever experienced.

Don't make the mistake of stocking imported shells, for you will find them harder to sell in the future than the past.

THE DOMINION CARTRIDGE CO. are creating a demand for their product among dealers and consumers—a demand that is built on the strongest foundation — quality, advertising, satisfaction and a natural preference for Canadian-made products.

Consider our NEW proposition before closing with outside manufacturers.

BUILDING AND INDUSTRIAL NEWS

HARDWARE AND METAL would be pleased to receive from any authoritative source building and industrial news of any sort, the formation or incorporation of companies, establishment or enlargement of mills, factories, foundries or other works, railway or mining news. All correspondence will be treated as confidential when desired.

Portage La Prairie will endeavor to secure electrical power from Winnipeg.

The Moose Mountain Lumber & Hardware Co. are erecting new premises in Kisbey, Sask.

The Montreal Street Railway is considering an increase in its capital from $7,000,000 to $9,000,000.

The Oliver Motor Car Company, recently formed to manufacture the Oliver trackless car, has located in Sarnia.

Messrs. Mason, Sturgeon and Davidson of Peterboro, have purchased land in Hastings, Ont., on which to erect a radiator factory.

The Shipway Iron, Bell & Wire Manufacturing Co. will shortly make application for a charter, and will establish works in Niagara Falls.

Port Colborne has carried a by-law granting exemption from taxes to the Great Lakes Portland Cement Co. and the Canadian Portland Cement Co.

The Ideal Cylinder Snow Plough Company has been incorporated by the Ontario Government. The capital of the company is $100,000, and the head office will be in Toronto.

The Roxton Mill & Chair Manufacturing Co., Roxton Falls, Que., has dissolved. J. H. Poirier, J. A. Beaudry, Louis Plouffe and Alfred Langevin have taken over the business.

Extensions amounting to $175,000 to the plant of the American Locomotive & Machine Co., at Longue Pointe, Que., will add 500 men to the works, and will give a capacity of five locomotives per week.

For the first time since the commencement of the decline of the bicycle business, the annual report of the Canada Cycle & Motor Company shows an increase in sales over those of the previous year.

The International Portland Cement Co., of Hull, will double its present plant in that city, giving it a capacity of 4,000 barrels daily. They are also completing a mill in Exshaw, Alta., which will make their total daily output 6,500 barrels.

The large increase in the business of David Spencer's departmental store, Victoria, B.C., has necessitated the purchase of enlarged premises, and the Williams block in that city is being remodelled, at a cost of $15,000, to add to the old warehouse.

Whalen & Boweman, who have signed an agreement with the Town of Fort William to build a $50,000 dry dock and ship-repairing yard, are said to be contemplating the establishment there of a $250,000 ship-building plant instead of merely carrying out their first intention.

The annual statement of the Lake Superior Corporation for the year ending June 30, 1906, shows that the company has during that time earned 1 per cent. on its total capital of $40,000,000, which is considered to be a very favorable report when compared with previous years.

Fifteen years ago Portland cement was almost entirely imported from Great Britain and the continent, but during that period the development of the manufacture in Canada has been such that fears of over-production have arisen. This week an inquiry was received at the Ontario Bureau of Mines from Glasgow, Scotland, as to whether Portland cement can be obtained here. The price mentioned, however, of 30 shillings a ton, or about $1.25 per barrel, is only about half the ruling price here.

Four new industrial concerns propose to locate in Goderich shortly, if their propositions receive the approval of the ratepayers. Two will not be voted on at present, but the most important, perhaps, that of the Goderich Wheel Rigs Co., will come up at once, the by-law being published in the local papers this week. Some of the important features are that the authorized capital of the concern will be $250,000, that they will employ by the end of a year at least one hundred hands, and that this is to be the sole Canadian factory of the concern, and a duplicate of the parent plant, the Lloyd Manufacturing Co., Minneapolis, Minn. The goods manufactured will be baby carriages, express wagons, rattan goods — in fact everything of that nature, practically the only manufacturers of these in Canada at present being the Gendron Co., Toronto. They ask the municipality for a loan of $50,000 repayable in twenty equal annual payments, without interest, and the usual privileges.

BUILDING NOTES.

Haileybury is building a $10,000 club house.

A new hotel is being built in Virden, Man., by James Huston.

Hattie Bros. are erecting a carriage factory at Stellerton, N.S.

A rink will be built at Stettler, Sask., at a cost of $3,500.

Mrs. Winter is erecting a $45,000 hotel on Water street, Vancouver.

C. C. Delbridge will erect a four-storey hotel in Kenora, Ont.

The Moose Jaw Carriage Works Co. is erecting premises in Moose Jaw.

The new Queen's Avenue Presbyterian Church, Edmonton, will cost $4,000.

The British Columbia Market Co. is erecting a $25,000 building in Vancouver.

A large Summer hotel for Sarnia is projected by J. R. Mann, of Dayton, Ohio.

Winnipeg's building permits for 1906, up to October 16th, amounted to $11,366,700.

The total amount of tenders accepted for the new public library, Toronto, is $237,216.

The Nena street Baptist congregation, Winnipeg, will erect a new church, to cost $30,000.

W. A. Noble is building a brick house on Delaware avenue, Hamilton, at a cost of $3,600.

The Town of Notre Dame de Grace, Que., has decided to erect a town hall, fire station, etc.

A new Industrial School to be erected near Cranbrook will cost between $30,000 and $40,000.

Galt's new collegiate institute will cost $75,000—$10,000 more than the ratepayers voted.

Pither & Leiser will erect a five-storey brick block in Victoria. Tenders are now being asked for.

The Royal Alexandra Theatre, now under construction in Toronto, will cost $150,000 when completed.

B. F. Ackerman & Son, Peterboro, are building a three-storey addition, 50 x 40 feet, to their harness factory.

Geo. Bruce has the contract for W. McC. Symington's new residence in Sarnia. The house will cost $3,500.

The Canadian Pacific Railway will erect a skyscraper on the northwest corner of King and James streets, Hamilton.

The contract for building the Melfort (Sask.) Hospital, which will cost in the neighborhood of $4,000, has been let to Sidney Smart.

Work has commenced on Ryan & Co.'s Calgary warehouse; it will cost $20,000. The enlargement of the Lincham Block has also begun.

The Waterloo County Country Club has awarded the contract for the erection of their new club house, near Galt, at a cost of $8,000.

Eugene La Horse, of Port Arthur, has purchased land in Strathcona, and intends erecting there a forty-room brick hotel in the Spring.

Toronto's building permits up to October 23 represent a value of $11,000,000. The total for twelve months last year amounted to $10,337,000.

The Bank of Nova Scotia has purchased the corner of Portage avenue and Garry street, opposite the Free Press, Winnipeg, for $125,000, and will erect a $200,000 office building.

It is reported that a Buffalo capitalist is behind a project to erect a 200-room hotel in London. The plans are said to call for a seven-storey building on the most modern lines, to cost $100,000.

Stratford's new Normal School will have three floors and basement, and will contain 36 rooms, besides a gymnasium and manual training department. The building is to be completed before September, 1907.

Tenders for the erection of Normal School buildings at Stratford, Peterboro and North Bay, are considered too high, and new tenders will be asked for. Pither & Leiser will erect a five-storey erecting a $25,000 building in Vancouver

The Chronicle Publishing Co. and the Bank of Commerce are erecting buildings in Halifax at a cost of $40,000 and $100,000, respectively. School buildings and alterations amount to $41,325; S. A. Hiseler is erecting a new house, to cost $3,500, and the Knights of Columbus are adding a storey to their hall, at a cost of $3,000.

Paroid Roofing Will Make Money for You

READ THIS:

Thousands of dealers all over Canada and the United States are making with Paroid one of their most profitable lines. If you are not selling Paroid it will pay you to get our proposition.

Why Paroid is the Best Ready Roofing Made

Paroid is the best quality of ready roofing made. Railroads, manufacturers and farmers all over Canada and the United States are using it in place of shingles, tin, iron and other kinds of roofings, because it lasts longer and costs less.

We make Paroid from start to finish—we make our felt—the most important part of the roofing, while other manufacturers buy their felt where they can get it cheapest. That's the principle reason why Paroid lasts longest. We could not stand back of Paroid if we did not make the felt.

Paroid is soaked and coated with a thicker, smoother, more pliable and durable coating than is on other ready roofings. Send for samples of Paroid and compare it with other kinds. You can see and feel the difference.

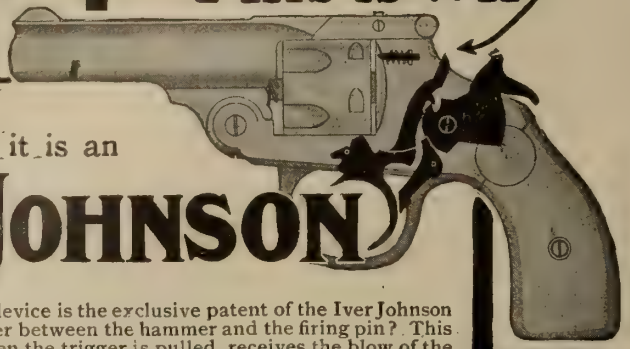
Paroid is applied with the **only** anti rust-proof cap made. It insures a tight roof. Other roofs often fail because the cap rusts out. Paroid will not crack and break in cold weather. It is adapted for all kinds of buildings and will outlast other ready roofings.

How We Help You

Our advertising plan has doubled the sales of our dealers this year. It helps to sell their other lines, too.

Send for our proposition and we will mail advertising matter and samples to every likely user of roofing in your town. It will not cost you a cent and can't help bringing you orders. We'll send you all the electrotypes and special things you can use. We'll write letters to prospective customers and send our salesman to help you land orders. Write, telegraph or telephone at our expense at any time.

The Fall is the best season of the year to sell roofing. Can you afford not to sell Paroid?



It won't cost you a cent to try out our proposition and we stand back of every roll of Paroid you sell.

Sign your name to a postal to-day and we'll send you full particulars and samples.

VENTILATION OF A MODERN GROCERY STORE

By M. J. Quinn, Ventilating Engineer with Cluff Brothers, Toronto.

There is no class of tradesmen whose success to such a large extent depends upon the absolute cleanliness of their premises as the grocer and the butcher, and at the same time there are perhaps none who, at different periods of the year, experience greater difficulty in maintaining the desired sanitary conditions. In Summer time, as a rule, the question of ventilation is not a serious one, because the windows and doors are left open, and in consequence with reasonable precaution there is little danger of air pollution.

In Winter time, however, conditions are altered, and while there is not likely to be as much decomposition of animal and vegetable matter as during the Summer, still such decomposition is always taking place and will in a short time charge the air with the results, which are of both a gaseous and organic nature.

Even though the odors in a shop are not the result of decaying matter, but are simply—as in the case of a grocery store—the blending together of the butter, soap, onions, etc., they are sometimes offensive, and, everything else being equal, the store in which these combinations are reduced to a minimum will receive the greatest amount of and the most excellent patronage.

It is commonly supposed that, except with the use of an expensive mechanical plant, it is impossible to accomplish any definite results in the matter of ventilation, and for that reason few attempts have been made along that line.

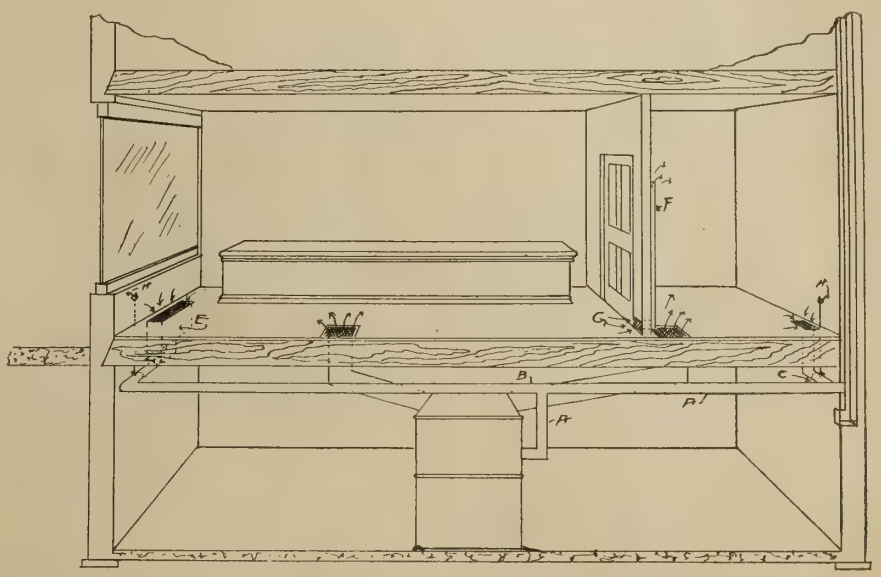
Fire and Ventilation.

It is true that where a building or a room is filled with people who are constantly vitiating large volumes of air that no satisfactory results can be obtained except through the medium of a mechanical system which includes a fan, with the necessary motive power, but in the case of a store it is entirely another question, and in most cases very satisfactory results may be obtained by the expenditure of very little money and the exercise of a little common sense (which perhaps is not as common as it is supposed to be) and a good judgment.

Has it ever occurred to you that wherever there is a fire lit in a building there is a splendid means of providing a large amount of ventilation providing, as was said, good judgment is used and the proper appliances are provided?

Let us take, for example, the case of a store heated by a hot air furnace connected to a chimney 12 inches square and 35 feet high. Under such conditions with a very moderate fire the movement of gases in the chimney would average at least seven feet per second and would perhaps exceed that velocity considerably, depending upon local conditions. However, at the figure named the quantity of air or gas passing up the chimney every hour would be 25,200 cubic feet. Now, in most cases, where does that air come from? Most likely through badly fitting cellar windows and doors, perhaps broken panes of glass, and very seldom indeed from a place where it might be drawn with advantage to the storekeeper.

The Illustration.



The sketch shown is intended to indicate one way of the many in which this condition of affairs may be remedied and some definite results obtained in the matter of ventilation. It will be seen that the building consists of a front shop and a rear storeroom (though of course the idea would work out in the same way in any size building) and a basement. The furnace, which in this case is hot air, is placed as near the centre as possible, and a hot air register is placed in each room (the cold air inlet to the furnace, which may be taken from within the building or from outside, is not shown).

The smoke pipe (A A) connects with the chimney at the rear of the building. Into this smoke pipe are run two connections (E) and (C), both fitted with a tight damper from which chains (H H) are run up through the floor and fastened on hooks.

Now, ordinarily, there is a flap damper in a furnace smoke pipe, which when opened allows the chimney to draw the air directly from the cellar, instead of through the fire, thereby checking the latter. In this case such flap damper is omitted, and the openings to cellar made as tight as possible.

Moving Cold Air.

Assume now that the fire is in condition to check; instead of opening a flap damper in the cellar we would simply pull one or both of the chains marked

(H), thereby opening the direct connections from the floor of the store above into the smoke pipe, and consequently into the chimney, and we at once set up a current from the coldest portion of the store, viz., the outside walls, which will remove cold foul air at the rate of perhaps 25,000 cubic feet per hour, which in most cases will provide ventilation sufficient to produce practically ideal conditions in a store.

It often happens that heat is neither required nor desired in the storeroom, while ventilation is most necessary. In such a case we would omit the hot air register indicated in the storeroom, and allow the cold air from the floor of the shop to pass in at (G) and up through pipe (F), and out through ventilating

register in opposite side of the room. It is desirable that the incoming air should be compelled to rise, for otherwise it might be drawn across the floor directly to the outlet without changing the air in the upper portion of the room at all.

Of course this system can be greatly modified to suit various circumstances. For instance, the space between two joists may be converted into a duct by nailing paper and boards across the bottom to make it tight and connecting same to smoke pipe at nearest point with a tin or galvanized iron sleeve.

Then again, a foul air pipe fitted with a tight damper may be taken from a cold spot in the shop and enter the under side of the ash pan so that all air passing through the coal or wood will be taken from some place where its removal will accomplish the most good.

The sketch, however, indicates a principle which the individual can, in most cases, work out to produce results at a very small cost.

HOT AIR HEATING FADS AND FALLACIES

Address delivered by R. S. Thompson, before the American Society of Heating and Ventilating Engineers, Chicago, Ill. (Concluded from last Issue).

This accounts for the fact that you will often find two men, using the same make of furnace, one of whom will declare it is the best in the world and the other is equally sure it is the worst. One is giving the furnace credit that belongs to the engineer; the other is placing on it blame which is due to the engineer.

It is a fallacy to suppose that leader pipes in the basement must have an inclination or "pitch" of one inch to the foot in order that the hot air may flow through them.

The ascensional force of hot air (if I may be allowed to coin a word) depends on the difference in elevation between the starting point and point of delivery. It will make no difference whether the air is carried six feet perpendicularly and twelve feet horizontally, or five feet perpendicularly and twelve feet at an inclination of one inch to the foot. What you gain in the pitch you lose in the riser. If I had to take my pipes off the side of the casing I would carry the casing up to within a few inches of the joists and carry the pipes horizontally under the joists. I would get the same total elevation by this plan as with a low casing and pipes inclined, but the elevation in the casing would be more efficient than in the pipes, because freer from friction.

But in practice I always use a flat-topped casing and take the pipes off the top because in this way I can make straight lines from furnace to register boxes and foot pieces, something it is rarely possible to do where you take your pipes from the side of the casing.

By running the leader pipes horizontally and close to the joists you leave plenty of head room in the cellar, if it is of reasonable depth, and they who manage the furnace or use the cellar will rise up and call you blessed.

As in this statement I am flying in the face of all tradition and precedent, I feel that I must back my assertion with a practical example.

Practical Example in Piping.

Last year in putting in a large job I was compelled, in order to reach a certain room, to carry the air through 88 feet of pipe. Sixty-nine feet of this pipe was horizontal and 19 feet perpendicular. The lay-out was as follows:

I started with a 22-inch pipe, which I carried 5 feet perpendicularly up from casing top. Then a 22-inch 90-degree elbow. Then 5 feet horizontally to the right. Then another 22-inch 90-degree elbow. Then 42 feet horizontally through a long hallway and out into a "social room." Here the 22-inch line ended and the pipe was capped. A few feet before the end I tapped this line with a 9-inch round pipe which heated two rooms in the second storey and a 3 1-2 by 12-inch pipe which heated one room on first floor. Close to the end of the 22-inch line I put in a 16-inch tee collar for a 15 x 20 inch register on first floor. In the cap on end of the 22-inch pipe I put a 9-inch collar; on this a 9-inch 90-degree elbow, with 6 feet of 9-inch pipe running horizontally to the left, where by a reducer and 8-inch round elbow I entered a perpendicular 8-inch round stack 12 feet high. This entered the bottom of an 8 x 10 inch square pipe which ran 16 feet to the right horizontally between the joints. The end of this pipe was closed, and I cut into the top a 3 1-2 x 14 inch pipe with a 12 x 15 inch register just above the baseboard.

The long run of 22-inch pipe being all exposed was leveled with a spirit level. You will notice that in addition to the 69 feet of absolutely horizontal pipe I had six 90-degree elbows, not counting the change in direction of air made as it came through the register.

You will notice also that the 16 x 20 inch first floor register was at the end of a 47-foot line of absolutely horizontal pipe.

In laying out this job I made the following calculations:

1. That the 5-foot rise from the top of the furnace would give sufficient force to carry the air to the end of the 22-inch horizontal line.

2. That as the capacity of the 22-inch line was considerably in excess of that of the three tappings, that the momentum of the air would when it struck the closed end, drive a considerable amount around the 9-inch elbow, and through the 9-inch horizontal pipe, on the principle of the hydraulic ram.

3. That the 8-inch perpendicular pipe would take care of itself and give the air a good push to start it through the 16 feet of 8 x 10 feet horizontal pipe.

4. That by giving this 8 x 10 inch horizontal pipe a capacity 60 per cent. greater than that of the riser by which it was fed I would make up for the loss of velocity.

All the five registers on this system worked well, and equally well, and none better than the one at the end of 88 feet of pipe.

In my own justification I must say that I did not in this case send the air around Robin Hood's barn and back again simply to give it exercise, but because in this case the line followed was the most direct which the construction of the building permitted.

I could give plenty of other instances, and in fact every job I put in is an instance.

I freely admit that if by the use of "pitch" angles can be materially reduced or distances materially shortened there is an advantage, but claim it is due to reduction of angles and distance, and that this will rarely justify spoiling the head room in a basement.

Plenty of "Know it Alls."

But my time and your patience would fail should I attempt to give all the fads and fallacies which in my opinion have been connected with hot air heating. The business has been far too largely left to unscientific men. Every man who has ever lived in a furnace-heated house thinks he knows all about heating with hot air. Every man who can handle a hammer and pair of snips thinks he is competent to put in a furnace. The popular impression has been that science and skill were not needed, and if the house were not heated it was the fault of the furnaec or the system.

We are as yet but in the infancy of the business. Sufficient data has not yet been obtained to reduce it to an exact science. In fact, as yet it can hardly be called a science at all. It is not strange that many believe that cheapness in first cost is the only thing the hot-air system has to commend it, and that cheapness in first cost is the only thing to be considered in having a hot-air plant installed.

ANSWER THIS QUESTION:

In your judgement is it essential that every closet connection to soil pipe stack should be provided with a Breaksyphon?

If not, illustrate by a rough sketch the conditions which would render unnecessary the use of a Breaksyphon, and give the reasons why it would not be required.

For the best answer received by December 1, we will send a cheque for $5.00 and to every one sending a satisfactory reply for publication we will give a year's subscription to Hardware and Metal. Send in a reply at once and answer the question as fully as possible.

The Plumbers' Union of Vancouver is protesting to the civic authorities that men who have not complied with the city's requirements concerning examinations and certificates are working in competition with those who have passed the examination and hold the certificate. This is against the city by-law, and will be looked into by the city engineer.

PLUMBING MARKETS

MONTREAL.

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, October 26, 1906.

With copper prices going higher almost every day, finished materials are being advanced and will undoubtedly continue on the upward move for some time. Brass and copper goods are important items in the plumbing list, and it must be expected that goods in these lines will be considerably higher in the near future. During the week just passed one class of copper goods was advanced, our quotations showing increased prices in copper range boilers.

There is no other actual change to remark in the price of plumbing supplies, though the strength which is being felt in every branch of the metal markets is reflected here. Iron pipe is much firmer in tone than last week, although prices remain the same.

RANGE BOILERS—The phenomenal rise of copper is responsible for higher prices in copper boilers. An advance of approximately 10 per cent. has been made. As will be seen by referring to our list. Our quotations : Iron clad, 30 gallon, $5 ; 40 gallon, $6.50 net list. Copper, 30 gallon, $25 ; 35 gallon. $29.50 ; 40 gallon, $32 net.

LEAD PIPE—Last week's advanced quotations are firmly held, as pig lead continues its record-breaking figures. Our quotations : 5 p.c. f.o.b. Montreal, Toronto, St. John, N.B., Halifax: f.o.b., London, 15c. per hundred lbs. extra; f.o.b. Hamilton, 10c. per hundred lbs. extra.

IRON PIPE FITTINGS—The recently revised lists show higher prices discounts remain as follows : Discounts on nipples, ¼ in. to 3 in., 75 per cent.; 3½ in. to 6 in., 72½ per cent.; couplings, ½ in. to 2 in., 55 per cent.

IRON PIPE—Higher prices may be looked for. The market at present is very firm. The current prices follow : Standard pipe in lots of 100 feet, regular lengths, 1-4 inch, $5.50; 3-8 inch, $5.50; 1-2 inch, $8.50; 3-4 inch, $11.50; 1 inch, $16.50; 1 1-4 inches, $22.50; 1 1-2 inches, black pipe, 1-4 inch, 62 per cent.; 3-8 looked for. At present we quote : inch, 62 per cent.; 1-2 inch, 71 per cent.; 3-4 inch and upwards, 73 per cent. Discounts on galvanized pipe: 1-4 inch, 47 per cent.; 3-8 inch, 47 per cent.; 1-2 inch, 61 per cent.; 3-4 inch, and upwards, 63 per cent. Extra heavy pipe of 100 feet lots are quoted as follows: 1-2 inch, $12; 3-4 inch, $15; 1 $36; 2 inches, $50. The discount for inch, $22; 1 1-4 inches, $30; 1 1-2 inches, black pipe is 71 per cent., and for galvanized, 61 per cent.

SOIL PIPE AND FITTINGS — The demand is good for the season. We still give the following discounts : Standard soil pipe, 50 per cent. off list. Standard fittings, 50 and 10 per cent. off list; medium and extra heavy soil pipe, 60 per cent. off. Fittings, 60 per cent. off.

SOLDER — Primary markets maintain their strength, and solder prices are held firm, as follows : Bar solder, half-and-half, guaranteed, 25c. ; No. 2, wiping solder, 22c.

ENAMELWARE — We quote the following prices: Canadian bath tubs, plate E1, 5 ft., 1st quality, $20.65, special $18.65; plate E11 and E21, 5 ft., 1st quality, $19.50, special $17.15; plate E35, 5 ft., 1st quality, $24.65, special $22.40. American baths, rolled rim, 5 feet 2 1-2 inch rim, $22.25; 3 inch rim, $29.25. Lavatories, discounts, 1st quality, 30 to 30 and 5 per cent.; special, 30 and 10 to 40 per cent. Sinks, 18 x 30 inch, flat rim, 1st quality, $2.60, special, $2.45.

TORONTO.

Office of HARDWARE AND METAL,
10 Front Street East.
Toronto, October 26, 1906

Although new lists have not yet been issued on brass goods we are able this week to quote new prices on J.M.T. and Jenkin's globe, angle and check valves, as well as J.M.T. and standard radiator valves and square head brass cocks. Copper range boilers are now net list and quotations have been withdrawn on copper bath tubs.

Enameled ware has also been moved up, the advances being chiefly on specials, baths, lavatories and sinks.

Radiators are subject to discounts about ten per cent. closer than the old list, and hot water boilers are slated to rise according to present outlook.

All these new prices will be found amongst the current market quotations on our back pages.

A rushing trade is being done by both plumbing and heating supply houses. Shipments are by no means prompt, although manufacturers and jobbers are doing their utmost to keep up with their orders.

LEAD PIPE — The discount on lead pipe is now five per cent. off the list price of 7c. per pound. Lead waste, 8c. per pound with 5 off. Caulking lead 5½c. per pound. Traps and bends, 50 per cent. discount.

SOIL PIPE AND FITTINGS — We continue to quote : Medium and extra heavy pipe and fittings, 65 per cent. off ; light pipe and fittings, 60 per cent. off ; 7 and 8 inch pipe, 40 and 5 per cent.

IRON PIPE—The shortage still continues. One-inch black pipe is now being quoted at $4.45, and one-inch galvanized at $6.10. Full list in current market quotations.

IRON PIPE FITTINGS — New lists are as follows : Cast iron elbows, tees, crosses, etc., 62½ per cent.; cast iron plugs and bushings, 62½ per cent.; flange unions, 62½ per cent.; nipples, 70 and 10 per cent.; iron cocks, 60 per cent.; Canadian malleable, 30 per cent.; malleable unions, 65 per cent.; malleable bushings, 55 per cent.; cast iron ceiling plates, plain or nickel-plated, 65 per cent.; cast iron floor, 75 per cent.; hook-plates, 62½ per cent.; expansion plates, 67½ per cent.; headers of branch tees, 62½ per cent.; ring hangers, black, 75 per cent.; galvanized, 65 per cent., standard list.

GALVANIZED IRON RANGE BOILERS—We quote : 12 gallon capacity, standard, $4.50; extra heavy, $6.50; 18 gallon standard, $4.75 ; extra heavy, $6.75 ; 24 gallon, standard, $4.75; extra heavy, $6.75; 30 gallon, standard, $4.75 ; extra heavy, $7.50; 35 gallon, standard, $5.75; extra heavy, $8.50; 40 gallon, standard, $6.75; 40 gallon, extra heavy, $9.50; 52 gallon, $11; extra heavy, $14; 66 gallon, standard, $18; extra heavy, $20 ; 82 gallon, standard, $21; extra heavy, $24 ; 100 gallon, standard, $29; extra heavy, $34; 120 gallon, standard, $34; extra heavy, $40; 144 gallon, standard, $47 ; extra heavy, $55. Copper range boilers are now net list.

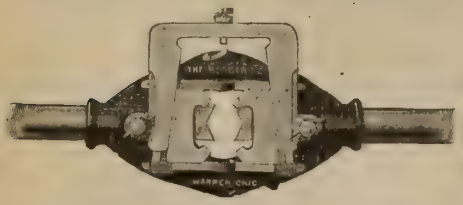
RADIATORS—Quotations have advanced about ten per cent, as follows . Hot water, 47½ per cent.; steam, 50 per cent.; wall radiators, 45 per cent.; specials, 45 per cent. Hot water boilers are expected to advance also.

SOLDER — Quotations remain very firm as follows : Bar solder, half-and-half, guaranteed, 26c.; wiping, 24c.

ENAMELWARE—We quote as follows : Standard Ideal, Plate E1, 5 ft., first quality, $21.65; special $20.25 : plate E11, 5 ft., first quality, $20.15, special, $19.75. Lavatories, first quality, 20 and 10 to 30 and 10 off; special, 30 and 5 to 30 and 10 per cent. discount Kitchen sinks, plate 300, firsts, 65 and 5 off, specials, 70 per cent. Urinals and range closets, 20 off. Fittings extra. Lower prices in quantities.

PRICES ON KERR VALVES.

The Kerr Engine Co., Walkerville, have issued the following announcement, dated October 20 :



"Owing to the continued advance in the prices of raw materials entering into the construction of our goods we are obliged to again withdraw all quotations, and will fill orders placed with us at lowest prices possible under the conditions of the market. It is impossible to quote standing discounts at this time."

PLUMBING NEWS NOTES.

McGuire & Co. have secured the contract for the steam heating work connected with the new public library, Toronto, amounting to $15,600. J. E. Grey will install the plumbing, his tender being $2,464.

W. H. Walford, of the Ontario Lead & Wire Co., Toronto, went down to Montreal early this week to meet one of the boats from the Old Country. On its arrival on Wednesday a clergyman's services was secured and a han young couple united their fortunes for better or for worse. We wish them the former.

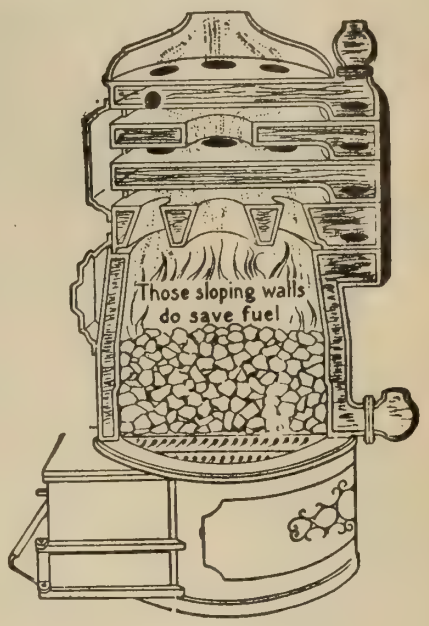
"Well, why will the Oxford pay me best?"

Every day or so some sharp-witted dealer asks us that question—wants to know *why* there's most profit and easiest selling in the Oxford Hot Water Boiler.

And we tell him why—we *show* him why. Wish you'd let us show *you* why.



We'd show you what the twelve betterments are in the Oxford Boiler—and what they are worth to the man who *sells* the boiler as well as to the man who buys it.

We'd show you why the Oxford fire-pot is wider at bottom than top—why the grate-bars are hollow and triangular and mounted on cog-gears—why the fire-pot walls slope in over the fire—why the first water section is double deep.

We'd show you why we can afford to give the dealer all the selling-help he can possibly want and yet not cut the fat off his profits——

We certainly would show you where you come in on the Oxford Boiler.

Why don't you ask us to show you?

EVAPORATION REDUCED TO A MINIMUM

is one of the reasons why PATERSON'S WIRE EDGED READY ROOFING will last longer than any other kind made.

Mr. C. R. Decker, Chesterfield, Ont., used our 3 Ply Wire Edged Ready Roofing fourteen years ago, and he says it is apparently just as good as when first put on.

We have hundreds of other customers whose experience has been similar to Mr. Decker's.

High Pressure

Sheet Packing

A packing that will hold. For use in highest pressures for steam, hot or cold water and air. Packs equally well for all.

From actual tests, we believe that this packing is the most durable and satisfactory of any on the market. Try a sample lot and see for yourself.

Crain Monthly Account System

Three Points To Consider

in ordering an account system

1st. **Unlimited Capacity.** The Crain system will bind on one sheet as easily as on 500. This is important.

2nd. **Length of Sheet.** The Crain Sheets are 14 inches long, allowing for three different size accounts. It is also easier to work as you have better arm rest.

3rd. **Cost of Supplies.** With the 14-inch sheet it cuts in half the cost of supplies.

We have been manufacturing this system for six years, and to-day it is recognized as the best on the market. Write us for information.

"SARGENT" LIQUID DOOR CHECK AND SPRING

Sargent's liquid door check and spring is suitable for either right or left hand doors.

The spring is adjustable tension, very compact and powerful and is made from extra heavy clock-spring steel of the finest quality.

The check is put up regularly for attaching to the door, but special brackets for attaching in different positions to the soffit and door frame and for any kind of door, can be furnished.

The Check can be instantly varied for light or heavy draft by screwing the regulating thumb screw.

For applying, use the directions packed with each check and follow them carefully.

Have the cylinder indoors where possible.

Made of cast iron, gold bronze finish.

No. 121.	Gold bronze,	for light inside doors.
No. 123.	"	for medium size inside doors.
No. 125.	"	for heavy inside or light outside doors.
No. 127.	"	for medium size outside doors.
No. 129.	"	for heavy outside doors.

Packed one in a box with screws.

PULL

Chances for Sales Unlimited

Every door in town with a building attached to it can be made to do its duty 50% better with a **Sargent "Liquid" Door Check** on it.

They are the newest checks manufactured ; have all the points of "others" with a lot the others haven't got, and are the most up-to-date in every respect.

They shut out competition as well as cold and prices are no higher than on any of the other makes.

If you're in the market, name the quantity you'll buy and we'll quote you special prices.

CALGARY

TO OUR PRESENT AND PROSPECTIVE FRIENDS:

It is well known that the weak place in a Scoop is invariably in the shoulders, which are apt to spring and sometimes double up, especially in the case of a light Scoop.

To produce a light Scoop and at the same time overcome the weakness of shoulder, we have devised a method (Patented) of making the shoulders with a converse curve, which strengthens them and at the same time improves the appearance of the Scoop. No extra charge is made when applied to our regular lines.

As no hardware stock is complete without our ''Moose'' 1st Grade Coal or ''Black Cat'' 4th Grade Grain Scoops, lose no time in ordering.

If your jobber does not stock them, write us direct.

Yours faithfully,

THE CANADIAN SHOVEL & TOOL CO., Limited,

Will Not Gum

The Bowser Pump for linseed oil, turpentine, etc., is constructed in such a manner that the working parts are always immersed in oil, and hence never being exposed to the air, cannot become gummed or clogged.

Cut 15

The Bowser will handle any oil, no matter how thick and gummy, with the greatest ease. The lever shut-off prevents dripping, and the discarding of sticky measures and funnels, and make a clean oil room no matter what oils are handled.

Hardware Catalogues

THERE is no trade which depends upon up-to-date trade catalogues from the large wholesale houses so much as the hardware. You probably issue several catalogues on different lines, they are very seldom kept together, and are not on hand when wanted.

Make them Loose-Leaf under one cover—all in one—and always at hand.

Any information you wish cheerfully furnished.

—MADE BY—

The J. W. HARRIS COMPANY, Limited

Successors to LESSARD & HARRIS

Contractors, Montreal

The Universal Steel Range is constructed to suit the requirements of the Canadian Trade. **BUILT LIKE A STEAM BOILER AND WILL LAST A LIFE TIME.** It has all the requisites suitable for a Farmer's Range. Will burn a 29-inch stick, and both the fire box and fire box door are unusually large to admit of rough and coarse wood. Lots of room on the top and in the oven to do the busy morning's work.

Made with
18 and 20-inch Ovens

Both sizes
Burn 29-inch Wood

This Range with coal will cook and bake perfectly and no trouble to retain a fire day and night. When this Range is connected to Hot Water attachments the grates and all other linings can be removed without disturbing the water front.

The linings can be changed from Coal to Wood or vice versa in five minutes without the removal of a bolt.

Now Mr. Dealer is not this a grand feature, for in most of Ranges to change the linings from Coal to Wood is an awful job, particularly after it has been in use for some time. In the Universal Favorite the woman of the house can change the linings herself so simple and perfect is the arrangement.

The Universal Favorite has more REAL features of Merit and more good talking points than any other Range on the market.

WHAT TO DO THIS MONTH

While general business during October was very brisk, the trade in distinctly Fall lines was somewhat hampered by the fine weather which prevailed throughout the month. Consequently hardware dealers are preparing to push energetically in November many lines which should have sold better last month, under more favorable weather conditions.

It would seem, then, that there will be considerable activity in the various hardware articles which are used in making small repairs to houses and outbuildings. Few householders have felt it necessary to bring out the double windows as yet, but the sharpness of these early November days will remind them of the coming Winter, and dealers should be prepared for a run on window glass, putty, glazier points and hooks and eyes, all of which will be called into requisition when the storm windows are being adjusted. The double doors and porches will also create a demand for hinges, screws, hooks and eyes, latches, and similar goods. Hammers and screw drivers, as well, will be required by many who have lost these useful tools since the Spring cleaning-up process.

Weather strip is another line which consumers are loath to purchase until the wind comes whistling through the cracks and sets the inmates shivering. Good sales will be effected during November in the four popular styles — wood and felt, wood and rubber, solid felt and solid rubber.

Prepare for Snow.

In some parts of Canada snow has already fallen, and the regular Winter storms cannot be much longer delayed. In the northern districts especially, the time is not too early for displaying snow shovels, and reminding the consumer that it is better to purchase now than wait until he has to wade through snow to the hardware store.

We believe that by a little effort hardwaremen could work up a good trade in wire door mats this month. Comparatively few of them are in use, in spite of their utility during the Fall, Winter and Spring. In towns where streets are not paved mud is now running riot, but if a census were taken the number of houses without any kind of door-mat would be surprising. For scraping the loose mud and snow from the bottom of the shoe, these wire door mats are most valuable, and they will prove of the greatest service in preserving carpets from stains at this season. This is a good line to push. It would be advisable to prepare some lively advertising on the subject and quote prices. No doubt many customers would buy this article if they could weigh its comfort against its moderate price.

Attend to Heating Goods.

To the stove dealer, November is a busy month. The season for coal stoves and heaters is at its height. Now is the time to get a line on the requirements of your customers, and to emphasize the merits of the stoves you handle.

But there are many heating sundries which should also be brought to the fore. Coal oil heaters are becoming more popular all the time. In houses where there is no furnace they are of the greatest use, for, being very portable, they can be carried to bedrooms and other parts of the house when it is desired to take the chill off the air. For offices and stores they have been found practical and economical for use before the weather is cold enough to demand a steady fire in the stove or furnace.

Farmers and others who do much driving in the Winter are good prospective buyers of carriage heaters. They should be sold very soon now, and it would pay the dealer to appropriate a corner of his store for a Saturday display of these goods.

A Heating Novelty.

It is well known that when the coal stoves are set up in the Fall the lining is often found to be so cracked that new parts are ordered, and it is always a difficult matter to secure the exact fit, especially if the stove has been used for some years, and the model is out of date.

A remedy has been found for this, however, and hardwaremen who have taken it up are making big sales this month. It is a powder which is easily applied, and if care is taken it will make a job almost as good as the original lining.

When the stove has been cleaned the parts where the cement is to be applied are dampened and the cement put on with a small trowel. Then a few newspapers or shavings are burned to gradually dry the cement, and in a few hours the fire may be made as usual. If the lining then cracks it should be filled up again, and will be almost as good as new.

Of course November will be a busy month for stovepipe and elbows, furnace scoops, fire shovels, coal hods, and ash sifters. These lines are being displayed by almost every hardwareman in the country, and little reference to them need be made.

About Christmas Goods.

It is rather early as yet for displaying Christmas goods, as they are likely to become dirty and lose their freshness before the real holiday season is at hand. At the same time it must be admitted that people are already beginning to make up their minds as to the gifts they will buy. It would, therefore, be profitable to announce through the local papers the coming exhibit of Christmas goods at your store. Placard the store with notices of a similar character, and talk it up with your customers. Nearly all retailers are already in receipt of their stock of cutlery and other Christmas goods.

Equipment for Winter Sports.

If we are to believe the travelers, tremendous quantities of skates have been sold this season. Dealers are expecting a fine business in all seasonable sporting goods, as a hard Winter has been prophesied. Skates are, of course, a staple sporting goods line, and they will sell as largely as ever this year. But many other Winter sports are being popularized in all parts of the country. Snoeshoeing is taking a great hold, and with lots of snow promised hardwaremen should sell lots of snowshoes. Tobogganing, too, is being seized upon by those who prefer a more strenuous sport, while the still more adventurous will use skis, which have been very popular in Montreal for the past two or three seasons. All these offer opportunities to the hardwaremen, who should not be at all slow in getting after this special business. These goods should be displayed right away, either in the window or in some prominent part of the store.

If men and women are accustomed to making up their minds on Christmas presents early, this is even more true about children. From now on, they will be open to conviction on the requests they are going to make of Santa Claus. Sleds, bob-sleighs and similar lines make a tempting array, and they will help to turn many sales towards the hardware store. On this line now is the time to strike.

Order Spring Goods.

Before the rush of the holiday trade is on a thorough size up of stocks should be made and orders placed not only for holiday goods but for Winter lines which are likely to advance, as well as for such heavy goods, etc., as are usually booked at this season for Spring delivery. Present indications are that metals, tin and enameled ware, tools, etc., will all be higher, as well as white lead and mixed paints. The higher tariff which is looked for at the coming session of Parliament will likely cause many American manufactured goods to go up in price.

Window Displays.

During November displays of loaded shells, guns, knives and cutlery, traps and skates, carpet sweepers, lamps and electrical supplies and novelties will be seasonable.

Points to Push.

There are several good products that should be placed well to the front during November.

Aluminum paint, furniture polish, gold paint, bath enamel, stove pipe enamel, varnish stain, and wagon and implement paint will meet demands that are to be found now in every territory. Some of these specialties have their largest sale during the late Fall months, when homes are being renovated for the Winter

HOW TO PLAN SALES

Some Suggestions for Advertising—Sales that Have Succeeded—How to Get Started.

There are many methods of attracting, and the live dealer is always on the lookout for some such plan. Some merchants, however, are averse to schemes which smack of chance, classing them as gambling, but it is only the narrow gauged merchant who looks upon a selling scheme in this light. But it must be kept in mind that whatever scheme a merchant decides to use, unless it is well advertised, it will not prove successful. The public must know of the scheme, otherwise they will not have a chance to participate in it. No matter what sort of a selling plan is adopted the main condition should be the purchase of goods to a certain amount.

Prizes for Crops.

An Iowa merchant has been conducting an annual corn-growing contest for several years, and he says that the advertising he has had from the scheme is out of all proportion to the cost. He gives merchandise prizes amounting to $50 to the boys that raise the largest ears of corn from seeds which he furnishes.

In the Spring he has made up a large number of packages containing 500 grains of corn. One of these is given to any boy who calls for it and registers his name as a competitor in the contest. With each package is enclosed a good sized circular, stating the terms of the contest, and incidentally tooting the merchant's horn a little.

A window display is made of these packages in the Spring, and in the Fall there is another display of the competing specimens of corn. The farmers take considerable interest in the contest, and it is much talked about. Of course, this plan would work better in a small town. If corn is not the principal product, any other product would answer the same purpose.

A Flower Show.

When a merchant decorates his store elaborately for an opening, he naturally expects to pay a good round sum for the decorations. An Ohio firm has found a simple way of getting the store decorated without any expense whatsoever. This is the way it was done :

For several years some church or society in this town has given a chrysanthemum show for the benefit of the flower-loving public. The event was anticipated last year by this enterprising concern, which made arrangements with the local florist to give the chrysanthemum show in connection with the Fall opening. The florist was anxious to display his flowers, and readily consented to bring them to the store for nothing. He arranged them on the several floors of the store, as well as in the windows. Every feature of a chrysanthemum show was preserved in that the plants and flowers were not for sale, but orders were taken.

An orchestra was employed to furnish music, and everything was done to give visitors a pleasant time. The first evening no goods were sold, but the entire sales force was present to escort visitors through the various departments of the store to view the Fall stock. The exhibit, which lasted two days, Thursday and Friday, was a thorough success, both as a flower show and as a Fall opening. A much greater crowd attended than could have been gotten together, had the affair been merely an opening. This is what they had to say about it :

"The chrsyanthemum show certainly was a winner. We gave our regular Fall opening in connection with the chrysanthemum show, and it was the best thing we have ever done in that line.

"Our local florist was glad to bear half the expense of the music and do a great deal of his own advertising. As an advertising medium it was a great success; and we shall repeat it next season."

Money Given Away as Souvenirs.

A clothier down in West Virginia held a sale recently, during which he gave two-dollar-and-a-half gold pieces as souvenirs to purchasers of suits, overcoats and raincoats. The following notice appeared in his newspaper advertisement :

"In celebrating this anniversary, we do not overlook the fact that without the confidence, good will and patronage of the people of ———— and this vicinity, the phenomenal growth of this remarkable youngster would have been impossible.

"By way of showing our appreciation we will, on Wednesday, October 5th, from 7.30 a.m. to 6 p.m., present to every purchaser of one of our famous suits, overcoats or raincoats, a two-and-a-half-dollar gold piece as a souvenir of this event.

"Remember, this two-and-a-half-dollar gold piece is given as a souvenir, and will not act as part payment of any purchase, as our unalterable price remains the same, viz., $10, $12.50 and $15 for suits, $10, $12.50, $15 and $20 for overcoats and top coats, and $15 and $20 for raincoats."

Novel Window Display.

A display which causes passersby to stop and scrutinize carefully every item in the window certainly accomplishes the purpose of a window display. A merchant in Wisconsin recently had such a display, and his plan is well worth copying. It is as simple and effective as it is inexpensive. Here it is :

The window was filled with men's wearables, but might be worked out with kitchen utensils. In the centre was displayed a card calling attention to the fact that one article necessary to the proper dressing of a man had been omitted, and that one dollar would be paid to the first person to discover what the missing article was. The window was left in for a week, and it was interesting to see the people studying the entire display, trying to make out what was lacking.

On the afternoon of the last day of the contest a boy of thirteen discovered the missing article, which was a small sleeve button left out of the sleeve of the shirt shown. Both sleeves had been pulled out, so they were in plain sight, and the very simplicity of it made it hard to see. Next day a card called attention to the missing button, and made it clear to every one. The query, "What man would feel properly dressed with only one sleeve buttoned?" left no room for quibbling as to who guessed correctly.

The window sold goods as people took time to read the show cards and look over each article displayed. Those wishing to try for the prize had to come into the store, so it brought them inside.

A Voting Contest.

In California there is a general store that conducted what was called a "scholarship voting contest." One vote was given for every 10c. purchase made at the store, and the two contestants receiving the highest number of votes were given a free scholarship in a first-class local business college. When they have graduated from the business college, the two winners will be given permanent positions in the store that conducted the contest. In addition to the votes given with purchases, a coupon good for a vote was printed in the newspaper advertisements.

To keep up the interest, a list of the candidates with their standing was published in the newspapers every day. The novelty and value of the prizes made this contest a popular one.

When Will Clock Stop?

The following was used by a firm in Louisiana. It is no doubt a good scheme, but, we believe, it is a violation of the postal regulations, therefore, could not be advertised in any newspapers going through the post office. However, it could be advertised in circulars, distributed by the store. Here is the way it was advertised :

"On Saturday, April 21st, we will wind up an eight-day clock in such a manner that it shall stop before the end of next week. To insure honesty, we shall seal the door."

"Five dollars in merchandise (winner's own selection) to the person making the nearest estimate.

"One estimate with each 25c. purchase during this sale.

"Clock will be veiled Wednesday morning so no one can tell when it stops.

"Winner will be announced Friday morning, and must claim prize on same day, or else lose it.

"As an extra inducement to call Friday, we shall bunch up all odds and ends left from the sale, and offer them at still further reduced prices."

Following this ad the one printed below was sent out :

"Our unique guessing contest is causing a sensation. Already nearly every

hour on the dial has been named. Have you guessed ?

"A guess with every 25c. purchase during our four-days' home goods sale.

"The clock is now veiled, and interest is at white heat.

"We repeat the conditions of the contest for the benefit of those who are delinquents.

"On Saturday, April 21st, we wound up an eight-day clock in such a way that it will stop some time this week. Since this morning the clock is veiled, so no one can see whether it has stopped or is still running.

"Five dollars in merchandise (winner's own selection) to the nearest guesser.

"Winner will be announced Friday morning, and must claim prize same day, or else forfeits it.

"Be sure to come Friday. You may be the winner."

Free Railway Transportation.

There is a store down in Indian Territory that prints a paper devoted exclusively to its own interests. In a recent issue appeared the following, which was, no doubt, a strong inducement to out-of-town trade :

"That friends from other towns may attend our opening sale at no cost, we have arranged to refund the transportation charges for a round trip from places within a reasonable distance from ———. Bring one of the coupons with you :

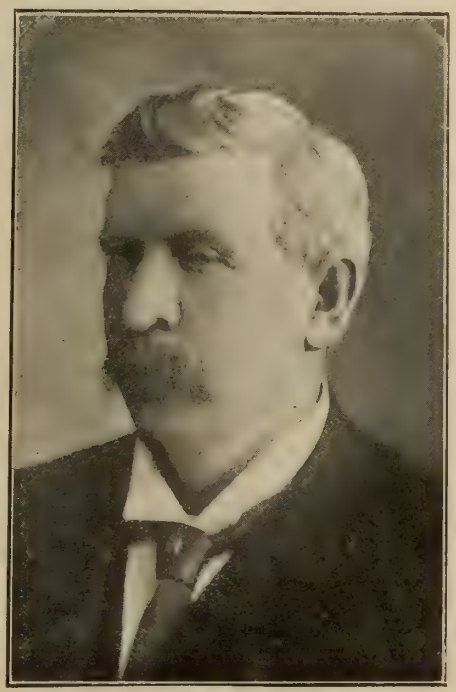
"Coupon :

"This coupon will be good for round trip transportation from Kelso, Albia, Big Cabin or White Oak to ———— and return, to any person coming by rail to attend our opening sale, May 3-5, upon the purchase of merchandise to the amount of $5 or over."

No prices ever raised during a sale at ———. All prices marked in plain figures —see for yourself. One price to all, and that the lowest.

WIRE NAIL PLANT FOR SALE.

The Ontario Lead & Wire Co., Toronto, are advertising their wire nail, white lead and putty manufacturing plants for sale by tender, all offers to be in their hands by Wednesday, November 7. Particulars of the sale can be learned on inquiry at their offices at 59 Richmond street east, Toronto.



It has been known for a long time that the plants were for sale, but as no offers have been made of a nature satisfactory to the company they have gone on with the industry up to the present time. A year ago they greatly enlarged their premises by securing the building on Church and Richmond streets, but the continued growth of their plumbing supply business has made necessary further enlargements. It has now been decided, therefore, that the present buildings will in future be used for plumbing supplies, and that the nail, white lead and putty machines will be sold or larger premises secured for the manufacturing end of the business.

"If the reserve bid is not reached by any of the tenders," said Mr. Fred Somerville to Hardware and Metal, "we will secure a site at Toronto Junction and go into the manufacturing end on a larger scale, establishing a mixed paint plant as well as draw our own wire and produce nails on a more economical basis.

PUBLIC SPIRITED HARDWARE MERCHANTS

NO. 1

Few will be inclined to dispute the statement that the successful man of business should make the best mayor, the best councillor or the best president of a board of trade. The same qualities which enable a man to build up a successful business should stand him in good stead in the administration of the affairs of a municipality and in voicing the business sense of the community as president of the board of trade. As to the fitness of the business man for these positions there can be no dispute, but, unfortunately, the business man is always a busy man and it is often a difficult matter to persuade him that it is his duty to undertake the responsibilities and duties of civic and municipal office. In many towns and cities it is only after the people have become thoroughly aroused by the results of incompetent administration that good business men can be prevailed upon to undertake the task of giving their town or city a business government.

W. H. SPARLING,
Mayor of Minnedosa, Manitoba.

Western Canada has suffered in this respect as has the east, but there are a few towns in which the business men have realized their civic responsibilities and have sacrificed their inclinations for the public good. Hardware and Metal purposes reproducing the portraits of a few representative hardware men in the west who are serving their fellow citizens in some responsible municipal office.

W. H. Sparling, mayor of the thriving town of Minnedosa, Man., is a busy hardware man, who, nevertheless, finds time for the discharge of important civic duties. Mr. Sparling may claim to be one of the old timers in the west as he left his native town of Seaforth, Ont., in the year 1880 to learn the hardware business with J. H. Ashdown in Winnipeg. After a year in Winnipeg he moved farther west to Portage la Prairie, where he remained with A. L. Ashdown until 1895 when he commenced business in Minnedosa.

In Portage la Prairie Mr. Sparling acted as assessor for three years, but held no other municipal office. In Minnedosa he served as councillor for three years and was elected mayor for 1906 He is also a member of the board of trade.

Mr. Sparling is modest in regard to his work while in office, but it is recognized that it was mainly due to his efforts that Minnedosa now has a system of fire appliances which would be a credit to a much larger city and which has saved the people of Minnedosa many thousands of dollars in the last four years. For the making of satisfactory arrangements with the Electric Light Co. and the installation of an efficient system Mr. Sparling is also entitled to some of the credit.

Minnedosa, like most other western towns, is much interested in the power question and it is probable that the municipality will undertake the development of the water power available. In the conduct of this undertaking Minnedosa will require the services of her business men and it is not likely that she will be disappointed. None but a business council of business men should undertake the large expenditures which such an enterprise involves.

KEEP THINKING.

When you are not busy attending to customers and advancing the interests of your establishment, keep thinking. Perhaps it might be well to take an hour off each day and leave the store—and while away give your attention to your establishment, your clerks and your customers, and see if during that hour you can not think out some plan for bettering yourself. You have thought out many a problem and found a high degree of satisfaction in doing it. Keep on thinking.

Think out a plan for getting in the money due you from your customers, a plan that will not make them sore—but that will get the money. Meditate on the possibility of a shift to the cash system.

A man can think better alone. When you think out a solution of any problem put it into effect immediately — even though you have to do it yourself. When trade is slow, get out into the country and talk to "mother" and the boys. Keep busy.—Hardware Trade.

Pewter, which years ago was quite extensively used for spoons, cups, and tableware, is a cheap substitute for britannia metal. It is composed of 84 per cent. lead, 15 per cent. tin, and 1 per cent antimony.

RETAIL HARDWARE ASSOCIATION NEWS

Official news of the Ontario and Western Canada Associations will be published in this department. All correspondence regarding association matters should be sent to the secretaries. If for publication send to the Editor of Hardware and Metal, Toronto.

RETAIL HARDWARE MERCHANT'S PLAIN TALK

Address by E. M. Bush, Evansville, Indiana, President of the National Retail Hardware Association, before the Hardware Manufacturers and Jobbers Conventions at Atlantic City in October.

The address of Mr. Bush was one of the features of the recent convention at Atlantic City. His remarks were listened to with great attention and were the subject of much favorable comment, especially on the part of the manufacturers, many of whom expressed the belief that they would profit by his practical suggestions. Mr. Bush spoke in part as follows :

When upon former occasions our national officers have come before you it has been principally to discuss the catalogue house question and prospective parcels post legislation. I shall touch these subjects but briefly, not that we consider either of them a dead issue, for that the educational influences and agitation of both questions have born fruitage we are fully convinced by the events of the past year. Let me rather in a few words try to show you the every day environment of the retailer—contrast his surroundings and opportunities with yours in your larger sphere of manufacturing and jobbing business life—and endeavor if I may to make two or three suggestions which shall perhaps be mutually helpful. I cannot hope to bring anything new to you in these suggestions—this ground has been so thoroughly threshed over that little new is left. But so auspicious an opportunity for a few words on the subject leads me to hope that even a repetition, if brief, will bring about some good results.

In the centers of trade—cities of 20,000 and upward; often, too, in small places—are retailers doing a business which runs up into six figures annually. But with a vast majority of retailers whose stock embraces, besides legitimate hardware, stoves, agricultural implements, vehicles, paints and numerous other lines that in this day fill a general hardware store, the annual sales run from $10,000 to $60,000. It is to retailers of this class, who are also largely predominate in the State retail hardware associations, that I would call your attention. Few of these merchants are brought in direct contact with the heads of jobbing houses; even less rarely do they meet the manufacturers of the goods they sell.

Merchants Go Seldom to Market.

The market comes to them in the traveling salesman of the jobber, in the stove, implement and paint representative of the manufacturer who sells direct to the merchant. Is it strange, then, that there has existed in the past no greater feeling of community of interest between you and these retailers? And—pardon me, gentlemen—have not manufacturers and jobbers been inclined to regard the retailer's interests as of slight consequence? In reality retailers are the secondary roots of your tree of prosperity, and must be nourished and nurtured by fair, just and considerate treatment, for this glorious tree will suffer severely if these secondary roots do not receive proper consideration.

The lack of this feeling of mutual interest has been accentuated in instances where the merchant has seen in the catalogues of the mail order houses goods of a manufacturer which he has for years displayed, talked, sworn by and sold, so priced that he has cut out competition. Happily these times and conditions are passing—largely through the advent of the Retail Hardware Associations—which by this act of association have won recognition of the fact that they are a factor worthy of consideration in to-day's commercialism, and which afford in their conventions opportunities for the heads of firms to meet the distributors of their goods and products.

Acquaintanceship Clears the Air.

Matters are better understood, differences are more readily adjusted. While a few years ago manufacturer and jobber thought only of their own troubles, they have learned through association efforts that the retailer, too, has his troubles—some of them unconsciously or thoughtlessly brought about by the very manufacturer whose goods he is pushing. The retailers rejoice to-day in the knowledge that a great number of manufacturers and nearly all jobbers—all in this association—are working in unison with him for improved conditions, which we know are coming about. Are we not justified in a small feeling of pride in the knowledge we have, that the position we have gained, has been attained by methods both sane and conservative? For well we know the prejudice, almost distrust, which existed in some minds in the early days of our association life.

Let me suggest that whenever possible you attend with your representatives those conventions where displays of your wares are made, that you encourage criticism and suggestions from the retailer, for who knows better than he who comes in direct contact with the consumer what the public asks in an article and what changes and improvements will meet its demands? Learn from the retailer what the public wants, for he has his finger on the public pulse.

Retailer's Many Little Sales.

Next, let me bring to your notice the vast difference in the matter of sales between your business and the retailer's. Few manufacturers can conceive of the many little sales of 10, 15, and 20 cents that go to make up the day's business of a retailer, since the most of your transactions run into hundreds and thousands of dollars and concern ton and carload and trainload in quantity.

The retail merchant must of necessity be accessible to every customer who enters his store, and it is an everyday occurence for customers to come many times to the proprietor himself for their little purchases. You say, "Turn such sales over to your clerks." You can't afford to do what will probably offend your customer and lose to you his trade, which, small to-day, may be large to-morrow. A retailer's trade is limited, he must keep it—it is largely local—while yours is the entire country and perhaps the wide world. I bring this volume of small sales to your attention, and the valuable time often consumed in making them, that you may be more liberal when estimating the profits that are legitimately the retailer's.

A complaint often heard is that the man behind the counter does not exhibit enthusiasm in talking goods, lacks a knowledge of how they are made, of what material, what advantages they have and all the uses to which they can be put, etc. Let me ask you manufacturers, what you have done to impart this information to us? We receive from you, inclosed usually in a neat, tasty box or package distinctly marked perhaps, with name, number and size upon it, a chisel, a rifle, a hundred other things. You know its merits, you consider it the best of its kind or you wouldn't send it out, why don't you tell us wherein its especial merit and advantage lies?

How is a retailer with hundreds and thousands of other articles upon his shelves to talk with knowledge, with an air of conviction, with enthusiasm, when his only guide is the name, number and size of that plane, saw or chisel? That is all you have told him of it, and with the myriad of other articles about he has little time to study up each especial merit.

Help Us to Know More About Goods.

Tell us for how many years your saw or chisel has been made, of what sort of steel or other material, its improvements, how to use to best advantage, exact dimensions, why you know it to be better than its rival in the trade. The maker of an article should certainly know best the merits of his product. Print this information upon a slip to be inclosed in box or pasted upon the package. This slip will better enable proprietor and clerks to sing your praises and talk the merits of your goods all over this broad land.

One of the strong points of the cataloguer is the complete description he gives of even the most inferior articles. However poor and diminutive the cut may be, these full descriptions in print make an impression that sells an article which, if seen and handled, would probably not have been sold, but the minute description does the work.

Many clerks lack the intelligence, inclination or versatillity to see and grasp the talking points of an article. These need the information I ask for in suggesting this descriptive card. Salesmanship in our stores would rank high-

er did not jobbers and manufacturers as soon as our clerks are developed take them from us by offering higher salaries than we can afford to pay.

Many of you have difficulty in finding salesmen to properly represent you and your wares on the road. Retailers have the same difficulty in securing model clerks to properly represent them and talk their wares behind the counter. We all know how much more readily we buy of the man who understands and knows how to talk his wares. Every salesman who knows and understands your wares is in a way your salesman, and you reap the benefit of his sales.

Advertising Helps.

This is the era of advertising. Retailers too are catching the spirit of the times and many more would advertise than do if they knew better how. Our trade press has done much to stir up and encourage this spirit. A few manufacturers have helped along the movement by preparing advertisements and furnishing cuts of their specialties. Furnish small cuts of your wares for use in newspaper advertising. Short descriptions and small cuts of your wares we need and ask for. Remember that the retailer as an advertiser is in swaddling clothes.

How can he unassisted produce ads. of your goods that are attractive and bring results? I have seen criticism of the same ad. of a retailer standing for months without change. But I assure you that it is easier for the proverbial camel to go through the eye of a needle than for many of us to get up unassisted a new ad. for our daily and weekly papers.

Nor do I come to you with these suggestions as a suppliant for help to the poor retailer. No one knows better than you that our success is yours, and whatever increases our sales widens your market. Here indeed lies our community of interest.

Parcels Post Legislation.

A good part of the work of our National Association has been directed with your own against parcels post legislation, and very effectively, too. We were the first business organization to raise a cry against this iniquitous measure. The first appearance before your two organizations of representatives of the National Retail Association was in 1903, when Mr . Bogardus, then our president, addressed you upon the subject. It is with satisfaction we note growth of opposition to this measure outside our triple organization.

I have been amazed at what has seemed to me to be almost criminal shortsightedness, when some of our daily papers appear as advocates of this measure—surely with no consideration of the interests of proprietors and stockholders by their editorial writers—since they advocate a plan which, a veritable boomerang, would sweep away pages of well paying advertisements. Mail order business, which alone is interested in parcels post, once the measure is secured will quickly abandon the daily papers for those magazines whose widespread circulation makes them a better advertising medium.

Let me urge that such united action be taken by your two organizations before adjournment of this convention as shall bring the dire evils of a parcels post, as this business organization sees them, to the attention, the thoughtful consideration and the better understanding of the proprietors and editors of the daily papers of this country. Retailers regard it of paramount importance that this matter be brought by you to the attention of the publishers of those daily papers which will in the next few months mold public opinion for or against this feature.

Catalogue House Goods.

To learn how we have succeeded with the aid and leadership of the joint committee—against standard goods being sold by the catalogue houses—it is only necessary to compare the latest catalogues with former ones. And, for the organization which I represent, I desire to express to both manufacturer and jobber our appreciation and gratitude for aid and assistance rendered, and the compliance of so many of you with our desires and requests in this matter.

A few manufacturers have expressed their purpose to continue their business relations with these mail order houses, and in some instances, judging from the prices at which their goods are sold, do not care to protect the retailer's interests even to the extent of regulating the prices at which their goods are catalogued. We, however, continue to hope they will yet view this matter from our point.

We plead for that united and enthusiastic action in this matter which shall foster and further develop our present system of merchandising—manufacturer to jobber, jobber to retailer, retailer to consumer, rather than the demoralizing methods of mail order houses, which with cut prices, gift giving schemes, widespread money borrowing system, that cannot but work disaster upon present day business methods, seek for their own aggrandizement, usurpation of manufacturer, elimination of jobber and distrust of local merchant. We surely have the brains and courage, when awake to the situation, to stem this tide of business demoralization.

Rural delivery, trolley lines and telephone are making country and village life more attractive, more desirable every day—a condition most happy for the welfare and prosperity of our beloved country. Will this condition be furthered by any system of business which does away with the retailers of village and town, and puts in their places mail order houses hundreds of miles away?

A mail order house that controls forty million dollars capital will certainly increase the number of its factories as rapidly as the quantity of goods it can market will justify. Some of them are also doing so large a borrowing or banking business with their distant patrons that bankers are becoming alarmed at the flow of money away from the towns and smaller cities into the hands of these firms. Such vast amounts of money must be invested, and does it not seem that a syndicate of mail order houses located in the principal business centers is much nearer realization to-day than when your attention was called to its possibility on a former occasion?

Several mail order houses of no small magnitude have failed in the last year, and we believe with the improved methods of the retailers in conducting business, with the prevention of the parcels post legislation, the aid we render one other, the present business method of manufacturer to jobber, jobber to retailer, retailer to consumer, will continue to prevail.

Friendly Relations.

Retailers would welcome heartily large representations of manufacturers and jobbers at their State and national meetings. Such affiliation could result only in good, for by addresses and discussion, the exchange of ideas and opinions, the friendly relations now existing would be the more closely cemented, enabling us to work more in unison, more in defense of our mutual interest and good, as illustrated by what has been accomplished in the prevention of parcels post legislation. That what has been accomplished has been of benefit to the individual members of our several organizations no one can deny. Many other questions will doubtless arise in our kaleidscopic times that may demand quick, united action. The three branches of the hardware and iron trade represented here to-day, manufacturer, jobber, retailer, representing also the greatest volume of business in any single line of trade in the world, were first to be brought together for consideration and discussion of subjects of mutual interests.

Let us prove to other lines of business by our harmonious action and the good results obtained thereby, that they also will be benefited by following the path where we have blazed the way.

MR. McROBIE'S SAD EXPERIENCE.

J. E. McRobie, secretary of the Western Retail Hardware Association, returned to Winnipeg last week from a protracted organization trip in the Dauphin district. The trip was considerably more protracted than "Mac" expected when he left Winnipeg and he bears on his body the marks which indicate hard usage during his absence. From this it must not be thought that the hardwaremen of the Dauphin district gave the secretary a rude reception ; the trouble was something quite different.

On Saturday, October 6, in company with A. J. McPherson, a Dauphin hardware dealer, a McClary Manufacturing Co. traveler, and three others Mr. McRobie set out on Lake Winnipegosis in Mr. McPherson's steam launch. It was their intention to bag a few ducks and return in a short time, but a big storm came up and they had other things to think of besides duck shooting. All Sunday and Sunday night the storm was very violent and the launch was driven ashore. When the storm subsided the launch was high and dry on the shore and it was up to the six men to move it down to the water.

The job took five days, and during the first three days they succeeded in moving the launch only 18 inches. Provisions gave out and had it not been for the ducks which the party were able to shoot there would have been a serious time. As it was, in spite of proverbial bushrangers' appetites, the hungry were always satisfied.

The last night the party played pedro, the stake being the last pipe of tobacco that was left.

Now McRobie et al appreciate the comforts of civilization.

STOVES AND TINWARE

LOOK AFTER STOVE COMPLAINTS.

The success of a stove merchant depends largely upon the way he takes care of stove complaints. If he lets a complaint run along from day to day without giving it attention, says a writer in Buck's Shot, the consumer will get disgusted at the treatment received at the hands of the merchant. She will get prejudiced against the stove and it will become a very difficult matter to ever satisfy the consumer, even though the stove is made to operate perfectly.

When the merchant lets the complaint run along without giving it attention the consumer tells all the neighbors about having a stove, bought of Mr. Jones, that does not draw or bake, and the entire neighborhood becomes prejudiced against the stove. If, after the consumer is prejudiced, the merchant goes or sends a man to take care of the complaint, even though the stove is made to work perfectly the consumer will not be as well pleased with it during the entire lifetime of the stove as if it had had immediate attention, and the consumer will feel slighted at the hands of the merchant.

This will injure the business of the merchant, and also injure the reputation of the manufacturer's stoves and ranges in that city or town. If a merchant is not educated to take care of these complaints, when he gets a complaint he is in deep water, and immediately calls upon the company for assistance. This causes the representative in that territory to have to call upon the merchant at quite an expense of time and money.

Education Important.

A man cannot be a thoroughly successful stove merchant or stove salesman until he understands how to take care of a stove complaint. He cannot take care of a stove complaint until he understands what causes a stove to operate. He must understand that a stove of itself has no draft, that without air there is no combustion, without combustion no heat, that the air that creates combustion is drawn into the fire box by the draft in the chimney, that the heat created by combustion does not work its own way around the oven but is forced around by the draft in the chimney.

If it fails to get around the oven, and the top of the stove gets red hot, it is proof positive that the draft is at fault, and is not drawing the heat under the bottom oven plate. If the stove gets hot it is proof that the draft is only strong enough to force the heat to the end of the flue strip, or part way under the bottom oven plate. To successfully bake the draft must be strong enough to completely flood the space under bottom oven plate with heat.

A Strong Draft.

If the draft is too strong it will cause the bottom of oven to get too hot. If the draft is very strong it will draw the heat out of the stove, and it will neither cook on top or bake successfully. Very often the consumer will declare that the stove has a good draft, that the fire burns nicely, etc., when upon investigation you will find only enough draft to create imperfect combustion, that the coal is being smudged and turned into soot instead of heat. It takes fifteen pounds, or fifty-eight cubic feet, of air to burn one pound of soft coal perfectly. When you make a man understand this, it will make him realize the importance of draft.

Thousands of tons of stove castings are burnt out every year, a great many stoves are unjustly condemned on account of poor drafts, set up by careless, incompetent men, and most of all, by neglect of merchants in taking care of complaints.

CALORIC FIRELESS COOK STOVE.

The Caloric Fireless Cookstove Co., Grand Rapids, Mich., are offering the trade the "Caloric" Fireless Cook Stove, illustrated. The construction of

"Caloric" Fireless Cook Stove.

this Cooker is based on the scientific fact that save in hermetically sealed vessels it is impossible to raise the temperature of boiling foods above 212 degrees Fahrenheit, irrespective of how much gas or fuel is consumed under the vessel. The principle of this air-tight Stove is to retain the heat generated in an ordinary wood, coal, gas or oil stove in the insulated cabinet, or "cooking stove." The food desired to be cooked is first prepared in the ordinary manner, and placed in the vessels with which the cabinet is equipped. It is then brought to a boil for a few moments on the ordinary stove, the cover of the vessel having a revolving bar-lock, is clamped down and the vessel is quickly placed in the cooking cabinet and closed. The vessels fit closely in holes or pockets in the cabinet and are tightly surrounded on all sides, including the top, by a non-conductor of heat. As the temperature of the food is not lowered, it continues to cook until it is thoroughly and evenly done, requiring about twice the time as on an ordinary flame stove. The food is not affected by a longer stay in the cabinet, as there is no loss through evaporation. The Cook Stove is made of quartered oak, weathered oak finish, is 36 inches long, 15 inches wide and 17 inches deep, weighs about 60 pounds, and is provided with casters. It contains one 8-quart and 4-quart vessels of high grade enamelled ware, extra heavy gauge. The covers lock easily and prevent contents from slopping over. While kettle is over flame cover is not locked, but just before removing from the flame it is always locked, thus keeping food at boiling point. All the strength and flavor are thus kept in the food. Kitchen odors are eliminated, time, labor and fuel are saved, and the inexperienced cook is greatly assisted.

ONE MAN'S FURNACE EXPERIENCE.

The man for whom I first worked was one of those sour fellows who thought anybody who traded with his competitors offered him an affront, and he used to growl about not getting all the business he ought to have, writes W. T. N. in The Metal Worker. I was too young and inexperienced at the time to know it was mostly his own fault and due to lack of sound business enterprise.

Like all healthy young fellows I had lots of friends and got along well with the old folks. Knowing I would be laid off if the shop wasn't busy I took to asking my friends if they had any work in our line. After I had been a year or two in the shop doing mostly furnace work with an excellent furnace-man I learned enough to like it, and made it a point to keep a list of people with the name and size of the furnace and range they had in their houses. I lost no opportunity to add to this list, and then I made it a point to find out what condition they were in. This not only brought in repair work, but I inquired if the stoves and heaters gave good satisfaction. I got the boss into one or two scrapes by these inquiries and he cut a caper about it, but being young I told him he ought to have done the work right in the first place. This brought out the statement that he couldn't afford to because he had taken the job low to keep the hands going and to keep it out of the other fellow's hands. What a lame excuse for putting in a small furnace and small pipes for a man who could afford to pay for it! I told him it was and he showed me his teeth, but I showed him some of the work that I had brought in that he would never have got and that more than evened things up.

I found many a job that was unsatisfactory and was continually stuck, but learned that my journeyman preceptor saw through every mystery and had a remedy. I was in hot water a good deal of the time, but kept inquiring all summer how people's furnaces worked till we had orders for lots of alterations, which, through the good judgment of my old shopmate, gave fine results and brought others that I had nothing to do with. This work kept us all that fall and winter, when without it we would have lost a lot of time. The boss growled and I hustled because I wanted to make full wages every week.

I learned that it is best to do good work every time.

I learned that people don't object to a bill if they know what it is going to be when the work is done and when good results that show follow it.

I learned that a job done low just to advertise is a fool trick and sets a low price for all other work.

I learned that good furnace work that results in heating a building is worth a good profit and should bring it.

I learned that more furnaces suffer from too small a supply of cold air than from short firing.

I learned that an air supply equal in area to the total area of the hot air pipes is better than a small supply.

I learned that hot air pipes should have a square inch of area for every 25 or 30 cubic feet of space in the room heated.

I learned that a better rule is to consider the glass and wall surface as well as the contents.

I learned to allow 1 square inch of area for every square foot of glass, 1 for every 10 square feet of wall and 1 for every 100 cubic feet of space.

CANADIAN HARDWARE STORES

No. 8.

Every visitor to Western Canada brings back stories of the fine hardware stores to be found on the prairies and in the mountain and coast towns and cities. Even along the lines of new railways, where the towns are only a few months old, from one to three well equipped hardware stores are to be found carrying full lines of hardware and innumerable side lines. The hardware trade in the west is distinct in itself and general stores find little excuse to stock hardware lines as buyers are able to get everything required in the straight line hardware store. In fact many western hardware stores have become general house furnishing supply houses, so varied are their stocks of hardware, stoves, paints, cutlery, lighting goods, silverware, glassware, furniture, clocks, etc.

The store conducted by J. F. Dandy at Pierson, Man., an idea of which can be gained from the accompanying illustration, is no exception to the rule and it will be seen that for neatness and appointments it is worthy of commendation. The clear floor space, metal ceiling unencumbered with goods, the attractive counters, show cases and shelving, all go to make the store a pleasant place for the housewife to do business, likewise attracting the farmer and mechanic who desire prompt service, with the opportunity of making a satisfactory selection of goods without loss of time. The up-to-date scales, wrapping paper stands, cash register, etc., indicate progressiveness, while the silver and cut glass show case, washing machines, churns and ranges on the opposite side, with the racks of farm tools and well-lighted office in the rear, the office containing a modern safe and the desk being ornamented with a fern pot, indicate completeness of detail which is certain to result in the prosperity which the store already shows ample signs of enjoying.

Out in Iowa the farmers got the mail order habit so bad that a large number of local merchants had to close their doors and move elsewhere. With no competition amongst merchants in the towns near at hand, farm lands fell off in value, the farmers being unable to obtain ready cash for butter, eggs and milk, and there being no stores to supply immediate wants which could not be satisfactorily filled by mail order houses.

Do not wait for the opportunity — make it.

CANADIAN HARDWARE STORES, No. 8—J. F. Dandy's Store at Pierson, Man.

I learned to add 20 per cent. for exposed north walls, 15 per cent. for west walls and 10 per cent for east walls.

I learned that 1 square inch of grate surface should be provided for every 1.5 square feet of equivalent glass surface, counting 4 square feet of wall as equivalent to 1 of glass.

I learned that a furnace with a long fire travel is more economical and a better heater than a direct draft furnace having the same size grate.

I learned that I could not work and hustle too after a year or two on this plan and made the boss send out cards saying what we could do and enclosing addressed postal cards to be used for orders.

According to C. M. Kittson, Canadian trade commissioner for South Africa, cheap German enamelware threatens to supersede the British article, which has up to the present controlled the market.

TOYS FOR THE CHILDREN.

"If your store is in a locality where there are many families and many children, and where you need not be too dignified, lay in a stock of toys made to sell for a few cents. Fill a window with them, and announce that one will be given to each child making a purchase on certain days. Pick those days when you would not otherwise be busy. You will immediately enlist a host of active canvassers for your business. The commercial value of the toys will cut no figure with the children so long as you give them something they can have a lot of fun with.

A great check book does not make a great man.

* * *

The new Government building at Edmonton will be among the handsomest in Canada. Work is expected to begin almost immediately.

Adscript, Canada

TRAVELERS' TAX MAY BE ABOLISHED.

During the recent conference of Provincial premiers held in Ottawa, which consulted Sir Wilfred Laurier on divers questions relative to the welfare of the provinces, there was a satisfactory consideration of the tax on non-resident commercial travelers which is levied on them by the provinces of British Columbia and Prince Edward Island and the tax on foreign travelers in Quebec Province. As the tax stands to-day in the province of Quebec, it calls for the payment of $300 per year for those travelers calling on liquor firms; a yearly tax of $100 on those calling on wholesale houses only; $200 per year on those calling on both wholesale and retail houses. A six months license is sold and cuts these figures in half. British Columbia has a nominal tax of $100 on all travelers representing firms outside the province. Prince Edward Island has a nominal tax of $20 on travelers who represent firms outside of the province. These three provinces are seriously considering a withdrawal of the tax much to the joy of all those concerned. With the abolishing of this business-restraining tax there will be removed the veritable thorn from the side of enterprising commerce.

In these columns the various phases of the question have been discussed from time to time. It is sincerely hoped that the next reference made to it will be its obituary notice. Such a task will be superlatively pleasant.

There is but little satisfaction to be derived from such a law, its benefits were probably known only to the provincial treasury coffers; long ago it was condemned by prudent men who thought that if protection were required, from trespassers on Canadian commerce, the tariff should serve that purpose, and if one province claimed more protection than another, it was a feeble way of admitting weakness, or a very questionable method of relieving distressed poverty.

The repealing of the law will once again fling open the doors of these provinces to all comers and stamp out a petty piece of provincialism that is not in keeping with the spirit of the age. They will be freed from a stultifying yoke of which they were ashamed. It is a sagacious decision and will be hailed with delight by all those who hold their province on the same level as their sister provinces.

THE NEW TARIFF.

With the re-election of Finance Minister Fielding in Nova Scotia this week and the announcement that the Dominion Parliament is to meet in about three weeks, the chief business to be the rearrangement of the tariff, all is clear for the expected revision of the tariff schedules.

While it is generally expected that many advances will be made there is much speculation as to what the increases will amount to and what articles will be included. American manufacturers and Canadian jobbers have anticipated the changes by bringing as large shipments into Canada as the scarcity of raw materials would allow and are now refusing to sell for future delivery other than subject to such advances as may be made necessary by the tariff changes.

Canadian manufacturers, of course, favor a higher tariff wall and they will be supported in their requests by a majority of the mercantile community. In stoves particularly there is much need for additional protection for Canadian foundrymen.

The dumping clause, however, has few friends as it encourages deceit and crookedness both on the part of American manufacturers and Canadian importers. If the Dominion Government decides to abolish this objectionable clause and meet the United States with an equally high tariff they will meet with little objection from any quarter.

A SHORTAGE OF CARS.

There is everywhere a great shortage of cars at present. The manufacturer, the wholesaler, the contractor and all who have use for the railways of the country to move freight are calling for cars to relieve the present acute situation. A string of empty cars behind a powerful engine is something eagerly sought after by all firms which have need of transportation. With the advent of the holiday shipping, the demand for cars will be very largely increased, and at present there seems no prospect of more cars being placed at the disposal of shippers. The different railway companies are doing their very best to keep up with the demand, but apparently it is impossible for them to do so. Every car they possess which is fit for use is now on the road, while new cars are being turned out from the car shops every day. But still the shortage continues.

There are many reasons for the scarcity. One of the principal is that there is a rush from all parts of the country of goods to port centres. Business houses are anxious to have their goods for export reach the Canadian ports before the close of navigation, and the railway companies are doing all they can to help business in their endeavor. Then the grain business calls for cars by the thousand, while the railways themselves have use for many trains for construction work. In all parts of the Dominion railroad construction is going on more or less actively, and supply trains and engines for work in the neighborhood are much required. It is hoped that there will be a little breathing spell immediately upon the close of navigation, and the present situation will probably experience some improvement, but is seems that a shortage of cars, and the consequent lack of good transportation facilities is something which must accompany the wonderful prosperity of the country. At any rate the railway companies do not seem able to keep pace with the rapid development now going on.

WHAT CASH DISCOUNTS REPRESENT.

The margin between buying for cash and accepting the full credit terms represents to many a merchant an amount with which he could be well satisfied without figuring on any further net profit from his business. How, in view of this, the importance of cash discounts can be overlooked is amazing. One does not have far to seek to see evidences of their great potency as an element in successful modern merchandizing. Take the big departmental stores, for instance, which are taking away by their mail order system a great deal of trade from the country merchants. Cash discounts represent the greater part—and in some cases all—of their net profit. That is how they are able to make

prices which attract readily, and emulation of their policy in this respect is the first step that the small dealer must take in placing his business on such a basis that the people of his district will prefer patronizing the home market to sending abroad. Competition at the present day is so keen that the man who would attain success must figure close and hard, and pass by no short cut that presents itself. There is none that will curtail the distance which he must travel more than that to which access is gained by way of cash discounts.

In the majority of cases it will pay the merchant to borrow money from the bank for the purpose of discounting his bills. It is easy for him to figure out how he is going to profit handsomely by doing this.

From merchants at various points we learn that the trend of trade is more and more toward a cash basis. The public has plenty of money and, generally speaking, asks for credit as little as possible. This is a satisfactory condition that should be nursed into greater proportions each year, until the straight cash business is made possible. To reach this goal should be the ambition of every merchant.

THE METAL SITUATION.

It was seen this week how sensitive the metal market is to fluctuations in money values. During the earlier days of the week, in spite of the extreme buoyancy which has characterized every branch of the metal market, conditions became quite sluggish, when the Bank of England advanced discounts. Since that time, speculation appears to have ceased, and dealers are now devoting their efforts to realizing on recent transactions.

Copper became decidedly easier, as a result of the bank's action, and although the prices quoted by prominent Canadian jobbers have not undergone any change, it is openly stated that better terms will be offered on orders for more than the usual quantities.

Ingot tin has fallen off somewhat in foreign markets but the net effect upon Canadian prices has only been to slightly lower the tone without affecting the nominal figures.

Pig lead was much weaker a few days ago, but aided by a large demand and limited supplies, this metal is already beginning to recover its strength. Prices to-day are the same as we have quoted for a couple of weeks past, and at time of writing the market is stiffening.

Large inquiries for deliveries of pig iron during the Winter months have been received this week by the leading Montreal importers. Several specifications for a thousand tons are at present under consideration. In view of the fact that stocks, this Fall, are light, and are likely to remain so all Winter, it does not look as if present quotations will be lowered for a long time to come.

Sheet metals are decidedly firm. We are this week quoting a number of revised prices all of which show higher values. Canada plates in all varieties but full polished, are up about 5 cents, and are held very steadily at these new figures. Tin plates also have gone up, as we predicted some two weeks ago. The advance now declared is equivalent to 15 cents a box, and further revisions are looked for. Terne plates are also higher, the current price being $7.15.

To sum up, the metal market generally shows brisk sales and active inquiries. Prices, except in the sheets referred to, are, however, somewhat easier, owing to the difficulty experienced by speculators in obtaining money for their transactions.

PRIZES FOR WINDOW DISPLAYS.

Last year Hardware and Metal awarded prizes for the three best displays made during the Xmas season. This year we will give five prizes but the displays must be of goods sold in hardware stores and suitable for Christmas presents, such as silverware, razors, cutlery, sporting or house furnishing goods, hardware specialties, etc. The prizes are:

1st prize $6 00
2nd prize 4 00
3rd, 4th and 5th, a year's subscription to Hardware and Metal.

All photographs of displays must be mailed to us not later than December 31, 1906, and they should be accompanied by a short description of how the display was constructed, the display artists' name and, if possible, samples of the Christmas advertisements in the local papers backing up the window display advertising.

In addition to the above we offer a special prize of a handsome fountain pen for the best Xmas advertisement in a local paper pushing the goods shown in the window displays.

CIVIC POLITICS.

Two months more and the municipalities of Ontario will be involved in the excitement of the annual elections. Municipal government in Ontario is not corrupt; it is only inefficient. Some good people profess a preference for a capable and corrupt rather than an incapable and honest administration. It's a matter of choice; but why have either? If the business men, the storekeepers, of the province would do their duty as citizens, there would be an administration both honest and efficient in every municipality.

This does not mean that the merchants of Ontario should hog the public offices. There are legions of successful business men who would fail utterly as municipal representatives. The first thing a business man should do who wants to serve his country municipally, is not to run for office but to get really interested in the affairs of his municipality. The rest is easy. The thoroughly interested man is going to see that he is capably represented. In almost every council there are some representatives of capacity sufficient to merit retention. The rest should be replaced by the most efficient men available.

The first problem always is how to get such reform going. The boards of trade should make the move. Take Toronto, for instance, and not a place in Ontario at this moment is more in need of applied business principles and business foresight and acumen in the direction of its affairs. The present administration is lamentably weak. The trouble lies primarily with the calibre of the aldermen who year after year get themselves elected to council. If a strong board of aldermen were once installed, the problem of mayor and controllers would quickly resolve itself into a mere matter of seniority.

The board of trade is the organized larger business interests of the city. It is fitting that the board take the initiative. It should call a meeting of the representatives of every business organization in the city. If such a body working in harmony made careful and wise selection of candidates for mayor, aldermen, controllers and school trustees, then got in behind them and worked, they could elect every man of them.

It is important that the board of trade should not attempt the work alone. Every business interest should as far as possible be represented, but the board is the only organization in a position to take the initiative.

The largest pin factory in the world is that in Birmingham, England, where 37,000,000 pins are manufactured every working day.

HARDWARE TRADE GOSSIP

Ontario.

R. J. Cluff, of Cluff Bros., Toronto, is on a business trip to the Eastern States.

Ald. Hugh Wallace, Hamilton, was a caller this week on Toronto plumbing supply houses.

William Conrad, of Conrad Bros., Waterloo, was one of the buyers in Toronto during the week.

Oscar S. Hunter, of the Wilberforce Lumber Co., Durham, is to establish a new hardware store at Durham.

W. H. Thorne, wholesale hardware merchant, St. John, N.B., spent a few days in Toronto during the past week.

James Robertson, of the Montreal offices of the James Robertson Co., spent a few days in Toronto during the past week.

Fred Somerville, general manager of the Ontario Lead & Wire Co., Toronto, is on a business trip to Winnipeg this week.

Frank Cameron, of the Fort William Hardware Co., was married on October 8, to Miss Minnie Edna McDonell, of Pembroke.

Bert McDonnell, of the wholesale metal department of Rice Lewis & Son, is on a fortnight's hunting trip to Northern Ontario.

Herman Croxall, manager of the National Hardware Co., Orillia, was in the city several days this week calling on the wholesale trade.

The Berlin Electrical Mfg. Co., makers of electrical novelties are now located in their new factory at 472-474 King street west, Toronto.

R. E. Carscallen, son of J. B. Carscallen, hardware merchant, Dresden, was married on Oct. 24 and is now enjoying a honeymoon tour in the east.

Owing to the severe illness of his wife James McMartain, traveling representative of S. W. P., was unable to attend the staff conference held in Cleveland this week.

Elijah Westman, formerly a well-known hardware merchant in Toronto, died suddenly on Thursday night, aged 65 years. He was at one time a member of the city council.

C. A. Gray, who suicided by poisoning himself at Buffalo, this week, was at one time a paint traveler for the firm of Wm. Johnston & Co., Toronto, now merged into the Canada Paint Co.

The Model Hardware Store, established at 632 Yonge street, Toronto, by B. S. Jackes, now has a branch store at 163 Dundas street under the management of Fred Hutt.

Thomas Stewart, of T. McAvity & Son, St. John, N.B., who was one of the party who visited the Pacific Coast with the Manufacturers' Association, and who has been spending a few weeks in Ontario returned east last Friday evening.

A traveler is authority for the information that the Walker Steel Range Co., Grimsby, Ont., intend giving up their western business and devoting their entire attention to their eastern trade. They have had warehouses at Winnipeg, Calgary, Edmonton and Vancouver.

The Central Supply Association's appeal against Justice Clute's judgment is to be heard in the Court of Appeal during the sitting at Toronto beginning Nov. 12. This appeal has been postponed two or three times since Jan. 22, but no further delay is likely. It will be remembered that the supply men appealed and have not yet paid the $5,000 fine imposed on them.

G. J. B. Ramsden, Ontario sales representative of the J. H. Still Mfg. Co., St. Thomas, was a caller at the Toronto office of Hardware & Metal a few days ago. Mr. Ramsden reports that business in wooden goods during the past season has taxed the factories to their fullest extent. The Still Co. are now adopting "Empire" as the brand name for their highest grade handles made from Kentucky hickory.

Messrs. J. W. Benson, R. C. Mission, Geo. E. Boomer, J. J. Harkness, J. J. Whalen, W. S. Fallis, A. E. Cowley and C. A. Thomas, traveling representative of S. W. P. are attending the annual conference of traveling salesmen held in Cleveland this week. They will also attend the convention of Canadian representatives to be held in Montreal next week. The new linseed oil crushing mill erected by the company at Montreal will be inspected by the staff during the visit to Montreal.

Western Canada.

J. A. Gray has sold his hardware store at Vancouver to C. H. Fox.

The McComb Hardware Co., of Strathcona, have located in new premises in the Parrish block.

W. McLean, formerly Manitoba traveler for the J. H. Ashdown Co., has, with a Mr. Stirling purchased the business of the Souris Hardware Co.

The annual general meeting of the Miller-Morse Hardware Hockey Club, of Winnipeg, was held on Friday night of last week, when the following officers were elected for the ensuing season: Patrons, Messrs. F. Morton Morse, A. Reed and H. Robson; honorary president, H. Miller; president, F. A. Sermon; vice-president, H. W. Alger; secretary-treasurer, J. C. Craig; manager, Fred Lake; executive, Messrs. A. A. Cattanach, J. H. Foulds and J. J. Sullivan.

Quebec.

H. A. Drury, of H. A. Drury & Co., Montreal, will spend the next two months in Europe.

N. Curry, of Rhodes, Curry & Co., Amherst, N.S., was a visitor in Montreal a few days ago.

A. T. Z. Santoire, general merchant of St. Chrysostome, paid a business visit to Montreal, during the week.

A. Lemieux, general merchant, of Henryville, was a caller at the wholesale offices of Montreal, this week.

Thos. Pink, manufacturer of lumbering tools, Pembroke, Ont., paid Montreal wholesalers a visit on Monday.

Jos. Forget, plumber and roofer, 1693 Notre Dame street, Montreal, has assigned, with liabilities of about $3,500.

William A. Mitchell, hardware merchant, of Kingston was in Montreal this week getting pointers on Christmas goods.

N. Boily, general merchant, of St. Jerome, took a trip to the Royal City a few days ago in connection with business interests.

J. Sophus, manager of the Canadian branch of Schuchardt & Schutte, Montreal, will spend next week in the Maritime Provinces.

J. O. Roy, general merchant, of St. Perpetue, was noticed in Montreal this week. It is said that Mr. Roy will shortly desert the state of single blessedness.

The Canadian Buffalo Forge Co. have designed, and are installing the heating and ventilating system for the new Henry Morgan & Co. building on Beaver Hall Hill, Montreal.

Samuel K. Shaw, aged 51 years, brother of Chas. Shaw, hardware merchant of Quebec, was accidentally killed at Lake Beauport last week by a gasoline stove exploding.

J. McL. Stewart, of T. McAvity & Son, wholesale hardware merchants, St. John, N.B., was among the prominent members of the trade to visit the Canadian metropolis this week.

P. F. Rolston, of the Rolston Hardware Co., Vancouver, was in Montreal this week and visited the hardware jobbing trade. Mr. Rolston is introducing a patent clothes line puller.

The Standard Automatic Sprinkler Co. have registered in Montreal. Hugh W. Glassford, formerly manager of H. G. Vogel & Co's Montreal branch, has taken charge of the new concern.

Geo. R. Burton, who has been with Lewis Bros., Montreal, for the past two years, resigned from the staff of that firm this week and will hereafter be associated with the R. E. T. Pringle Co., manufacturers of electrical apparatus and supplies.

E. F. Walter, of the hardware importing house of E. F. Walter & Co., Montreal, has returned on the Empress of Ireland from a visit to European markets. Mr. Walter reports that German manufacturers find it very difficult to fill orders, as workmen are scarce and a tremendous demand exists.

Markets and Market Notes

(For detailed prices see Current Market Quotations, page 66.)

THE WEEK'S MARKETS IN BRIEF.

MONTREAL.

Manufactured Brass Goods—Up from 5 to 10 per cent.
Wrought Brass Butts—Advanced about 17½ per cent.
Peterborough Builders' Hardware—Now 45 and 10 per cent.
American Padlocks—Advanced from 10 to 25 per cent.
Canada Plates—Advances make.
Tin Plates—Up 15 cents per box.
Terne Plates—Now $7.15.

TORONTO.

Iron Pipe—Stiff advances on large sizes.
Plumbers' Brass Goods—From 5 to 10 per cent. higher.
Tin Plates—25 cent advances on some lines.
Charcoal Terne Plates—Quoted higher.
Tinned Sheets—Higher quotations.
Bar Iron—Now quoted at $2.25.
Refined and Horseshoe Iron—Advanced.
Hoop, Tire and Sleighshoe Steel—Advanced.
Builders' Hardware—Peterborough advanced 10 per cent.
American Padlocks—Prices withdrawn.
Wrought Brass Butts—Advancing.
Japan Handled Shears—Advanced five per cent.
Wire Nails—Now $2.10 base—no rebate.
Linseed Oil—One cent higher.

Montreal Hardware Markets

Office of HARDWARE AND METAL,
232 McGill Street,
Montreal, Nov. 2, 1906.

With the breaking up of the mild weather which has continued for so long a time, trade in Fall goods has taken on a new impetus. Even the holiday on Thursday (All Saints' Day) made no appreciable difference in the sales of the week, and, as the weather prophets predict continued cold weather, it is certain that late Fall and early Winter goods will experience a heavy demand during the next few weeks.

Prices are still going up. This week, announcement has been made of advances in all manufactured brass goods, both English and American. Averaging between 5 and 10 per cent. more than those hitherto quoted. Figures on wrought brass butts, have been advanced about 17 1-2 per cent. All these changes have been made necessary by the condition of the copper markets.

Revised discounts have been issued by the Peterboro Hardware Co., and their full line is now quoted at 45 and 10 per cent., instead of 50 and 10, as formerly. American padlocks have also gone up, manufacturers having declared the following advances: Padlocks selling at less than $4 per doz., 25 per cent. advance; at from $4 to $5, 20 per cent. advance; at from $5 to $6, 15 per cent. advance; at more than $6, 10 per cent. advance.

One of the features of the week has been a famine in wire nails. One of the leading manufacturing interests reporting a scarcity in all sizes except 1 1-2 inch.

AXES—Business continues healthy. Our prices are: $7.60 to $9.50 per dozen; double bitt axes, $9.50 to $12 a dozen; handled axes, $7.50 to $9.50; Canadian pattern axes, $7.50 a dozen.

HANDLES — Our prices remain as follows: No. 3, $1.25; No. 2, $1.50; No. 1, $1.90 a dozen; adze handles, 34-inch, $2.20 a dozen; pick handles, No. 2, $1.70; No. 3, $1.50 a dozen.

LANTERNS—Prices in Montreal continue to be quoted as follows: "Prism," $7; "Prism" globes, $1.20; Cold Blast, $4; No. 0 Safety, $3.50 to $3.75.

COW TIES AND STALL FIXTURES—Good shipments of these lines are still being made. Quotations remain: Cow ties, discount 40 per cent. off list; stall fixtures, discount 35 per cent. off list.

SLEIGH BELLS—Business continues good. We are still giving prices as follows: Back straps, 30c. to $2.50; body straps, 70c. to $3.50; York Eye bells, common, 70c. to $1.50; pear shape, $1.15 to $2; shaft gongs, 20c. to $2.50; Grelots, 35c. to $2; team bells, $1.80 to $5.50; saddle gongs, $1.10 to $2.60.

RIVETS AND BURRS—As all copper goods are going up, an advance in copper rivets cannot be much longer postponed, as is the opinion of leading members of the trade: We still quote: Best iron rivets, section, carriage, and wagon box, black rivets, tinned do., copper rivets and tin swede rivets, 60, 10 and 10 per cent.; swede iron burrs are quoted at 60 and 10 and 10 per cent. off new lists; copper rivets with the usual proportion of burrs, 35 per cent. off, and coppered iron rivets and burrs in 5-lb. carton boxes at 60 and 10 and 10 per cent.; copper burrs alone, 30 per cent., subject to usual charge for half-pound boxes.

HAY WIRE—Our quotations are still as follows: No. 13, $2.45; No. 14, $2.55; No. 15, $2.70; net cash, f.o.b. Montreal.

MACHINE SCREWS— Discounts as follows: Flat head, iron, 35 per cent.; flat head, brass, 35 per cent.; Felisterhead, iron, 30 per cent.; Felisterhead, brass, 25 per cent.

BOLTS AND NUTS—No relief of any account has been experienced from the shortage reported some time ago. We quote: Carriage bolts, ⅜ and under, 60 and 10; 7-16 and larger, 55 p.c.; fancy carriage bolts, 50 p.c.; sleigh shoe bolts, ⅜ and under, 60 per cent.; 7-16 and over, 50 per cent.; machine bolts, ⅜ and under, 60 per cent.; 7-16 and larger, 55 per cent.

HORSE NAILS—We quote discounts: C brand, 40, 10 and 7 per cent.; M.R.M. Co., 55 per cent.; P.B. brand, 55 per cent.

WIRE NAILS—An actual famine in all large sizes is reported this week. Prices, in consequence, have stiffened. We now quote $2.15 per keg base, f.o.b. Montreal.

CUT NAILS—No change in conditions has occurred since our last report. $2.20 base, f.o.b. Montreal.

HORSESHOES—Business is very active just now, and prices are steadily held at the following prices: P. B. new pattern, base price $3.50 per 100 lbs.; M.R.M. Co., latest improved pattern iron shoes, light and medium pattern, No. 2 and larger, $3.65; No. 1 and smaller, $3.90; snow pattern, No. 2 and larger, $3.90; No. 1 and smaller, $4.15. Light steel shoes, No. 2 and larger, $4; No. 1 and smaller, $4.25; featherweight, all sizes, No. 0 to 4, $5.60. Toeweight, all sizes, No. 1 to 4, $6.85. Packing, up to three sizes in a keg, 10c. per 100 lbs. More than three sizes, 25c. per 100 lbs. extra.

BUILDING PAPER—Sales are increasing with the advance of the season, and good inquiries are coming to hand.

CEMENT AND FIREBRICK— Unchanged conditions prevail: We quote: "Lehigh" Portland in wood, $2.54; in cotton sacks, $2.39; in paper sacks, $2.31. Lefarge (non-staining) in wood, $3.40; Belgium, $1.60 to $1.90 per barrel; ex-store, American, $2 to $2.10 ex-cars; Canadian Portland, $2 to $2.05. Firebrick, English and Scotch, $17 to $21, American $30 to $35; White Bros.' English cement, $1.80 in bags, $2.05 in barrels in round lots.

COIL CHAIN— The big season for this line is rapidly approaching. Prices are very firm. We quote as follows: 5-16 in., $4.30; 3-8 inch, $3.80; 7-16 inch, $3.60; 1-2 inch, $3.40; 9-16 inch, $3.35; 5-8 inch, $3.25; 3-4 inch, $3.10; 7-8 inch, $3.05; 1 inch, $3.

SHOT— We still quote: Shot, packed in 25-lb. bags, ordinary drop AAA to dust, $7 per 100 lbs.; chilled, No. 1—10, $7.50 per 100 lbs.; brick and seal, $8 per 100 lbs.; ball, $8.50 per 100 lbs. Net list. Bags less than 25 lbs., ½c. per lb. extra, net; f.o.b. Montreal, Toronto, Hamilton, London, St. John, Halifax.

AMMUNITION—Orders are still going out. Our quotations are as follows: Loaded with black powder, 12 and 16

gauge, per 1,000, $15; 10 gauge, per 1,000, $18; loaded with smokeless powder, 12 and 16 gauge, per 1,000, $20.50; 10 gauge, $23.50.

Toronto Hardware Markets

Office of HARDWARE AND METAL,
10 Front Street East,
Toronto Nov. 2, 1906.

Last month's business undoubtedly broke all records for the same month in previous years and with the coming of brisk Fall weather November has started off well with indications of the year being rounded off with a splendid quarter's trade.

Buying of general hardware as well as of seasonable and holiday goods is very brisk and considerable night work is being done by the wholesale staffs in order to catch up with orders in hand.

Booking orders on Spring goods are also fairly heavy but the jobbers are protecting themselves from expected advanes in the Canadian tariff during the coming session of Parliament. American hardware and tools will, of course, have to advance if the tariff is increased.

Another advance has been made this week on wire nails, the rebate of 10c. being discontinued and prices now being firm at $2.10. With the advances on wire during the past month and the heavy demand for nails the advance was not unloooked for.
